ANT.—bent, circuitous, crooked, distorted, swerving, twisted; deceptive, devious, dishonest, fraudulent, unreliable.

strain, breed, extraction, lineage, pedigree, race, stock; kind, sort, variety; effort, endeavor, overexertion, struggle; melody, tune; manner, style; anxiety, burden, mental tension, pressure, stress.

strange, abnormal, alien, anomalous, bewildering, bizarre, curious, dissociated, eccentric, exotic, extraordinary, fantastic, foreign, grotesque, inapplicable, incredible, irregular, irrelevant, misplaced, mysterious, nondescript, odd, peculiar, remote, singular, stupefying, surprising, unaccustomed, uncommon, unfamiliar, unrelated, unusual. ANT.—conventional, familiar, ordinary, prevailing, regular, typical.

stranger, alien, drifter, foreigner, immigrant, interloper, intruder, newcomer, outsider, squatter, visitor. ANT.—acquaintance, associate, companion, friend, neighbor, peer.

stratagem, artifice, cabal, conspiracy, design, device, finesse, intrigue, logistics, machination, maneuver, plan, plot, ruse, scheme, strategy, tactics, trick.

stray, err, go astray, traipse, wander; see also deviate; ramble.

stream, spout, spurt; abound, be copious; see also emanate; flow.

strength, durability, fortitude, intensity, lustiness, stamina, sturdiness, toughness; see also power.

strengthen, confirm, corroborate, substantiate, sustain, verify; brace, buttress, fortify, harden, invigorate, reinforce, rejuvenate, steel; augment, enlarge, extend, heighten, intensify, sharpen.

stress, burden, compulsion, exigency, force, press, pressure, strain, tension, urgency; accent, emphasis, importance, significance, weight.

stretch, distort, spread, strain; see also distend; extend.

strict, accurate, exact, precise, stern, rough, rugged; see also severe.

strike, hurt, knock, pummel, smite; see also hit.

striking, affecting, august, grandiose, majestic, over-powering, splendid; see also impressive.

stripped, defenseless, unprotected; see also naked.

strive, see endeavor.

strong, athletic, concentrated, durable, enduring, forcible, fortified, hale, impregnable, resistant, resolute, solid, strenuous, tough; see also mighty; sinewy.

struggle, brawl, feud, fray, quarrel, row, scuffle, skirmish; see also combat; conflict.

stubborn, adamant, contumacious, determined, dogged, headstrong, immovable, inflexible, intractable, mulish, obdurate, obstinate, pertinacious, recalcitrant, refractory, uncompromising, ungovernable, unyielding. ANT.—amenable, compliant, reasonable, submissive, tractable, yielding.

student, apprentice, disciple, learner, novice; observer, pupil, scholar.

study, cogitate, examine, investigate, scrutinize, weigh; see also contemplate.

stumble, fall, pitch, slide, slip, sprawl, tilt, topple, trip, tumble. ANT.—arise, ascend, mount, soar.

stun, amaze, astonish, disconcert, dumbfound, flabbergast, surprise; see also shock.

stupid, asinine, brainless, crass, dense, dull, dumb, feeble minded, foolish, inane, inept, moronic, obtuse, senseless, vapid, witless. ANT.—clever, discerning, perspicacious, sage, wise.

stupor, apathy, coma, daze, drowsiness, inertness, insensibility, languor, lethargy, narcosis, numbness, stupefaction, torpor, unconsciousness. ANT.—activity, consciousness, liveliness, sensibility, vivacity.

sturdy, see mighty; sinewy; strong.

suave, adroit, affable, amiable, courteous, cultured, debonair, gallant, genteel, glib, gracious, pleasing, polished, polite, smooth, sophisticated, tactful, urbane, well-bred. ANT.—brusque, crude, displeasing, inept, rude.

subdue, beat, conquer, control, crush, defeat, humble, master, moderate, overcome, quell, restrain, rout, soften, subjugate, suppress, surmount, tame, temper, vanquish. ANT.—awaken, enrage, incite, rouse, stimulate.

subject, citizen, dependent, inferior, liegeman, subordinate, vassal; argument, case, material, matter, point, problem, question, substance, theme, thesis, thought, topic.

sublime, elevated, glorious, lofty, raised, supreme; see also majestic.

submerge, see immerse.

submit, abdicate, abide, accede, acquiesce, bear, bend, capitulate, cede, defer, obey, quit, relent, resign, succumb, suffer, surrender, yield; offer, present, propose, suggest. ANT.—defy, obstruct, resist, struggle, withstand; deny, refuse, reject, retain, withhold.

subordinate, ancillary, dependent, inferior, insignificant, junior, minor, paltry, secondary, subject, subservient, subsidiary, unimportant; control, subdue, subjugate. ANT.—chief, dominant, excellent, leading, superior; dignify, elevate, glorify, promote, revere.

subsequent, after, consequent, ensuing, following, later, next, posterior, succeeding, successive. ANT.—antecedent, anterior, earlier, preceding, prior.

subside, descend, drop, fall, sink; droop, extend downward, hang; see also collapse; decline.

substance, see material; moment.

substantiate, see confirm.

substitution, alternation, exchange, replacement, variety; see also change; modification.

subtract, deduct, remove, take away, withhold; see also decrease; lessen.

subvert, demolish, depress, destroy, extinguish, invert, overthrow, overturn, overwhelm, pervert, reverse, supplant, topple, upset. ANT.—conserve, establish, perpetuate, preserve, sustain.

succeed, achieve, accomplish, attain, conquer, defeat, flourish, gain, prevail, prosper, surmount, thrive, triumph, vanquish, win; ensue, follow, replace, supersede, supervene, supplant. ANT.—blunder, fail, lose, miscarry, miss; anticipate, herald, introduce, precede, preface.

succession, continuation, progression; see also sequence.

succinct, compendious, curt; see also concise.

sudden, abrupt, immediate, instantaneous, unexpected; see also hasty; rapid.

suffer, bear, endure, experience, feel, stand, sustain; admit, allow, indulge, let, permit, submit, tolerate; ache, agonize, undergo. ANT.—avoid, resist, surrender; deny, disallow, prohibit, refuse; heal, rally, overcome, recover, revive.

suffering, see distress; pain.

sufficient, abundant, adequate, ample, commensurate, enough, fitting, plenty, proper, satisfactory, satisfying, suitable. ANT.—deficient, inadequate, insufficient, lacking, scant.

suggest, advise, allude to, counsel, hint, imply, infer, insinuate, intimate, offer, propose, recommend, submit.

suggestion, admonition, advice, allusion, caution, counsel, exhortation, hint, idea, implication, indication, innuendo, insinuation, intimation,

proposal, recommendation, thought, warning; design, layout, outline, plan, project, scheme, [illegible].

suit, accommodate, adapt, adjust, alter, conform, fit, revise; fill, gratify, please, satisfy. ANT.—misapply, misfit; annoy, disturb, vex.

suitable, acceptable, accordant, adapted, agreeable, applicable, appropriate, becoming, conformable, congruous, consonant, eligible, expedient, fitting, gratifying, just, meet, pertinent, proper, relevant. ANT.—disagreeable, improper, incongruous, irrelevant, obnoxious, reprehensible.

sullen, churlish, crabbed, cross, dismal, dour, fretful, gloomy, glum, moody, morose, sour, stubborn, sulky, surly. ANT.—amiable, cheerful, genial, jovial, sociable.

sum, aggregate, amount, bulk, collection, entirety, entity, everything, gross, lump, total, totality, unity, value, whole, worth. ANT.—fraction, ingredient, part, portion.

summary, abstract, analysis, condensation, core, digest, epitome, outline, recapitulation, reduction, report, resumé, survey, syllabus, synopsis.

summit, apex, cap, crest, crown, culmination, head, height, peak, pinnacle, tip, top, vertex, zenith. ANT.—base, bottom, foot, foundation, nadir.

sunny, bright, brilliant, clear, cloudless, dazzling, fair, gleaming, shining, shiny, splendid, sunlit. ANT.—cloudy, dark, dull, foul, overcast.

superficial, cursory, desultory, exterior, external, flimsy, frivolous, hasty, ignorant, imperfect, outward, shallow, short-sighted, slight, surface, unenlightened. ANT.—careful, deep, deliberate, learned, profound, thorough.

superfluous, abounding, exaggerated, excessive, exorbitant, extra, extravagant, extreme, inexhaustible, inordinate, lavish, lush, luxuriant, needless, overmuch, profuse, redundant, spare, superabundant, unnecessary, useless. ANT.—inadequate, insufficient, scanty, scarce.

superior, above, better, distinguished, excellent, finer, greater, higher, major, preferred, sovereign, supreme, unsurpassed, upper. ANT.—below, deficient, inferior, minor, substandard.

supernatural, ghostly, metaphysical, mysterious, mystic, spectral, spiritual, superhuman, unearthly; see also miraculous.

supervise, command, dominate, manage, superintend; see also regulate.

supple [illegible].

supplicate, adjure, importune, request; see also [illegible].

supply, fund, reserve, endow, fit out, produce; see also hoard, furnish.

support, base, basis, bolster, brace, buttress, foundation, fulcrum, groundwork, prop, shore, stanchion, stay; advocacy, aid, assistance, backing, comfort, contribution, encouragement, [illegible] hood, living, maintenance, subsistence, [illegible] advocate, aid, assist, back, bear, bolster, brace, carry, contribute, defend, encourage, expedite, foster, further, help, hold, keep, maintain, pre[illegible] travail; dental, desertion, delusion, fantasy, [illegible] frustrate, obstruct, undermine.

suppose, conjecture, deduce, speculate, surmise, [illegible].

suppress, lower, moderate; see also lessen.

supremacy, domination, predominance, sovereignty, transcendence; see also mastery.

supreme, best, cardinal, chief, dominant, essential, final, first, foremost, greatest, highest, leading, main, paramount, peerless, predominant, principal, transcendent, ultimate. ANT.—auxiliary, inferior, subordinate, subsidiary, supplemental.

sure, assured, indubitable, inevitable, secure, undeniable, unquestionable; see also definite.

surplus, see excess.

surprise, curiosity, marvel, miracle, phenomenon, oddity, prodigy, rarity, sensation, spectacle; admiration, amazement, astonishment, awe, bewilderment, curiosity, incredulity, perplexity, shock, stupefaction, wonder, wonderment; alarm, amaze, astonish, astound, bewilder, confound, dazzle, disconcert, dumbfound, flabbergast, overwhelm, shock, startle, stun. ANT.—familiarity, habit, routine, triviality; anticipation, apathy, expectation, indifference, tranquility; admonish, caution, forewarn, prepare, warn.

surrender, acquiesce, capitulate, resign, sacrifice, submit; see also relinquish.

surround, bound, confine, enclose, fence, limit; see also encircle, encompass.

surveillance, charge, control, management, superintendence; see also inspection.

suspect, disbelieve, dispute, distrust, doubt, mistrust, query, question, waver; assume, guess, imagine, presume, speculate, suppose, theorize. ANT.—believe, confide in, rely on, trust; ascertain, discern, know.

suspend, adjourn, cease, defer, delay, desist, discontinue, interrupt, postpone, stay; append, balance, dangle, hang, hitch, poise, sling, swing. ANT.—accelerate, continue, expedite, persist, proceed, support.

suspicion, incredulity, scruple, skepticism, suspense, unbelief; see also distrust.

sustain, advocate, back, bear, brace, further; see also encourage, help, preserve.

swallow, absorb, accept, assimilate, bear, believe, bolt, consume, devour, endure, engulf, envelop, imbibe, stomach, tolerate; recant, retract, suppress, withdraw. ANT.—discharge, doubt, emit, expel, reject; affirm, confirm, uphold.

swarthy, brown, dark, dusky, sable, tawny. ANT.—bright, fair, light.

sway, impel, incite, stir; see also influence.

swear, affirm, declare, protest, state; see also maintain.

sweep, brush, clean, clear, graze, mop, rake, remove, touch, traverse, whisk; amplitude, bend, compass, contour, curve, extent, range, reach, [illegible] stretch, sweep.

sweet, engaging, gentle, honeyed, mellifluous, melodious, saccharine, sugary, winning; see also luscious.

swell, amplify, bulge, dilate, distend, expand, [illegible] rise, tumefy, bulge, crescendo, curve, elevation, intensity, power, protuberance, swelling. ANT.—compress, contract, diminish, shrink, shrivel; decline, depression, flatness, reduction, shrinkage.

swift, see fast.

swindle, cheat, chicanery, guile, imposture; bilk, dupe, fool, gull, hoax, hoodwink, victimize; see also deceit, deceive.

symbol, character, figure, mark, representative, sign, token, type.

symmetry, agreement, arrangement, balance, centrality, conformity, equality, equilibrium, equivalence, evenness, finish, form, harmony, order, proportion, regularity, shapeliness. ANT.—disagreement, disparity, distortion, imbalance, irregularity.

sympathetic, forbearing, kindly, tender, thoughtful; see also humane.

sympathize, gladden, soothe; see also comfort.

sympathy, accord, affinity, agreement, alliance, concord, condolence, congeniality, consolation, empathy, harmony, warmth; see also compassion. ANT.—antipathy, harshness, indifference, insensitivity, malevolence.

symptom, characteristic, diagnostic, evidence, feature, indication, mark, property, token, trace, trait, vestige.

synthetic, artificial, ersatz, fake, feigned, fictitious, phony, unreal; see also counterfeit.

system, network, operation, organization, policy, program; see also method.

T

tact, adroitness, dexterity, diplomacy, discretion, discrimination, finesse, knack, perception, perspicacity, poise, savoir-faire, skill, subtlety.

tactful, discreet, discriminating, judicious, politic; see also diplomatic.

tale, account, anecdote, chronicle, history, narration, narrative, report, yarn; see also fiction.

talent, cleverness, endowment, genius; see also ability, faculty.

talented, bright, sharp, smart, quick, quick-witted, witty; see also skillful.

talk, chatter, gossip, lecture, report; blab, chat, comment, gossip, harangue, jabber, mutter, plead, prattle, preach, rant, speak, spout, tattle; see also conversation; discourse, speak.

talkative, chatty, communicative, glib, voluble; see also garrulous.

tall, see high.

tame, domestic, domesticated, gentle, obedient, subdued, timid; boring, dull, flat, insipid, tedious, vapid; see also docile.

tamper, alter, discommode, inconvenience, interrupt, intervene, mix in, monkey, trouble; see also interfere.

tangible, palpable, sensible; see also corporeal.

tangle, complicate, confuse, ensnare, entrap, hinder, interfere, intertwine, involve, jumble, muddle, snare, spoil; dilemma, disorder, embarrassment, muddle, perplexity, puzzle, quandary, snarl.

tardy, detained, lax, overdue, retarded, slack; see also late.

tarnish, befoul, besmirch, blemish, blight, blot, defame, defile, discolor, disgrace, dishonor, smudge, soil, spot, stain, sully, taint. ANT.—brighten, cleanse, defend, honor, restore.

tart, see bitter.

task, assignment, burden, business, charge, chore, duty, function, job, labor, mission, office, pursuit, stint, toil, work, undertaking.

taste, flavor, gusto, piquancy, relish, savor, tang, zest; acumen, appreciation, discernment, discrimination, disposition, inclination, judgment, liking, predilection, refinement, sensibility, susceptibility. ANT.—antipathy, disinclination, indelicacy, rudeness, vulgarity.

taut, bound up, constricted, firm, fixed, snug, stretched, tight, unbending, unyielding. ANT. lax, loose, relaxed, shaky, slack.

tax, assessment, charge, custom, dues, duty, exaction, excise, fine, impost, levy, obligation, rate, tariff, toll, tribute; burden, demand, strain, task. ANT.—gift, grant, present, remuneration, reward; comfort, ease, relaxation, rest.

teach, advise, coach, direct, educate, enlighten, explain, expound, guide, imbue, inculcate, indoctrinate, inform, instill, instruct, interpret, lecture, nurture, prepare, school, train, tutor. ANT.—follow, imbibe, learn, misguide, misinform.

tear, cleave, disunite, rive, sever, shed, sunder, wound; see also rip.

tease, aggravate, badger, bother, disturb, harry, nag; see also harass.

tedious, boring, burdensome, dilatory, dreary, drowsy, dull, fatiguing, humdrum, irksome, monotonous, slow, sluggish, soporific, tardy, tiresome, uninteresting, wearisome. ANT.—animating, exhilarating, fascinating, inspiring, refreshing.

teeming, abounding, abundant, ample, bountiful, copious, overflowing, plenteous, plentiful, profuse, prolific, replete, rich, rife. ANT.—deficient, inadequate, meager, scant, scarce.

tell, describe, narrate, recite, recount, rehearse, relate, report; assert, communicate, declare, discuss, express, mention, publish, say, speak, state, utter; announce, betray, confess, disclose, divulge, reveal; discern, discover, distinguish, recognize; acquaint, apprise, explain, impart, inform, instruct, notify; direct, order, request.

temper, anger, animosity, choler, fury, indignation, ire, irritation, petulance, rage, resentment, wrath; composition, disposition, humor, mood, nature, quality, structure, type; anneal, assuage, change, moderate, modify, mollify, qualify, soften, soothe. ANT.—composure, conciliation, patience, peace, repose; agitate, harden, intensify, strengthen, toughen.

temperament, constitution, disposition, humor, makeup, mood, nature, personality, propensity, spirit, temper.

temperate, abstemious, abstinent, frugal, mild, moderate, reasonable, self-restrained, sober, unruffled. ANT.—excessive, immoderate, impetuous, tempestuous, uncontrolled.

temporal, earthly, ephemeral, fleeting, laic, lay, mundane, profane, secular, temporary, transient, transitory, worldly. ANT.—ecclesiastical, eternal, everlasting, religious, spiritual.

temporary, brief, changeable, cyclical, ephemeral, evanescent, fleeting, impermanent, momentary, passing, provisional, shifting, short, summary, transient, transitory. ANT.—abiding, durable, endless, permanent, perpetual, timeless.

tempt, allure, bait, captivate, charm, coax, court, decoy, entice, fascinate, incite, induce, inveigle, lure, rouse, seduce, test, try. ANT.—discourage, disenchant, nauseate, repel, repulse.

tend, accompany, attend, escort, guard, keep, manage, nurse, protect, serve, watch; gravitate, incline, lean, point, verge on.

tendency, aim, aptness, bent, bias, direction, disposition, drift, inclination, learning, mood, predisposition, proclivity, proneness, propensity, susceptibility, tone, trend, turn. ANT.—apathy, aversion, deviation, disinclination, opposition.

tender, benevolent, delicate, loving, merciful, responsive, sympathetic, warm; feeble, fragile, immature, weak, young; advance, extend, offer, present, proffer, propose, suggest, volunteer; see also mild.

tenet, belief, conviction, creed, doctrine, dogma, position, precept, principle, system, teaching, view.

tense, firm, rigid, stiff, strained, taut, tight, anxious, distraught, edgy, high-strung, nervous, overwrought, restless, troubled. ANT.—lax, limp, loose, slack; calm, placid, relaxed, tranquil, unruffled.

tentative, experimental, makeshift, probationary, provisional, temporary. ANT.—conclusive, decisive, definitive, final, permanent.

term, boundary, course, cycle, duration, interval, limit, period, phase, span, time; condition, stipulation; expression, name, nomenclature, phrase, terminology, word.

terminate, abolish, achieve, cease, close, complete, conclude, end, expire, finish, perfect, stop. ANT.—begin, commence, inaugurate, initiate, start.

terrible, alarming, appalling, awful, dire, dreadful, fearful, frightful, gruesome, hideous, horrible, horrid, severe, shocking, terrifying. ANT.—appealing, attractive, captivating, happy, pleasing.

terrify, see frighten.

territory, area, boundary, country, district, division, domain, dominion, land, place, province, quarter, region, section, township.

terror, see fear.

terse, brief, compact, compendious, concise, condensed, crisp, incisive, laconic, neat, pithy, sententious, short, succinct, summary, trenchant. ANT.—profuse, rambling, redundant, verbose, wordy.

test, assay, examine, experiment, inspect, prove, scrutinize, substantiate, try, verify; criterion, demonstration, essay, examination, proof, standard, trial.

testimony, affidavit, attestation, certification, confirmation, credentials, declaration, deposition, evidence, indication, proof, warrant, witness.

text, book, handbook, manual, manuscript, matter, passage, publication, quotation, sentence, stanza, subject, textbook, theme, topic, verse, volume, wording, writing.

texture, character, coarseness, composition, constitution, disposition, feel, fiber, firmness, flexibility, grain, makeup, nap, organization, rigidity, roughness, smoothness, structure, tissue.

thankful, appreciative, beholden, contented, grateful, gratified, pleased, satisfied. ANT.—critical, discontented, dissatisfied, faultfinding, thankless.

thaw, deliquesce, dissolve, flow, liquate, liquefy, melt, run. ANT.—chill, congeal, freeze, petrify, solidify.

theft, burglary, depredation, embezzlement, fraud, holdup, larceny, misappropriation, pillage, piracy, plagiarism, plunder, rapine, robbery, spoliation, swindle.

theme, composition, description, discourse, dissertation, essay, idea, motive, narrative, proposition, report, statement, subject, tenor, text, thesis, topic, trend, writing.

theoretical, analytical, formal, ideal, scholastic; see also learned.

theory, assumption, attribution, doctrine, guess, opinion, perception, plea, presupposition, speculation, surmise, thesis, viewpoint; see also hypothesis.

therefore, accordingly, consequently, for, hence, since, so, then, thence, wherefore.

thesis, affirmation, argument, composition, dictum, dissertation, doctrine, essay, position, proposition, report, study, theme.

thick, abundant, close, compact, compressed, condensed, crowded, dense, impenetrable, multitudinous, numerous, packed, populous, profuse, solid, swarming; coagulated, curdled, gelatinous, glutinous, gummy, heavy, miry, muddy, opaque, ropy, solidified, viscid, viscous; cloudy, dull, indistinct, turbid; doltish, dull, ignorant, obtuse, stolid, stupid; coarse, crass, gross; broad, chunky, dumpy, squat, thickset. ANT.—barren, inadequate, scattered, spacious, sparse; clear, diaphanous, gaseous, limpid, rarified, transparent; clear, distinct; acute, bright, intelligent, perceptive; genteel, polite, refined; fragile, frail, slender, thin.

thin, diaphanous, diluted, fine, gauzy, gossamer, rare, scanty, scrawny, skeletal, threadlike, wasted; see also gaunt, slender.

think, conceive, imagine, picture, recall, recollect, remember; cogitate, contemplate, deliberate, determine, examine, meditate, muse, ponder, reason, reflect, ruminate, speculate, study; apprehend, believe, conjecture, consider, deem, esteem, guess, hold, judge, opine, presume, reckon, regard, suppose, surmise; devise, intend, mean, plan, propose.

thorough, absolute, accurate, complete, concluded, consummate, ended, entire, exact, exhaustive, finished, full, painstaking, perfect, plenary, radical, scrupulous, sweeping, thoroughgoing, total, unbroken, undivided, unmitigated. ANT.—deficient, incomplete, perfunctory, sketchy, superficial.

thought, cerebration, cogitation, conception, consideration, contemplation, deliberation, fancy, idea, imagination, impression, judgment, lucubration, meditation, memory, notion, opinion, perception, recollection, reflection, regard, retrospection, sentiment, speculation, view. unselfish, see generous.

unsettled, adrift, apprehensive, changeable, fickle, inconstant, nervous, perturbed, restless, stirred, troubled, unhinged, unnerved, unstable, unsteady, vacillating, wavering; uninhabited, wild; outstanding, owing, unpaid; foul, muddy, roily, turbid. ANT.—calm, certain, constant, peaceful, secure; inhabited, settled; cleared, paid, solvent; clarified, immaculate, pure, sparkling, untainted.

unskilled, awkward, clumsy, ignorant, ill-qualified, incompetent, inept, inexperienced, maladroit, rusty, unfit, unpracticed. ANT.—accomplished, competent, efficient, expert, trained.

unsophisticated, artless, candid, frank, fresh, genuine, guileless, ignorant, ingenuous, innocent, naive, natural, open, pure, real, simple, true, unaffected, undesigning, unspoiled, unstudied, unvitiated. ANT.—experienced, guileful, hard, initiated, sophisticated, worldly.

unstable, see fickle.

unswerving, fast, inflexible, solid, unyielding; see also stable.

unusual, aberrant, abnormal, anomalous, atypical, awesome, capricious, curious, devious, distinguished, eccentric, exceptional, extraordinary, incredible, irregular, odd, rare, strange, uncommon, unique, unnatural, unparalleled, variable. ANT.—common, normal, ordinary, regular, usual.

unyielding, see unswerving.

upbraid, blame, lecture, reprehend, vituperate; see also think.

uphold, see maintain.

upright, direct, right, undeviating, unswerving, erect, standing, straight, unbent, vertical; conscientious, ethical, fair, faithful, honest, honorable, incorruptible, just, moral, scrupulous, square, straightforward, true, trustworthy, virtuous. ANT.—deviating, indirect, swerving; bent, horizontal, prone; corruptible, crooked, dishonest, fraudulent, immoral, lax.

upset, disturb, haunt, inconvenience, perplex, worry, see also pester.

urbane, considerate, well-mannered; see also polite.

urge, appetite, aspiration, hungering, lust; induce, prevail upon, win over; see also desire; persuade.

urgency, importance, need, seriousness; see also emergency.

urgent, absorbing, breathless, chief, cogent, compelling, critical, crucial, demanded, essential, exigent, grave, impelling, imperative, important, importunate, insistent, instant, momentous, necessary, pressing, principal, required, salient, serious, vital, weighty. ANT.—common, insignificant, petty, trivial, unessential, uneventful.

use, apply, avail, employ, exploit, handle, manage, manipulate, operate, ply, utilize, wield; exercise, exert, practice, work; consume, exhaust, expend; accustom, familiarize, habituate, inure; application, employment, service, utilization; necessity, need; advantage, usefulness; method, technique, usage; see also habit.

useful, advantageous, applicable, beneficial, gainful, good, helpful, practical, pragmatic, profitable, remunerative, salutory, serviceable, suitable, utilitarian, valuable, wholesome. ANT.—deleterious, destructive, detrimental, harmful, noxious.

usefulness, adaptability, advantage, application, convenience, helpfulness, practicality, utility, versatility; see also merit.

useless, abortive, empty, fruitless, futile, idle, inadequate, ineffective, ineffectual, pointless, unavailing, unproductive, unserviceable, vain, valueless, vapid, worthless. ANT.—beneficial, effective, potent, profitable, valuable.

usual, accustomed, common, commonplace, conventional, current, customary, everyday, expected, familiar, frequent, general, habitual, normal, ordinary, prevailing, prevalent, prosaic, recognized, regular, stereotyped. ANT.—abnormal, exceptional, extraordinary, rare, unconventional.

utensil, apparatus, appliance, device, equipment, implement, instrument, medium, tool, vehicle, ware.

utility, adequacy, advantage, avail, benefit, convenience, efficacy, efficiency, expediency, favor, productiveness, profit, service, serviceableness, usefulness, utilitarianism, value, worth. ANT.—disadvantage, futility, inefficacy, uselessness, worthlessness.

utilize, adopt, apply, appropriate, avail, employ, exercise, exert, exploit, occupy, practice, use. ANT.—discard, discharge, expel, refuse, reject.

utmost, absolute, chief, extreme, farthest, greatest, highest, last, main, maximum, most, ultimate, unqualified, uttermost. ANT.—closest, least, merest, minimum, nearest.

utopian, chimerical, exemplary, fabulous, fancied, fantastic, faultless, ideal, illusory, imaginary, perfect, supreme, unreal, visionary. ANT.—actual, faulty, imperfect, substantial, [illegible] real.

utter, complete, entire, finished, full, perfect, thorough, total, whole; consummate, excellent, ideal, pure, superlative, supreme; absolute, downright, sheer, unconditional, unqualified, unrestricted, wholehearted; acclaim, air, announce, articulate, assert, claim, declare, disclose, divulge, emit, enunciate, express, inform, proclaim, pronounce, speak, talk, tell, vocalize, voice, whisper. ANT.—imperfect, incomplete, lacking, partial, unfinished; inferior, lesser, negligible, poor; conditional, limited, qualified, restricted; conceal, cover, hide, mask, withhold.

V

vacant, abandoned, bare, barren, blank, depleted, deserted, empty, hollow, idle, tenantless, unfilled, uninhabited, unoccupied, untenanted, unused, vacuous, void, dreaming, empty-headed, foolish, inane, silly, thoughtless. ANT.—filled, full, inhabited, occupied, overflowing; cogitative, contemplative, meditative, reflective, thoughtful, wise.

vacate, abandon, abdicate, abjure, depart, desert, empty, evacuate, forsake, leave, quit, relinquish, resign, surrender, waive. ANT.—assume, maintain, remain, stay, support.

vacillate, change, oscillate, undulate, vary; see also hesitate.

vacillation, changeableness, faltering, fluctuation, hesitation, inconstancy, indecision, irresolution, oscillation, reeling, rocking, swaying, uncertainty, unsteadiness, wavering. ANT.—certainty, constancy, dependability, firmness.

vagrant, beggar, bum, hobo, idler, loafer, rambler, rogue, rover, straggler, tramp, truant, vagabond, wanderer; changeable, digressive, discursive, divergent, erratic, fickle, fluctuating, homeless, idle, inconstant, irresolute, itinerant, nomadic, peripatetic, ranging, roaming, roving, straying, traveling, unsettled, unstable, unsteady, wandering. ANT.—gentleman, laborer, toiler, worker, workman; anchored, established, fixed, rooted, stable.

vague, cryptic, dark, doubtful, dubious, enigmatic, formless, imprecise, mysterious, nebulous, questionable, unsure, visionary; see also indefinite.

vain, abortive, bootless, delusive, empty, fleeting, frivolous, fruitless, futile, hollow, idle, ineffective, ineffectual, nugatory, pointless, shadowy, trifling, trivial, unavailing, unprofitable, unsatisfactory, useless, valueless, vapid, visionary, worthless; arrogant, conceited, egotistical, inflated, ostentatious, proud, showy, vainglorious. ANT.—advantageous, effective, potent, profitable, valuable; demure, genuine, humble, meek, modest, unpretentious.

valiant, adventurous, assertive, audacious, bold, brave, chivalrous, courageous, daring, dauntless, fearless, gallant, heroic, indomitable, intrepid, magnanimous, manly, plucky, puissant, spirited, strong-willed, unafraid, undismayed, unflinching, unshrinking, valorous, venturesome, vigorous. ANT.—cowardly, craven, fearful, timid, timorous, weak.

valid, accurate, actual, authentic, binding, cogent, conclusive, convincing, definite, effective, efficacious, efficient, factual, forceful, genuine, legal, legitimate, logical, operative, powerful, real, solid, sound, strong, substantial, sufficient, telling, tested, true, weighty. ANT.—counterfeit, erroneous, fallacious, invalid, spurious.

valor, chivalry, manliness, prowess, spiritedness; see also courage.

valuable, costly, expensive, high-priced, rare; dear, esteemed, precious, worthy; profitable, serviceable, useful. ANT.—cheap, common, unmarketable; abhorred, disliked, disrespectable, worthless; profitless, useless

value, appreciate, cherish, esteem, hold dear, prize, treasure; appraise, assess, compute, estimate, figure, rate; advantage, appreciation, consideration, esteem, estimation, excellence, importance, merit, price, profit, quality, significance, usefulness, utility, valuation, virtue, worth, worthiness. ANT.—abandon, despise, ignore, neglect, overlook, reject; inexpedience, inutility, unfitness, uselessness, worthlessness.

vandalism, barbarism, burning, damage, destruction, looting, piracy, spoliation, wasting, wrecking. ANT.—care, preservation, protection, repair, replacement

vanish, cease, depart, die, disappear, dissolve, evaporate, fade, go away, sink. ANT.—appear, emerge, reappear

vanity, affectation, arrogance, conceit, conceitedness, display, egotism, ostentation, pretension, self-applause, self-glorification, selfishness, self-laudation, self-love, show, vainglory. ANT.—bashfulness, diffidence, humility, modesty, unobtrusiveness.

vanquish, beat, outwit, suppress; see also conquer.

vapid, banal, bland, commonplace, dry, dull, feeble, flat, hackneyed, inane, insipid, lifeless, prosaic, spiritless, tasteless, trite, uninteresting ANT.—bright, fresh, original, pungent, stimulating, striking

vapor, breath, cloud, condensation, effluvium, emanation, exhalation, fog, fume, gas, haze, mist, smoke, smog, spray, steam.

variable, see fickle

variation, aberration, alteration, change, contrariety, contrast, departure, deviation, difference, disagreement, discord, discrepancy, disparity, dissent, dissidence, dissimilarity, dissimilitude, distinction, diversity, fluctuation, heterogeneity, incongruity, inconsistency, innovation, modification, mutation, noncomformity, oscillation, variety, vicissitude. ANT.—agreement, congruity, homogeneity, permanence, stability, uniformity

variety, change, difference, dissimilarity, diversification, diversity, heterogeneity, medley, miscellany, mixture, multifariousness, variance; array, assortment, brand, breed, category, class, division, family, genus, grade, kind, race, rank, sort, species, stock, strain, subspecies, tribe, type. ANT.—homogeneity, likeness, monotony, sameness, uniformity, unity

various, assorted, different, disparate, divergent, divers, diverse, manifold, many, miscellaneous, numerous, several, sundry ANT.—alike, congruous, identical, same, uniform

vary, exchange, substitute, shift, transfigure, veer; see also modify

vast, ample, big, capacious, extensive, great, large; see also colossal

vault, see jump

vehement, [illegible] excitable, fervent, fervid, fiery, glowing, hot, impetuous, intense, irascible, passionate ANT.—apathetic, calm, cool, indifferent,

veil [illegible] also conceal

velocity, alacrity, celerity, impetus, pace, quickness, rapidity, speed swiftness

venerable, adored, aged, ancient, antiquated, antique, archaic, elderly, erudite, esteemed, honored, old, patriarchal, respected, revered, superannuated, time-worn, venerated, worshipped. ANT.—callow, immature, inexperienced, modern, new.

venerate, admire, adore, appreciate, approve, cherish, esteem, honor, regard, respect, revere, worship. ANT.—abhor, despise, dislike, loathe, scorn.

vengeance, reparation, reprisal, requital, spitefulness; see also revenge.

venom, acerbity, bitterness, contempt, enmity, gall, hate, malevolence, malice, malignity, poison, rancor, resentment, virulence. ANT.—benevolence, charity, fellowship, love, warmheartedness

vent, belch, breathe, discharge, eject, emanate, emit, expel, explode, shoot, spurt, ventilate; airhole, crenel, emission, escape, hole, inlet, loophole, mouth, nostril, opening, orifice, outlet, overflow, passage, plug, spiracle, spout, tap, valve.

ventilate, aerate, air, circulate air, cool, explain, express, fan, freshen, open, oxygenate, purify, refresh, vent.

venture, adventure, attempt, business, chance, dare, enterprise, experiment, gamble, hazard, investment, peril, project, risk, speculation, stake, trial, undertaking, work; advance, assay, attempt, bet, brave, dare, experiment, gamble, grope, hazard, invest, risk, speculate, try, wager

veracity, accuracy, candor, credibility, exactitude, fidelity, frankness, honesty, probity, reality, sincerity, truth, truthfulness. ANT.—chicanery, deception, duplicity, falsehood, misrepresentation.

verbal, announced, communicated, expressed, lingual, literal, nuncupative, oral, sounded, spoken, told, unwritten, uttered, vocal, voiced ANT.—documentary, printed, unspoken, written.

verbose, chattering, chatty, fluent, garrulous, long-winded, loquacious, redundant, talkative, verbal, wordy. ANT.—concise, laconic, silent, stammering, taciturn, uncommunicative

verdict, adjudication, arbitrament, conclusion, decision, decree, determination, finding, judgment, result.

verge, border, boundary, brim, brink, confine, edge, end, extreme, limit, lip, margin, rim, skirt. ANT.—body, bulk, center, inside

verification, affirmation, attestation, authentication, confirmation, corroboration, demonstration, evidence, proof, recognition, support, testimony. ANT.—contradiction, denial, failure, fallacy, invalidity

verify, acknowledge, affirm, approve, assure, attest, authenticate, certify, corroborate, confirm, determine, establish, fix, prove, ratify, sanction, settle, strengthen, substantiate, validate ANT.—contradict, deny, disprove, invalidate, repudiate

versed, acquainted, aware, cognizant, conversant, familiar, intimate, knowing, proficient, skilled ANT.—unaware, unfamiliar, unknowing

versatile, adaptable, apt, changeable, many-sided, movable, ready, variable. ANT.—awkward, limited, unadaptable, unchanging

vertical, erect, perpendicular, plumb, standing, straight, upright ANT.—flat, horizontal, inclined, oblique, prone, supine

vestige, mark, remainder, remains, remnant, residue, scrap, sign, trace

vex [illegible]

vibrate, agitate, flicker, fluctuate, flutter, jar, jolt, oscillate, pulsate, quake, quaver, quiver, rock, shake, shiver, shudder, sway, swing, totter, tremble, undulate, wave, waver

vice, blemish, blot, carnality, debauchery, defect, excess, fault, impropriety, impurity, iniquity, offense, perversity, sin, transgression, ungodliness; see also evil.

vicinity, district, domain, environment, environs, locality, neighborhood, realm, region, sector, territory; adjacency, nearness, proximity. ANT.—outskirts; distance, remoteness.

vicious, bad, base, corrupt, debased, degenerate, demoralized, depraved, destructive, evil, harmful, hurtful, malignant, obnoxious, pernicious, profligate, reprehensible, sinful, unruly, vile, virulent, wicked. ANT.—admirable, exemplary, honorable, noble, upright, virtuous.

victim, dupe, gull, martyr, prey, puppet, quarry, sacrifice, scapegoat, sufferer, wretch. ANT.—culprit, evil-doer, felon, swindler.

victor, champion, conqueror, hero, master, vanquisher, winner. ANT.—failure, loser, underdog, vanquished, victim.

victory, achievement, ascendancy, conquest, defeating, mastery, overcoming, subjugation, success, superiority, supremacy, triumph, win, winning. ANT.—collapse, defeat, failure, frustration, overthrow

view, aim, belief, conception, examination, glance, glimpse, goal, impression, inspection, judgment, look, object, observation, opinion, outlook, panorama, perspective, picture, prospect, range, regard, scene, sight, survey, theory, vision, vista; behold, consider, discern, examine, eye, gaze, glance, inspect, look, observe, regard, scan, scrutinize, see, stare, survey, watch, witness. ANT.—avert, disregard, ignore, miss, overlook, sidetrack.

viewpoint, angle, aspect, attitude, disposition, light, outlook, perspective, pose, position, posture, slant, stand, standpoint

vigilant, alert, attentive, careful, cautious, circumspect, guarded, heedful, observant, wakeful, wary, watchful, wide-awake. ANT.—careless, foolhardy, negligent, rash, reckless.

vigor, endurance, energy, force, fortitude, hardihood, health, liveliness, lustiness, spirit, strength, verge, virility, vitality, well-being, zeal. ANT.—exhaustion, languor, lassitude, listlessness.

vigorous, active, animated, blithe, brisk, energetic, flourishing, forceful, frolicsome, healthy, lively, lusty, powerful, robust, spirited, sprightly, strenuous, strong, virile, vital, vivacious. ANT.—debilitated, feeble, frail, inactive, lethargic

vile, abject, base, brutish, cheap, contemptible, debased, depraved, despicable, disgusting, evil, foul, gross, ignoble, impure, iniquitous, loathsome, low, mean, obscene, odious, repulsive, revolting, sinful, sordid, ugly, vicious, vulgar, wicked, worthless, wretched. ANT.—attractive, decent, elevated, honorable, laudable, valuable

vilify, abuse, asperse, ill-use, revile, scandalize; see also malign

villainous, bad, base, evil, unsound, unwholesome, see also deleterious, iniquitous

vindicate, advocate, assert, avenge, defend, excuse, maintain, support, uphold; see also exonerate

vindictive, avenging, grudgeful, implacable, malevolent, malicious, rancorous, resentful, unforgiving, vengeful. ANT.—conciliatory, excusing, forgiving, placable

violate, break, disobey, disregard, encroach, infringe, invade, transgress; debauch, defile, deflower, desecrate, dishonor, outrage, pollute, profane, rape, ravish

violence, assault, fury, intensity, outrage, vehemence, violation, wildness; see also force.

violent, angry, convulsive, fierce, fiery, frantic, frenzied, fuming, furious, hysterical, obstreperous, passionate, raging, rampant, raving, riotous, savage, turbulent, ungovernable, uproarious, vehement, wild; acute, extreme, forceful, great, intense, mighty, potent, powerful, severe, strong. ANT.—composed, kind, pacific, peaceful, tranquil, unruffled; feeble, insignificant, mild, moderate, weak.

virgin, chaste, clean, immaculate, innocent, modest, pure, spotless, stainless, unadulterated, unblemished, undefiled, unsullied, untainted, virginal; first, fresh, genuine, natural, new, original, undisturbed, untamed, untouched ANT.—corrupt, defiled, shameless; foul, poisoned, polluted, soiled.

virile, hardy, lusty, vigorous; see also masculine.

virtue, chastity, decency, goodness, honesty, honor, impeccability, innocence, integrity, morality, probity, prudence, purity, rectitude, sanctity, temperance, uprightness, virginity; effectiveness, efficacy, force, fortitude, power, strength; distinction, excellence, merit, superiority, value, worth. ANT.—corruption, depravity, dishonor, vileness, wickedness; debility, enervation, infirmity, weakness; deficiency, inferiority, inutility, uselessness, worthlessness.

virtuous, decent, honorable, just, right, scrupulous; see also chaste, ethical.

visible, see evident, fair, manifest.

vision, apparition, appearance, chimera, conception, daydream, discernment, dream, fancy, ghost, hallucination, hope, illusion, image, manifestation, mirage, perception, phantasm, phantom, prophecy, revelation, shadow, sight, specter. ANT.—actuality, blindness, corporality, fact, substantiality, verity.

visionary, chimerical, delusory, dreamy, fancied, fanciful, ideal, illusory, imaginary, imaginative, romantic, unreal, utopian. ANT.—actual, material, real, substantial.

vital, alive, animate, existing, living; basic, cardinal, essential, fundamental, important, indispensable, necessary, paramount, requisite, urgent. ANT.—dead, inanimate, lifeless; dispensable, excessive, insignificant, trivial, unimportant

vitality, being, existence, life; animation, ardor, buoyancy, energy, intensity, liveliness, spirit, spunk, verve, vigor, vim, vivacity. ANT.—death, demise, extinction; apathy, lassitude, lethargy, passivity, torpor.

vitiate, abase, adulterate, alloy, annul, contaminate, corrupt, damage, debase, defile, degrade, deprave, depress, deteriorate, humiliate, impair, infect, injure, lower, nullify, pervert, poison, pollute, ruin, spoil, void. ANT.—clean, enhance, improve, purify, revive, vitalize.

vivid, animated, bright, brilliant, clear, expressive, fresh, graphic, intense, lifelike, lively, lucid, pictorial, picturesque, realistic, sprightly, striking, strong, telling, vibrant. ANT.—cloudy, dreary, dull, vague, weak.

vocal, announced, articulate, communicated, expressed, expressive, fluent, musical, oral, spoken, sung, uttered, verbal, vocalized, voiced, voluble. ANT.—printed, quiet, silent, unspoken, written

vocation, art, business, calling, commerce, employment, engagement, enterprise, field, job, lifework, mission, occupation, office, position, profession, pursuit, role, situation, trade, trading, undertaking, work. ANT.—avocation, diversion, entertainment, hobby, pastime

voice, accent, articulation, call, cry, enunciation, expression, intonation, noise, pronunciation, sound, speech, tongue, utterance, vocalization; choice, election, suffrage, vote; announce, assert, cry, declaim, declare, express, say, sound, speak, talk, tell, utter.

void, blank, lacking; see also empty.

volatile, airy, buoyant, changeable, effervescent, evaporable, fleeting, gaseous, inconstant, irresolute, light, resilient, vacillating, vaporous, vapory, wavering, weak; active, animated, blithe, cheerful, elated, jocund, lively, playful, vivacious. Zaire	Kinshasa	Zaire (Z) = 100 makuta	French, Kongo, Kingwara, Luba	—	
Zambia	Lusaka	Kwacha (K) = 100 ngwee	English, Bemba, Tonga, Nyanja	260	-
Zimbabwe	Salisbury	Zimbabwe dollar (Z$) = 100 cents	English African	—	

COMMON ABBREVIATIONS

ABBREVIATIONS, ə-brē-vē-ā′shənz, are letter symbols or contractions used as shortened forms of words and phrases to facilitate writing and to save space. The practice of abbreviating goes back to antiquity; early examples of abbreviation have survived on coins and inscriptions, where lack of space made the shortening of words necessary. With the development of papyrus and, later, of parchment, writing increased and abbreviations were adopted by copyists to save labor.

In modern times the rapid growth of the sciences, technology, and business, and the increase of governmental agencies have produced a vastly increased vocabulary of abbreviations for use in some fields, symbols other than letters are employed, as in physics and mathematics. The following list of abbreviations often used in printing or writing includes only letter symbols or contractions, in the Roman alphabet.

A

A.—absolute (temperature)
A., Å., Å—angstrom unit
a.—about; acre(s)
AA—Alcoholics Anonymous
A.A.—Associate in Arts
AAA—Agricultural Adjustment Administration; Amateur Athletic Association; American Automobile Association; antiaircraft artillery
AAAL—American Academy of Arts and Letters
AAAS—American Association for the Advancement of Science
AAU—Amateur Athletic Union
AAUP—American Association of University Professors
A.B.—Artium Baccalaureus (Lat.), Bachelor of Arts
A.B., a.b.—able-bodied (seaman); airborne
ABA—American Bar Association
abbr., abbrev.—abbreviation; abbreviated
ABC—American Broadcasting Company
abp.—archbishop
abr.—abridged; abridgment
ABS—American Bible Society
AC—Air Corps; Army Corps; Athletic Club
AC, A.C., a.c., a-c—alternating current
A/C, a/c, ac.—account
Ac—actinium
ac—acre(s)
acad.—academic; academy
accel.—accelerando (It.), more quickly (music)
acct.—account; accountant
ACDA—Arms Control and Disarmament Agency
ACLS—American Council of Learned Societies
ACLU—American Civil Liberties Union
ACP—American College of Physicians
ACS—American Chemical Society; American College of Surgeons
ACTH—adrenocorticotropic hormone
A.D.—anno Domini (Lat.), in the year of our Lord
ADA—American Dental Association; Americans for Democratic Action
adag.—adagio (It.), slowly (music)
ADC, a.d.c.—aide-de-camp
add.—addenda; addendum; addition; additional; address
adj.—adjacent; adjective; adjourned; adjustment; adjutant
ad lib., ad libit.—ad libitum (Lat.), at one's pleasure
adm.—administration; administrative; admiral
adv.—adverb; adversus; advertisement; advocate
ad val.—ad valorem (Lat.), according to the value
ae., aet., adtat.—aetatis (Lat.), of age, aged
AEC—Atomic Energy Commission
AEF—American Expeditionary Force
aero.—aeronautics
AF—Air Force; audio frequency
AFAM—Ancient Free and Accepted Masons
AFB—Air Force Base
AFC—automatic frequency control
AFL-CIO—American Federation of Labor-Congress of Industrial Organizations
AFTRA—American Federation of Television and Radio Artists
Ag—argentum (Lat.), silver
agr., agri., agric.—agricultural; agriculture
agt.—agent
A.H.—anno Hegirae (Lat.), in the year of Hegira (Mohammedan era)
AHA—American Historical Association
AIA—American Institute of Architects
A.I.Ch.E.—American Institute of Chemical Engineers
AID—Agency for International Development
AIEE—American Institute of Electrical Engineers
AKC—American Kennel Club
Al—aluminum
ALA—American Library Association
Ala.—Alabama
Alas.—Alaska
Alba.—Alberta
alg.—algebra
alt.—alternate; alternating; altitude; alto
Alta.—Alberta
AM—amplitude modulation
A.M., a.m., a.m.—ante meridiem (Lat.), before midday
A.M.—Artium Magister (Lat.), Master of Arts
Am—americium
AMA—American Medical Association
amb.—ambassador
A.M.E.—African Methodist Episcopal
amp.—amperage; ampere
AMS—Agricultural Marketing Service
amt.—amount
AMVETS—American Veterans (of World War II and Korea)
AN, AN.—Anglo-Norman
ANA—American Nurses Association
anal.—analogy; analysis; analytic
ANC—Army Nurse Corps
and.—andante (It.), slowly (music)
anon.—anonymous
ant.—antenna; antonym
anthrop., anthropol.—anthropological; anthropologist; anthropology
antiq.—antiquarian; antiquary
ANZAC—Australian and New Zealand Army Corps
AOH—Ancient Order of Hiberians
AP—Associated Press
APA—American Philological Association
APO—Army Post Office
app.—apparent; appended; appendix; appointed; apprentice
approx.—approximately
Apr., Apr—April
apt.—apartment
AQ—accomplishment quotient; achievement quotient
aq.—aqua; aqueous
Ar—argon
Ar.—Arabian; Arabic; Aramaic
ARA—Agricultural Research Administration; American Railway Association
A.R.A.—Associate of the Royal Academy
Arab.—Arabian; Arabic
ARC—American Red Cross
arch.—archaic; archbishop; archery; archipelago; architect; architecture
archaeol.—archaeological; archaeology
archd.—archduke
arith.—arithmetic
Ariz.—Arizona
Ark.—Arkansas
ARS—Agricultural Research Service
AS, AS.—Anglo-Saxon
As—arsenic
ASCAP—American Society of Composers, Authors and Publishers
ASCE—American Society of Civil Engineers
ASME—American Society of Mechanical Engineers
ASPCA—American Society for the Prevention of Cruelty to Animals
assn., assoc.—association
ASSR—Autonomous Soviet Socialist Republic
asst.—assistant
ASTM—American Society for Testing Materials
ASTP—Army Socialized Training Program
astrol.—astrologer; astrological; astrology

BSDA—Business and Defense Services Administration
B.E.—Bachelor of Engineering; Bachelor of Education
bev—billion electron volts
Be.—Baume
B.Ed.—Bachelor of Education
BEF—British Expeditionary Force(s)
B.E.M.—British Empire Medal
BEV, bev—billion electron volts
bf.—boldface
Bi—bismuth
bib.—Bible, biblical
bibliog.—bibliography
biochem.—biochemistry
biog.—biographer; biographical; biography
bk.—book
B.I.S.—Bank for International Settlements; British Information Service
Bk—berkelium
bl.—bale; black
blvd—boulevard
B.L.—Baccalaureus Legum (Lat.), Bachelor of Laws
blvd—boulevard
B.Lit(t).—Baccalaureus Litterarum (Lat.), Bachelor of Literature (or Letters)
B.L.S.—Bureau of Labor Statistics
B.L.S.—Bachelor of Library Science
blvd—boulevard
BM—basal metabolism
BMI—Bureau of Mines Information
B.Mus.—Bachelor of Music
BMV—Blessed Virgin Mary

bot.—botanical, botany
bp.—bishop
b.p.—boiling point
BPOE—Benevolent and Protective Order of Elks
Br—bromine
brig.—brigade; brigadier
brig. gen.—brigadier general
bro.—brother
B.S.—Bachelor of Science
BSA—Boy Scouts of America
B.S.A.—Bachelor of Science in Agriculture
B.Sc.—Baccalaureus Scientiae (Lat.), Bachelor of Science
B.T., B.Th.—Baccalaureus Theologiae (Lat.), Bachelor of Theology
B.T.U., Btu, b.t.u., btu—British thermal unit
bu—bushel
bur.—bureau
B.V.M.—Blessed Virgin Mary

C

C—carbon
C., c.—candle; capacitance; cape; carat; cathode; cent; center; century; chapter; circa (Lat.), about; cirrus (meteor.); copyright; cubic; cup; current; cycle
C., C, c., c—centigrade; centimeter
CA—chronological age; Coast Artillery
Ca—calcium
c.a.—chartered accountant; chief accountant; commercial agent; consular agent; controller of accounts
CAA—Civil Aeronautics Administration (or Authority)
CAB—Civil Aeronautics Board; Consumers' Advisory Board
Cal.—California; large calorie
cal.—calendar; caliber; small calorie
Calif.—California
Cant.—Canticles
CAP—Civil Air Patrol
cap.—capital; capitalize
capt.—captain
CAR—Civil Air Regulations
CARE—Cooperative for American Remittances to Everywhere
Cath.—Catholic
cath.—cathedral
CAVU—ceiling and visibility unlimited
C.B.—Chirurgiae Baccalaureus (Lat.), Bachelor of Surgery; Companion of the Bath
Cb—columbium
CBC—Canadian Broadcasting Corporation
C.B.E.—Commander (of the Order) of the British Empire
CBS—Columbia Broadcasting System
cc, c.c., c/c—carbon copy; cubic centimeter
CCC—Commodity Credit Corporation
CCS—Combined Chiefs of Staff
Cd—cadmium
CE—Corps of Engineers; Chief Engineer; Civil Engineer; Church of England; Christian Endeavor
Ce—cerium
CEA—Council of Economic Advisers
CED—Committee for Economic Development
CEF—Canadian Expeditionary Force
Celt.—Celtic
CEMA—Council for Mutual Economic Assistance
cent.—centigrade; centimeter; central; century
CENTO—Central Treaty Organization
Cf—californium
cf.—confer (Lat.), compare
CG—center of gravity; Coast Guard; commanding general, consul general
cg—centigram
cgs—centimeter-gram-second
CGT—Confederation Generale du Travail (Fr.), General Confederation of Labor
CH—clearing house; courthouse; customhouse
C.H.—Companion of Honor
ch.—chaplain; chapter; check (chess); chief; child; children; chirurgia (Lat.), surgery; church
chan.—channel
chap.—chaplain; chapter
Ch.E.—Chemical Engineer
chem.—chemical; chemist; chemistry
chm.—chairman; checkmate
Chr.—Christ; Christian
Chron.—Chronicles
chron.—chronology
CIA—Central Intelligence Agency
C.I.E.—Companion (of the Order) of the Indian Empire
CIF—cost, insurance, freight
C. in C.—Commander in Chief
CIO—Congress of (formerly Committee for) Industrial Organizations
cir., circ.—circular; circa (Lat.), about
cit.—citation; cited; citizen
civ.—civil; civilian
Cl—chlorine
clk.—clerk
C.M.—Chirurgiae Magister (Lat.), Master in Surgery
Cm—curium
cm, cm.—centimeter(s)
C.M.G.—Companion (of the Order) of St. Michael and St. George
CO—Commanding Officer; conscientious objector
Co—cobalt
co.—company; county
c.o., c/o—care of; carried over
COD, c.o.d.—cash on delivery; collect on delivery
C. of C.—Chamber of Commerce
C. of S.—Chief of Staff
Col.—Colorado; Colossians
col.—collected; collector; college; colonel; colonial; colony; column
colloq.—colloquial; colloquialism
Colo.—Colorado
Coloss.—Colossians
com.—comedy; command; commandant; commerce; commercial; commission(er); committee; commodore; common; communication; community
comdr.—commander
COMECON—Council for Mutual Economic Assistance
comr.—commissioner
con.—concerto; consolidated; consul
conf.—conference
confed.—confederate
Cong.—Congregational
cong.—congress
conj.—conjugation; conjunction
Conn.—Connecticut
consol.—consolidated
constr.—construction
cont.—containing; contents; continent; continental; continue(d)
Cor.—Corinthians
CORE—Congress of Racial Equality
corp.—corporal; corporation
cos—cosine
CP—candlepower; chemically pure; command post; Communist Party
cp.—candlepower; compare
CPA—Certified Public Accountant
cpl.—corporal
CPO—chief petty officer
Cr—chromium
cr.—credit; creditor; creek
cres., cresc.—crescendo (It.), increasingly loud (music)
crit.—critic
CS—civil service
C.S.—Christian Science
Cs—cesium
CSA—Confederate States of America
C.S.B.—Bachelor of Christian Science
CSC—Civil Service Commission

C.S.I.—Companion of (the Order of) the Star of India
CST—Central Standard Time
ct.—carat; cent; court
Cu—cuprum (Lat.), copper
cu—cubic
CWA—Civil Works Administration
cwt—hundredweight
CYO—Catholic Youth Organization

D

D—deuterium
D., d.—dam (in pedigrees); date; daughter; day(s); dead; democrat; density; diameter; died
d.—pence, penny
D.A.—delayed action; district attorney
DAB—Dictionary of American Biography
Dan., Danl.—Daniel
DAR—Daughters of the American Revolution
DAV—Disabled American Veterans
D.B.E.—Dame Commander (of the Order of the) British Empire
D. Bib.—Douay Bible
DC, D.C., d.c., d-c—direct current
D.C.—da capo (Lat.), repeat (music); District of Columbia; Doctor of Chiropractic
D.C.L.—Doctor of Civil Law
D.C.M.—Distinguished Conduct Medal (Brit. Army)
D.C.T.—Doctor of Christian Theology
D.D.—Divinitatis Doctor (Lat.), Doctor of Divinity
D.D.S.—Doctor of Dental Surgery
Dec., Dec—December
dec.—deceased; declaration; declension; declination; decrease; decrescendo (It.), decreasing in loudness (music)
deg.—degree(s)
Del.—Delaware
Dem.—Democrat; Democratic
D.Eng.—Doctor of Engineering
dep.—department; departure; deposit; depot; deputy
dept.—department; deputy
der., deriv.—derivation; derivative
dermatol.—dermatology
Deut.—Deuteronomy
DEW—distant early warning
DFC—Distinguished Flying Cross
diag.—diagram
dial.—dialect
dict.—dictionary
dim.—diminuendo (It.), diminishing in loudness (music)
dipl.—diplomat; diplomatic
dir.—director
disc.—discount; discovered
dist.—distinguished; district
div.—dividend; division; divorced
D.Lit., D.Litt.—Doctor Lit(t)erarum (Lat.), Doctor of Literature (or, Letters)
D.L.S.—Doctor of Library Science
dm, dm.—decameter; decimeter
D.M.D.—Doctor of Medical Dentistry
D.Mus.—Doctor of Music
DNA—deoxyribonucleic acid
DNB—Dictionary of National Biography (Brit.)
D.O.—Doctor of Optometry; Doctor of Osteopathy
do.—ditto (It.), the same
DOA—dead on arrival
doc.—document
doz.—dozen
DP—degree of polymerization (diametrical pitch; displaced person
dpt.—department
D.R., D/R, d.r.—dead reckoning; deposit receipt
Dr.—doctor
dr.—debit, debtor, drachma; dram
D.S., D.Sc.—Doctor of Science
DSC—Distinguished Service Cross
DSM—Distinguished Service Medal
DSO—Distinguished Service Order
DST—Daylight Saving Time
d.t.—delirium tremens; double time
dup., dupl.—duplicate
D.V.—Deo volente (Lat.), God willing; Douay Version
D.V.M.—Doctor of Veterinary Medicine
dwt—penny weight
Dy—dysprosium

E

E—east; eastern
e., e—erg; errors (baseball)
ea.—each
ECA—Economic Cooperation Administration
eccl., eccles.—ecclesiastical
Eccles., Eccl.—Ecclesiastes
Ecclus.—Ecclesiasticus
ECG—electrocardiogram
ecol.—ecology
econ.—economic; economics; economy
ECSC—European Coal and Steel Community
ed.—edited; editor; edition
EDC—European Defense Community
Ed.D.—Doctor of Education
EDT—Eastern Daylight Time
EEC—European Economic Community
EEG—electroencephalogram
EFTA—European Free Trade Association
e.g.—exempli gratia (Lat.), for example
Egyptol.—Egyptology
EHF, e.h.f.—extremely high frequency
EIB—Export-Import Bank
EKG—electrocardiogram
elec., elect.—electric(al); electrician; electricity
elev.—elevation
Eliz.—Elizabeth; Elizabethan
E.M.—Engineer of Mines
EMF, e.m.f., emf.—electromotive force
emp.—emperor; empire; empress
e.m.u.—electromagnetic unit
enc.—enclosed
ency., encyc., encycl.—encyclopedia
eng.—engineer; engineering; engraved
ens.—ensign
entom., entomol.—entomologist; entomology
Eph., Ephes.—Ephesians
Episs., Episc.—Episcopal
Er—erbium
ERA—Emergency Relief Administration
ERP—European Recovery Program
Es—einsteinium
ESB—Economic Stabilization Board
ESC—Economic and Social Council (United Nations)
Esk.—Eskimo
ESP—extrasensory perception
Esq., Esqr.—Esquire
EST—Eastern Standard Time
est.—established; estimate
Esth.—Esther
et al.—et alii (Lat.), and elsewhere; et alia (Lat.), and others
etc.—et cetera (Lat.) and so forth
ETO—European Theater of Operations
et seq.—et sequens (Lat.), and the following; et sequentes or sequentia (Lat.), and those that follow
Eu—europium
Ex.—Exodus
ex.—examined; example
exch.—exchange; exchequer
exec.—executive; executor
ex lib.—ex libris (Lat.), from the books of
Exod.—Exodus
Ez., Ezr.—Ezra
Ezek.—Ezekiel

F

F—Fahrenheit; farad; fathom; fluorine; Lutheran (cyclic)
F.—Fahrenheit; Fellow; Friday
f—forte (It.), loud (music)
f.—farad; father; farthing; fathom; feminine; (and (omega) form) following; franc; frequency
FAA—Federal Aviation Agency
fac.—facsimile
Fahr.—Fahrenheit
FAO—Food and Agricultural Organization of the United Nations
FBI—Federal Bureau of Investigation
FCA—Farm Credit Administration
FCC—Federal Communications Commission
FCIC—Federal Crop Insurance Corporation
FDA—Food and Drug Administration
FDIC—Federal Deposit Insurance Corporation
Fe—ferrum (Lat.), iron
Feb., Feb—February
fec.—fecit (Lat.), he (she) did, *or* made, it
fed.—federal; federated; federation
fem.—female; feminine
FEPC—Fair Employment Practice Committee
ff—fortissimo (It.), very loud (music)
ff.—folios; following
FFA—Future Farmers of America
FHA—Farmers Home Administration; Federal Housing Administration; Future Homemakers of America
FICA—Federal Insurance Contributions Act
fig—figure
fin.—finance
fl.—florin; flourished; fluid
Fla., Flor.—Florida
F.L.S.—Fellow of the Linnaean Society
FM—frequency modulation
Fm—fermium
FMB—Federal Maritime Board
FMCS—Federal Mediation and Conciliation Service
fn.—footnote
FOB, f.o.b.—free on board
FOE—Fraternal Order of Eagles
fol.—folio; following
F.P., f.p.—foot pound; freezing point
FPC—Federal Power Commission
FPHA—Federal Public Housing Authority
FPO—Fleet Post Office
fps—feet per second
Fr.—francium
Fr.—Father (eccl.); Frater (Lat.), brother; Friar; Friday
fr.—fragment; franc; from
F.R.A.S.—Fellow of the Royal Astronomical Society
F.R.C.P.—Fellow of the Royal College of Physicians
F.R.C.S.—Fellow of the Royal College of Surgeons
F.R.G.S.—Fellow of the Royal Geographical Society
F.R.Hist.S.—Fellow of the Royal Historical Society
Fri.—Friday
F.R.I.B.A.—Fellow of the Royal Institution of British Architects
front.—frontispiece
FRS—Federal Reserve System
F.R.S.—Fellow of the Royal Society
F.R.S.C.—Fellow of the Royal Society of Canada
F.R.S.E.—Fellow of the Royal Society, Edinburgh
F.R.S.L.—Fellow of the Royal Society of Literature; Fellow of the Royal Society, London
FSA—Farm Security Administration; Federal Security Agency
F.S.A.—Fellow of the Society of Antiquaries, or Arts
FSCC—Federal Surplus Commodities Corporation
FSH—follicle-stimulating hormone

F.S.A.—Fellow of the Society of Antiquaries, or Arts
FSCC—Federal Surplus Commodities Corporation
FSH—follicle-stimulating hormone
F.S.S.—Fellow of the (Royal) Statistical Society
ft—foot
ft.—ton
FTC—Federal Trade Commission
F.Z.S.—Fellow of the Zoological Society

G

G., g.—conductance; gauge; grain; gravity; guinea; gulf
g., g—gram
GA—general agent; General Assembly
Ga—gallium
Ga.—Gallic; Georgia
Gael.—Gaelic
Gal.—Galatians; Galen
gal, gall.—gallon
GAO—General Accounting Office
GAR—Grand Army of the Republic
GATT—General Agreement on Tariffs and Trade
gaz.—gazette; gazetteer
G.B.E.—Grand (Cross, Order) of the British Empire
GCA—ground-controlled approach
G.C.B.—(Knight) Grand Cross of the Bath
GCI—ground-controlled interceptor
G.C.I.E.—(Knight) Grand Commander (of the Order) of the Indian Empire
G.C.L.H.—Grand Cross of the Legion of Honor
G.C.M.G.—(Knight of the) Grand Cross (of the Order) of St. Michael and St. George
G.C.S.I.—(Knight) Grand Commander (of the Order) of the Star of India
GCT—Greenwich civil time
G.C.V.O.—(Knight) Grand Cross of the (Royal) Victorian Order
Gd—gadolinium
Ge—germanium
Gen.—Genesis
gen.—gender; genera; general; genus
geod.—geodesy; geodetic
geog.—geographer; geographical; geography
geol.—geologic; geologist; geology
geom.—geometric; geometry
ger.—gerund
GHA—Greenwich hour angle
GHQ—General Headquarters
GI—general issue, or government issue (U.S. Army)
GI, g.i.—gastrointestinal
gloss.—glossary
GM—General Manager; George Medal (Brit.); Grand Master; guided missiles
gm—gram
GMT—Greenwich mean time
GNP—gross national product
GOP—Grand Old Party (Republican)
Goth.—Gothic
gov.—governor
govt.—government
GP—general practitioner
GPO—General Post Office; Government Printing Office
gr—grain(s); gram(s)
gram.—grammar; grammarian
GS—General Staff
GSA—General Services Administration; Girl Scouts of America
GSC—Geological Survey of Canada

H

H—henry (elec.); hydrogen; intensity of magnetic field
h.—hard; hardness; high; hits (baseball); husband
Hab.—Habakkuk
hab. corp.—habeas corpus
HAC—Honorable Artillery Company
Hag.—Haggai
Hal.—halogen
Haw.—Hawaii
Hb—hemoglobin
H.B.M.—His (Her) Britannic Majesty
H.C.—House of Commons
H.C.M.—His (Her) Catholic Majesty
H.E.—His Eminence; His Excellency
He—helium
Heb., Hebr.—Hebrew(s)
her.—heraldry
HF—high frequency
Hf—hafnium
Hg—hydrargyrum (Lat.), mercury
H.H.—His (Her) Highness; His Holiness (the Pope)
HHFA—Housing and Home Finance Agency
HIFI—high fidelity
H.I.H.—His (Her) Imperial Highness
hist.—historical; historian; history
H.J.S.—hic jacet sepultus (Lat.), here lies buried
H.L.—House of Lords
H.M.—His (Her) Majesty
H.M.S.—His Majesty's Service, Ship, or Steamer
Ho—holmium
Hon.—Honorable
hort.—horticultural; horticulture
Hos.—Hosea
H.P., HP, h.p., hp—high pressure; horse power
HQ, H.Q., hq, h.q.—headquarters
H.R.—Home Rule; House of Representatives
hr—hour(s)
H.R.H.—His (Her) Royal Highness
H.R.I.P.—hic requiescit in pace (Lat.), here rests in peace
H.S.H.—His (Her) Serene Highness
ht.—height

I

I—iodine
I.—Island; Isle
Ia.—Iowa (not official)
IADB—Inter-American Defense Board
ib., ibid.—ibidem (Lat.), in the same place
IBRD—International Bank for Reconstruction and Development
ICAO—International Civil Aviation Organization
ICBM—intercontinental ballistic missile
ICC—Interstate Commerce Commission, Indian Claims Commission
ichth.—ichthyology
ICJ—International Court of Justice
Id.—Idaho (not official)
id.—idem (Lat.), the same
i.e.—id est (Lat.), that is
IFC—International Finance Corporation
IGY—International Geophysical Year
IHS—the first three letters of the Greek word for Jesus
ILA—International Longshoremen's Association
ILGWU—International Ladies' Garment Workers' Union
Ill.—Illinois
ILO—International Labor Organization
I.L.P.—Independent Labour Party
IMF—International Monetary Fund
imp.—imperative; imperial; imports; imprimatur (Lat.), let it be printed
in.—inch
in.—including
inc.—including; income; incorporated
Ind.—Indian; Indiana
Inf.—infantry
in loc. cit.—in loco citato (Lat.), in the place cited
INRI—Iesus Nazarenus, Rex Iudaeorum (Lat.), Jesus of Nazareth, King of the Jews
INS—International News Service
ins.—inches; insurance
inst.—instant, the present month; institute
introd.—introduction
IOF—Independent Order of Foresters
IOOF—Independent Order of Odd Fellows
IOU—I owe you
IQ—intelligence quotient
Ir—iridium
IRA—Irish Republican Army
IRO—International Refugee Organization
IRS—Internal Revenue Service
Is., is.—island(s); isle
Isa.—Isaiah
ITO—International Trade Organization
ITU—International Telecommunications Union
IU—international unit
IWW—Industrial Workers of the World

J

J—joule
J.—Justice; Judge
JA—Judge Advocate
Jan., Jan—January
Jas.—James
JCC—Junior Chamber of Commerce
J.C.D.—Juris Civilis Doctor (Lat.), Doctor of Civil Law
J.D.—Juris Doctor (Lat.), Doctor of Law
Jer.—Jeremiah
j.g.—junior grade
Jno.—John
Josh.—Joshua
jour.—journal
J.P.—Justice of the Peace
Jr., jr.—junior
J.U.D.—Juris Utriusque Doctor (Lat.), doctor of both laws (canon and civil)
jud.—judicial
Judg.—Judges (Bible)

K

K—kalium (Lat.), potassium; king (chess)
K, k.—kilogram; king
K.—Kelvin
k.—kilo, thousand
ka—kathode *or* cathode
Kan., Kans., Kas.—Kansas
KB—king's bishop (chess)
K.B.—King's Bench; Knight Bachelor; Knight of the Bath
K.B.E.—Knight (Commander of the Order) of the British Empire
KBP—king's bishop's pawn (chess)
K.C.—King's Counsel; Knights of Columbus
kc—kilocycle
K.C.B.—Knight Commander of the Bath
K.C.I.E.—Knight Commander (of the Order) of the Indian Empire
K.C.M.G.—Knight Commander of St. Michael and St. George
K.C.S.I.—Knight Commander of the Star of India
K.C.V.O.—Knight Commander of the Victorian Order
KEV, Kev—thousand electron volts
K.G.—Knight of the Garter
kg—kilogram
Ki.—Kings (Bible)
kilo.—kilogram; kilometer
KKK—Ku Klux Klan
K Kt—king's knight (chess)
K Kt P—king's knight's pawn (chess)
KLM—Royal Dutch Airlines
km—kilometer
kO—knockout
K. of P.—Knights of Pythias
KP—king's pawn (chess); kitchen police, potato peels, or cooks
K.P.—Knight of St. Patrick; Knights of Pythias
KR—king's rook (chess)
Kr—krypton
KRP—king's rook's pawn (chess)

K.T.—Knight of the Thistle; Knight Templar
Kt.—Knight
kt.—carat
kv.—kilovolt
kw—kilowatt
K.W.H., kw-h, kw-hr—kilowatt-hour
Ky.—Kentucky

L

£, L, l.—libra (Lat.), pound
L., l.—lake; left; length; liber (Lat.), book; lira
l., l—liter
l., ll.—line; lines
La—lanthanum
La.—Louisiana
Lab.—Labrador
lab.—laboratory
Lam.—Lamentations
lang.—language
Lat.—Latin
lat.—latitude
lb—libra (Lat.), pound
LC—landing craft (following letter specifies type, for example, LCI Landing Craft Infantry)
L.C.—Library of Congress
l.c.—loco citato (Lat.), in the place cited; lower case (print.)
LD—lethal dose; Low Dutch
leg.—legal; legend; legato (It.), in a smooth manner (music); legislative; legislature
legis.—legislation; legislative, legislature
Lev.—Leviticus
LG—Low German
LH—luteinizing hormone
L.H.D.—lit(t)erarum Humaniorum Doctor, *or* In Litteris Humanioribus Doctor (Lat.), Doctor of Humanities
L.I.—Long Island
Li—lithium
lib.—liberal; librarian; library
lieut.—lieutenant
ling.—linguistics
Linn.—Linnaeus; Linnaean
liq.—liquid; liquidation; liquor
lit.—literally; literary; literature
Lit.B., Litt.B.—Lit(t)erarum Baccalaureus (Lat), Bachelor of Letters *or* Literature
Lit.D., Litt.D.—Lit(t)erarum Doctor (Lat.); Doctor of Literature
LL—Late Latin; Low Latin
LL.B.—Legum Baccalaureus (Lat.), Bachelor of Laws
LL.D.—Legum Doctor (Lat.), Doctor of Laws
LL.M.—Legum Magister (Lat.), Master of Laws
loc. cit.—lococitato (Lat.), in the place cited
log.—logarithm
Lon., Lond.—London
lon., long.—longitude
LOOM—Loyal Order of Moose
loq.—loquitur (Lat.), he, or she, speaks
L.R.A.M.—Licentiate of the Royal Academy of Music
L.R.C.P.—Licentiate of the Royal College of Physicians
L.R.C.S.—Licentiate of the Royal College of Surgeons
LS—landing ship (following letter specifies type, for example, LST, Landing Ship Tank)
l.s.—locus sigilli (Lat.), place of the seal
L.S.A.—Licentiate of the Society of Apothecaries
LSD—lysergic acid diethylamide
L.S.D., ls.d., l.s.d.—librae, solidi, denarii (Lat.), pounds, shillings, and pence
lt.—lieutenant
Ltd., ltd.—limited
Lu—lutetium
Luth.—Lutheran
Lw—lawrencium

M

M—magnitude; thousand
M.—Majesty; Monsieur (Fr.), miter
m.—male; mark (German money); married; meridian; meridies (Lat.), noon; meter; mile; minute; month
MA—Maritime Administration; mental age
M.A.—Magister Artium (Lat.), Master of Arts
ma, ma., mA—milliampere
Mac., Macc.—Maccabees
Maced.—Macedonia(n)
mach.—machine; machinist
maj.—major
Mal.—Malachi
Man.—Manitoba
MAP—Military Assistance Program
Mar., Mar—March
mas., masc.—masculine
Mass.—Massachusetts
math.—mathematician; mathematics
MATS—Military Air Transport Service
Matt.—Matthew
M.B.—Medicinae Baccalaureus (Lat.), Bachelor of Medicine
M.B.A.—Master of Business Administration
MBS—Mutual Broadcasting System
M.C.—Medical Corps; Master of Ceremonies; Member of Congress
mc—megacycle
M.D.—Medicinae Doctor (Lat.), Doctor of Medicine; Medical Department
Md—mendelevium
Md.—Maryland
M.D.S.—Master of Dental Surgery
mdse.—merchandise
ME, ME., M.E.—Middle English
M.E.—Methodist Episcopal; mining or mechanical, engineer
Me.—Maine
mech.—mechanical; mechanics
med.—medical; medicine; medieval
Medit.—Mediterranean
M.E.E.—Master of Electrical Engineering
mem.—memento (Lat.), remember, memorandum
mep—mean effective pressure
Messrs.—Messieurs (Fr.), gentlemen
metal.—metallurgy
meteorol.—meteorology
Meth.—Methodist
MEV, Mev—million electron volts
mf—mezzo forte (It.), moderately loud (music); millifarad
mf, mfd—microfarad
M.F.A.—Master of Fine Arts
mfg.—manufacturing
mfr.—manufacture; manufacturer
MG—Military Government
Mg—magnesium
mg, mg., mgm—milligram
MGB—Ministerstvo Gosudarstvennoi Bezopasnosti (from the Russian), the Soviet Ministry of State Security
mgr.—manager; monsignor
MHG, M.H.G.—Middle High German
M.I.—Military intelligence
mi—mile; mill
Mic.—Micah
Mich.—Michigan
M.I.E.E.—Member of the Institution of Electrical Engineers
mil., milit.—militia; military
M.I.Mech.E.—Member of the Institution of Mechanical Engineers
M.I.Min.E., M.I.M.E.—Member of the Institution of Mining Engineers
min.—Minute(s)
min.—mineralogy; minimum; mining
Minn.—Minnesota
M.Inst.C.E.—Member of the Institution of Civil Engineers
misc.—miscellaneous
Miss.—Mississippi
M.I.T.—Massachusetts Institute of Technology
ML, M.L.—Medieval, *or* Middle, Latin
M.L.—Magister Legum (Lat.), Master of Laws; Medieval, *or* Middle, Latin
ml, ml.—milliliter
MLA—Modern Language Association
MLG, M.L.G.—Middle Low German
M. Lit(t).—Magister Lit(t)erarum (Lat.), Master of Letters
Mlle.—Mademoiselle (Fr.), Miss
MM—Messieurs (Fr.), gentlemen; (Their) Majesties
mm—millimeter(s); millia (Lat.), thousands
M.M.E.—Master of Mining, or Mechanical, Engineering
Mme.—Madame (Fr.), Madam
Mn—manganese
MO, m.o.—medical officer; money order
Mo—molybdenum
Mo.—Missouri
mo.—month(s)
mod.—moderate
Moham.—Mohammedan
Mon.—Monday; Monsignor
Mont.—Montana
MOS—military occupational specialty (duty classification by serial number)
MP—military police
M.P.—Member of Parliament
mp—mezzo piano (It.), moderately soft (music)
MPH, mph—miles per hour
Mr., Mr—Mister
MRA—Moral Re-Armament
MRP—Mouvement Républicain Populaire (Fr.), Popular Republican Movement
Mrs.—Mistress
MS, Ms, ms, ms.—manuscript
M.S., M.Sc.—Master of Science
msgr.—monsignor
m.s.l.—mean sea level
MSS, MSS., mss, mss.—manuscripts
MST—Mountain Standard Time
M.S.W.—Master of Social Work
mt.—mount; mountain
MTO—Mediterranean Theater of Operations
Mt. Rev.—Most Reverend
mts.—mountains
mu—micron
mus.—museum; music; musician
Mus.B., Mus.Bac.—Musicae Baccalaureus (Lat.), Bachelor of Music
Mus. D.—Musicae Doctor (Lat.), Doctor of Music
MVA—Missouri Valley Authority
MVD—Ministerstvo Vnutrennikh Del (from the Russian), the Soviet Ministry of Internal Affairs
M.V.O.—Member of the (Royal) Victorian Order
myth., mythol.—mythology

N

N—nitrogen
N, N., n—north, northern
N., n.—navy; noon; normal (solution)
n.—natus (Lat.), born; neuter; note; noun
Na—natrium (Lat.), sodium
NAACP—National Association for the Advancement of Colored People
NAB—National Association of Broadcasters
NAD—National Academy of Design
Nah.—Nahum
NAM—National Association of Manufacturers
NAS—National Academy of Sciences
NASA—National Aeronautics and Space Administration
nat.—national; native; natural
natl.—National
NATO—North Atlantic Treaty Organization
NATS—Naval Air Transport Service

naut.—nautical
nav.—naval; navigation
N.B.—New Brunswick
N.B., n.b.—nota bene (Lat.), mark well, take notice
Nb—niobium
NBA—National Basketball Association; National Boxing Association
NBC—National Broadcasting Company
NBS—National Bureau of Standards
NC—Nurse Corps
N.C.—North Carolina
NCAA—National Collegiate Athletic Association
NCCJ—National Conference of Christians and Jews
NCO, n.c.o.—noncommissioned officer
N.D.—North Dakota
N.D., n.d.—no date
Nd—neodymium
N.Dak.—North Dakota
N.E.—New England
Ne—neon
NEA—National Education Association
Neb., Nebr.—Nebraska
NED—New English Dictionary (the Oxford English Dictionary)
neg.—negative
Neh.—**Nehemiah**
neur., neurol.—neurology
Nev.—Nevada
Newf.—Newfoundland
New M.—New Mexico
New Test.—New Testament
N.F.—Newfoundland; Norman French
NFL—National Football League
Nfld.—Newfoundland
NG—National Guard
N.G., n.g.—No good
N.H.—New Hampshire
NHA—National Housing Administration
NHG, NHG., H.H.G.—New High German
Ni—nickel
NIH—National Institutes of Health
NIRA—National Industrial Recovery Administration
N.J.—New Jersey
NKVD—from the Russian for People's Commissariat for Internal Affairs, the secret police preceding OGPU
NL, N.L.—New Latin
n.l.—new line (print.); non licet (Lat.), it is not permitted or it is not lawful; non liquet (Lat.), it is not clear
NLRB—National Labor Relations Board
N.M., N.Mex.—New Mexico
NMU—National Maritime Union
No—nobelium
No.—north; northern
No., no.—numero (Lat.), number
noncom.—noncommissioned officer
non obst.—non obstante (Lat.), notwithstanding
non pros.—non prosequitur (Lat.), he does not prosecute
non seq.—non sequitur (Lat.), it does not follow
Nor.—Norman; North
NORAD—North American Air Defense Command
Nov., Nov—November
N.P.—nisi prius (Lat.), no protest (banking), Notary Public
Np—neptunium
n.p. or d.—no place or date
NRA—National Recovery Administration
NRAB—National Railroad Adjustment Board
N.S.—New Style (calendar); Nova Scotia
NSC—National Security Council
NSF—National Science Foundation
NSPCA—National Society for the Prevention of Cruelty to Animals
NSPCC—National Society for the Prevention of Cruelty to Children
NT., N.T.—New Testament
Num., Numb.—Numbers (Bible)
NWLB—National War Labor Board
N.W.T.—Northwest Territories
N.Y.—New York
NYA—National Youth Administration
N.Y.C.—New York City

O

O—oxygen
o—ohm
o.—ocean; order
OAS—Organization of American States
Obad.—Obadiah
O.B.E.—Officer (of the Order) of the British Empire
obit.—obituary
obj.—object, objective
obs.—observation; obsolete
OCD—Office of Civilian Defense
OCDM—Office of Civil and Defense Mobilization
OCS—Officer Candidate School
Oct., Oct—October
oct., 8vo.—octavo (print.)
O.D.—Officer of the Day; ordinary seaman; overdraft or overdrawn
ODT—Office of Defense Transportation
OE, O.E.—Old English
OECD—Organization for Economic Co-operation and Development
OED—Oxford English Dictionary
OEO—Office of Economic Opportunity
OES—Office of Economic Stabilization
O.E.S.—Order of the Eastern Star
OF, O.F.—Old French
O.F.M.—Order of Friars Minor
OHG, O.H.G.—Old High German
O.H.M.S.—On His (Her) Majesty's Service
O.K., OK—correct *or* approved
Okla.—Oklahoma
Old Test.—Old Testament
O.M.—Order of Merit
ON, O.N.—Old Norse
Ont.—Ontario
O.P.—Order of Preachers (Dominicans)
op. cit.—opere citato (Lat.), in the work cited
Ore., Oreg.—Oregon
orig.—original; originally
ornith.—ornithology
OS, O.S.—Old Saxon
O.S.—Old Style (calendar)
Os—osmium
O.S.A.—Order of St. Augustine
O.S.B.—Order of St. Benedict
O.S.F.—Order of St. Francis (Franciscan, or Capuchin, Order)
OSRD—Office of Scientific Research and Development
OSS—Office of Strategic Services
O.T.—Old Testament
OTS, O.T.S.—Officers' Training School
oz.—ounce (It. abbrev. of onza)

P

P—phosphorus
P., p.—pater (Lat.), father; pawn (chess); pere (Fr.) father; post (Lat.), after; president; priest; prince
p—piano (It.), softly (music)
p.—page; part; participle; penny; per (Lat.), by
PA—public address (system); power of attorney
Pa—protactinium
Pa.—Pennsylvania
PAC—Political Action Committee
Pac., Pacif.—Pacific
PAL—Police Athletic League

QMG—quartermaster general
QP—queen's pawn (chess)
Q.P., q.pl.—quantum placet (Lat.), as much as you please
qq.v.—quae vide (Lat.), which see (plural)
QR—queen's rook (chess)
qr.—quarter
QRP—queen's rook's pawn (chess)
qs—quantum sufficit (Lat.), as much as may suffice
qt—quart
q.t.—quiet (slang)
Que.—Quebec
ques.—question
quot.—quotation
q.v.—quod vide (Lat.), which, *or* whom, *see*

R

R—radical (hydrocarbon radical, chem.); radius; rates (math.); rook (chess)
R, r—resistance (elec.); royal; ruble
R.—Reaumur
R., r.—rabbi; rector; regina; river; road; royal; rupee
r.—radius; reigned; runs (baseball)
R.A.—Rear Admiral; Royal Academy, *or* Academician; Royal Artillery
Ra—radium
RAAF—Royal Australian Air Force
RAF—Royal Air Force
R.A.M.—Royal Academy of Music; Royal Arch Mason
Rb—rubidium
RBC—red blood cells; red blood count
r.b.i., rbi, RBI—run(s) batted in (baseball)
R.C.—Red Cross; Reserve Corps; Roman Catholic
RCAF—Royal Canadian Air Force
RCMP—Royal Canadian Mounted Police
R.D.—Rural Delivery
Rd., rd.—road
R.E.—real estate; Reformed Episcopal; Right Excellent; Royal Engineers
Re—rhenium
REA—Rural Electrification Administration
rec.—receipt, recipe, record, recorded
rect.—receipt; rector
ref.—referee; reference; reformed
Ref. Ch.—Reformed Church
reg.—regent; regiment; region; register; registrar; regular; regulation
Rep., Repub.—Republic; Republican
Rev.—Revelation (Bible); Reverend
Rev. Ver.—Revised Version (Bible)
RF—radio frequency
RFC—Reconstruction Finance Corporation
R.F.D.—Rural Free Delivery
Rh—rhodium
Rh factor—Rhesus factor (agglutinogen often present in human blood, biochem.)
R.I.—Rhode Island
RIBA—Royal Institute of British Architects
R.I.P.—requiescat in pace (Lat.), let him, *or* her, rest in peace
rit., ritard.—ritardando (It.), more slowly (music)
riv.—river
R.M.S.—Railway Mail Service
R.N.—Registered Nurse; Royal Navy
Rn—radon
RNA—ribonucleic acid
R.N.R.—Royal Naval Reserve
R.N.V.R.—Royal Naval Volunteer Reserve
Rom.—Roman; Romans (Bible)
ROTC—Reserve Officers Training Corps
R.P.—Regius Professor (Lat.), Royal Professor; Reformed Presbyterian
RPF—Rassemblement du Peuple Français (Fr.), Reunion of the French People
rpm—revolutions per minute
rps—revolutions per second
R.R.—Railroad; Right Reverend
RRB—Railroad Retirement Board
R.S.A.—Royal Society for Antiquarians; Royal Scottish Academy
RSFSR—Russian Socialist Federated Soviet Republic
RSV—Revised Standard Version (Bible)
R.S.V.P., r.s.v.p.—répondez s'il vous plait (Fr.), answer if you please
Rt. Hon.—Right Honorable
Rt. Rev.—Right Reverend
Ru—ruthenium
R.V.—Revised Version (Bible)
Ry.—Railway

S

S—sulfur
S, S., s.—south
S.—Sabbath; Samuel (Bible); Saturday; Saxon; Seaman; September; Signor; Sunday
S., s.—saint, soprano; southern
s.—second; semi-; shilling; silver; sire; solo; son
S.A.—Salvation Army
SAC—Strategic Air Command
Sam., Saml.—Samuel
Sans., Sansk.—Sanskrit
SAR—Sons of the American Revolution
S.A.S.—Societatis Antiquariorum Socius (Lat.), Fellow of the Society of Antiquaries
Sask.—Saskatchewan
Sat.—Saturday; Saturn
S.B.—Scientiae Baccalaureus (Lat.), Bachelor of Science
Sb—stibium (Lat.), antimony
SBA—Small Business Administration
SC—Security Council (United Nations)
S.S.—Sanitary Corps; Signal Corps; South Carolina; Supreme Court
Sc—scandium
Sc.—science; Scotch; Scots; Scottish
sc.—scale; scene; science; screw
s.c.—small capital (printing)
Scan., Scand.—Scandinavia(n)
SCAP—Supreme Commander Allied Powers
Sc.B.—Scientiae Baccalaureus (Lat.), Bachelor of Science
Sc.D.—Scientiae Doctor (Lat.), Doctor of Science
sch.—school
sci.—science; scientific; scientist
Sc.M.—Scientiae Magister (Lat.), Master of Science
Scot.—Scotch; Scotland; Scottish
scr.—scruple (pharm.)
Script.—Scripture
sculp., sculp.—sculptor; sculptural; sculpture
S.C.V.—Sons of Confederate Veterans
s.d.—sine die (Lat.), without day *or* without appointing a day
S.Dak.—South Dakota
Se—selenium
SEATO—Southeast Asia Treaty Organization
SEC—Securities and Exchange Commission
sec—secant; second(s)
sec.—secretary
sect.—section
secy.—secretary
sen.—senate; senator
Sep.—Septuagint
Sept., Sept—September
seq., seqq.—sequentia (Lat.), following
serg., sergt.—sergeant
sf., sfz.—sforzando (It.), sudden strong accent (music)
SFSR—Soviet Federated Socialist Republic
sg, s.g.—senior grade
s.g.—specific gravity
sgt.—sergeant
SHAEF—Supreme Headquarters, Allied Expeditionary Forces
SHAPE—Supreme Headquarters Allied Powers (Europe)
Si—silicon
Sig., sig.—signature; signor (It.), mister
sin—sine
sing.—singular
S.J.—Society of Jesus
S.J.D.—Scientiae Juridicae Doctor (Lat.), Doctor of Juridical Science
Slav.—Slavic; Slavonian; Slavonic
S.M.—Scientiae Magister (Lat.), Master of Science; Sergeant Major; Soldier's Medal; State Militia
Sm—samarium
Sn—stannum (Lat.), tin
So.—South; Southern
soc.—society
S. of Sol.—Song of Solomon
sol.—solicitor
sop.—soprano
SOS—Service of Supply; the signal of distress is not an abbreviation but a prescribed code
SP—shore patrol or shore police (U.S. Navy)
sp.—special; species; specific; specimen; spelling; spirit
s.p.—sine prole (Lat.), without issue
SPARS—Women's Coast Guard Reserves (from the Coast Guard motto, "Semper Paratus—Always Ready")
SPCA—Society for the Prevention of Cruelty to Animals
spec.—special
sp gr—specific gravity
sp ht—specific heat
SPR—Society for Psychical Research
Sq.—Squadron
sq.—square; sequence
SR—Sons of the Revolution
Sr—strontium
Sr.—Senior; Señor; Sir
SRO—standing room only
SS, S.S.—Schutzstaffel (Ger.), protective force (a military unit of the Nazis)

Tutti	(It.)	All (players)
Una corda	(It.)	Use of soft pedal on piano to achieve muting
Veloce	(It.)	Fast
Vite	(F.)	Fast
Vivace	(It.)	Quick, vivacious
Volti subito	(It.)	Turn (the page) quickly(*v.s.*)

Purpose of This Book

The purpose of this *Handbook* is to provide a quick, easy-to-use guide to grammar, correct usage, and punctuation. It is intended for use in the business office, in the home, and in school. Secretaries, writers, teachers, and students, will find it especially useful.

The *Handbook* is divided into 25 sections or chapters each covering an important aspect or problem in English. The book is designed so that it may be used as a step-by-step complete self-study English review. But, in addition, it is a complete reference handbook for day-to-day use whenever a question arises concerning English usage or punctuation.

Special Features

Complete Table of Contents

Starting on page 1, is a detailed table of contents for use in finding subtopics within each chapter.

Clear Explanations and Examples

Throughout the book, each explanation is followed by one or more specific examples. The examples clarify the principles and rules of good English usage.

TABLE OF CONTENTS

1. THE PARTS OF SPEECH I 2

The Parts of Speech • Nouns—Words Used as Names • Pronouns—Substitutes for Nouns • Verbs—Action and Linking Verbs • Verb Phrases—Principal and Auxiliary Verbs

2. THE PARTS OF SPEECH II 3

Adjectives • Adverbs • Position of the Adverb • Prepositions—Words That Show a Relationship • Conjunctions—Connecting Words • Interjections—Exclamatory Words • Function of Words

3. THE SENTENCE-SUBJECT AND PREDICATE 4

Subject and Predicate • Complete Subject and Complete Predicate • Simple Subject and Simple Predicate • Compound Subject and Compound Predicate • Sentence Fragments

4. SENTENCE PATTERNS 5

Kinds of Sentences • Inverted Order • Interrogative Sentence Patterns • Imperative and Exclamatory Sentence Patterns • Sentences that Begin With "There,"

5. NOUNS—CAPITALIZATION 6

Kinds of Nouns • Capitalization of Proper Nouns • Special Uses of Capital Letters • Plural Forms of Nouns

6. PRONOUNS 8

Kinds of Pronouns • Personal Pronouns • Compound Personal Pronouns • Interrogative Pronouns • Demonstrative Pronouns • Indefinite Pronouns • Relative Pronouns • Pronouns Used as Adjectives • Possessive Forms of Pronouns

AGREEMENT OF PRONOUN WITH ANTECEDENT 10

Agreement of Pronoun and Antecedent In Gender • Gender and Number of Indefinite Pronouns • Agreement of Pronoun With a Compound Antecedent • Agreement of Pronoun With Collective Nouns • Agreement of Pronoun and Antecedent in Person • Vague Antecedents • Adjective-Pronoun Agreement

8. COMPLEMENTS OF VERBS 12

The Direct Object • Transitive and Intransitive Verbs • The Indirect Object • Linking Verbs • Complements of Linking Verbs

9. CASE OF NOUNS AND PRONOUNS 15

Case of Nouns • Nominative Case • Objective Case • Case of Pronouns • Nominative Case of Pronouns • Objective Case of Pronouns • Possessive Case of Nouns • Use of the Possessive—Special Forms • Possessive Case of Pronouns

10. MODIFIERS—ADJECTIVES 15

Use of Adjectives • "Overworked" Adjectives • Kinds of Adjectives • Predicate Adjectives • Nouns Used as Adjectives • Comparison of Adjectives • Degree Of Comparison • Irregular comparison of adjectives • Adjectives Not Compared

11. MODIFIERS—ADVERBS 17

Forms of Adverbs • Interrogative Adverbs • Yes, No, and Not • Adverbs of Degree • Nouns Used as Adverbs • Comparison of Adverbs • Irregular Comparison of Adverbs

12. VERBS: PRINCIPAL PARTS 18

Regular and Irregular Verbs • Verbs Added to the Language • Troublesome Verbs • Principal Parts of Troublesome Verbs • Six Confusing Verbs • "Lie" and "Lay" 108 • "Sit" and "Set," • "Rise" and Raise

13. Table Of 20

The Six Tenses • The Simple Tenses • The Perfect Tenses • The Verb "to Be" • Progressive Forms of Verbs • Emphatic Forms of the Verb • The Use of "Shall" and "Will" "Should" • "Would," • Mixed Tenses • The [illegible]

14. VERBS: VOICE AND MOOD 24

Active and Passive Voice • How The Passive Voice is Formed • Six Tenses of the Verb "Call"—Passive Voice • Six Tenses of the Verb "Know"—Passive Voice • When to Use the Passive Voice • Mood of Verbs • Subjunctive Forms of Verb "To Be," • Uses of the Subjunctive Mood

15. AGREEMENT OF SUBJECT AND VERB 26

Agreement in Person and Number • Agreement of Verb With Compound Subject • Agreement of Verb With Collective Nouns • Intervening Phrases • Agreement of Subject With Contractions • Agreement of Verb With Indefinite Pronouns • Special Cases of Agreement

16. PREPOSITIONAL PHRASES 27

Adjective Phrases • Commonly Used Prepositions • Adverbial Phrases • Compound or Phrasal Prepositions • Pronouns Used as Objects of Prepositions • The Correct Use of Prepositions • Position of the Preposition

17. COMPOUND SENTENCES 29

Kinds of Clauses • The Simple Sentence • The Compound Sentence • Coordinate Conjunctions • Use of the Semicolon in the Compound Sentence • The Comma Fault • The Run-on Sentence • Transitional Words

18. COMPLEX SENTENCES—ADJECTIVE CLAUSES 31

The Complex Sentence • Kinds of Subordinate Clauses • Adjective Clauses • Adjective Clauses Introduced by Relative Adverbs • "Who" and "Whom" in Subordinate Clauses • Restrictive and Non-restrictive Clauses

19. ADVERBIAL CLAUSES 32

Subordinate Conjunctions • Words Used as Subordinate Conjunctions • Kinds of Adverbial Clauses • Clauses of Degree • Position of the Adverbial Clause • Clauses of Comparison • "As-As" and "Not So-As" in Comparisons • Incorrect Use of "Like" in Clauses

20. NOUN CLAUSES 34

Function of the Noun Clause • Omission of the Connecting Word • The Noun Clause Used as an Appositive • The Noun Clause and the Introductory "It," • Words That Introduce Noun Clauses

21. PARTICIPLES 35

The Nature of Verbals • Forms of the Participle • The Participle Phrase • Modifiers of Participles • Complements of Participles • Participles Used in Independent Constructions • Dangling Participles • Misplaced Modifiers • Participles Used in Verb Phrases

22. GERUNDS 37

1. THE PARTS OF SPEECH—I

When we speak and write, we use words to express our thoughts and ideas. The English language has thousands of words, but all of them fall into eight groups or classes known as the *parts of speech*. The following names have been given to the *parts of speech*:

Nouns **Pronouns** **Verbs**
Adjectives **Adverbs** **Prepositions**
Conjunctions **Interjections**

Each group has its special work to do. *Nouns* [illegible] places, and things. [illegible] are words that help express the ideas [illegible] and [illegible] connect words or groups of words.

Words, then, are the tools of communica-

[illegible] use, but many words do.

NOUNS

WORDS USED AS NAMES

[illegible]

Persons:	soldier—Jane—friend
Animals:	elephant—mouse—zebra
Places:	home—Chicago—camp
Objects:	desk—picture—computer
Substances:	iron—air—water—food
Qualities:	kindness—heroism—beauty
Actions:	climbing—cooking—reading
Measures:	yeast—pound—inch—day

Nouns Used in Sentences

The words in *italics* in the following sentences are nouns.

The *soldier* is wearing his new *uniform*.

Chicago is a great industrial *city*.

Iron is a useful *metal*.

PRONOUNS

SUBSTITUTES FOR NOUNS

You will often find it necessary to refer to a *name* a number of times in a single sentence. This repetition usually results in a sentence that is very awkward or monotonous. You can readily see what might happen from the following illustration:

Jack went to *Jack's* closet and took out *Jack's* new suit because *Jack* was going to a dance given by *Jack's* company.

In this sentence the word *Jack* is stated five times. This awkward repetition of the word *Jack* and *Jack's* could be avoided by substituting another part of speech for these words.

Jack went to *his* closet and took out *his* new suit because *he* was going to a dance given by *his* company.

The words *his* and *he* used in the revision of the sentence are called **pronouns**. They are substitutes for the noun *Jack*. The prefix **pro** in the word pronoun means *for a noun, or in place of a noun*. The word **pronoun** simply means *for a noun, or in place of a noun*.

In the following sentences the pronouns and the nouns to which they refer are underlined.

Mary and Ann [illegible]
The men forgot their tickets.
[illegible]

Commonly Used Pronouns

[illegible] common use. For that reason a list of pronouns [illegible] familiar with most of them.

[illegible]	[illegible]	[illegible]	several
[illegible]	[illegible]	[illegible]	[illegible]
me	[illegible]	[illegible]	[illegible]
[illegible]	[illegible]	all	everybody
[illegible]	they	any	[illegible]
[illegible]	[illegible]	[illegible]	[illegible]
[illegible]	theirs	[illegible]	[illegible]
[illegible]	[illegible]	[illegible]	[illegible]
yours	which	[illegible]	everyone
your	what	[illegible]	one
[illegible]	[illegible]	[illegible]	[illegible]
[illegible]	[illegible]	[illegible]	[illegible]
[illegible]	[illegible]	some	[illegible]

VERBS

ACTION AND LINKING VERBS

The **verb** is the most important part of speech. *It is the only part of speech that can make a statement about the subject.* The subject is the part of a sentence that names the person, place, or thing that is talked about. If you wanted to write or say something about a *hunter*, you could not complete your statement without the use of a verb. You must have a verb in every sentence. The following illustration will make this clear.

The hunter *shot* the deer.
(The verb is the word *shot*.)

If you take the verb *shot* out of the sentence, you have left the words *the hunter, the deer* but you do not have a complete thought. You need a verb to state what the hunter did to the deer. When you supply a verb, you have a complete statement.

Most of the verbs in common use express **action.** The action is not always physical action like the action expressed in the sentence *The hunter shot the deer.* In the sentence, *I solved the problem,* the meaning of the verb *solved* implies both mental and physical activity.

In the sentence, *The engineer built a bridge,* all the types of activity that went on until the bridge was completed are implied in the verb *built.* The same would be true of the verb *made* in the sentence, *The chef made a cake.* All the verbs in the following sentences express action of some kind.

The painter *decorated* the hall.
I *pricked* my finger.
The manager *wrote* a letter.
The president *called* a meeting.

A small but very important group of verbs *do not* express action. The verb **to be** is the most important verb in this group. The most common forms of the verb *to be* include *is, are, was* and *were.* Since the verb *to be* does not express action, it must have another function in the sentence. With the help of some other word or words, it makes a statement about the *condition* of the subject or the person, place, or thing that is talked about.

In the sentence, *Henry is ill,* the verb *is* does not express action of any kind, but it serves two purposes in the sentence. With the help of the word *ill* it makes a statement about the subject, *Henry.* It also serves to connect the word *ill* with *Henry.* The sentence really means *ill Henry,* but you need the verb *is* to make the statement a complete sentence. Because the verb has this connecting function, it is called a **linking verb.**

From the following illustrations you will see that the verb *to be* with the help of some other word describes or explains the condition of the [illegible] in some way. The verb *is* is a form of [illegible] *to be.*

My uncle *is* a famous surgeon.
(describes uncle as surgeon)
Mother *is* very happy.
(describes the condition of mother)
Her dress *is* beautiful.
(describes dress)

VERB PHRASES

PRINCIPAL AND AUXILIARY VERBS

A *verb* is not always a single word. *When the verb is composed of two or more words, it is called a* **verb phrase.** The verb form at the

end of the verb phrase is always the *principal verb*. It is the verb form that indicates the nature of the action if the verb expresses action. The other verb forms in the verb phrase are called *auxiliary verbs* or *helping verbs*.

The men *work* in the fields.
The men *are working* in the fields.
The men *have been working* in the fields.
The men *must have been working* in the fields.

In the first sentence the verb consists of one word, the verb *work*. The verb *work* tells the kind of action that is going on. The verb in the second sentence consists of two words. The principal verb is *working*. The auxiliary, or helping verb is *are*. The verb phrase is *are working*. The verb phrase in the third sentence is *have been working*. The principal verb is *working*, and the two helping verbs are *have been*. The verb phrase in the fourth senpence is *must have been working*. The principal verb is *working* and the three helping verbs are *must have been*.

One of the first things you should learn to do in your study of grammar is to be able to identify the verb or the verb phrase in any sentence. Some persons have trouble in deciding what words belong in the verb phrase. You will never encounter this difficulty if you become familiar with the commonly used auxiliary verbs. A list of these auxiliary verbs follows. You should refer to this list constantly until you become familiar with the verbs that help make verb phrases.

Commonly Used Auxiliary Verbs

am	have been	could
is	had been	would
are	has been	should
was	shall	must
were	will	should have
will be	do	would have
shall be	did	must have
could be	does	should have been
have	may	could have been
has	can	must have been
had	might	

Verb Phrases Used in Sentences

In the following sentences, the words in *italics* are verb phrases.

You *will receive* the money.

He *was talking* with the manager.

The building *was destroyed* by fire.

2. THE PARTS OF SPEECH—II

Chapter One explained how *nouns*, *pronouns*, *verbs*, and *verb phrases* function in English. With these three parts of speech you can build the framework of any sentence. But it is only a framework. The sentence that contains only a noun or a pronoun and a verb is not a very interesting sentence. It does not give very specific information, or present a very interesting picture. Such sentences become very monotonous if repeated often, as you will readily see from the following illustrations.

Birds fly. Dogs bark.
Men work. She knits.
He swims. They sing.

ADJECTIVES-Modifiers

You will generally find it necessary to add other parts of speech to a sentence in order to make the meaning clearer and more exact. You can add words to nouns and pronouns that tell *what kind*, *what color*, *which one*, etc. If you wanted to tell about the hat a woman was wearing, you would describe the hat in some way. You might say that it was a *large* hat, an *old* hat, a *red* hat, depending upon the meaning which you intended to convey.

When you add one or more of these *describing words* to hat, you give a clearer picture of what the hat is like. *Words which add to a idea to nouns and pronouns are called* **adjectives.**

The adjective not only describes by telling what kind or what color, but it may limit the meaning by telling *which* hat, *whose* hat, or the *number* of hats. For example, you might limit the meaning by saying *that* hat, *Fred's* hat, *two* hats, or *several* hats.

In grammar, we say that the adjective *modifies* the meaning of the noun or pronoun.

The word **modify** means *to change the meaning slightly* by *describing* or *limiting* the meaning to a certain kind or to a certain number.

When we speak of a hat as an *attractive* hat we are limiting the meaning because we are leaving out all the hats that are not attractive. If a word describes, limits, or restricts the meaning in any way, it is called a **modifier.** This is an important term that is frequently used in grammar.

The words *a*, *an*, and *the* are adjectives although in grammar they are called **articles.** The word *the* is called the *definite* article. The words *a* and *an* are called the *indefinite articles*. When we say, *the* book on *the* table, we are pointing out a particular book on a particular table. When we say, *I have a book*, no specific or particular book is indicated.

Adjectives Modifying Nouns

The following examples show how adjectives modify nouns and how their use makes the meaning clearer or more explicit.

long road	*good* friend	*rainy* day
rusty nail	*worthy* cause	*rapid* typist
old piano	*steep* hill	*essential* parts

ADVERBS—Modifiers

Another interesting group of words that serve as modifiers are **adverbs.** The prefix *ad* in the word adverb means *to, toward, or in addition to*. An adverb is a word that you *add to a verb to modify or expand the meaning of the verb*. Adverbs may also modify adjectives or other adverbs, but at present we shall consider the adverb as a modifier of the verb. A later unit will give you the other uses of an adverb.

Adverbs are easy to identify because they usually answer the questions *when*, *where*, *how*, *in what manner*, or *to what extent* or *degree*. The following illustrations will make this clear.

You must set up the copy *now*.
(*Now* tells when you must set up.)
We put the desk *there*.
(*There* tells where it was put.)
She walks *gracefully*.
(*Gracefully* tells how she walks.)

When we say, *The paper is issued weekly*, the adverb *weekly* introduces an additional idea of *time*. The adverb *weekly* makes the meaning explicit because we know *how often* or *when* the paper is issued. When we say, *Dandelions grow everywhere*, we have introduced the idea of *place*, or we tell *where* the dandelions grow. In the sentence, *We walked farther into the forest*, we have added the idea of *extent* or the *degree to which*. The adverbs in the preceding sentences are called adverbs of *time*, *place*, *manner*, or *degree*.

POSITION OF THE ADVERB

Although an adverb often modifies the verb in the sentence, it is not always placed directly after the verb. Sometimes the adverb introduces the sentence. In this position it gives more emphasis. At times the adverb is placed between the parts of the verb phrase. Study the following sentences carefully. Note the position of the adverb.

Sometimes I take a walk in the woods.
Jack *usually* leaves the house at seven.
We added a room to our house *recently*.
I have *always* admired him.

PREPOSITIONS

Words That Show a Relationship

Another important part of speech is the **preposition.** A preposition is not a modifier. The only parts of speech that are modifiers are adjectives and adverbs. The preposition has a different function to perform in the sentence. *A preposition shows the relationship that exists between certain words in a sentence.*

The word *preposition* comes from two Latin words which mean *placed before*. A preposition is a word that is *placed before some noun or pronoun*. It shows the relationship that exists between that noun or pronoun and some other word in the sentence. When we say "a bag *for* the mail," the word *for* is a preposition. It shows a relationship between *bag* and *mail*. The word *mail* which follows the preposition is called the **object** of the *preposition*.

In the sentence, *The accident occurred on the bridge*, the word *on* is a preposition. The preposition *on* is followed by the word *bridge* which is called its object. The entire group of words, *on the bridge*, is called a **prepositional phrase.** The preposition *on* shows the relation between the noun *bridge* and the verb *occurred*. The entire phrase, *on the bridge* tells where the accident occurred.

We might use a number of prepositions to show the relationship between the noun *bridge* and the verb *occurred*. Each preposition would show a slightly different type of relationship, as you will readily see from the following illustrations.

The accident occurred *under* the bridge.
The accident occurred *near* the bridge.
The accident occurred *above* the bridge.
The accident occurred *behind* the bridge.
The accident occurred *beneath* the bridge.

You should become acquainted with the words that are commonly used as prepositions. A list of these prepositions is given here for your reference. Refer to this list repeatedly until you are able to identify the prepositions that are in common use.

A List of Commonly Used Prepositions

[illegible]	[illegible]	[illegible]	since
[illegible]	below	[illegible]	to
[illegible]	beneath	[illegible]	toward
[illegible]	beside	[illegible]	through
against	between	into	under
[illegible]	beyond	like	until
[illegible]	by	near	up
around	down	of	upon
as	during	out	with
before	except	on	within

CONJUNCTIONS—Connecting Words

[illegible] sentences you need words that serve to join words or groups of words. In grammar, words that have this connecting function are called **conjunctions.**

The word *conjunction* comes from two Latin words which mean *to join with* or *to join together*. In the sentence *Jane and Alice are secretaries*, the word *and* connects the two names *Jane* and *Alice*. The word *and* in this sentence is a conjunction. In the sentence, *The manager or his secretary will see you*, the word *or* connects the words *manager* and *secretary*. The word *or* in this sentence is a [illegible] sentence, *He is small but attractive*, the word *but* joins the words *small* and *attractive*.

The conjunctions that were used in the preceding illustrations were *and*, *but*, and *or*. These conjunctions always connect words or groups of words of equal rank. For the present [illegible] the use of these three conjunctions. In the following sentences the underlined words are the words joined by [illegible]

[illegible]

[illegible]

[illegible]

(Joins two verbs.)

He gave it to Mary *or* Jane.

(Joins two nouns.)

[illegible]

INTERJECTIONS—Exclamatory Words

[illegible] are used to express strong feeling or sudden [illegible] called **interjections.** The word *interjection* [illegible] *throw between*. Interjections are really thrown into the sentence to express some type of [illegible]

[illegible] grammar we call words of this type *independent*

The words classified as interjections in the preceding illustrations *are always interjections*. In addition to such words, nouns, pronouns, adjectives, and other parts of speech *are often used* as interjections.

Heavens! I cut my finger.

Good! I'm glad to hear that.

Horrors! Look at that hat!

Well? When are you going?

FUNCTION OF WORDS

One of the most important things to learn about the English language is the fact that *the same words are often used as different parts of speech*. A word may perform a certain function in one sentence and an entirely different function in another sentence.

Adjectives are commonly used as nouns, and nouns are frequently used as adjectives. The same word may function both as an adverb and as a preposition. Almost any type of word may be used as an interjection. The following sentences show how words function as different parts of speech.

The *light* in my study is poor.

(*Light* is a noun.)

Please *light* the candles.

(*Light* is a verb.)

Her hat is a *light* shade of blue.

(*Light* is an adjective.)

Father is a *fast* driver.

(*Fast* is an adverb.)

Father drives too *fast*.

(*Fast* is an adverb.)

[illegible]

(*Fast* is a verb.)

3. THE SENTENCE

When a number of words (parts of speech) are put together in such a way that they express a **complete thought,** you have a *sentence*. The sentence may consist of one word or it may consist of as many as three hundred words. The tendency in modern writing is to use short, effective sentences. Twenty words is about the average length in [illegible]

Often those who are beginning the study of language find it difficult to understand what is [illegible] Some students punctuate parts of sentences as if they were sentences because [illegible] following groups of words are sentences, although they are punctuated as if they were [illegible]

[illegible]

Enjoyed the banquet.

[illegible]

These groups of words are not sentences because they lack something that is necessary [illegible] officers did. The second group of words tells you that somebody enjoyed a banquet. But the author neglected to tell you who it was. The third group of words tells you very little. You have no way of knowing what the writer is talking about.

SUBJECT AND PREDICATE

In order to express a complete thought, a sentence must have both a *subject* and a *predicate*. These are two important grammatical terms used to describe the essential elements of a sentence.

The **subject** is the word or group of words that tells us *what or whom the speaker or writer is talking about*. The **predicate** is the part of the sentence *that makes a statement about the subject*. The *predicate* usually tells what the subject is doing, or what is happening to the subject.

Study the following sentences carefully. Note that the subjects have been separated from the predicates so that you will be able to see the relationship between the two parts more easily.

Subject	Predicates
My friend	lives in New York.
The letter	contains exciting news.
Both men	are experienced salesmen.

In the first sentence, I am talking about *my friend*. Therefore, *my friend* is the subject of the sentence. I complete the sentence by making a statement about my friend. I say that my friend *lives in New York*. The predicate is *lives in New York*. This group of words, *My friend lives in New York*, is a sentence because it expresses a complete thought. It has both a subject and a predicate. The other two sentences also have a subject and predicate.

COMPLETE SUBJECT AND COMPLETE PREDICATE

In many sentences the subject or the predicate is only a single word. But more often, the subject consists of two or more words. In grammar, we call the entire subject, regardless of the number of words, the **complete subject.** We call the entire predicate the **complete predicate.**

If the subject of a sentence is a single word, that word is the *complete subject*. If the predicate of the sentence is a single word, that word is the *complete predicate*. In the sentence, *Birds fly*, the word *birds* is the complete subject, and the word *fly* is the complete predicate.

SIMPLE SUBJECT AND SIMPLE PREDICATE

After you have learned how to identify the complete subject and the complete predicate, you can easily find the **simple subject** and the **simple predicate.**

Somewhere in the complete subject you will find the *particular word* about which something is said. That word is the *simple subject*. It is usually either a noun or a pronoun.

Somewhere in the predicate you will find a word that serves as the *key* to the predicate. This word is the *verb*, the most important word in any sentence. If the verb consists of more than one word, it is called a *verb phrase*. In the following examples, the simple subjects and predicates are underlined.

[illegible] attended a conference.

[illegible] the story had many adventures.

My friend in Boston bought a new car.

Sometimes you will find only one word in [illegible] one word in the predicate. In [illegible] the single word in the subject is the simple subject. It is also the complete subject.

The single word in the predicate is the simple predicate and also the complete predicate.

Pronouns are often used as the simple subject and the complete subject. In the sentence, *We are buying a new home*, the pronoun *we* is the simple subject. It is also the complete subject since there are no other words in the subject.

In the sentence, *The building collapsed*, the verb *collapsed* is the simple predicate. It is also the complete predicate since it is the only word in the predicate.

In the following illustrations, the simple subjects and simple predicates are underlined.

Fast driving is often dangerous.
The detectives on the case found the jewels.
Children play.

COMPOUND SUBJECT AND COMPOUND PREDICATE

A sentence may have two or more simple subjects and two or more simple predicates. In the sentence, *Harry and Fred joined a lodge*, there are two simple subjects, *Harry* and *Fred*. The connecting word is *and*. In grammar we say that the sentence has a **compound subject.**

In the sentence, *The stenographer wrote the letter and mailed it*, there are two predicate verbs, *wrote* and *mailed*. The connecting word is *and*. This sentence has a **compound predicate.**

Some sentences have a compound subject and a compound predicate. In the sentence, *Alice and Jane washed the curtains and ironed them*, there are two simple subjects and two simple predicates. The subject nouns are *Alice* and *Jane*. The two predicate verbs are *washed* and *ironed*. In both cases, the connecting word is *and*.

The following sentences contain either a compound subject, a compound predicate, or both.

Corn and beans are grown in the valley.
(*compound subject*)
I attended the lecture and took notes.
(*compound predicate*)
The boys and girls sang and danced at the club.
(*compound subject and compound predicate*)

SENTENCE FRAGMENTS

If you have studied this unit carefully, you will have a thorough understanding of the essential elements of a sentence. But even persons who have this knowledge often punctuate groups of words as sentences when one or both of the essential elements are missing.

Any incomplete group of words punctuated as if it were a sentence is called a *sentence fragment* or a *fragmentary sentence*. As you know, a fragment is only a piece or a part of the whole. A fragment always refers to something that is incomplete.

A fragmentary sentence always lacks one or both of the essential elements of a sentence. That is, either the subject or the predicate, or both the subject and predicate are missing. Whenever you are in doubt about a particular sentence, apply this test: Does the group of words contain both a subject and a predicate? Does it express a complete thought?

Very often the subject of the sentence is missing. The following group of words is *not* a sentence because it does not tell who it is that the writer is talking about.

Interviewed the candidate.
(This is not a sentence.)
The president interviewed the candidate.
(This is a complete sentence.)

The sentence was completed by supplying a subject, *The president*.

Sometimes the predicate is missing. The following group of words is *not* a sentence because the entire predicate is missing.

The sound of footsteps.
(This is not a sentence.)
The sound of footsteps *alarmed us*.
(This is a complete sentence.)

The use of fragmentary or incomplete sentences is an unsatisfactory way of communicating your ideas. Surprising as it may seem, sentence fragments similar to the following examples can be found repeatedly in letters sent out by reputable business firms. Check the letters of your company. You may be amazed at what you find. Be sure you do not use fragments in your own personal writing.

Received your letter this morning.
(*Subject* is missing.)
Will send order at once.
(*Subject* is missing.)
Have shipped your order.
(*Subject* is missing.)
Hoping this meets with your approval.
(*No subject or predicate.*)

4. SENTENCE PATTERNS

In Chapter Three it was explained that a sentence must express a complete thought. It must also have both a subject and a predicate. This unit shows how it is possible to express a complete thought in a variety of ways. You should become familiar with the different ways of arranging words in sentences and the different sentence patterns that are the result of these arrangements.

KINDS OF SENTENCES

Sentences fall into four groups according to the purpose the sentence serves and the manner in which the thought is expressed. Some sentences simply *make statements*. Some sentences *ask questions*. Another type of sentence *gives a command* or *makes a request*. The last group is the kind of sentence that *expresses strong feeling* or *sudden emotion*.

In grammar, the sentence that makes a statement is called a **declarative sentence.** The sentence that asks a question is called an **interrogative sentence.** The sentence that gives a command or makes a request is called an **imperative sentence,** and the sentence that expresses strong feeling is called an **exclamatory sentence.** Following are examples of the four types of sentences.

My friend is a business executive.
(*declarative sentence*)
Have you entered the contest?
(*interrogative sentence*)
Clear the road at once!
(*imperative sentence—command*)
Please, may I go?
(*imperative sentence—request*)
What a beautiful dress!
(*exclamatory sentence*)

If you examine the preceding illustrations carefully, you will notice that the *declarative sentence* ends with a *period*. The *interrogative sentence* ends with a *question mark* (?). Sometimes the *imperative sentence* ends with an *exclamation mark* (!) and sometimes it ends with a *period*. If the command is given in a very emphatic or decisive manner, an exclamation mark is placed at the end. A mild request always ends with a period. An *exclamatory sentence* usually ends with an *exclamation mark*. Briefly summarized, then:

A **declarative** sentence *makes a statement*.

An **interrogative** sentence *asks a question*.
An **imperative** sentence gives a *command* or makes a *request*.

An **exclamatory** sentence expresses *strong feeling* or *sudden emotion*.

INVERTED ORDER

You have probably observed that the four types of sentences follow certain patterns of word arrangement. These patterns will now be discussed in more detail.

Every sentence has a basic structure or framework. This is true of all four types of sentences—*declarative, interrogative, imperative,* and *exclamatory*. This framework, as you already know, consists of the subject noun or pronoun and the predicate verb.

There are a number of ways of introducing the subject in a declarative sentence. The **normal order,** or the grammatical order, is *subject first,* followed by the predicate. If you always followed this pattern, your sentences would soon become monotonous and uninteresting. The following illustration will make this clear. The sentences in this paragraph sound very much like the sentences in a primer or in a first reader.

I like this book. It is a book about Mexico. My friend sent this book to me. My friend lives in New York. She speaks Spanish.

In this short paragraph, all the sentences follow the same pattern—subject first, followed by the predicate. You can give more variety to your sentence patterns by placing words in unusual positions.

You can put the subject after the verb or place it at the very end of the sentence. Varying the position of the subject gives you an opportunity to place other words at the beginning of the sentence to give them more emphasis. This also makes our sentences more interesting.

On my desk I found an interesting book about Mexico.

In this sentence, the subject is placed after the group of words or the phrase, *on my desk*. This arrangement throws the phrase to the front of the sentence and gives it more emphasis.

When the subject of the sentence does not appear in its normal position, we say that the order of the sentence is inverted or turned around. Always remember that *normal* or grammatical order *means subject first,* followed by the predicate. Examine the following sentences carefully. Note the position of the subject in the two sentences.

The *beast* scurried down the street.
Down the street scurried the *beast*.

The first sentence is in normal, or grammatical, order. The subject noun, *beast*, appears at

the beginning of the sentence. The verb *marched* follows the subject.

The second sentence is the same sentence in **inverted order.** The subject noun *band* now appears at the end of the sentence. The verb *marched* comes before the subject. A phrase, *Down the street*, appears at the beginning of the sentence.

An adverb often introduces a sentence. The following sentence begins with an adverb and not with the subject.

Suddenly the train stopped. (*inverted order*)
The train stopped *suddenly*. (*normal order*)

Some persons find it difficult to determine the true subject when a sentence is not in grammatical order. This difficulty can be avoided by *transposing* the sentence and putting it back in normal order. The only purpose in transposing a sentence is to see the grammatical relations more clearly.

Sometimes when you put a sentence back in grammatical order by transposing it, you will find that the transposed sentence is not so smooth as the original sentence. However, the following sentence is just as effective in either order.

Along the road we passed a number of army trucks.
We passed a number of army trucks *along the road*.

Whenever you are dealing with a sentence in inverted order, you should transpose it before you attempt to analyze the sentence from the grammatical point of view.

INTERROGATIVE SENTENCE PATTERNS

In asking a question, you seldom start with the subject first, as you do in a declarative sentence. For that reason, *the interrogative sentence is usually in inverted order.* Sometimes the interrogative sentence starts with the verb. Often it begins with an *adverb* which is used to ask the question.

(introduced by the *verb*)

structions in an interrogative sentence that is

sentences the interrogative sentence becomes a statement when it is transposed.

IMPERATIVE AND EXCLAMATORY SENTENCE PATTERNS

The imperative sentence presents a different

a command or makes a request *is seldom*

Sometimes an imperative sentence begins with a noun that indicates the name of the person to whom the command or the request is given. An interrogative sentence may also begin in this way. The point to keep in mind is that such a noun *is not the subject* of the sentence. In fact, it has no grammatical connection with the rest of the sentence. It is an independent element. For that reason, it is separated from the rest of the sentence by a comma. Study the following illustrations carefully.

Imperative Sentence

Fred, please close the door.
(*Fred* is the person addressed.)
Fred, (you) please close the door.
(Subject is *you* understood.)

Interrogative Sentence

Alice, did you lock the door?
(*Alice* is a noun in direct address.)
Alice, you did lock the door?
(Subject is *you* expressed.)

In the first sentence, the word *Fred* is a noun in **direct address** because it names the person spoken to directly. It is not the subject of the sentence. The subject of an imperative sentence is *you* understood. The word *Fred* is set off from the rest of the sentence by a comma to show that it is used *independently*.

In the second sentence, the word *Alice* is a noun in direct address because it names the person spoken to directly. Since this is an interrogative sentence, the subject is expressed. When the sentence is placed in normal order, you can easily see that the subject is *you* and not Alice.

A noun in *direct address* may appear at the beginning or at the end of the sentence. It may even appear within the sentence.

Fred, please close the door.
(beginning of the sentence)
Please close the door, *Fred*.
(end of the sentence)
Come here, *Fred*, and look at this book.
(within the sentence)

The exclamatory sentence is often expressed in inverted order. In the sentence, *What a feast she spread!*, the subject and the verb appear at the end of the sentence. When the sentence is transposed, the subject appears at the beginning of the sentence and is followed by the verb.

What a feast she spread! (*inverted order*)
She spread what a feast! (*normal order*)

How beautiful the sunset is tonight! (*inverted order*)
The sunset is how beautiful tonight! (*normal order*)

What a tragedy that would be! (*inverted order*)
That would be what a tragedy! (*normal order*)

SENTENCES THAT BEGIN WITH "THERE"

sentence pattern you use

word *there*. We have a very good reason for

When the word *there* is used to introduce the sentence, it is possible to place the subject

much smoother sentence, as you will see from the following illustration.

A heavy frost was last night.
There was a heavy frost last night.

Although the first sentence is in grammatical order, it is a very awkward sentence. The second arrangement results in a much smoother style, but it presents a grammatical problem. In dealing with a sentence that begins with *there*, you must always remember that the word *there* is neither the subject of the sentence, nor an adverbial modifier. It is merely an introductory word which has a special function: that of introducing the sentence.

When the word *there* functions in this way, it is called an **expletive.** The word **expletive** comes from the Latin and means "*added merely to fill up.*" This is a very suitable term because it explains exactly what takes place.

The word *there* merely "fills up" the place normally occupied by the subject. It has no other function in the sentence. Like the noun in direct address, it is an independent construction. When the sentence is transposed, and placed in grammatical order, you should enclose the word *there* in parentheses to show that it is used independently.

There are twelve candidates for the position.
(There) twelve candidates are for the position.

It is important to transpose the sentence beginning with *there* in order to determine the true subject of the sentence. It is also important to determine whether the word *there* is used as an introductory word or whether it is used as an adverb.

There they are. (*There* is an adverb of place.)
They are *there*. (*There* is an adverb of place.)

There were ten men in the band. (*there*—expletive)
(*There*) ten men were in the band. (*there*—expletive)

The coach stood *there* watching the game. (*there*—adverb of place)
There is a telephone directory on the table. (*there*—expletive)
We met *there* last year. (*there*—adverb of place)
There will be some objection to the plan. (*there*—expletive)

The word *it* is also used as an expletive in certain sentence patterns. The use of *it* as an expletive will be discussed in later units.

5. NOUNS

KINDS OF NOUNS

Chapter One explained that a noun is a word used as a name. You also learned that some nouns begin with capital letters, and others begin with small letters. The subject of *capitalization* is very important because it is closely concerned with the division of nouns into groups or classes.

In English, nouns are divided into two main classes called **common nouns** and **proper nouns.** A *common noun* names any one of a class of persons, places, or things. We have a name for all the chairs in the world when we use the common noun *chair*. We have a name for all the lakes in the world when we use the common noun *lake*.

But when we want to name a particular lake, we must give it a special name. The name of a *lake* one might be *Lake Louise*, *Lake George*, or *Lake Michigan*. These particular names are called proper nouns. *A proper noun* always begins with a capital letter.

We have particular names for persons such as *John Adams, General Eisenhower, Queen Elizabeth,* and *Governor Stevenson.* We also have particular names for certain objects such as buildings, hotels, theaters, and clubs: *Conway Building, Congress Hotel, Harris Theater* and *Union League Club.*

Sometimes a common noun names a collection of objects or a group of persons. When we use the word *band* in music, we include under one name all the musicians who play the different instruments. When we use the word *jury,* we include all the members who make up the jury. Nouns that name a group of persons or a collection of objects are called *collective nouns.*

A **common noun** is the name of *any one* of a class of *persons, places,* or *things.*

aviator	ocean	tiger	meat
city	book	lily	desk

A **proper noun** is the name of a *particular person, place,* or *thing.*

Pacific Ocean	Thomas Edison
Chicago	Amazon River
England	Wrigley Building
State Street	Bay of Fundy

A **collective noun** is a common noun whose singular form names a *group* of persons, objects, or acts.

herd	company	team	crowd
army	corps	audience	faculty

Some nouns are *common nouns* in one sentence and *proper nouns* in another sentence.

Common Nouns

Roy is studying to be a doctor.
John's uncle is an engineer.
I went to the theater with May.
We spent the summer at the lake.

Proper Nouns

The family called in Dr. Allen.
Uncle John is a colonel in the army.
The play was given at the Grand Theater.
Did you ever cross Lake Erie?

CAPITALIZATION OF PROPER NOUNS

A student of language should be familiar with the accepted rules regarding the capitalization of *proper nouns* and *proper adjectives.* **Proper adjectives** *are adjectives derived from proper nouns.*

Proper Nouns	Proper Adjectives
America	an *American* soldier
Spain	a *Spanish* house
China	a *Chinese* vase

The following list of rules for the capitalization of proper nouns follows accepted, present-day usage.

1. Capitalize names of *particular persons* and *places.*

Mr. Smith	Yankee Stadium
Helen Hayes	Radio City
Senator Clark	Ellis Island

2. Capitalize *geographic names:* continents, countries, states, cities, rivers, mountains, lakes, falls, harbors, valleys, bays, etc.

Africa	Gulf of Mexico
Montana	Rocky Mountains
Pikes Peak	New York Harbor
Cleveland	Long Island

3. Capitalize names of *definite regions, localities,* and *political divisions.*

the Orient	Third Precinct
the Bad Lands	Wheeling Township
the Arctic Circle	French Republic

4. Capitalize names of *bridges, buildings, monuments, parks, ships, automobiles, hotels, forts, dams, railroads, streets,* etc.

Brooklyn Bridge	Michigan Avenue
Fine Arts Building	Plaza Hotel
Statue of Liberty	Eiffel Tower
Central Park	Boulder Dam

5. Capitalize names of *historical events, historical periods,* and *historical documents.*

the Middle Ages	Battle of Gettysburg
World War II	Louisiana Purchase
the Crusades	Fourteenth Amendment
Magna Charta	the Civil War (American)

6. Capitalize names of *governmental bodies* and *departments.*

Bureau of Mines	Civil Service Commission
the Federal Government	Federal Trade Commission
United States Senate	the President's Cabinet
Federal Courts	Supreme Court of the United States

7. Capitalize names of *political parties, business* and *fraternal organizations, clubs* and *societies, companies,* and *institutions.*

Republicans	County Hospital
Democratic Party (or party)	John Crerar Library
	a Shriner
Chapman Chemical Company	the Elks
	Ford Motor Company
Volunteers of America	Rutgers University

8. Capitalize *titles of rank* when they are joined to a person's name.

President Lincoln	Professor Thomas
Senator Lodge	Doctor Hayden
Dr. Allen Reed	Dean Mary Allison
Chancellor Harris	Cardinal Wolsey
Secretary Henderson	His Honor the Mayor

9. Capitalize *days* of the *week, months* of the *year, holidays,* and *days of special observance,* such as feast and fast days.

Monday	Feast of the Passover
September	Mother's Day
Labor Day	Good Friday
Easter Sunday	Memorial Day

10. You should not capitalize names of the seasons unless they are personified. When something is personified it is represented or considered as if it were a person. Personification is frequently used in poetry.

spring	winter
Spring's warm touch	Winter's icy breath

11. The words *north, east, south,* and *west* are capitalized when they refer to *sections* of the country. They are not capitalized when they refer to *directions.*

Sections of Countries

the Midwest
the Far West
the Near East

Directions

I travel north on my way home.
The sun rises in the east.
The southern part of Idaho is beautiful.

12. The *special names* given to planets and stars are capitalized. The words *sun, moon, star,* and *planet* are not capitalized.

Jupiter	The *sun* rose at six that morning.
Venus	The *moon* is a heavenly body.
Mars	A *planet* shines by reflected light.
Milky Way	A *constellation* is a group of stars.

SPECIAL USES OF CAPITAL LETTERS

1. Words derived from proper nouns are usually capitalized. If the word has acquired a special meaning, it is not capitalized.

Capitalized	Not Capitalized
Mongolian race	navy blue
Venetian blinds	china cabinet
Swiss cheese	morocco leather
English tweeds	chinaware
Turkish bath	turkish towel or Turkish towel

2. The principal words in *titles of books, magazines, pictures, songs, articles,* etc., are capitalized. Prepositions, conjunctions, and the articles *a, an,* and *the* are not capitalized unless the title begins with one of these words.

The Last of the Mohicans (book)
The Saturday Evening Post (magazine)
"Outside Our World" (article)
Battle Hymn of the Republic (song)
"Meet the Press" (television program)

3. The definite article *the* is not capitalized unless it is the first word of a title. Many titles do not begin with *the.* If the word *the* is within the title, it is written with a small letter. The only way to be sure about the correct form of a title is to check the official form, or the form adopted by the company, publication, etc.

The Christian Science Monitor
The John C. Harris Company
National Geographic Magazine
Pinnacle Oil Company

4. All words referring to the Deity, the Bible, books of the Bible, and other *sacred books* are capitalized.

God, the Father	the Koran
Savior	Genesis
the Trinity	Supreme Being
Talmud	Bible
Book of Job	New Testament

5. The pronoun *I* and the interjection *O* are capitalized. The word *oh* is not capitalized unless it is the first word of a sentence.

"O say! can you see, by the dawn's early light,
"'Tis the Star Spangled Banner, oh, long may it wave.

6. Names of school subjects are not capitalized unless they are names of the languages. Subjects listed in school catalogs as names of special courses are capitalized.

mathematics	History 101
French	Advanced Chemistry II
economics	Economics 315
English	Physics II

7. Capitalize words which show family relationships when they are used with a person's name. The words *father* and *mother* are not capitalized when they are preceded by a pronoun. When used without a pronoun, they are usually capitalized.

Aunt Martha	her cousin
Cousin John	their uncle
Uncle Jack	my father

8. Capitalize the first word in a *compound term* and in each of its *longer parts*. If the second word in the compound word is a proper noun, it should also be capitalized. Capitalize both parts of *compound titles of distinction*.

Forty-third Street	un-American activities
Army-Navy game	ex-President Eisenhower
The Honorable John Wallis	Rear Admiral Simpson

9. The names of special departments of business firms may be written with small or with capital letters. In business writing, it is considered good practice to capitalize titles such as *president, secretary, office manager, general superintendent*, etc. They may also be written with small letters.

Claim department *or* Claim Department
The Company will reimburse you for your expenses.
Our President will see you for presidents.

PLURAL FORMS OF NOUNS

When a noun refers to one person or thing it is singular in number. When a noun refers to more than one person or thing, it is plural in number. Nouns have special forms to show these distinctions, as you will see from the following illustrations.

Singular	Plural
boy	boys
box	boxes
leaf	leaves
tomato	tomatoes

The plurals of nouns are formed in a number of different ways. Since there are exceptions to almost every one of these methods, you should consult a reliable dictionary whenever you are in doubt regarding a correct plural form. You should also be familiar with the following methods of forming the plurals of nouns.

1. Most nouns add the letter *s* to the singular to form the plural.

lamp	lamps	valley	valleys
dress	dresses	manager	managers
tree	trees	museum	museums

2. Nouns ending in *s, sh, ch, x,* or *z* form the plural by adding *es*. The plural adds another syllable.

church	churches	watch	watches
tax	taxes	loss	losses

Vowel Preceding "o" Musical Terms

		piano	pianos
		alto	altos

Some nouns ending in *o* preceded by a consonant add *s*. Others add *es*. Some form the plural by adding *s* or *es*.

Add "s"	Add "es"
	hero
	heroes

Add "s" or "es"

cargo	cargoes

4. Nouns ending in *y* preceded by a consonant change the *y* to *i* and add *es*.

party	parties	country	countries
city	cities	enemy	enemies
lady	ladies	berry	berries

5. Nouns ending in *y* preceded by a vowel usually add *s*. In many cases the vowel before the final *y* is *e*.

alley	alleys	journey	journeys
boy	boys	valley	valleys
key	keys	day	days

6. Some nouns ending in *f* or *fe* change the *f* or the *fe* to *v* and add *es*. Some nouns ending in *f* have two plurals, one in *s* and one in *ves*. Some simply add *s*.

Change to "ves"		Add "s" or Change to "ves"		
wife	wives	scarf	scarfs	scarves
thief	thieves	wharf	wharfs	wharves
half	halves	hoof	hoofs	hooves

7. Some nouns form the plural by a change in the vowel.

man	men	mouse	mice
foot	feet	goose	geese
tooth	teeth	louse	lice

8. Some nouns have the same form for both singular and plural.

Singular and Plural

fish	fish	species	species
sheep	sheep	series	series
Chinese	Chinese	salmon	salmon

9. The plurals of compound nouns are generally formed by adding *s* to the *principal word* in the compound.

mother-in-law	*mothers*-in-law
board of education	*boards* of education
attorney general	*attorneys* general or attorney *generals*
court-martial	*courts* martial

Sometimes *both parts* of the compound are made plural.

manservant	menservants
woman doctor	women doctors

Sometimes an *s* or *es* is added to the end of the compound. In that case, there is no important word in the compound.

forget-me-not	forget-me-nots
toothbrush	toothbrushes

Compounds ending in *ful* are made plural by adding *s* to the end of the compound. This rule applies when the same container is filled a number of times.

spoonful	spoonfuls	handful	handfuls
basketful	basketfuls	cupful	cupfuls

10. The plurals of proper names are formed by adding *s* or *es*.

[illegible] three *Keatons* in the class	
The two *Stevens* in the [illegible]	
The *Dresses* and the *Smiths* attended.	

The spelling of proper names must not be changed. If we followed the rule for words ending in *y* preceded by a consonant, we would change the *y* to *i* and add *es*. The name would then be changed to *Marie*, for the plural would be *Maries*. (See also *Mary*.)

11. Titles are made plural in several ways. The plural of *Miss* is *Misses*, the plural of *Mr.* is *Messrs.* *Mrs.* has no plural. The plural of *Madam* is *Mesdames*, which is sometimes used for the plural of *Mrs.* *Misses* should not be followed by a period. It is not an abbreviation. In the first column of the following examples, the title is made plural. In the second column the name is made plural. Either form is correct.

the *Misses* Thomas *or*	the Miss *Thomases*
the *Messrs.* Churchill *or*	the Mr. *Churchills*

Foreign Plurals

Words taken from foreign languages usually retain their foreign plurals. Some of these words are used so commonly that they have acquired an English plural which is formed in the regular way, that is, by adding *s* or *es* to the singular.

The following list gives the foreign and English plurals for some commonly used foreign words. If no English plural is given, the foreign plural is used.

Foreign Word	Foreign Plural	English Plural
alumna (*feminine*)	alumnae	
alumnus (*masculine*)	alumni	
analysis	analyses	
appendix	appendices	appendixes
bacterium	bacteria	
basis	bases	
cactus	cacti	cactuses
crisis	crises	
criterion	criteria	criterions
curriculum	curricula	curriculums
datum	data	
formula	formulae	formulas
gymnasium	gymnasia	gymnasiums
hypothesis	hypotheses	
index	indices	indexes
madam	mesdames	
medium	media	mediums
memorandum	memoranda	memorandums
parenthesis	parentheses	
phenomenon	phenomena	
radius	radii	radiuses

12. The plural of numbers, letters, signs, and symbols is formed by adding the apostrophe and *s*.

Your *2's* look like your *3's*.
You use too many *ands* in your writing. (correct)
or
You use too many *and's* in your writing. (correct)
You must always cross your *t's*.
He received three *A's* and two *B's* last semester.

13. The following nouns are used only in the plural. You may find some of them used in the singular, but the general practice is to regard them as plural. When you are in doubt, consult the dictionary.

trousers	shears	contents
pants	pliers	riches
scissors	scales (weighing)	alms
billiards	nuptials	remains
[illegible]	gallows	victuals

6. PRONOUNS

In Chapter One you learned that a *pronoun* is a word used in place of a noun. Because pronouns can be used in place of nouns, they avoid the monotonous repetition of nouns. The following illustration shows what happens when we repeat the same noun too often in a sentence.

Alice went to **Alice's** room to dress because **Alice** was going to a reception given by **Alice's** club in **Alice's** honor.

This sentence is very awkward and monotonous because of the tiresome repetition of *Alice* and *Alice's*. When we rewrite the sentence and substitute pronouns for *Alice* and *Alice's*, we have a much better sentence:

Alice went to **her** room to dress because **she** was going to a reception given by **her** club in **her** honor.

You should not only learn how to use pronouns effectively, but you should also learn how to use them correctly. Many of the language errors that are commonly made are errors in the use of pronouns. These mistakes occur because some of the pronouns that we use constantly have a number of different forms.

As a student of English you should know how and when to use the different forms of pronouns. In order to do this, you must be familiar with the changes in form that certain pronouns undergo. To illustrate: The pronoun **I** is used as the subject of a sentence. When this same pronoun is used as the object of a preposition, the form changes to *me*. It is incorrect to say, "between *you* and **I**." The correct form to use in this phrase is *me*.

Illustrations of Changes in the Forms of Pronouns

I saw the accident. (The pronoun **I** is the subject.)
Jane saw **me** at the game. (The pronoun *me* is the object of *saw*.)
He *won* the first prize. (The pronoun *he* is the subject.)
We met **him** in the lobby. (The pronoun *him* is the object of *met*.)

In the first sentence, the pronoun *I* is used as the **subject** of the sentence. When this same pronoun is used as the **object of a verb,** the form changes to *me*. In the third sentence, the pronoun *he* is the subject of the sentence. When this same pronoun is used as the object of the verb *met*, the form changes to *him*.

KINDS OF PRONOUNS

There are five groups or classes of pronouns in English: **personal** pronouns, **interrogative** pronouns, **demonstrative** pronouns, **indefinite** pronouns, and **relative** pronouns. The personal pronouns include the *compound personal* pronouns, and the relative pronouns include the *compound relative* pronouns.

PERSONAL PRONOUNS

The personal pronouns are the most important group of pronouns. They are also the pronouns that will give you the most trouble unless you are familiar with the various forms that belong to each pronoun.

A **personal pronoun** is a pronoun that shows by its form whether it refers to the *person speaking*, the *person spoken to*, or the *person or thing spoken of*. All the personal pronouns, with the exception of the pronoun *it*, refer to persons. The following sentences show the use of personal pronouns in the first, second, and third person.

I shall spend the winter in Texas. (*I* is the *person speaking*.)
You are working too hard. (*You* is the *person spoken to*.)
He bought a new Ford. (*He* is the *person spoken about*.)
We built the garage. (*We* refers to the *persons speaking*.)
They operate two farms. (*They* refers to the *persons spoken about*.)
Ted has a new radio. **It** is a Zenith. (*It* refers to the *thing spoken about*.)
Jan has two fur coats. **They** are both mink. (*They* refers to the *things spoken about*.)

The pronoun of the **first person** is the pronoun **I** with its plural form *we*. The pronoun of the **second person** is *you*. The plural form is also *you*. The pronouns of the **third person** are *he, she,* and *it* with the common plural *they* for all three pronouns.

The personal pronouns also have different forms to indicate case. You will learn more about the case of pronouns in Chapter Nine. For the present, you should be familiar with all the forms of the personal pronouns and the pronoun *who* so that you will be able to identify them.

Forms of the Personal Pronouns

1. **First person**—personal pronouns referring to the *speaker*

   I, my, mine, me (singular)
   we, our, ours, us (plural)

2. **Second person**—personal pronouns referring to the *person spoken to*

   you, your, yours (same forms in both singular and plural)

3. **Third person**—personal pronouns referring to the *persons* or *things spoken about*

   he, his, him, she, her, hers, it, its (singular)
   they, their, theirs, them (plural)

4. Forms of the pronoun **who:**

   who, whose, whom

COMPOUND PERSONAL PRONOUNS

Sometimes the word *self* or *selves* is added to certain forms of the personal pronouns. Pronouns formed in this way are called **compound personal pronouns.**

List of Compound Personal Pronouns

myself	herself
yourself	ourselves
himself	yourselves
itself	themselves

Compound personal pronouns are used in two ways, (1) as *reflexive pronouns* and (2) as *intensive pronouns*. A compound personal pronoun is used *reflexively* when the pronoun is the object of the verb. It tells *who* or *what* received *the* action expressed by the verb. In this use the pronoun always refers back to the same person or thing as the subject. The following illustrations will help to make this clear.

He cut himself yesterday.

In this sentence the word *himself* is a compound personal pronoun used as the object of the verb *burned*. *Himself* refers to the same person as the subject, which is the word *he*. In other words, *he* and *himself* are the same person. This is called the **reflexive** use of the compound personal pronoun. It means that the pronoun *refers* or *reflects back* to the subject.

Sometimes the compound personal pronoun is used to give added emphasis to a noun or pronoun in the sentence. This is called the **emphatic** or **intensive** use of the compound personal pronoun.

When a compound personal pronoun is used in this way, it must give emphasis to some noun or pronoun that is already in the sentence. Observe the following sentences carefully. In each sentence you will find that there is a *noun* or a *pronoun* to which the compound personal pronoun refers.

I made the dress myself. (*Myself* intensifies the pronoun **I**.)
John himself built the canoe. (*Himself* intensifies the noun *John*.)

Incorrect Use of Compound Personal Pronouns

One of the mistakes commonly made in English is to use the compound personal pronoun when there is no word in the sentence to which it refers. These pronouns should never be used as a substitute for a personal pronoun. They should never be used as the subject of the sentence.

My wife and *myself* appreciate your courtesy. (incorrect)
My wife and **I** appreciate your courtesy. (correct)

The manager and *myself* checked the accounts. (incorrect)
The manager and **I** checked the accounts. (correct)

He sent the book to John and *myself*. (incorrect)
He sent the book to John and **me**. (correct)

The first sentence is incorrect because there is no noun or pronoun in the sentence which the pronoun *myself* refers to or gives emphasis to. The second sentence is correct because a *personal pronoun* is used.

Whenever you use a compound personal pronoun in a sentence, always remember that such a pronoun must have an *antecedent*, or a word in the sentence which refers to the same person or thing as the pronoun does. In other words, it must have its own antecedent in the sentence. Do not make mistakes like the following.

Alice and *yourself* were appointed on the committee. (incorrect)
Alice and **you** were appointed on the committee. (correct)

The owner gave Tom and *myself* his old lawn mower. (incorrect)
The owner gave Tom and **me** his old lawn mower. (correct)

Everyone in the club has a car as well as *myself*. (incorrect)
Everyone in the club has a car as well as **I**. (correct)

They sent an invitation to the Smiths and *ourselves*. (incorrect)
They sent an invitation to the Smiths and **us**. (correct)

INTERROGATIVE PRONOUNS

Interrogative pronouns are pronouns that are used in asking questions. The interrogative pronouns are *who (whose, whom), which,* and *what*. An interrogative pronoun also has

another general to perform in the sentence just as any other pronoun has. It may be the *subject* of the sentence or it may be the *object* of the verb or of a preposition.

Who is the director of the band?

For **whom** are you waiting?

What did they say about his speech?

Which is your car?

Whose car did you borrow?

DEMONSTRATIVE PRONOUNS

Demonstrative pronouns are pronouns that point out definite persons, places, or things. There are only two demonstrative pronouns: *this* with its plural *these*, and *that* with its plural *those*.

This is my hat. (A definite hat is pointed out.)
That is your book. (A definite book is pointed out.)
These are the theater tickets. (Definite tickets are pointed out.)
Those are John's shoes. (Definite shoes are pointed out.)

INDEFINITE PRONOUNS

A large group of pronouns are called **indefinite pronouns** because they do not point out particular places, persons, or things.

Somebody took my coat. (*Somebody* is an indefinite pronoun.)
A **few** left the hall early. (*Few* is an indefinite pronoun.)

The following list contains the commonly used indefinite pronouns. Refer to this list, and to the other lists in this unit whenever you are not sure of the classification of a pronoun.

Commonly Used Indefinite Pronouns

all	everybody	one
any	everyone	one another
anybody	everything	ones
anyone	few	other
[illegible]	[illegible]	others
both	neither	several
[illegible]	[illegible]	some
[illegible]	[illegible]	somebody
[illegible]	[illegible]	someone
[illegible]	nothing	something

RELATIVE PRONOUNS

A **relative pronoun** is a pronoun that joins the clause which it introduces to its own antecedent. The *antecedent* of a pronoun is the [illegible] it refers. (Discussed in the chapter [illegible].)

The relative pronouns are *who, which, that,* [illegible] called a **compound relative pronoun.**

List of Compound Relative Pronouns

[illegible]	[illegible]	[illegible]
whomever	whatsoever	whomsoever
[illegible]	[illegible]	[illegible]

The *relative pronoun* is always found in a [illegible]

Use of Relative Pronouns

[illegible]

Who is used when the antecedent is a *person*.

That is used to refer to either *persons* or *things*.

Which is used to refer to anything *except persons*.

She is the girl **who** won the award. (*Who* refers only to persons.)

This is the dog **that** (or **which**) was lost. (*That* or *which* refers to things.)

She is the girl **that** won the award. (*That* may refer to persons.)

PRONOUNS USED AS ADJECTIVES

The *possessive forms* of the personal pronouns are often used with nouns in much the same way as adjectives are used to modify nouns. Although they function as adjectives when they are placed before the noun, they still retain the idea of possession. For that reason, they are sometimes called **possessive adjectives** to distinguish them from other types of adjectives.

In the sentence, *Herbert forgot his coat,* the possessive form of the pronoun *he,* which is *his,* is used as an adjective modifying the noun *coat.* It also shows that the coat belongs to Herbert. Therefore, it is called a possessive adjective. All the adjectives in the following sentences show possession. They are called possessive adjectives.

Possessive Forms of Personal Pronouns Used as Adjectives

These are **her** gloves. (modifies *gloves*)
I bought **their** home. (modifies *home*)
Did you bring **your** violin? (modifies *violin*)
The dog lost **its** collar. (modifies *collar*)
We like **our** new radio. (modifies *radio*)
Do you like **my** new coat? (modifies *coat*)
The manager has **his** report. (modifies *report*)

Demonstrative and *indefinite pronouns* are also used as adjectives. Demonstrative pronouns that function as adjectives are often called **demonstrative adjectives** because they have not lost their pointing out function. In the following sentences the demonstrative pronouns are used as adjectives.

This camera belongs to Jane. (modifies *camera*)
Those apples are delicious. (modifies *apples*)
That man is an army officer. (modifies *man*)
These cards are Easter cards. (modifies *cards*)

Indefinite pronouns used as adjectives are generally regarded as pure adjectives, although they may be called **indefinite adjectives.** They have no special function. The following examples illustrate their use as adjectives.

Each girl carried a flag. (modifies *girl*)
Both men received a promotion. (modifies *men*)
Neither answer is correct. (modifies *answer*)
Many soldiers were on that ship. (modifies [illegible])
Any mechanic could do that job. (modifies [illegible])
Several tables were ruined. (modifies *tables*)

Interrogative pronouns are also often used as adjectives. Since the adjective is the word that asks the question, these adjectives are called **interrogative adjectives.** In the sentence, *Which house did you buy?* the word *which* asks the question. It is also an adjective [illegible] pronouns are used to ask questions in the following sentences.

What newspapers does he read? (modifies *newspapers*)
Whose name did he call? (modifies *name*)
Which play do you like best? (modifies *play*)

POSSESSIVE FORMS OF PRONOUNS

The possessive forms of the *personal pronouns* and the possessive form of the pronoun *who* are never written with an apostrophe. These pronouns have a special form to show possession and do not require an apostrophe. The correct forms to use in order to show possession are the following: *my, mine, yours, his, hers, its, ours, theirs, whose.* Do not place an apostrophe either before or after the **s** in any of these words.

The word *it's* is a contraction of *it is.* It is not a form of the pronoun, and should never be used to show possession. The word *who's* is a contraction of *who is* or *who has,* and should not be confused with the possessive form *whose.*

Contractions

It's on my desk. (*It is* on my desk.)
Who's speaking tonight? (*Who is* speaking tonight?)
Who's finished the test? (*Who has* finished the test?)

Indefinite pronouns do not have special forms to show possession. Therefore, it is necessary to use the apostrophe to show the possessive forms of these pronouns. Since most of these pronouns are used only in the singular, the possessive is formed by adding the *apostrophe* and **s** (**'s**). The plural of the indefinite pronoun *other* is *others.* In the case of this plural form, the apostrophe is placed after the **s.** Study these forms carefully.

Possessive Forms of Indefinite Pronouns

everybody's job	*anyone's* opinions
somebody's hat	*someone's* car
one's relatives	*each one's* duty
another's problems	*others'* affairs (plural)

When *else* is added to an indefinite pronoun, it is regarded as part of the pronoun. In this case, the apostrophe and **s** are added to *else* to form the possessive.

I came home with *somebody else's* coat.
Someone else's book was substituted for mine.

7. AGREEMENT OF PRONOUN WITH ANTECEDENT

You have already learned that a pronoun usually refers to a noun or pronoun which precedes it in the sentence. The word to which the pronoun refers is called its antecedent. The word *antecedent* comes from two Latin words which mean "*going before.*" The antecedent of a pronoun is the word which "*goes before*" the pronoun. It is the word to which the pronoun refers.

In the sentence, *Robert lost his fishing* [illegible] the pronoun *his* refers to *Robert.* The word *Robert* precedes the pronoun *his* or [illegible] it. *Robert* is the antecedent of *his.* It is the word to which the pronoun *his* refers.

Antecedents of Pronouns

Margaret attended her class reunion. (*Margaret*—antecedent of *her*)

Every day brings its duties (*its*—antecedent of *its*)

The men brought their golf clubs (*men*—antecedent of *their*)

Only a few brought their equipment (*few*—antecedent of *their*)

The professor himself did not know the answer (*professor*—antecedent of *himself*)

AGREEMENT OF PRONOUN AND ANTECEDENT IN GENDER

Since a pronoun stands for, or replaces a noun it must agree with that noun in person number, and gender. We have already considered the problems of number and person in Chapters Five and Six. In this unit we shall take up the problem of gender and show its connection with the agreement of pronoun and antecedent.

In grammar **gender** means the classification of nouns and pronouns according to distinctions in sex. There are four genders *masculine gender, feminine gender, common gender,* and *neuter gender*.

Masculine gender denotes the male sex. **Feminine gender** denotes the female sex. **Common gender** denotes either sex. **Neuter gender** denotes absence of sex. The following are examples of nouns and pronouns in the four genders.

Masculine gender—he, him, father, kind
Feminine gender—sister, she, her, princess
Common gender—child, adult, cousin, neighbor
Neuter gender—table, book, dress, radio, it

Some nouns and a few pronouns have special forms to show gender. The following list shows the changes that occur in some words to indicate a change in the gender. Some of the distinctions formerly used to show gender are passing out of use. The words *authoress* and *poetess*, for example, are seldom used.

SPECIAL FORMS TO SHOW GENDER

Masculine	Feminine	Masculine	Feminine
uncle	aunt	god	goddess
bull	cow	aviator	aviatrix
waiter	waitress	hero	heroine
alumnus	alumna	count (title)	countess
emperor	empress	gander	goose
host	hostess	sir	madam
peacock	peahen	ram	ewe
male	female	lion	lioness
monk	nun	duke	duchess
actor	actress	nephew	niece
bachelor	spinster	prince	princess
executor	executrix	fiance	fiancee
baron	baroness	stallion	mare
he	she	father	mother
lad	lass	him	her
man	woman	boy	girl
rooster	hen	husband	wife
master	mistress	buck (stag)	doe
brother	sister	landlord	landlady
drake	duck	son	daughter

GENDER AND NUMBER OF INDEFINITE PRONOUNS

Indefinite pronouns present a problem in gender. These pronouns often refer to both sexes, masculine and feminine. When we say, *Everybody went to the game,* the indefinite pronoun *everybody* includes individuals of both genders, masculine and feminine.

The problem arises when the indefinite pronoun is the antecedent of another pronoun. In this case the accepted practice is *to use the masculine gender for the pronoun that is used in place of the indefinite pronoun.*

In the sentence *Everyone received his income tax form,* the indefinite pronoun *everyone* is the antecedent of the pronoun *his*. It is the word to which the pronoun *his* refers. Although *everyone* includes persons of both genders, the masculine pronoun *his* is used instead of saying *his or her* income tax form.

If the sentence shows clearly that the indefinite pronoun refers to members of only one sex, the pronoun that refers to that sex should be used.

Everyone attending the meeting of the Women's Athletic Club presented **her** membership card.

In this sentence the members are women, and the pronoun *her* is used correctly. In cases where it is not clear whether the antecedent is masculine or feminine, use the pronoun *his*.

Anyone may have **his** money refunded.
Somebody left **his** pen on my desk.

Indefinite pronouns also present a problem in number. Some of them are always singular. Some are always plural, and some may be either singular or plural.

Pronouns That Are Always Singular

The following pronouns are always singular. A pronoun that is used in place of one of these indefinite pronouns must also be singular.

anybody	everybody	neither
anyone	everyone	one
another	many a one	other
each	nobody	someone
either	no one	somebody

Study the following illustrations carefully. These sentences show the proper agreement between pronoun and antecedent when the antecedent is singular.

Neither of the men had **his** tools. (not *their*)
If **anyone** wants a pen, **he** can obtain one here. (not *they*)
One likes to do what **he** can do well. (not *they*)
Someone left **his** coat in **his** locker. (not *their*)

Pronouns That Are Always Plural

The following pronouns are always plural. A pronoun that is used in place of one of them must also be plural.

many both few several others

Notice that *many a one* is included in the list of pronouns that are always singular, whereas *many* is included in this plural list. When singular expressions, such as *a man, a one, a person,* etc., are added to *many*, the pronoun is singular, not plural.

Several found **their** cars unlocked. (*Several*—plural)
Only a **few** would admit **their** error. (*few*—plural)
Many brought **their** lunches with them. (*Many*—plural)
Others found **their** friends in the balcony. (*others*—plural)

Pronouns That May Be Either Singular or Plural

The pronouns *all, any, some,* and *none* are singular or plural according to the meaning of the sentence. When these words refer to a number, they are generally regarded as plural. When they refer to **quantity** or to a **mass**, they are regarded as singular.

The pronoun *none* is singular when it clearly means *no one,* or *not one*. It is often difficult to determine the number of this pronoun since there are sentences in which it carries a plural idea. If you want to express the singular idea use *no one,* or *not one*.

Some found **their** children in the park. (*Some* is plural.)
Some of the candy has lost **its** flavor. (*Some* is singular.)
All were waiting for **their** salary checks. (*All* is plural.)
There is no candy in the box. **All** of it has been eaten. (*All* is singular.)
Did **any** of the men have **their** membership cards? (*Any* is plural.)
None have arrived. (*None*—plural in use.)
None of these is a typical example. (*None*—singular in use.)

AGREEMENT OF THE PRONOUN WITH A COMPOUND ANTECEDENT

Sometimes the pronoun refers to two antecedents connected by *and*. If both of these antecedents are singular and refer to *different persons or things,* the antecedent is plural. The pronoun that refers to these antecedents must also be plural.

The president and the manager have outlined their plans.

If the antecedent refers to *one* person who fulfills *two* functions, the pronoun that takes the place of the antecedent is singular. In the following sentence *cook* and *housekeeper* are the same person.

The cook and housekeeper did not like her duties.

If the housekeeper were another individual, the word *the* would be placed before the word *housekeeper*.

The cook and the housekeeper did not like their duties.

When the connectives, *either—or* and *neither—nor* join singular nouns, the antecedent is singular. When they join plural nouns, the antecedent is plural. When they join nouns that differ in number, the pronoun should agree with the antecedent that is nearer to it.

Either *Jane* or *Vince* left **her** book on **her** desk. (Nouns are singular—pronoun is singular.)

Either the *boys* or the *girls* left **their** books on the table. (Both nouns are plural—pronoun is plural.)

Neither *Harry* nor his *cousins* wore **their** dress suits. (Pronoun is plural—agrees with cousins.)

Neither the *men* nor the *boy* could find **his** place in the bar. (Pronoun agrees with *boy* which is nearer to it.)

In sentences like the last one, it is better to place the plural noun nearer to the pronoun. By doing so, you make the antecedent plural and the sentence sounds better.

AGREEMENT OF PRONOUN WITH COLLECTIVE NOUNS

Collective nouns are singular when they designate a group *acting as a unit*. They are plural when the members who make up the group *act individually*. The pronoun

...takes the place of the collective noun must agree with it in number. If the collective noun expresses a singular idea, the pronoun is singular. If the collective noun expresses a plural idea, the pronoun is plural.

The band played its fifth concert. (*acting as a unit*)

The band were tuning up their instruments. (*as individuals*)

You can readily see that the second sentence could not refer to the band as a unit. That would mean that the members of the band were all working on the same instrument.

AGREEMENT OF PRONOUN AND ANTECEDENT IN PERSON

A pronoun must agree with its antecedent in **person**. If the antecedent of the pronoun is in the *third person*, the pronoun that refers to it must also be in the *third person*. If the antecedent is in the *second person*, the pronoun should be in the *second person*.

One of the most common mistakes in English is to start the sentence in the *third person* and then put the pronoun that refers to the antecedent in the *second person*. Study the following examples carefully.

If anybody wants an education, you can get it. (*incorrect*)

If anybody wants an education, he can get it. (*correct*)

When one pays attention, you learn better. (*incorrect*)

When one pays attention, he (or *one*) learns better. (*correct*)

VAGUE ANTECEDENTS

A pronoun should not have two possible antecedents in the same sentence. If it is not clear which of two nouns a pronoun refers to, there will be two possible interpretations of the sentence. Observe the two possible interpretations in the following illustration.

James told his friend that **he** had been elected president.

In this sentence, does the pronoun *he* refer to *James* or to *friend*? If the antecedent of the pronoun *he* is *friend*, the sentence means that *James told his friend that he* (*the friend*) *had been elected president*. If the antecedent of the pronoun *he* is *James*, the sentence means that *James told his friend that he* (*James*) *had been elected president*.

The sentence might be rewritten in either of the two following ways since we do not know [illegible]

James said to his friend, "You have been elected president."

James said to his friend, "I have been elected president."

Many of the errors that are made in the use of [illegible] between pronoun and antecedent. The pro[illegible] probably refers to an order for goods which to an order for goods, the sentence might be written as follows:

Your letter and your check arrived promptly, but at present we cannot ship the goods ordered.

ADJECTIVE—PRONOUN AGREEMENT

Demonstrative adjectives should agree in *number* with the nouns they modify. The adjectives *this, that, these,* and *those* sometimes cause agreement trouble when they modify such nouns as *kind, sort, type,* and *variety*.

Keep in mind that the demonstrative adjectives *this* and *that* are singular and should be used only with singular nouns. *These* and *those* are plural and should be used only with the plural nouns.

these kind of apples **(incorrect)**
this kind of apples (or apple) **(correct)**
or **these kinds** of apples (plural)

those sort of roses **(incorrect)**
that sort of roses (or rose) **(correct)**
or **those sorts** of roses (plural)

these variety of fruits **(incorrect)**
this variety of fruits or fruit **(correct)**
or **these varieties** of fruits (plural)

The forms in italic are incorrect because the adjective does not agree with the noun in number. The forms in bold face are correct because the adjective agrees with the noun in number.

8. COMPLEMENTS OF VERBS

THE DIRECT OBJECT

Every sentence must have a basic structure in order to express a complete thought. This basic structure may consist of only two parts, a subject noun or pronoun and a predicate verb or verb phrase. Many sentences require a third part or an additional word in order to express a complete thought. This additional word or group of words is necessary to complete the idea expressed by the verb.

The group of words *The men lifted*, contains a subject noun *men* and a predicate verb *lifted*. But it does not express a complete thought. A word is needed to tell **what** the men lifted. The sentence might be completed by adding the word *beam*. The completed sentence *The men lifted the beam*, expresses a complete thought.

The word *beam* completes the meaning expressed by the verb *lifted*. For that reason it is called a **complement** or a completing word. [illegible] the **subject**, the **verb**, and the **complement**. The complement is *beam*.

A complement completes the meaning expressed by a verb. The *complement* of a verb that expresses *action* is called the **direct object** of the verb. A direct object usually answers the questions *what?* or *whom?* In the [illegible] men lifted. Notice how the underlined comple[illegible]

I saw Evelyn at the convention.

The engineer stopped the train.

The sailors saluted the captain.
(tells *whom* they saluted)

She refused the invitation.
(tells *what* she refused)

Some verbs that express action are complete without the addition of a complement. When such verbs are used in sentences, only two parts are essential—the *subject* and the *verb*.

Study the following illustrations. You will readily see that the thought is complete without the addition of a complement.

Jane is singing.
We have been studying.
The boys are playing.

Although the verbs in the preceding sentences do not require a complement or a completing word, a complement might be added to some of them to make the meaning more explicit. The underlined words are complements and are called *direct objects*.

Jane is singing a ballad.
(tells *what* Jane is singing)

We have been studying Spanish.
(tells *what* we have been studying)

The boys are playing games.
(tells *what* the boys are playing)

The **direct object** of a verb names the *receiver* of the action. It completes the meaning of the verb. A direct object is usually a noun or a pronoun. Adjectives and adverbs are never used as direct objects. Adjectives and adverbs are always used as modifiers. If you have any difficulty in deciding which word is the direct object, apply this test: Find the word that answers the question *what?* or *whom?* Apply the test in the following sentences:

The farmer planted the **seeds** in rows.

What did the farmer plant? The answer is, "He planted the *seeds*." The word *seeds* is the direct object of the verb planted. It tells **what** he planted.

I met *Uncle Henry* in the bank.

Whom did I meet? The answer is, "I met Uncle Henry." The direct object is *Uncle Henry*. It tells **whom** I met.

A verb may take two or more direct objects. In this case, the verb or verb phrase has a compound object.

He grows *orchids* and *lilies* in his garden.

I met *Jerry* and *Jane* at the stadium.

TRANSITIVE AND INTRANSITIVE VERBS

When an action verb takes a direct object, it is called a **transitive verb.** The word *transitive* comes from two Latin words which mean *"passing across."* When the verb is transitive, the action passes across from a **doer** (the subject) to a **receiver** of the action (the direct object). When we say that a verb is *transitive*, it is the same as saying that it has a *direct object*.

Any verb that does not take a direct object is **intransitive**. That is, the verb does *not* express action that passes over to a receiver.

A verb may be transitive in one sentence and [illegible] another sentence. The verb may express [illegible] but the action may not pass over to a receiver. In that case the verb is intransitive. When the verb is transitive, it always takes a direct object—the receiver of [illegible].

The following sentences show the same verb used as a *transitive* verb with a direct object

(underlined) in the first sentence and as an *intransitive* verb with no object in the second sentence.

The sexton rang the bell.
The bell rang loudly. (*no object*)

The ship sailed the seas.
The ship sails at noon. (*no object*)

I met my friend at the airport.
The delegates met yesterday. (*no object*)

THE INDIRECT OBJECT

Some verbs that express action take two objects, a direct object and an indirect object. The **indirect object** tells *to whom* the action is directed or *for whom* the action is performed.

The indirect object is used after certain verbs *get, give, lend, offer, read, tell, buy, send, show, make, pay*, etc.

In the sentence *Mother bought Ellen a coat*, there are two objects: a direct object and an indirect object. The word *coat* is the direct object. It tells *what* Mother bought. The word *Ellen* is the indirect object. It tells *for whom* Mother bought a coat. The indirect object *always* precedes or comes before the direct object. In the following sentences the indirect object and the direct object are underlined.

The librarian read the children a story.
Give him five dollars for his services.
The tailor made Edward a brown suit.

There are two tests that you can apply in order to identify an indirect object. One test is to determine the position of the object. *The indirect object always precedes the direct object.* The other test is to determine whether the indirect object seems to be the object of the preposition *to* or *for* understood. The following sentences illustrate this point.

The librarian read **(to)** the children a story.
Give **(to)** him five dollars for his services.
The tailor made **(for)** Edward a brown suit.

The words *to* and *for* are never expressed when a word functions as an indirect object. If we change the order of the sentence and supply the preposition, our sentence would read as follows: *The librarian read a story to the children.* In this sentence the word *children* is no longer the indirect object but is the object of the preposition *to*.

LINKING VERBS

Most verbs describe or express action. However, there are a small group that do not. The verb **to be** is the most important verb in this group. Since it is the most irregular verb in our language, you should be familiar with its various forms. The following verbs and verb phrases are forms of the verb *to be*.

Forms of the Verb "To Be"

am	will be	shall have been
are	shall be	will have been
is	have been	could have been
was	has been	would have been
were	had been	might have been

Although the verb *to be*, as well as the other verbs belonging in this group, does not express action, it has another function in the sentence. The chief purpose of the verbs in this group is to serve as a link which joins the subject to some word in the predicate that gives the meaning to the sentence. For that reason, it is called a **linking verb.**

Linking verbs have very little meaning of their own. With the help of another word they express various ideas in regard to the subject. In the sentence *Mary is ill*, the verb is a form of *to be*—used with the adjective *ill* to describe the condition of the subject, *Mary*. The sentence really means *Ill Mary*, but you need a verb in order to make a complete statement.

In the sentence *The young man was an aviator*, the verb *was* is a linking verb. With the help of the noun *aviator*, it identifies or classifies the young man. The noun *aviator* means the same as the subject. In the sentence *The actress is very beautiful*, the verb *is*, with the help of the adjective *beautiful*, describes the appearance of the actress.

The verbs *become* and *seem*, like the verb *to be*, are almost always used as linking verbs. The following verbs are used both as linking verbs and as action verbs. The meaning of the sentence will show to which classification they belong.

Linking and Action Verbs

grow	look	smell	remain
turn	feel	taste	keep
prove	sound	appear	stay

This group of words is important because a great many mistakes in English are made when a speaker of writer does not understand their linking function.

When these words have a linking function, they have practically the same meaning as the verb *to be* would have in the same sentence. By supplying the the verb *to be* mentally after one of these verbs, you can readily tell whether the verb has a linking function or whether it is used as an action verb. Every one of the verbs in the following sentences is a linking verb. The verb *to be* has been supplied to show you how to interpret the sentence when the verbs have a linking function.

The cookies **are** wonderful.
(wonderful cookies)
The cookies **look** (to be) delicious.
(delicious cookies)
The cookies **smell** (to be) good.
(good cookies)
The cookies **taste** (to be) sweet.
(sweet cookies)
The cookies **seem** (to be) brittle.
(brittle cookies)
The cookies **became** (to be) stale.
(stale cookies)
The cookies **proved** (to be) sweet.
(sweet cookies)
The cookies **feel** (to be) hard.
(hard cookies)
The cookies **stayed** (to be) fresh.
(fresh cookies)
The cookies **appear** (to be) crumbly.
(crumbly cookies)
The cookies **remained** (to be) soft.
(soft cookies)
The cookies **kept** (to be) fresh.
(fresh cookies)

Some of the same verbs that were used in the preceding illustrations may also be used to express action. Note the differences in meaning when these verbs function as action verbs and not as linking verbs.

John **appeared** promptly.
(*appeared* in person)

The horticulturist **grows** orchids.
(produces by cultivation)
I **turned** the key in the lock.
We **proved** a theorem in geometry.
The doctor **felt** the broken bone.
The warden **sounded** the gong.
The chef **tasted** the sauce.
We **kept** a record of our journey.
The dog **smelled** the meat.
The judge **will stay** the trial. (postpone)
The committee **looked** at the pictures.

COMPLEMENTS OF LINKING VERBS

A *linking verb* cannot make a complete predicate. It always requires a *complement*. The group of words *My friend is* does not make a complete statement. The verb *is* requires some additional word to complete the meaning of the sentence. That word may be a noun, a pronoun, or an adjective.

My friend is an executive.
My friend is very ambitious.
That is he.

The noun that completes the meaning of a linking verb is called a *predicate noun* because it is found in the predicate. A **predicate noun** completes the verb and renames or explains the subject. In the preceding illustration *executive* is a predicate noun. It renames the subject *friend* and classifies *friend* as an *executive*. The noun *friend* and the noun *executive* refer to the same person.

A pronoun that follows a linking verb functions in the same way as the noun. It completes the verb and means the same person or thing as the subject. It is called a **predicate pronoun.**

An adjective that follows a linking verb is called a **predicate adjective** because it is found in the predicate. A predicate adjective always modifies the subject.

The following sentences illustrate the use of the predicate noun, predicate pronoun, and predicate adjective.

Our manager was a former army colonel.
(*manager* and *colonel*—same person)
Our manager is very efficient.
(*efficient* modifies *manager*)
The candidate for the position is he.
(*he* and *candidate*—same person)

In the first sentence, *colonel* is a **predicate noun.** It completes the meaning of the verb *was* and refers to the same person as the subject. In the second sentence *efficient* is a **predicate adjective.** It modifies the subject noun *manager*. In the third sentence, *he* is a **predicate pronoun.** It means the same person as the subject *candidate*.

9. CASE OF NOUNS AND PRONOUNS

Nouns and pronouns have certain relationships to other words in a sentence. We call attention to these relationships by indicating the case of the noun or pronoun. The word **case** is used in grammar to indicate the *relationship* a noun or a pronoun has to other words in the sentence. The case of a noun or a pronoun is determined by the particular use of that noun or pronoun in the sentence.

There are only three cases in English: the *nominative case*, the *objective case*, and the *possessive case*. The **nominative case** is the case of the *subject*. The **objective case** is the case of the *object*. The **possessive case** is the case that shows *ownership*.

CASE OF NOUNS

Nouns present very few problems of case because the same form is used for the nominative case and the objective case. The only way to determine whether a noun is in the nominative case or in the objective case is to determine its relationship to other words in the sentence. If the noun is used as the *subject* of the sentence, it is in the *nominative case*. If the noun is used as the *object* of a verb or a preposition, it is in the *objective case*.

The **door** is open.
(*nominative case*—subject)
I closed the **door**.
(*objective case*—direct object)

In the first sentence, the noun *door* is used as the subject of the sentence. It is in the nominative case. In the second sentence, the same form, *door*, is used as the direct object of the verb *closed*. *Door* is in the objective case in this sentence.

The nouns *indefinite pronouns* have the same form for the nominative case and the objective case.

Everyone contributed five dollars.
(*nominative case*—subject)
I saw **everyone** at the game.
(*objective case*—direct object)

NOMINATIVE CASE

The word *nominative* comes from a Latin word which means *name*. The **nominative case** names the case of the subject of the sentence. It also names the case of a predicate noun. A predicate noun is in the nominative case. Because of this, it is often called a **predicate nominative.**

A predicate noun agrees in case with the *subject* because it refers to the same person or thing as the subject. It also follows a verb of linking. Verbs used as linking verbs are called predicate nouns. In the following sentences the subjects are the predicate nouns are underlined.

My friend is a naval officer.
The leading lady was Mary Harris.

Officer is a predicate noun. It is used after the linking verb *is* and refers to the same person as the subject. It is in the nominative case to agree with the case of the subject.

In the second sentence, Mary Harris is a predicate noun. It is used after the linking verb *was* and agrees with the subject *lady*. *Mary Harris* and *lady* refer to the same person.

OBJECTIVE CASE

The **objective case** is the case of the direct object of a verb, the indirect object of a verb, and the object of a preposition.

Arthur sent the **manager** a detailed report.
(*objective case*—direct object)
Arthur sent **Articles** a detailed report.
(*objective case*—indirect object)

In the first sentence, *manager* is the direct object. It tells **what** Arthur sent. In the second sentence, *Articles* is in the objective case. In the second sentence, *manager* is the indirect object. It tells **to whom** Arthur sent his report. *Manager* is in the objective case.

In Chapter Two you learned that a preposition is always followed by some noun or pronoun which is called the *object* of the *preposition*. The object of a preposition is always in the objective case.

Edward met his lawyer at the **bank**.
(object of preposition **at**)
We met Marvin in the **lobby**.
(object of preposition **in**)

In the first sentence, the preposition *at* is followed by the noun *bank*. The object of the preposition is *bank* which is in the objective case. In the second sentence, *lobby* is the object of the preposition *in*. *Lobby* is in the objective case.

It is easy to remember that direct objects of verbs, indirect objects of verbs, and objects of prepositions are in the objective case because they are all called **objects** of some type. The fact that they are objects indicates that they are in the **objective case.**

CASE OF PRONOUNS

Nouns do not present any problems in case because the form of the noun is the same for the nominative case and the objective case. Pronouns do present problems in case. The *personal pronouns* and the pronoun *who* have different forms to indicate the different cases.

There are only *six pronouns* in English that have these special forms to show *case*, but the changes that occur to indicate case are very important. They are responsible for many of the errors that frequently occur in the use of pronouns. You should become familiar with the different forms of these pronouns, and you should learn how to use them correctly. The six pronouns are *I, you, he, she, it, who*. The following table gives the nominative case forms and the objective case forms of each of the six pronouns.

Nominative Case		Objective Case	
Singular	Plural	Singular	Plural
I	we	me	us
you	you	you	you
he	they	him	them
she	they	her	them
it	they	it	them
who	who	whom	whom

The pronouns *he, she*, and *it* all have the same plural form. *They* is the pronoun used in the nominative case in the plural for each of the three pronouns. *Them* is the pronoun used in the objective case in the plural for each of the three pronouns.

NOMINATIVE CASE OF PRONOUNS

The nominative case is the case of the subjects of sentences or as predicate pronouns after one of the linking verbs. The difficulty arises in selecting the correct form of the pronoun to use as the subject of the sentence. Mistakes are frequently made, however, when a pronoun is used as a predicate pronoun. The following pronouns in the nominative case:

Subject of the Sentence	Predicate Pronoun
I	It is I.
You	It is **you**.
He	It might be **he**.
She gave me her note book.	It could be **she**.
It	Could it be it?
We are great friends. (plural)	It is **we**.
They arrived early. (plural)	It was **they**. (plural)
Who came in?	**Who** was it? (It was **who?**)

The pronoun *you* does not present any problem in the plural, because the forms for the plural are the same as the forms for the singular. The form of the pronoun *you* is also the same for the nominative case and the objective case.

Interrogative sentences should always be transposed and put in normal order. When this is done, it is easy to determine the case of the pronoun.

OBJECTIVE CASE OF PRONOUNS

Pronouns are in the objective case when they are used as direct objects of verbs, or as objects of prepositions. The correct forms to use in the objective case are *me, you, him, her, it*, and *whom* in the singular, and *us, you, them, whom* in the plural. The following sentences illustrate the correct use of these pronouns in the objective case.

Object of the Verb

Mother called **me**.
Jack saw **him** yesterday.
I met **you** in Paris.
The firm sent **her** to Texas.
My friend invited **us** to the game.
Sue drove **them** to the station.
Whom did you call?

Indirect Object of the Verb

Ethel gave **me** her pen.
I sent **him** a notice.
David sent **you** a ticket.
Jack offered **her** a seat.
The tailor made **us** new uniforms.
The teacher read **them** a story.

Object of a Preposition

The telegram was sent to **me**. (object of the preposition *to*)
The manager created the position for **him**. (object of *for*)
The author wrote an article about **us**. (object of *about*)
The waiter placed their table near **us**. (object of *near*)
We distributed the gifts among **them**. (object of *among*)

THE POSSESSIVE CASE OF NOUNS

The **possessive case** shows *ownership* or *possession*. The use of the possessive case does not present much of a problem in speaking, but it does present a problem in writing and spelling. Although the rule for forming the possessive case of nouns is very simple, many persons have considerable difficulty in spelling and writing the forms correctly.

One simple rule applies to all cases: If the singular form of the noun does not end in **s**, add the *apostrophe* and **s** (**'s**). If the singular ends in **s**, add the *apostrophe* (**'**). Study the following examples carefully and try to apply the rule.

Singular		Plural	
boy	boy's	boys	boys'
lady	lady's	ladies	ladies'
hero	hero's	heroes	heroes'
man	man's	men	men's
Charles	Charles's	Charleses	Charleses'
child	child's	children	children's

There is one fact that you must always keep in mind in order to form the possessive case correctly: that is, the sign of the possessive is something that is *added* to the word. It is not something that is inserted within the word. You must be absolutely sure of the correct form for the singular and the correct form for the plural before you add the sign of the possessive.

Take the proper name, *Dickens*, for example. This is a proper noun in the singular which ends in **s**. The sign of the possessive must be added to the complete word and not inserted within the word. The possessive form is often incorrectly written as *Dicken's*. That would be the possessive form of the name *Dicken*, and not the possessive form of the name *Dickens*. The singular possessive form of *Dickens* is *Dickens'* as shown below.

Oliver Twist is one of **Dicken's** novels. (incorrect)
Oliver Twist is one of **Dickens'** novels. (correct)

The possessive forms of proper nouns are formed according to the rule: If the singular form of the name does not end in **s**, add the *apostrophe* and **s**. If the singular ends in **s**, add the *apostrophe*. The same rule applies to the plural.

Singular		Plural	
Mary	Mary's	Marys	Marys'
Jones	Jones'	Joneses	Joneses'
Henry	Henry's	Henrys	Henrys'
Burns	Burns'	Burnses	Burnses'

There is one slight modification of the rule which may be followed in the case of the possessive singular of nouns that end in **s**. If you want the sound of the additional **s**, the *apostrophe* and **s** may be added.

This is **Charles'** fishing rod. (correct)
This is **Charles's** fishing rod. (correct)
I saw **Doris'** picture at the studio. (correct)
I saw **Doris's** picture at the studio. (correct)

In modern practice, the first form (*Charles' fishing rod*) is the form that is generally used. It follows the rule given, and is the simpler form to use in writing and in pronunciation. This rule also applies to nouns ending in **x** and **z**.

I bought a jar of **Heinz'** pickles. (correct)
She has always worn **Knox'** hats. (correct)
I bought a jar of **Heinz's** pickles. (correct)
She has always worn **Knox's** hats. (correct)

USE OF THE POSSESSIVE —SPECIAL FORMS

As a rule, it is better practice not to use the possessive forms for inanimate objects. Inanimate objects cannot possess anything in the sense that animate objects can. Word expressions such as *the table's top, the book's ending, the lake's shore,* and *the shop's window* are much better to use the phrase with *of* in such cases.

the top **of the table**	the shore **of the lake**
the ending **of the book**	the window **of the shop**

There are certain exceptions to this rule. Usage has established authority for using expressions such as the following.

the earth's surface	the sun's rays
the world's progress	today's edition
the law's delay	time's flight
the season's greetings	the water's edge

Certain expressions relating to *time, distance,* and *value* are also written with the sign of the possessive case. The apostrophe is generally used in expressions like the following.

a month's delay	a stone's throw
two weeks' salary	a week's journey
a month's vacation	ten cents' worth
a few minutes' quiet	thirty days' notice

The singular possessive and the plural possessive of compound nouns are formed by adding the sign of the possessive to the end of the compound word.

Singular	Plural
sister-in-law's	sisters-in-law's
editor-in-chief's	editors-in-chief's
maid of honor's	maids of honor's

Joint ownership is shown by making the last word in the series possessive. Individual ownership is shown by making both parts possessive.

Baker and Johnson's factory. (joint ownership)
Baker's and Johnson's factories. (individual ownership)

Asia and China's problems. (common to both)
Asia's and China's problems. (separate problems)

Some trade names and names of organizations and institutions are written with the sign of the possessive case, and some are not. In writing letters, one should follow the form established by the organization.

When the apostrophe and **s** (**'s**) are not used, the word which would ordinarily be written as a possessive is regarded as an adjective modifier. In the name of an institution, such as *Teachers College*, the apostrophe is not used. The word *Teachers* is regarded as an adjective modifying *College*. It tells the type of college. It does not mean that the teachers possess the college.

The following illustrations show the methods used in writing place names, institutional names, and titles of publications.

With the Apostrophe	Without the Apostrophe
Harper's Magazine	Womens Athletic Club
Hansen's Pharmacy	Bricklayers Union
Queens College (Oxford)	Executives Club
Charles Scribner's Sons	Pikes Peak
Young Mens Christian Association	Downers Grove
Working Girl's Club	Harris Brothers Company
Patron Guardian and Aid Society	Queens English
Consumer Optical Service	American Bankers Association
Ladies' Home Journal	Buzzards Bay
Martha's Vineyard Island	Peoples Finance Company

THE POSSESSIVE CASE OF PRONOUNS

The indefinite pronouns do not have special forms to show case. The possessive case of indefinite pronouns is formed in the same way as the possessive case of nouns. Indefinite pronouns ending in *body, one,* and *thing* and the plural forms of the indefinite pronouns *one* and *other* have the plural form ending in *s*. The following are illustrations of the possessive case form of indefinite pronouns.

everyone's opinion	one's relatives (singular)
someone's hat	somebody's car
anybody's guess	another's choice

The *personal pronouns* and the pronoun *who* have special forms to show the possessive case: *my, mine, our, ours, your, yours, her, hers, his, its, their, theirs,* and *whose*. These forms are never written with an apostrophe. To add an apostrophe would be adding a possessive sign to a word that is already possessive.

Whose report did you check? (not *Who's*)
The automobile was **theirs.** (not *their's*)
I did not know that book was **yours.** (not *your's*)
The ship lost **its** anchor in the storm. (not *it's*)
That ranch type house is **ours.** (not *our's*)

PERSONAL PRONOUNS

Singular and Plural

First Person

Nominative	I
	we
Possessive	my, mine
	our, ours
Objective	me
	us

Second Person

Nominative	you
	you
Possessive	your, yours
	your, yours
Objective	you
	you

Third Person

Nominative	he, she, it
	they
Possessive	his, her, hers, its
	their, theirs
Objective	you
	you

RELATIVE AND INTERROGATIVE PRONOUN "WHO"

Singular and Plural

Nominative	who
Possessive	whose
Objective	whom

10. MODIFIERS: ADJECTIVES

Adjectives give life and color to language. They also help us give more exact pictures of what we are telling about, if we know how to select them carefully. As you improve your skill in using these words, your language will become more interesting and more explicit.

Let us assume that you were telling someone about a man whom you had seen. You might start out with a sentence like this: "I met a man walking down the street." This sentence does not give us an interesting description or very accurate information. It tells very little about the man, his manner of walking, or the street, except which he walked.

Someone who has skill in selecting words that would give a more definite and colorful description might change the sentence into something like this:

I met a **weary** and **disheartened old** man hobbling down the **narrow, winding** street.

This sentence has been made more colorful and more accurate by the use of the adjectives *weary, disheartened,* and *old* to describe the man, and by the use of the adjectives *narrow* and *winding* to describe the street.

In order to use adjectives effectively, you must know the exact shade of meaning that you wish to convey. Then you must be able to select the adjective or adjectives that express that shade of meaning.

You might want to use an adjective to describe a certain type of individual, and you are not sure whether to use the adjective *sly* or the adjective *cunning*. Whenever you are in doubt, consult a reliable, up-to-date dictionary. In most dictionaries these differences in meaning are pointed out.

The adjective *sly* always implies that the individual is working or acting secretly, or is using underhand methods. The adjective *cunning* implies the use of intelligence, skill, or ingenuity. The two words do not mean exactly the same thing.

The following exercise will give you excellent practice in learning how to select the adjective that expresses the exact meaning you would like to convey. The adjectives listed below are divided into groups of three. Each adjective in a group of three expresses a different shade of meaning. Try to write sentences using these words. Be sure that your sentences show the differences in meaning. The dictionary will be a great help.

1. small, diminutive—little
2. form—strange—queer
3. strong—robust—sturdy
4. beautiful—handsome—lovely
5. bright—shining—brilliant

OVERWORKED" ADJECTIVES

There is a tendency on the part of many people to use some adjective to apply to a number of different situations. When a person does this, the assumption is that he has a very limited vocabulary. As a result he never selects the most appropriate word. For example, he may use the word *lovely* to describe many different things. In certain cases, the adjective is the most appropriate or the most precise word to use. Study the following illustrations.

a *lovely* time	a *lovely* view
a *lovely* dress	a *lovely* voice
a *lovely* picnic	a *lovely* program
a *lovely* picture	a *lovely* day
a *lovely* street	a *lovely* necktie

If you wanted to describe a dress instead of [illegible] of the following adjectives *becoming, stylish,* [illegible] would choose the one that expressed the most exact shade of meaning he wished to convey.

lovely swell

KINDS OF ADJECTIVES

There are two kinds of adjectives *descriptive* adjectives and *limiting* adjectives. **Descriptive adjectives,** as the name implies, give color and vividness to the persons, places, or things we talk or write about. **Limiting adjectives** indicate number or quantity.

Descriptive adjectives tell *what kind, what color, what size, what shape,* etc. Limiting adjectives tell *how many, how much, which one, whose,* etc.

three checks (limiting)	**brilliant** speaker (descriptive)
high mountain (descriptive)	**one** airplane (limiting)
a **new** car (descriptive)	a **few** children (limiting)
two branches (limiting)	a **sympathetic** listener (descriptive)

Adjectives derived from proper nouns are called **proper adjectives.** They are usually written with a capital letter. They are usually descriptive adjectives.

Canadian bacon	**Turkish** tobacco
American industries	**Norwegian** sardines
Mexican pottery	**Danish** silver
United States flag	**Swedish** crystal
English wool	**Indian** summer

PREDICATE ADJECTIVES

Adjectives that complete the meaning of the verb and modify the subject are called **predicate adjectives.** If an adjective is found in the predicate and modifies a noun in the predicate it is not a predicate adjective. The adjective must follow a linking verb and modify the subject in order to be classified as a predicate adjective. The predicate adjective usually *describes* the subject noun or pronoun.

The list of linking verbs which was given in Chapter Eight is repeated here for reference. You should become familiar with this important list of verbs. It will help you identify the predicate adjectives that are used after linking verbs.

Linking Verbs

is	grow	look	smell	remain
become	turn	feel	taste	keep
seem	prove	sound	appear	stay

Illustrations

The predicate adjectives are underlined in the following sentences.

Corn is plentiful in Illinois. (*plentiful* corn)
The street has become very muddy. (*muddy* street)

Position of the Adjective

An adjective usually stands directly before the noun it modifies. Sometimes the adjective follows the noun it modifies. The predicate adjective always stands after the verb it completes.

1. Adjectives placed before the noun
   An **old, gnarled** tree lay across the stream.
2. Adjectives placed after the noun
   A tree, **old** and **gnarled,** lay across the stream.
   The tree was **old** and **gnarled.**

NOUNS USED AS ADJECTIVES

The use of pronouns as adjectives was explained in Chapter Six. Nouns are also frequently *used as adjectives.* The nouns in the following expressions are used as adjectives.

college credits (modifies *credits*)
dress accessories (modifies *accessories*)
window sash (modifies *sash*)
Fourth of July speech (modifies *speech*)
summer clothes (modifies *clothes*)
table lamp (modifies *lamp*)

A noun in the *possessive case* is often placed before another noun which it modifies. In such cases the noun in the possessive case is used as an adjective although it has not lost the function of showing ownership or possession. Nouns used in this way are sometimes called **possessive adjectives.** Sometimes they are described as nouns in the possessive case used as adjectives. Observe how nouns in the possessive case are used in the following sentences.

John's car was wrecked in the crash. (*John's* modifies *car.*)
I like to shop in **Macy's** store. (*Macy's* modifies *store.*)
I am wearing my **sister's** coat. (*sister's* modifies *coat.*)

COMPARISON OF ADJECTIVES

The form of an adjective is often changed to show the extent or degree to which a certain quality is present. In grammar, this change in form to show a difference in degree is called *comparison.*

There are three degrees of comparison in English: the *positive degree,* the *comparative degree,* and the *superlative degree.*

The **positive degree** is really not a degree of comparison because no comparison is indicated when the positive degree is used. The positive degree is the simple form of the adjective. It shows that the quality is present, but it does not show a comparison with anything else. The adjectives in the following sentences are all positive degree.

That is a **beautiful** rose.
It is a very **cold** day.
Peter is very **energetic.**
Jane is **studious.**
The **old** house was sold.
It was a very **warm** day.

In the preceding illustrations, the adjective simply shows that the quality is present. No comparison is made with any other person or thing.

The **comparative degree** of the adjective is used when a comparison *is* made between **two** persons or things. The comparative degree shows that the quality expressed by the adjective exists to a *greater* or to a *lesser* degree in one of the two persons or things that are being compared.

The comparative degree of almost all adjectives of *one* syllable is formed by adding **er** to the positive degree, or to the simple form of the adjective, for example, *colder, smoother, longer, greater, stronger, firmer, thicker,* etc.

John is **stronger** than Michael. (*two persons* compared)
This table is **larger** than that table. (*two objects* compared)

In the first sentence, *two persons* are compared as to strength. According to the sentence, John possesses this quality of strength to a greater degree than Michael. The comparative degree of the adjective is used because a comparison is made between *two* persons.

In the second sentence, *two tables* are being compared as to size. The comparative degree of

the adjective *large* is used because a comparison is made between *two objects*.

The **superlative degree** of the adjective is used when **more than two** persons or things are compared. The superlative degree indicates that the quality (expressed by the adjective) is possessed to the *greatest* or to the *least* degree by one of the persons or things included in the comparison.

Our house is the **largest** house in the block. (More than two are compared.)
Louis is the **smallest** boy in his class. (More than two are compared.)

In the first sentence, *more than two* houses are being compared. The superlative degree of the adjective *large* is used to show this fact. The house that possesses the quality expressed by the adjective *large* to the greatest degree is *our* house. It is the *largest* house in a block which contains more than two houses.

In the second sentence, more than two boys are being compared as to size. Louis possesses this quality to the *least* degree. The superlative degree of the adjective *small* is used to show this fact.

DEGREES OF COMPARISON

Adjectives of One Syllable

Positive	Comparative	Superlative
neat	neater	neatest
sharp	sharper	sharpest
dark	darker	darkest
keen	keener	keenest
long	longer	longest

Adjectives of *two or more syllables* are usually compared by prefixing the words *more* and *most* to the simple form of the adjective. *More* is used to indicate the comparison between two persons or things. *Most* is used to indicate the comparison between more than two persons or things. *Less* and *least* are used in a similar way.

Positive	Comparative	Superlative
fragrant	*more* fragrant	*most* fragrant
famous	*less* famous	*least* famous
precious	*more* precious	*most* precious
difficult	*less* difficult	*least* difficult

Sometimes adjectives of *one syllable* are compared by prefixing *more* and *most*. Sometimes adjectives of *more than one syllable* are compared by adding **er** and **est.** There is no rule to follow for making these exceptions. It is usually a matter of sound. If one form of comparison sounds better than the other, that is the form of comparison to use. It sounds better to say *crisp, more crisp, most crisp,* than to say *crisp, crisper, crispest*. Therefore, the comparison with *more* and *most* is preferred.

Adjectives of more than one syllable that end in **y** are usually compared by adding **er** and **est.** Notice the change in spelling in the comparative and in the superlative degree. The **y** changes to **i** before the addition of **er** or **est.**

Positive	Comparative	Superlative
silly	sillier	silliest
dainty	daintier	daintiest
clumsy	clumsier	clumsiest
handy	handier	handiest
noisy	noisier	noisiest

IRREGULAR COMPARISON OF ADJECTIVES

Some adjectives are compared *irregularly*. The forms for the comparative degree and for the superlative degree usually show a marked change in the form of the word, for example, *many, more, most*. You should be familiar with these changes in order to use the correct forms in the comparative and superlative degrees.

Adjectives Compared Irregularly

Positive	Comparative	Superlative
bad, evil, ill	worse	worst
far	farther	farthest
far	further	furthest
good, well	better	best
little	less	least
many	more	most
much	more	most
out	outer	outmost or outermost

Farther refers to *distance* or remoteness in space. **Further** refers to remoteness in *time*, to *degree, extent,* or *quantity*. It is also used to express the idea of something *more* or *additional*.

The garage is **farther** than I thought. (distance in space)
I shall give you **further** instructions tomorrow. (*additional* instructions)

The distinctions between *farther* and *further* are passing out of use. These words are now used interchangeably. There is also a tendency to use *further* to express all the meanings discussed. (See latest dictionaries.)

ADJECTIVES NOT COMPARED

There are a number of adjectives that should not be compared because the **simple** form of the adjective expresses the quality to the highest possible degree. For example, if an answer to a problem is *correct*, another answer could not possibly be *more correct*. If a circle is absolutely *round*, another circle could not be *more round*. If a bottle is *empty*, another bottle could not be *more empty*.

The following are some of the adjectives that are not compared for the reasons given.

perfect	unique	square	universal
single	supreme	fatal	empty
vertical	full	alone	dead
final	mortal	round	deadly
straight	blind	everlasting	wrong

The expression *more nearly round* is often used when comparing two things, one of which is *more nearly round* than the other. In this case, however, neither of the things compared is round. Neither could be *more nearly straight* than another line if neither of the lines was absolutely straight.

Sometimes an adjective such as the word *unique* is modified by the superlative and superlative degrees. In such cases, we have no standard of absolute [illegible] by which to judge. The writer or speaker means is that one person approaches the absolute state of honesty to a greater or to a lesser degree than another person. The adjective *perfect* is often used in the same way.

11. MODIFIERS: ADVERBS

[illegible] use of the adverb as a modifier of the verb, telling *how* [illegible] *when, where,* or *to what extent* [illegible] sometimes. This unit presents [illegible] of the adverb and the relation of adverbs to adjectives and to other adverbs.

FORMS OF ADVERBS

Some people have the idea that all adverbs end in **ly.** There are a great many adverbs that do end in **ly,** but there are probably just as many that do not end in **ly.** Many adverbs are formed by adding **ly** to the adjective form.

Adjective	Adverb	Adjective	Adverb
strange	strangely	awkward	awkwardly
sudden	suddenly	necessary	necessarily
calm	calmly	strict	strictly
sure	surely	forcible	forcibly
usual	usually	extreme	extremely
swift	swiftly	similar	similarly
rapid	rapidly	slight	slightly

The following are some of the adverbs that do not end in **ly**:

seldom	little	why	fast
again	here	now	twice
soon	there	then	too
very	rather	since	much
almost	often	well	quite
ere	when	near	yonder
hard	where	far	how

Many adjectives end in **ly**. They should not be confused with adverbs that end in **ly**. The following words ending in **ly** are commonly used as adjectives. Some of them might also be used as adverbs.

stately	lovely	saintly	manly
homely	womanly	lively	courtly

Some adjectives have the same form as the adverb. In such cases the only way you can tell whether the word is an *adjective* or an *adverb* is to determine its use in a particular sentence. Study the following illustrations carefully.

That was a **hard** task. (*hard* adjective, modifies *task*)
Our janitor works **hard**. (*hard* adverb, modifies *works*)
We arrived at the airport **early**. (*early* adverb modifies *arrived*)
We had to make an **early** start. (*early* adjective modifies *start*)
That was a **cowardly** act. (*cowardly* adjective modifies *act*)
He acted **cowardly** in that situation. (*cowardly* adverb, modifies *acted*)

INTERROGATIVE ADVERBS

An adverb is often used at the beginning of a sentence to ask a question. When an adverb is used in this way, it is called an **interrogative adverb.** An *interrogative adverb* also modifies some word in the sentence.

When did you arrive? (*When* interrogative adverb)
Where did you put my hat? (*Where* interrogative adverb)
How many books have you read? (*How* interrogative adverb)

In the first sentence, the adverb *When* asks the question. It also modifies the verb *did arrive*. (You did arrive when?) In the second sentence, the adverb *Where* asks the question and modifies the verb *did put*. (You did put my hat where?) In the third sentence, the adverb *How* asks the question and modifies the adjective *many*. (You have read how *many* books?)

YES, NO, AND NOT

The affirmative adverb *yes* and the negative adverb *no* are used independently. They are usually set off by commas. *Not* is an adverb. It is used to [illegible] part of the verb phrase; often

parts of a verb phrase. The adverb *not* makes the verb express an idea [illegible] of the regular meaning of the verb.

[illegible]

ADVERBS OF DEGREE

Adverbs of degree tell *how large, how small, how much, to what extent* etc. They answer the questions *"How much?" "To what extent?" "In what degree?"* Adverbs of degree usually modify adjectives or other adverbs. In the following illustrations the adverbs of degree modify *adjectives*.

[illegible] modifies the adjective *cool*.)

The play was rather dull. (*rather* modifies the adjective *dull*.)

[illegible] modifies the adjective *high*.)

In the first sentence, the adverb of degree *very* modifies the predicate adjective *cool*. It tells the degree the apple is cool, or how cool it is. In the second sentence, the adverb of degree *rather* modifies the predicate adjective *dull*. It tells the extent to which the play was *dull*. In the third sentence, the adverb *too* modifies the predicate adjective *high*. It tells the extent to which the price is *high*. The adverbs *very, too,* and *rather* are commonly used as adverbs of degree.

In the following sentences, the adverbs of degree modify other *adverbs*.

The old man moved too slowly. (*too* modifies the adverb *slowly*.)

[illegible]

Don't talk so loud. (*so* modifies the adverb *loud*.)

In the first sentence, the adverb of degree *too* modifies the adverb *slowly*. It tells the extent to which the old man moved slowly. In the second sentence, the adverb of degree tells that John swims fast to a greater [illegible]. The adverb of degree tells that you should not talk loud to the extent expressed by the adverb *so*. In this sentence, the short form of the adverb (*loud*) is used instead of the longer form *loudly*.

NOUNS USED AS ADVERBS

Nouns that express *time, size, place, measurement, degree,* or *number* are often used as [illegible] not only used as adverbs, but they retain an [illegible]

I am going *home*. (*home* noun used as an [illegible]

[illegible] function as an **adverb of place.** In the second sentence, the noun *Monday* tells **when** Horace will arrive. It performs the same function as an **adverb of time.** In the third sentence, the noun *day* tells **how long** we worked, or the extent to which we worked. In the last sentence, the noun *pounds* tells the amount, or **how much**, the fish weighed.

The noun *pounds* in the last sentence is modified by the adjective *five*. Although the noun *pounds*'s functions as an adverb, it may take an adjective modifier. It still retains that particular characteristic of a noun. It functions as two parts of speech at the same time, both as a **noun** and as an **adverb.**

Some persons have difficulty in understanding the use of a noun as an adverb. A noun used as an adverb is really the equivalent of a phrase. The following illustrations will help make this clear.

I am going home. This sentence really means that I am going *to my home*. The noun *home* is the equivalent of the phrase, *to my home*.

Horace will arrive Monday. This sentence means that Horace will arrive *on Monday*. The noun *Monday* is the equivalent of the phrase *on Monday*.

We worked all day. This sentence means that we worked for the period of, or *to the extent of a day*.

The fish weighed five pounds. This sentence means that the fish weighed to the extent of *to the amount of five pounds*.

COMPARISON OF ADVERBS

Adverbs are compared in exactly the same way as adjectives are compared. They have the same three degrees of comparison: the *positive degree*, the *comparative degree*, and the *superlative degree*.

A few adverbs form the comparative degree by adding **er** to the positive degree. They form the superlative degree by adding **est** to the positive degree.

Positive	Comparative	Superlative
late	later	latest
hard	harder	hardest
soon	sooner	soonest
fast	faster	fastest
near	nearer	nearest
[illegible]	[illegible]	quickest
slow (*short form*)	slower	slowest

Most adverbs are compared by placing *more* [illegible] before the positive form. *Less* and *least* are used in the same way as *more* and *most*.

Positive	Comparative	Superlative
carefully	more carefully	most carefully
discreetly	more discreetly	most discreetly
abruptly	more abruptly	most abruptly
[illegible]	[illegible]	[illegible]
efficiently	more efficiently	most efficiently
awkwardly	less awkwardly	least awkwardly
favorably	less favorably	least favorably
gracefully	less gracefully	least gracefully

IRREGULAR COMPARISON OF ADVERBS

[illegible] were also in the list of adjectives that are compared irregularly. Such words are used both as *adjectives* and as *adverbs*.

Positive	Comparative	Superlative
far	farther	farthest
far	further	furthest
badly	worse	worst
little	less	least
much	more	most
well	better	best

Some adverbs are not compared. The following adverbs can not be used in the comparative or in the superlative degrees.

before	never	now	there	very	by
ever	no	so	thus	past	back
here	not	then	too	yes	when ever

The comparative degree of adverbs is used when comparing two things. The superlative degree is used when comparing more than two.

We drove *more slowly* than our guide. (Comparative)

Of the three speakers, the senator spoke *most convincingly*. (Superlative)

12. PRINCIPAL PARTS OF VERBS

Studies have shown that more than half of the errors made in English are errors in the use of verbs. Most of this trouble occurs because of confusion in the use of the principal parts.

Every verb has *three basic forms* which are called the *principal parts* of the verb. These three forms are the **present tense,** the **past tense,** and the **past participle.** They are called the principal parts of the verb because (with a few exceptions) the six tenses of the verb can be built from them.

Tense is a property that belongs to verbs. In grammar, *tense* means *time*. Every verb has certain forms which show the *time* of the *action* or the *time* of the *state of condition*. When we want to indicate that a certain action is going on now, or that a certain state of condition exists at the present time, we use the **present tense.**

Present Tense

I **drive.** (Action occurs at the *present time.*)
He **sings.** (Action occurs at the *present time.*)
Florence **is** ill. (State of condition exists at the *present time.*)

When we want to indicate that the action occurred yesterday, or in some past time, we use the **past tense** of the verb. With a few exceptions, the past tense of the verb is not the same form as the present tense of the verb.

Past Tense

I **drove.** (The action occurred in the *past.*)
He **sang** at the concert. (The action occurred [illegible].)
Florence **was** ill yesterday. (State of condition existed in the *past.*)

In the preceding illustrations, the forms *drive* and *sings* are used to show that action is [illegible] the present time. The forms *drove* and *sang* are used to show that action occurred at some time in the past. The forms *drive* and *sings* are the present tense of the verbs *drive* and *sing*. The forms *drove* and *sang* are the past tense of the verbs *drive* and *sing*.

The **past participle** of the verb is a verb form that is used with *have, has, or had* to form the perfect tenses. The past participle's major function as the predicate verb is to express combined with an auxiliary, such as *have, has,* or *had*. It is a part of the verb phrase.

Past Participles

I have **called** her every day this week. (*called* = past participle)

We have **driven** there often. (*driven* = past participle)

The three forms: the *present tense*, *past tense*, and the *past participle*, constitute the **principal parts** of a verb. Become familiar with the principal parts of certain verbs so that you will be able to use them correctly. The verbs that cause most of our verb troubles are the verbs that form the principal part irregularly. We shall make a special study of these verbs.

REGULAR AND IRREGULAR VERBS

Verbs are divided into two classes on the basis of the way in which the past tense and the past participle are formed. Some are called *regular* or weak verbs, and others are called *irregular* or strong verbs.

A **regular verb** is a verb that forms the past tense and the past participle by adding **ed** or **d** to the form of the present tense. Sometimes the **ed** or **d** changes to **t**: *build, built, built*

Verb	Past Tense	Past Participle
call	called	called
bake	baked	baked
build	built	built

The past tense and the past participle of the verb *call* are formed by adding **ed** to the form of the present tense: *call***ed**. The past tense and the past participle of the verb *bake* are formed by simply adding **d** to the form of the present tense: *bake***d**. The past tense and the past participle of the verb *build* are formed by changing the **d** to **t**. The old form of the verb build was *builded* in the past tense. That form is no longer used. The simpler form *built* has taken its place.

An **irregular verb** is a verb that does *not* form the past tense and the past participle in the regular way, that is, by adding **d** or **ed** to the form of the present tense. The past tense and the past participle of irregular verbs are formed in various ways. The most common way is by a change in the vowel, for example: *sing, sang, sung*. In the case of a few verbs, the same form is used for the present tense, the past tense, and the past participle: *hurt, hurt, hurt*.

Verb	Past Tense	Past Participle
sing	sang	sung
drive	drove	driven
begin	began	begun
go	went	gone
burst	burst	burst

The past tense and the past participle of the verb *sing* are formed by a change in vowel. The **i** in *sing* changes to **a** in the past tense (*sang*) and to **u** in the past participle (*sung*). The verb *begin* follows a similar change in the vowel. The verb *go* has a different form for the past tense and for the past participle: *go, went, gone*. The verb *burst* has the same form for the present tense, the past tense, and the past participle.

VERBS ADDED TO THE LANGUAGE

New verbs are added to the English language as the need arises. Practically all of new verbs form the past tense and the past participle by adding **ed** or **d**. This is the same way that the past tense or the past participle of these verbs add **ed** or **d**.

Verb	Past Tense	Past Participle
radio	radioed	radioed
camouflage	camouflaged	camouflaged
audition	auditioned	auditioned
[illegible]	[illegible]	[illegible]

THE TROUBLESOME VERBS

[illegible] are very hard to learn to spell, and writing because the past tense and the past participle usually follow the rule of forming the past tense and the past participle by adding **d** or **ed**. It is the *irregular verbs* that are responsible for most of the verb errors.

Errors are frequently made in using the *past tense* and the *perfect tense* forms of irregular verbs. This is due to the fact that these verbs form the past tense and the perfect tenses irregularly. In order to use these verbs correctly, it is highly important for you to become familiar with the principal parts of the irregular verbs that are in common use. You will learn these forms by checking constantly until you are familiar with the correct forms for the past tense and the past participle.

Mistakes are commonly made in using the wrong form for the **past tense:** *done* for *did*, *seen* for *saw*, *come* for *came*, *swum* for *swam*, *tore* for *tore*, *began* for *began*, *came* for *came*. The past participle is used in forming the perfect tenses.

Correct Forms for the Past Tense

I said the work assigned to me. (not *done*)

We saw the parade yesterday. (not *seen*)

He came from Ireland two years ago. (not *come*)

She swam across the English Channel last summer. (not *swum*)

The swimming teacher showed all the pupils how. (not *shown*)

The [illegible] the traffic. (not *tore*)

We drank all the milk in the pitcher. (not *drunk*)

Correct Forms for the Past Participle

The delegates **have gone** home. (not *have went*)

He **has done** the work well. (not *has did*)

She **has swum** the channel several times. (not *has swum*)

The actress **has torn** her dress. (not *has tore*)

They **have begun** to check the accounts. (not *have began*)

Has the mail **come**? (not *has came*)

In the first sentence, the past participle [illegible] form the verb phrase *have gone*. The form [illegible]

In the second sentence, the past participle is [illegible] combine with *has*. In the third sentence, the [illegible]

with *has*. *Tore* should never be used with *have, has,* or *had*. The correct form is *have, has,* or *had torn*.

Became is the correct form for the past tense. It should not be used for the past participle. The correct form for the past participle is *begun*. Never use the forms *have began, had began,* or *has began*. The correct forms are *have begun, had begun,* and *has begun*.

The following table gives the principal parts of the irregular verbs that cause most of the verb errors. You should become familiar with the principal parts of these verbs. Consult this list whenever you are in doubt about the correct form to use. If the verb you want is not in this list, consult a reliable, up-to-date dictionary. The principal parts of verbs are given in most dictionaries.

PRINCIPAL PARTS OF TROUBLESOME VERBS

Present Tense (present time)	Past Tense (past time)	Past Participles (*used with have, has, had*)
awake	awaked	awaked
	awoke	awoke
be (am)	was	[illegible]
beat	beat	beaten
become	became	become
begin	began	begun
bid (offer)	bid	bid
bid (command)	bade	bidden, bid
blow	blew	blown
break	broke	broken
bring	brought	brought

wear	wore	worn
weave	wove	woven
weep	wept	wept
wind	wound	wound
wring	wrung	wrung
write	wrote	written

SIX CONFUSING VERBS

Six of the irregular verbs require special attention because the use of the wrong form is considered by many persons to be incorrect more often than any of the other irregular verbs. These forms of the verbs in each pair are similar in appearance, but their meanings are quite different. We shall make a careful study of these verbs.

LIE AND LAY

There are two different verbs that are spelled alike (*lie*). One means to tell a falsehood. This is a regular verb and causes little difficulty in speaking or in writing. The verb that is troublesome is the verb *lie* (to recline) that you should always keep in mind. (1) There is no form ending in **d** that belongs to the verb *lie* meaning *to recline, to be in a horizontal position*. (2) The verb *lie* never takes an object.

Mother **lies** down every afternoon. (*rests*)

Mother **is lying** on the couch. (not *laying*)
Mother **has lain** on that couch often. (not *has laid*)
The pen **lies** on my desk. (not *lays*)
The pen **lay** on my desk all day. (not *laid*)
The pen **is lying** on my desk. (not *is laying*)
The pen **has lain** on my desk all week. (not *has laid*)

The verb **lay**, that is so often confused with *lie*, means *to put something down, to place something somewhere*. The principal parts of this verb are *lay, laid, have, has, or had laid*. The present participle is *laying*. The verb *lay* always takes an object.

John **lays** carpets for Macey's store. (*carpets* object of *lays*)
John **laid** carpets all week. (*carpets* object of *laid*)
John **has laid** carpets for many years. (*carpets* object of *has laid*)

In the first sentence, the verb *lays* is the present tense of the verb *lay*, which means to put something down. The word *carpets* is the direct object of the verb *lay*. It tells what John put down. In the second sentence, the verb *laid* is the past tense of the verb *lay*.

When we use the form *laid*, we must supply an object telling what we *laid* or *had to get down*. *Carpets* is the direct object of the verb *laid*. It tells what John *laid*. In the last sentence, *laid* is the correct form of the verb *lay* to combine with *has*. It helps form the verb phrase *has laid*.

SIT AND SET

The verb *sit* means *to assume a sitting position* or *to occupy a seat*. The principal parts of the verb are *sit, sat (have, has, had) sat*. The present participle is *sitting*. The verb *sit* never takes an object. The forms *set* does not belong to this verb.

Joe **sat** very still watching the game.
The children **were sitting** on the floor.
I always **sit** near the fireplace.
My aunt likes **to sit** in a rocking chair.
She **has sat** in the same chair for many years.

The verb *set* means *to put, to place, to fix, to prepare, to apply, to adjust, to sink, to harden*. The principal parts of the verb are *set (have, has, had) set*. The present participle is *setting*. The verb usually takes an object. There are a few idiomatic uses of the verb in which it does not take an object. The verb in the following sentences is the form used to express present time.

Esther **set** the basket on the table. (*basket* object of *set*)
We **set** the table before the guests arrived. (*table* object of *set*)
The operator **set** her hair beautifully. (*hair* object of *set*)
The buyer **has set** the price too low. (*price* object of *has set*)

Idiomatic Uses

The following sentences illustrate idiomatic uses of the verb *set*.

The sun **was setting** when we left the lodge.
The cement **will set** in two hours.
We **set** out on a long journey.
The men **set** to work at once.
Jelly **sets** as it cools.

RISE AND RAISE

The verb *rise* means *to ascend, to go up, to extend upward, to swell up*, as bread dough in baking. The principal parts of the verb are *rise, rose, (have, has, had) risen*. The present participle is *rising*. The verb *rise* expresses action, but it does not take an object.

The building **rises** to a height of eighty feet.
This river **rises** in the north.
The tide **was rising.**
Dan **has risen** in his profession.
The plane **rose** steadily.
The sun **will rise** at six o'clock tomorrow.
The cliffs **rise** far above the sea.

The verb *raise* means *to lift up something* or cause it *to go up, to increase the amount or force, to collect a number of things*, etc. The verb *raise* always takes an object. You can't raise without raising something. The verb *raise* is a regular verb. The principal parts are *raise, raised, raised*. The present participle is *raising*.

I **raised** my arm. (to lift up)
Don't **raise** so much dust! (to cause to rise)
The leader **raised** an army. (collected)
We **shall raise** the flag at sunrise. (to cause to go up)
The farmer **raises** wheat. (to cause to grow)
The landlord **raised** the rent. (increased)
Do not **raise** your voice. (to make louder)

13. THE TENSES OF VERBS

THE SIX TENSES

A verb is the most important word in any sentence because more constructions depend upon the verb than upon any other part of speech. Verbs have a number of properties which other parts of speech do not have. One of the properties that belongs exclusively to verbs and verb forms is tense.

Chapter 1 explained that in grammar *tense* means *time*. Verbs have **six tenses** which show differences in the time of *action* or the time of the *state of being* or *condition* (linking verbs).

I *see* a robin on the fence. (**present** time)
I *saw* a robin on the fence yesterday. (**past time**)
I *shall see* a number of birds when I go to the woods. (**future** time)

These sentences do not mean the same thing. The meaning depends to a large extent upon the verb form that is used, that is, the verb form that is used to show *the time* of the action.

The first sentence means that the action expressed by the verb *see* is going on now. The second sentence means that the action expressed by the verb *saw* happened at some time in the past (yesterday). The third sentence means that the action expressed by the verb *shall see* will occur at some future time.

The verbs used in the three sentences are forms of the verb *see*. The verb *see* in the first sentence is the form used in the present tense. It expresses or denotes *present time*. The verb *saw* in the second sentence is the form used to express *past time*. The verb *shall see* is the form used to express *future time*.

Remember, there are six tenses in English. The three tenses you have just studied are called the **simple tenses.** The other three tenses are called the **perfect tenses.** The only difference between the simple tenses and the perfect tenses is that the perfect tenses include the idea of completion. In grammar, the word *perfect* refers to an action or state of being that is completed at the time of speaking or writing.

Simple Tenses	Perfect Tenses
present tense	*present perfect* tense
past tense	*past perfect* tense
future tense	*future perfect* tense

THE SIMPLE TENSES

The present tense denotes *present time*. It is also used to express *habitual action* or to express an idea that is *generally accepted as true*.

I *hear* the bell. (present time)
Oscar *works* in an airplane factory. (habitual action)
"Honesty *is* the best policy." (generally accepted truth)

The present tense is often used to express *future time*. Examine the following sentences carefully. In all of them the present tense expresses a future idea.

If it *rains*, we shall not go to the woods.
If the bill *passes*, the tax will be removed.
Our lease on the factory *expires* tomorrow.

The past tense denotes *past time*. The past tense of **regular verbs** is formed by adding *d* or *ed* to the present tense form: call, called; dive, dived. Sometimes the *d* at the end of the present tense form changes to *t* in the past tense: build, built.

I *mailed* the letter yesterday. (addition of *ed*)
We *dived* into the pool. (addition of *d*)
The hunter *built* a cabin in the woods. (change of *d* to *t*)

The past tense of **irregular verbs** is formed in various ways. Sometimes there is a change in the vowel: sing, sang; swim, swam; begin, began; drive, drove; break, broke. Sometimes the same form is used in the past tense and in the present tense: bid, bid; hurt, hurt; cut, cut; slit, slit.

The future tense denotes *future time*. The future tense is formed by combining the auxiliary *shall* or *will* with the present tense form of the verb. Use *shall* with the pronouns *I* and *we*. Use *will* with the pronouns *you, he, she, it, they*.

I *shall see* you tomorrow. (*shall* first person)
I am sure that you *will be* late. (*will* second person)
The speaker *will arrive* at seven. (*will* third person)

To express future time, use *shall* in the first person and *will* in the second and third persons.

THE PERFECT TENSES

You can remember the *perfect tenses* easily if you remember that the word **perfect** is always used in identifying them. The three perfect tenses are the *present perfect tense*, the *past perfect tense*, and the *future perfect tense*.

The present perfect tense denotes *action that is completed* at the time of speaking or writing. It may also indicate action that is *continuing into the present*.

The present perfect tense is formed by combining the auxiliary *have* or *has* with the past participle of the principal verb. The auxiliary *has* is always used in the third person singular. He *has spoken* to the manager.

I *have seen* three of these films. (*have* first person)
You *have earned* a promotion. (*have* second person)
John *has washed* the car. (*has washed* third person)

In the first sentence, the verb phrase is *have seen*. It is the present perfect tense. The verb phrase is made up of the auxiliary *have* and the past participle of the verb *see*, which is *seen*. Observe *earned* in the third sentence. The auxiliary *has* is used instead of *have*. (*has washed*)

The past perfect tense denotes *action that was completed* before some definite time in the past. The past perfect tense is formed by combining the auxiliary *had* with the past participle of the principal verb: *had walked, had known, had given, had drunk, had become, had been*, etc.

In the following sentences, verbs in the past tense are underlined once. Verbs in the past perfect tense are underlined twice.

By the time the officer arrived, the thief had disappeared.
I liked the speaker better after I had heard him the second time.
The agent had sold all the tickets before we applied for some.

The future perfect tense denotes *action that will be completed* at some definite time in the future. The future perfect tense is seldom used in informal speaking or writing.

The future perfect tense is formed by combining the auxiliaries *shall have* or *will have* with the past participle of the principal verb. *Shall have* is used in the first person, and *will have* in the second and third persons. The *italicized* words are in the future perfect tense.

My friend *will have sailed* before I reach the pier.
By January the committee *will have completed* the investigation.
I *shall have crossed* the river three times before noon.

Many verb errors are made because the writer or speaker is not familiar with the forms for the past tense and the past participle. Whenever you are not sure of one of these forms, consult the tables in Chapter 12. If the verb you are interested in is not listed, consult a reliable, up-to-date dictionary. You will find these forms listed after the verb.

You can also avoid verb errors if you know the auxiliaries that indicate the tense:

shall and *will* for the future tense
have and *has* for the present perfect tense
had for the past perfect tense
shall have or *will have* for the future perfect tense

THE VERB "TO BE"

Every person should be thoroughly familiar with the forms of the verb **to be**. It is the most irregular, and also the most important verb in the English language. The verb *to be* is unusual in that, unlike other verbs, it does not show tense by a change in form or by the addition of an auxiliary verb. The entire passive voice and all the progressive forms of other verbs are formed by combining some form of the verb *to be* with the basic form for the present tense or the past participle of the principal verb.

The most important verb

tables for the tenses of three verbs: the verb *to be*, the regular verb *call*, and the irregular verb

REFERENCE TABLE

SIX TENSES OF THE VERB "TO BE"

Singular and Plural

PRESENT TENSE

First person	I am we are
Second person	you are you are
Third person	he, she, it is they are

PAST TENSE

First person	I was we were
Second person	you were you were
Third person	he, she, it was they were

FUTURE TENSE

First person	I *shall* be we *shall* be
Second person	you *will* be you *will* be
Third person	he, she, it *will* be they *will* be

Singular and Plural

PRESENT PERFECT TENSE

First person	I *have* been we *have* been
Second person	you *have* been you *have* been
Third person	he, she, it *has* been they *have* been

PAST PERFECT TENSE

First person	I *had* been we *had* been
Second person	you *had* been you *had* been
Third person	he, she, it *had* been they *had* been

FUTURE PERFECT TENSE

First person	I *shall have* been we *shall have* been
Second person	you *will have* been you *will have* been
Third person	he, she, it *will have* been they *will have* been

Third person	he, she, it *will* ring they *will* ring

PRESENT PERFECT TENSE

First person	I have rung we have rung
Second person	you have rung you have rung
Third person	he, she, it has rung they have rung

PAST PERFECT TENSE

First person	I had rung we had rung
Second person	you had rung you had rung
Third person	he, she, it had rung they had rung

FUTURE PERFECT TENSE

First person	I shall have rung we shall have rung
Second person	you will have rung you will have rung
Third person	he, she, it will have rung they will have rung

PROGRESSIVE FORMS OF VERBS

In addition to the forms which have already been given to show tense, a verb has special forms to show that the *action is continuing*. These forms are called the **progressive forms** of a verb. The *progressive forms* are used to show that an action is *continuing* or *progressing* at the time indicated by a particular tense.

I *am studying* English. (The action is continuing.)

He *is studying* chemistry. (The action is continuing.)

The progressive forms are formed by adding the present participle of the verb to the auxiliary verb *to be*. The present participle of any verb that ends in *ing* is called the **present participle**.

In the sentence, "I am studying," the verb is *am studying*. It is made up of a form of the verb *to be* which is *am* and the present participle of the [illegible] *studying*. In the second sentence, the pro[illegible]

The following are the progressive forms of the verb *call* for the six tenses (first person [illegible]

I *shall be calling* you (future progressive)
I *have been calling* you (present perfect progressive)
I *had been calling* you (past perfect progressive)
I *shall have been calling* you (future perfect progressive)

The present tense progressive form often [illegible]

I *am going* to New York next week. (In the future.)
He *is going* to buy a new home in the suburbs. (In the future.)

VERB "CALL"

PROGRESSIVE FORMS ACTIVE VOICE

Singular and Plural

PRESENT TENSE

First Person	I *am* calling we *are* calling
Second person	you *are* calling you *are* calling
Third person	he, she, it *is* calling they *are* calling

PAST TENSE

First person	I *was* calling we *were* calling
Second person	you *were* calling you *were* calling
Third person	he, she, it *was* calling they *were* calling

FUTURE TENSE

First person	I *shall be* calling we *shall be* calling
Second person	you *will be* calling you *will be* calling
Third person	he, she, it *will be* calling they *will be* calling

PRESENT PERFECT TENSE

First person	I *have been* calling we *have been* calling
Second person	you *have been* calling you *have been* calling
Third person	he, she, it *has been* calling they *have been* calling

PAST PERFECT TENSE

First person	I *had been* calling we *had been* calling
Second person	you *had been* calling you *had been* calling
Third person	he, she, it *had been* calling they *had been* calling

FUTURE PERFECT TENSE

First person	I *shall have been* calling we *shall have been* calling
Second person	you *will have been* calling you *will have been* calling
Third person	he, she, it *will have been* calling they *will have been* calling

EMPHATIC FORMS OF THE VERB

The **emphatic forms** of a verb are often used to give greater emphasis to the idea expressed by the verb. The auxiliaries *do, does,* and *did* are used to give this additional emphasis. The emphatic forms are used in only two tenses, the *present tense* and the *past tense*.

I *do agree* with you. (present tense)
Jane *did send* the letter. (past tense)
The editor *does need* to know the facts. (present tense)

EMPHATIC FORMS —*PRESENT TENSE*

Singular and Plural

First person:	I *do* call we *do* call
Second person:	you *do* call you *do* call
Third person:	he *does* call they *do* call

EMPHATIC FORMS—*PAST TENSE*

First person	I *did* call we *did* call
Second person	you *did* call you *did* call
Third person	he *did* call they *did* call

When *do, does,* and *did* are used in questions, the form is not used for emphasis. The use of *do, does,* and *did* in questions is an idiomatic way of asking question in English. In the following questions *do, does,* and *did* are not the emphatic form of the verb.

Did he buy that hat last week?
Do you know her?
Does he want to pay the bill?

Also, when *do, does,* and *did* are used to mean *accomplish, carry out,* etc., the form is not used for emphasis in these cases. This sentence is an example.

We *did* our homework quickly.

THE USE OF SHALL AND WILL

Many of the precise distinctions concerning the use of *shall* and *will* are rapidly passing out of informal speaking and writing. Careful writers, however, still observe some of these distinctions. The following are some of the distinctions that are most generally observed.

Simple Futurity

Use *shall* in the first person and *will* in the second and third persons to express **simple futurity.** Simple futurity means anticipation or expectation of what is likely to happen, or what one is likely to do. It follows the regular forms of the future tense.

First person	I *shall* go we *shall* go
Second person	you *will* go you *will* go
Third person	he *will* go they *will* go

Determination, Threat, Promise

If you want to express determination, compulsion, threat, or promise (willingness to do something), reverse the order of *shall* and *will*. Use *will* in the first person, and *shall* in the second and third persons.

First person	I *will* go we *will* go
Second person	you *shall* go you *shall* go
Third person	he *shall* go they *shall* go

Special Cases

When *shall* and *will* are followed by such expressions as *be glad, be sorry, be happy, be delighted, be pleased* etc., use *shall* in the first person, and *will* in the second and third persons. If *will* is used in the first person it would mean that you are determined *to be glad, sorry, delighted* etc. If *shall* is used in the second and third persons, it would mean that you are compelling someone *to be glad, sorry* etc. The following are the accepted ways of using such expressions.

I *shall be glad* to see you. (not *will*)
We *shall be delighted* to help you. (not *will*)
You *will be sorry* to learn of his misfortune. (not *shall*)
He *will be pleased* to see you at four. (not *shall*)

In giving courteous commands, you should use *will* in the second and third persons instead of *shall*. This is the form that is generally followed in giving military orders and instructions.

Corporal Smith *will report* to Captain Allen. (not *shall report*)
You *will hand* in your report on Wednesday. (not *shall*)
The meeting *will come* to order. (not *shall*)
Mr. Ames, you *will meet* with the committee today. (not *shall*)

SHOULD AND WOULD

Should is the past tense of *shall* and in general, follows the same rules that apply to the use of *shall*. *Would* is the past tense of *will* and follows the same rules that apply to the use of *will*.

Both *should* and *would* have special uses. *Would* is used in all three persons to express *habitual* or *customary* action. *Should* is often used in all three persons to express *obligation*. *Ought* and *should* both express obligation and are often interchangeable.

Every evening we *would play* cards for hours. (*habitual action*)
You *should read* something worth while every day. (*obligation*)
You *ought to read* something worth while every day. (*obligation*)

Study the following sentences carefully. Note especially the explanations given in parentheses. This will help you understand the distinctions which have been made in the preceding discussion.

I *should be* the first one to volunteer. (*obligation*)
I *will* not see him today. (*determination* on the part of the speaker)
You will enjoy meeting him. (*simple futurity*)
He will enter Harvard in September. (*simple futurity*)
I *will accompany* you to the clinic. (*promise*)
He shall report to the judge every month. (*I am determined* that he shall.)
You shall have any assistance that you may require. (*promise*)
We shall be pleased to grant you an interview. (*simple futurity*)
You would be lost if you ventured out in deep water. (*simple futurity*)
He would drown if he ventured out in deep water. (*simple futurity*)
We should be very happy if *you would call* for us. (*simple futurity*)
I *should be* the first one to volunteer. (*obligation*)
You should read good books. (*obligation*)
They should offer their services to the committee. (*obligation*)

MIXED TENSES

Unless there is a good reason for making a change, the tenses of the verbs in a sentence or in a paragraph should agree. If you start out with a verb in the *past tense*, you should not change to another verb in the *present tense*. If you start with a verb in the *present tense*, you should not change to the *past tense*.

Tense means *time*, and when you change the tense, you also change the time. Tenses must be consistent, that is, there must be a logical sequence of time. It is illogical to shift from one tense to another tense. Study the following illustrations carefully.

Dr. Smith *examined* the patient and *calls* the nurse. (*incorrect*)

In this sentence, the verb *examined* is in the past tense. It is followed by the verb *calls* which is in the present tense. There is a shift from the past tense to the present tense. Both verbs should be in the past tense or both verbs should be in the present tense.

Dr. Smith *examines* the patient and *calls* the nurse. (*correct*)
or
Dr. Smith examined the patient and *called* the nurse. (*correct*)

I *went* into the hall and there I *see* a strange man. (*incorrect*)
I *went* into the hall and there I *saw* a strange man. (*correct*)

The officer *stopped* the car and *speaks* to the driver. (*incorrect*)
The officer *stopped* the car and *spoke* to the driver. (*correct*)

THE "OF" ERROR

Careless speakers and writers often use the preposition *of* in place of the auxiliary verb *have*. The word *of* is a preposition and should never be used as part of a verb phrase.

The "*of*" error is generally caused by the use of contractions or by careless enunciation on the part of a speaker. The mistake is commonly made after the words *could, might, ought to, should,* and *would*. When *have* is used following any of these words, and the two words are contracted, the resulting combination sounds as if *of* were being used rather than *have*. *could've* sounds like *could of*, *should've* sounds like *should of*, etc.

Since in speech the contracted form of *have* cannot readily be distinguished from *of*, many persons have the mistaken belief that *of* is the word being said and that it is the correct word to use. As a result they carry over the mistake from their speech into their writing, and never realize that it is an error. To avoid making the "*of*" error when you are speaking, never contract *have* to *'ve*.

Study the following examples. The preposition *of* should never be used in place of *have* as part of a verb phrase.

We should *of* been more careful (*incorrect*)
We should *have* been more careful (*correct*)

He must *of* taken it (*incorrect*)
He must *have* taken it (*correct*)

They might *of* gotten it (*incorrect*)
They might *have* gotten it (*correct*)

I should *of* prepared the report (*incorrect*)
I should *have* prepared the report (*correct*)

14. VERBS: VOICE AND MOOD

ACTIVE AND PASSIVE VOICE

A verb not only undergoes certain changes to show *tense* or the time of the action but it changes in form to show *voice*. **Voice** is a grammatical term which is used to *tell whether the subject of the sentence is acting or is receiving the action expressed by the verb*.

When the subject is acting we say that the subject is the *doer*. When the subject is receiving the action, we say that the subject is the *receiver*. If you keep these two terms, *doer* and *receiver*, in mind, you will have no difficulty understanding what voice means in grammar.

Study the following sentences carefully. Note the changes that occur in the form of the verb. Note the change that occurs in the subject of the sentence.

Ned washed the car. (*Ned* is the *doer* of the action.)

The car was washed by Ned. (*Car* is the receiver of the action.)

In the first sentence the subject is *Ned*. It is the *doer*, the one who is performing the action expressed by the verb *washed*. The *car* is receiving the action. In grammar we say that the verb in this sentence is in the **active voice** because the subject is the *doer*, or is doing the washing. The car is the *receiver* of the action.

The second sentence is written in the reverse order. The subject is now the receiver of the action instead of the doer. In order to express this idea in accordance with the usual English word order, the doer, *Ned*, is placed at the end of the sentence but is now in a phrase introduced by the preposition *by*.

The verb *was washed* is in the **passive voice** because it represents the subject of the sentence as the receiver of the action. In other words, something is done to the subject. The doer, or the actor, appears in a phrase introduced by the preposition *by*.

A verb in the passive voice is *never* a simple verb. It is always a verb phrase. In the sentence *Our car was stolen yesterday*, the verb *was stolen* is in the passive voice. The doer is unknown, the *by* phrase is omitted. But we know that something was done to the car. If we discover who stole the car, the doer might be added.

Our car was stolen yesterday by a thief.

If a verb is in the **passive voice**, *the subject is the receiver of the action*. When a verb is in the passive voice

HOW THE PASSIVE VOICE IS FORMED

You cannot express an idea in the passive voice without using as a necessary helping verb. The verb *to be* is the auxiliary verb that is used to help form the six tenses of the passive voice. If you are familiar with the conjugation of the verb *to be*, you will have no difficulty in forming the passive voice of any verb that takes an object.

The passive voice is formed by combining the verb *to be* with the **past participle** of the principal verb. The principal verb is the verb that names the action.

The verb *was washed* in the sentence *The car was washed by Ned*, is made up of the auxiliary verb *was*, which is a form of the verb *to be*. The *past participle* of the principal verb is added to the auxiliary *was*. The past participle of the verb *wash* is *washed*. The verb phrase is *was washed*. It is a verb phrase in the passive voice.

The verb phrases in the following sentences are in the *passive voice*. They are formed by combining some form of the verb *to be* with the past participle of the principal verb, or the verb that names the action.

The plans will be made by the general.

Trees have been planted in the park by the commissioners.

The verb in the first sentence is *will be made*. It is made up of the auxiliary *will be*, which is a form of the verb *to be* and the past participle of the verb *make*, which is *made* (*will be made*).

The verb in the second sentence is *have been planted*. It is made up of the auxiliary verb *have been*, which is a form of the verb *to be* and the past participle of the verb *plant* (*planted*).

The six tenses of the verb *call* were given in Chapter Thirteen for the *active voice*. The forms for the *passive voice* follow. If you examine these forms carefully, you will see that the tenses follow the regular conjugation of the verb *to be*. The past participle of the verb *call* (*called*) is added to the forms of the verb *to be*.

SIX TENSES OF THE VERB "CALL"

PASSIVE VOICE

Singular and Plural

PRESENT TENSE

First person	I *am* called we *are* called
Second person	you *are* called you *are* called
Third person	he *is* called they *are* called

PAST TENSE

First person	I *was* called we *were* called
Second person	you *were* called you *were* called
Third person	he *was* called they *were* called

FUTURE TENSE

First person	I *shall be* called we *shall be* called
Second person	you *will be* called you *will be* called
Third person	he *will be* called they *will be* called

PRESENT PERFECT TENSE

Singular and Plural

First person	I *have been* called we *have been* called
Second person	you *have been* called you *have been* called
Third person	he *has been* called they *have been* called

PAST PERFECT TENSE

First person	I *had been* called we *had been* called
Second person	you *had been* called you *had been* called
Third person	he *had been* called they *had been* called

FUTURE PERFECT TENSE

First person	I *shall have been* called we *shall have been* called
Second person	you *will have been* called you *will have been* called
Third person	he *will have been* called they *will have been* called

SIX TENSES OF THE IRREGULAR VERB "KNOW"

PASSIVE VOICE

Singular and Plural

PRESENT TENSE

First person	I *am* known we *are* known
Second person	you *are* known you *are* known
Third person	he *is* known they *are* known

PAST TENSE

First person	I *was* known we *were* known
Second person	you *were* known you *were* known
Third person	he *was* known they *were* known

FUTURE TENSE

First person	I *shall be* known we *shall be* known
Second person	you *will be* known you *will be* known
Third person	he *will be* known they *will be* known

PRESENT PERFECT TENSE

First person	I *have been* known we *have been* known
Second person	you *have been* known you *have been* known
Third person	he *has been* known they *have been* known

PAST PERFECT TENSE

First person	I *had been* known we *had been* known
Second person	you *had been* known you *had been* known
Third person	he *had been* known they *had been* known

SIX TENSES OF THE IRREGULAR VERB "KNOW" (Cont'd)

FUTURE PERFECT TENSE

First person	I *shall have been* known we *shall have been* known
Second person	you *will have been* known you *will have been* known
Third person	he *will have been* known they *will have been* known

WHEN TO USE THE PASSIVE VOICE

Since you may show that the subject is either the doer or the receiver of the action, the question naturally arises, "Which form is better?" The use of the passive voice often results in a roundabout, awkward method of expression.

In the large majority of cases the *active voice is the better form to use*. Never use the passive voice, either in speaking or writing, when the active voice would be more natural or more direct. The following illustrations show clearly that the active voice would be more natural and more direct than the passive voice.

The concert was enjoyed by us. (*passive voice*)
We enjoyed the concert. (*active voice*)

Your order was sent by us by express today. (*passive voice*)
We sent your order by express today. (*active voice*)

The stranger was barked at by a dog. (*passive voice*)
A dog barked at the stranger. (*active voice*)

As a rule, the active voice is preferred for business writing, and for and other form of writing that requires the direct approach. The use of the *active voice increases vividness*. The passive voice expresses reversed action, since the receiver comes before the doer. Active verbs are often used in newspaper headlines because they are more vivid and take less space. The following headlines are all in the active voice:

"Lion Gets Out of Cage"
"White Sox Capture First Title"
"Urges France to Begin Defense Plan"
"Governor Advises Aid for Workers"

The passive voice is generally used when the subject of the sentence is *indefinite, general* or *unimportant*. In the sentence, *They mine coal in Pennsylvania*, the subject is so indefinite that it is not clear what is meant by *they*. It might mean the miners, the people, or the companies. This sentence and sentences like it, are improved by putting the verb in the passive voice.

They *mine* coal in Pennsylvania. (*poor*)
Coal *is mined* in Pennsylvania. (*better*)

They *grow* wheat in many of our states. (*poor*)
Wheat *is grown* in many of our states. (*better*)

They *use* tractors on most farms. (*poor*)
Tractors *are used* on most farms. (*better*)

The passive voice is also used when *what was done* is more important than the doer of the action. Study the following sentences.

The play "Man and Superman" *was written* by Shaw. (*passive*)
Shaw *wrote* the play "Man and Superman." (*active*)

America *was discovered* by Columbus. (*passive*)
Columbus *discovered* America. (*active*)

In the first sentence, if you wish to emphasize the play more than the author, put the verb in the passive voice. In the third sentence, if you wish to emphasize the discovery more than the discoverer, put the verb in the passive voice.

The use of the passive voice is generally used when you want to emphasize the *receiver* rather than the *doer*. However, in the great majority of cases the active voice is more effective than the passive voice.

MOOD OF VERBS

In addition to tense and voice, verbs have another property which is called **mood** (or *mode*). The word *mood* comes from a Latin word which means *manner*. When we apply the term mood to verbs, we mean *the manner in which the verb expresses the action or state of being*.

There are three moods in English, the *indicative mood*, the *imperative mood*, and the *subjunctive mood*. The *indicative mood* is used *to make statements* and *to ask questions*. Most of the verbs that you commonly use are in the indicative mood.

The stenographer *wrote* the letter. (*statement of fact*)
Did you hear the President's address? (*question*)

The imperative mood is used to *express a command* or *a request*. The imperative mood is found only in the present tense, second person. The subject is always the pronoun *you*, which is seldom expressed.

Come here at once! (*command*)
Close the door, Jane. (*request*)

The subjunctive mood is used to *express a wish* or *a condition which is contrary to fact*. By contrary to fact we mean something which is not true. A contrary to fact condition is usually introduced by the word *if* or *as if*.

If *he were* here, I would give him the keys. (*He is not here.*)
I wish *I were* in Florida. (*expresses a wish*)

The indicative and the imperative moods do not present any problems in English. The verb has the same form to express a statement or to ask a question. You can identify the imperative mood easily because the subject is *you*, which is usually understood. The imperative mood always expresses a command or a request.

Although most of the forms for the subjunctive have disappeared from our language, there are a few forms left that you should be able to recognize and to use. The verb *to be* still retains more of the subjunctive forms than any other verb. In the following, the subjunctive forms of the verb *to be* are given.

Reference Table

SUBJUNCTIVE FORMS OF VERB "TO BE"

PRESENT TENSE	*SINGULAR AND PLURAL*
First person	(If) I *be* (If) we *be*
Second person	(If) you *be* (If) you *be*
Third person	(If) he *be* (If) they *be*

PAST TENSE——SINGULAR

First person	(If) I *were*
Second person	(If) you *were*
Third person	(If) he *were*

PRESENT PERFECT TENSE——SINGULAR

First person	(If) I *have* been
Second person	(If) you *have* been
Third person	(If) he *have* been

The subjunctive with *be* (present tense) is almost never used in informal speaking and writing. The subjunctive form *have been* instead of *has been* is also passing out of use.

In the preceding table, the forms for the subjunctive that are different from the indicative are printed in *italics*, that is, *be* in the present tense, *were* in the past tense, first person singular and third person singular, *have* in the present tense, third person singular.

There is only one change that occurs in the subjunctive in the case of other verbs. In the present tense, third person, singular, the *s* is dropped in the subjunctive.

The verb *have* has only one form in the subjunctive that is different from the indicative. In the present tense, third person, singular *have* is used in place of *has*.

If he *have* the time, he will meet with you. (subjunctive)
He *has* the time; he will meet with you. (indicative)

If he fail—— (not *fails*)
If he have—— (not *has*)
If he call—— (not *calls*)

The word *if* is not a part of the subjunctive. The forms for the subjunctive are usually given with the word *if* because the group of words in which the subjunctive is used is very frequently introduced by the word *if*.

Although the subjunctive mood is rapidly passing out of use in informal speaking and writing, there are certain uses that are still observed by discriminating writers and speakers. The subjunctive expressing a *wish* and the subjunctive in a *contrary to fact condition* are two of these uses.

USES OF THE SUBJUNCTIVE MOOD

You have just learned that careful writers and speakers use the subjunctive to express a wish, a condition that is contrary to fact (not true), and a condition of uncertainty (it may be true or not true). Sometimes careful writers and speakers also use the subjunctive *in making a suggestion, in making a demand*, or *in expressing a need*.

I wish I *were* a millionaire. (wish)
If I *were* you, I should give up the contest. (contrary to fact)
If this plan *fail*, we shall give up the project. (condition of uncertainty)
I suggest that he *work* full time in the future. (suggestion)
The supervisor insists that the bookkeeper *prove* his report. (a demand)
It is imperative that the play *begin* at once. (a necessity)

The subjunctive is used in certain parliamentary expressions, such as the following.

I move that the nominations *be closed*.
He moved that the report of the committee *be accepted*.

She moved that the minutes *be adopted* as read

The *[illegible]* uses of the subjunctive are the subjunctive expressing a wish and the subjunctive in a contrary to fact [illegible] as if" and as "though."

15. AGREEMENT OF SUBJECT AND VERB

One of the common errors made both in speaking and writing is the lack of agreement between the subject noun or pronoun and the predicate verb. In order to have harmonious relations between the parts of the sentence you must have this agreement.

AGREEMENT IN PERSON AND NUMBER

The grammatical principle upon which [illegible] the verb depends is very [illegible] subject's *person and number*. If the subject of the [illegible] is singular the verb must also be in the singular. If the subject is plural the verb must also be plural. If the subject is in the first person the verb must also be in the first person. If the subject is in the second or third persons the verb must agree.

[illegible] (correct)
He don't know the answer. (incorrect——lack of agreement.)
You were invited to the meeting. (correct——subject and verb are in second person.)

In the first sentence the subject *He* is in the third person singular. In the second sentence *He* [illegible] person singular is *doesn't* not *don't*.

[illegible] subject and verb. These problems are responsible for the errors that are commonly made. Sometimes the speaker or writer does not [illegible] for the plural. Sometimes he does not know [illegible] that occur in making the subject and the verb [illegible]

AGREEMENT OF VERB WITH COMPOUND SUBJECT

[illegible] the second sentence, the two parts of the compound subject are also connected by *and*. The subject takes the plural form of the verb which is *speak*.

There is one exception to the [illegible] rule. Sometimes the two subjects connected by *and* form a unit. In this case *the subject is regarded as singular and takes a singular verb*.

Bacon and eggs is a popular combination. (*Verb is singular.*)

The Stars and Stripes flies overhead. (*Verb is singular.*)

When two subjects connected by *and* refer to the same person or thing, the subject is *singular*.

His companion and friend is very devoted to [illegible]. (*same person*)
The secretary and treasurer was present at the meeting. (*same person*)

If the subjects in the [illegible] sentences referred to *two individuals*, the verbs would be plural. The sentences would read as follows:

His companion and his friend are very devoted [illegible].
The secretary and the treasurer were present at the meeting.

By placing the word *his* before friend and the word *the* before treasurer, you clearly indicate that there are two individuals.

Subjects Connected by 'Or' or 'Nor'

When two singular subjects are connected by *or* and the subject [illegible] sentence means *either the one or the other*. It [illegible] when *nor* is used to join two singular subjects. *Either or* and *neither nor* follow the same rule.

[illegible] *one or the other*)
[illegible] (*neither the one nor the other*)

When one of the subjects connected by *or, either or, neither nor* is singular and the other is plural, the verb agrees with the subject that is *nearer to* it. If both subjects are plural, the verb is also plural.

[illegible] (*Verb is plural.*)
Neither the men nor the boy was responsible. (*Verb is singular.*)
Neither the men nor the boys were responsible.

In the first sentence, the plural subject is [illegible] third sentence, both subjects are plural. When

AGREEMENT OF VERB WITH COLLECTIVE NOUNS

A **collective noun** is a noun that represents a group or a collection of objects usually considered as a unit. Words like *crowd, troop, herd, people, flock,* and *jury* are collective nouns.

A collective noun that is singular in meaning requires a singular verb. A collective noun that is plural in meaning requires a plural verb.

If the collective noun in a particular sentence represents the individuals acting as a unit, the noun is singular. If the sentence indicates clearly that the individuals are acting separately, the noun is plural. The following examples will help you see this distinction.

The *committee is opposed* to the plan. (*acting as a unit*)
The *board of directors is* in session. (*as a unit*)
The *jury returned its* verdict. (*as a unit*)
The *jury have returned* to their homes. (*as individuals*)
The *family have given* their contributions. (*as individuals*)

In most cases where the individuals composing a group are acting separately, it is better to use such expressions as *the members of the jury, the members of the family,* etc. These expressions sound better and clearly indicate that the individuals are acting separately.

The members of the jury have returned to their homes.
The people in the audience were waving their hands.

INTERVENING PHRASES

Sometimes the subject is followed by prepositional phrases or such expressions as *accompanied by, in accordance with, together with, as well as, including,* etc. The subject of the sentence is not affected in any way by the introduction of such phrases. You will never find the subject of the sentence in a prepositional phrase or in any one of the expressions listed in the following sentences.

A *package* (of books) *was delivered* today.
Materials (for the building) *have been shipped* [illegible]
Important *papers*, as well as his will, *were* [illegible] on his desk.
The *checks*, including a statement, *were mailed* [illegible]

In the first sentence, the subject is the word [illegible] Since *package* is singular, the verb [illegible] must be singular. In the second sentence, the subject is the word *Materials*. Since the subject is plural, the verb must be plural. The prepositional phrases, *of books*, and *for the* [illegible] do not affect the number of the [illegible]

The subject of the third sentence is *papers*, which is plural. The verb must also be plural to [illegible] the subject. The group of words *as* [illegible] does not affect the number of the subject. In the fourth sentence, the [illegible] *a statement*, does not [illegible] the subject. The subject is *checks*, which is plural. The verb must also be [illegible] with the subject.

AGREEMENT OF SUBJECT WITH CONTRACTIONS

[illegible] verbs that have been [illegible] the omission of one or more [illegible] of the letters is indicated

by the use of an apostrophe. Many persons make mistakes in agreement of subject and verb when they use contractions. The use of the contractions *don't* and *ain't* are responsible for a great many of these errors.

Although the word *ain't* is frequently heard in informal conversation, most educated persons consider its use incorrect and unacceptable.

Do not use *ain't* for *am not, are not,* or *isn't.* The contraction *aren't* should be used for *are not.* There is no contraction for the words *am not.*

I *am not* interested in the position. (not *ain't*)
We *are not* going to the theater. (not *ain't*)
We *aren't* going to the meeting. (not *ain't*)
Isn't this a beautiful day! (not *ain't*)

Another error commonly made is the use of **don't** for **doesn't. Don't** is a contraction for *do not.* It should not be used in the third person singular. The expressions *it don't, he don't* and *she don't* are incorrect. Do not misuse them for *it doesn't, he doesn't,* and *she doesn't.*

It *don't* make any difference. (incorrect)
It *doesn't* make any difference. (correct)

He *don't belong to our union. (incorrect)*
He doesn't belong to our union. (correct)

AGREEMENT OF VERB WITH INDEFINITE PRONOUNS

The indefinite pronouns *one, no one, anyone, everyone, someone, anybody, nobody, everybody, somebody, each, either,* and *neither* are always singular. Since these pronouns are singular, they take a singular verb.

Only *one* of the candidates is eligible. (*singular verb*)
Each of these bags has been examined. (*singular verb*)
Neither has lost his ticket. (*singular verb*)
Somebody is responsible for the accident. (*singular verb*)
Anyone has the right to offer criticism. (*singular verb*)
Nobody has access to the vault. (*singular verb*)

When *many a, each,* and *every* are used to introduce a sentence and function as adjectives, the *subject* is singular.

Many a *man* wishes that he had gone to college.
Each *window* and *door* was locked securely.
Every *man, woman,* and *child* is expected to report.

The indefinite pronouns *several, few, both* and *many* are always plural.

Several were called to the platform. (*plural verb*)
A *few* were opposed to the bill. (*plural verb*)
Both were anxious to receive the award. (*plural verb*)
Many in the audience objected to his speech. (*plural verb*)

The indefinite pronouns *some, none, any,* and *all* are singular or plural according to the meaning of the sentence. When these words refer to a *quantity* or a *mass* taken as a whole, they are generally considered as singular. When they refer to a *number,* they are regarded as plural in meaning.

Some are going by plane. (*more than one*——plural)
Some of the ice cream *is* left. (*mass or quantity*——singular)
Are any of the men going by plane? (*more than one*——plural)
Is there *any* gasoline in the tank? (*mass or quantity*——singular)
None of these apples *are* ripe. (*more than one*——plural)
We needed a ball but *none was* available. (*not one*——singular)
All of the gasoline *has been sold.* (*mass or quantity*——singular)
All of the women *have brought* gifts. (*more than one*——plural)

Some nouns are plural in form but singular in meaning. Examples of nouns that take a singular verb are *mumps, measles, news, summons, physics, mathematics.*

Physics is a very interesting subject. *Verb is singular.*)
The news this week is startling. (*Verb is singular.*)
Measles is a contagious disease. (*Verb is singular.*)
Mathematics was his favorite study. (*Verb is singular.*)

SPECIAL CASES OF AGREEMENT

1. Words like *pants, trousers, pliers, scissors, shears,* and *tongs* are plural and take a plural verb. When the word *pair* is used as the subject, the subject is regarded as singular and takes a singular verb.

The *scissors* are very sharp. (*plural*)
A *pair* of scissors was left on the desk. (*singular*)

2. A plural noun which shows *weight, extent,* or *quantity* is singular, and takes a singular verb. Ten miles is a long distance to walk. (*singular*)
Five dollars is the price of the hat. (*singular*)
Twelve inches is the proper length. (*singular*)

3. The words *half* and *part* are singular or plural according to the meaning of the sentence. When these words refer to a *mass* or a *section,* they are singular. When they refer to a *number* of individuals or things, they are plural.

Half of the boys are in camp. (*number*——plural)
Half of the pie is left. (*mass or section*——singular)
Part of the roof was destroyed. (*mass or section*——singular)
Part of the guests have arrived. (*number*——plural)

4. When the word *number* is preceded by the article *a,* it takes a plural verb. When it is immediately preceded by the article *the,* it takes a singular verb.

A number of men *were working* on the project. (*plural*)
The number of men present *was* small. (*singular*)

5. The name of a firm is often regarded as singular even when there is a plural form in the title. If the entire name carries a plural idea, the name is regarded as plural.

Harrison Brothers are having a sale on furs. (*plural*)
The Lexicon Company publishes books. (*singular*)
Tractors *are made* by *General Motors Company.* (*plural*)
Has Simmons *Company* declared a dividend? (*singular*)

6. Sometimes a sentence begins with the word *there* or *here.* Neither of these words could be the subject of the sentence. The word *there* is used either as an expletive or as an adverb. The word *here* is an adverb. When a sentence begins with *here* or *there,* you should transpose it so that the true subject will appear at the beginning of the sentence. Then it will be possible for you to determine whether the subject is singular or plural.

There are six men on the committee.
Six men are on the committee. (*plural subject——plural verb*)
Here comes the general with his staff.
The general comes here with his staff. (*singular subject and verb*)

Sometimes a sentence beginning with the introductory *there* or *here* has a *compound subject,* which requires a plural verb. Mistakes in the number of the verb are frequently made because the speaker or the writer does not realize that the subject is *compound.* When the sentence is transposed, it is easy to determine whether the subject is simple or compound. The following sentences have compound subjects:

There goes the boy and his mother. (incorrect)
There go the boy and his mother. (correct)
The boy and his mother go there. (*compound subject——plural verb*)
Here comes John and Mary. (incorrect)
Here come John and Mary. (correct)
John and Mary come here. (*compound subject——plural verb*)

16. PREPOSITIONAL PHRASES

Chapter Two explained that a preposition is a word that shows the relation between its object and some other word in the sentence. In this unit you will study the function of the phrase which the preposition introduces.

A *prepositional phrase consists of the preposition and its object.* Sometimes the noun which serves as the object of the preposition has modifiers, but the important words in the phrase are the two words–the *preposition* and the *object.* The prepositions and their objects are underlined.

I walked down the winding street.
The girl with red hair is an artist.

In the first sentence, the preposition is the word *down.* The object is *street.* The entire phrase is *down the winding street.* The two important words in the phrase are the preposition *down* and the object *street.*

In the second sentence, the preposition is *with* and the object is *hair.* The prepositional phrase is the group of words, *with red hair.*

In grammar, a **phrase** is a group of words, *without a subject and predicate,* that functions as *a single part of speech.* A prepositional phrase is a phrase that functions as an *adjective* or an *adverb.* Since adjectives and adverbs are modifiers, the prepositional phrase is also a modifier.

ADJECTIVE PHRASES

An *adjective phrase* is a prepositional phrase [illegible] an adjective. An adjective phrase [illegible] the following illustrations.

The man *at the gate* sold us the tickets.
We followed the path *near the river*.

In the first sentence, the prepositional phrase [illegible] because it modifies the noun *man*. The phrase *at the gate* is the equivalent of an adjective because it [illegible]

In the second sentence, the prepositional phrase is *near the river*. This is also an adjective [illegible] sentence means that we followed the *river* path. The phrase *near the river* is the equivalent of an adjective.

Like the adjective, the adjective phrase *describes* or *limits* the noun or pronoun which it modifies.

She wore a hat *with blue trimming*. (describes the hat)
[illegible] a particular house)

An adjective phrase may follow the noun [illegible]

The injured man seemed *in a daze*. (follows a [illegible]

You will not acquire skill in recognizing [illegible] ar with the words that are commonly used as [illegible] the prepositions that are in common use.

Commonly Used Prepositions

[illegible]	[illegible]	[illegible]	toward
[illegible]	down	[illegible]	[illegible]
behind	[illegible]	near	[illegible]
[illegible]	except	[illegible]	[illegible]
[illegible]	for	[illegible]	[illegible]
[illegible]	[illegible]	[illegible]	with
[illegible]	inside	to	within

The fact that a word appears in this list does not mean that it is always used as a preposition. Many of the words that are commonly used as prepositions are also used as adverbs.

ADVERBIAL PHRASES

The adverbial phrase in the second sentence is *on the deck*. This phrase tells *where* or *at what place* the sailor was working. It modifies the verb *was working*. The adverbial phrase in the [illegible] sentence, *[illegible]*, tells *how* or *in what manner* you should tell the story. The phrase modifies the verb *tell*.

Adverbial phrases that modify verbs are very [illegible]. Most that modify adjectives and adverbs are not always easy to identify. The adverbial phrase that modifies an adjective usually follows that adjective. Study the following [illegible]

The child seemed afraid *of the noise*. (modifies [illegible])

In this sentence, the adverbial phrase *of the noise* modifies the predicate adjective *afraid*. Adverbial phrases that modify adjectives usually follow this pattern.

COMPOUND OR PHRASAL PREPOSITIONS

A preposition is not always a single word. There are a number of prepositions in common use that are made up of a group of two or more words. Such prepositions are called **compound prepositions** or **phrasal prepositions**.

[illegible] consists of two or more words, it is regarded as a unit or as a single preposition. The following list includes the compound prepositions that are in common use.

[illegible]	[illegible]
along side of	in apposition with
[illegible]	[illegible]
because of	in regard to
[illegible]	[illegible]
by reason of	in spite of
by way of	instead of
[illegible]	[illegible]
for the sake of	out of
in addition to	with reference to
[illegible]	[illegible]

Compound Prepositions in Sentences

In compliance with his request, we closed the account.
According to our schedule, the job will be [illegible].
The president resigned *on account of illness*.

PRONOUNS USED AS OBJECT OF PREPOSITIONS

You have already learned that the object of a preposition is always in the **objective case**. When nouns are used as objects of prepositions, they do not present a problem because nouns do not have different forms for the [illegible].

Pronouns do present a problem in case because some of the *personal pronouns* and [illegible] objective case. When a pronoun is used as the object of a preposition, the form for the [illegible] are **nominative case** forms. The correct forms [illegible] objective case.

The speaker spoke to **me** after the meeting [illegible] objective case.)
I went to the Art Institute with **her.** (*her*——objective case.)
We looked at **him** while he was dancing [illegible] objective case.)
The women prepared a dinner for **them.** (*them*——objective case.)
The librarian found the books for **us.** (*us*——objective case.)
For **whom** are you working now? (*whom*——objective case.)

Watch the two words, *but* and *like*, carefully when they are followed by pronouns. The word *but* is a preposition when it means *except*. When the word *but* is used as a preposition, it must be followed by the objective case. Similarly, when the word *like* is used as a preposition, it must be followed by the objective case of the pronoun. As a preposition, *like* means *similar to*, or *in a manner similar to*. (Other uses of the word *like* will be found in Chapter 19.)

No one knew the answer **but** me. (*but*——preposition.)
His son looks **like** him. (*like*——preposition.)

THE CORRECT USE OF PREPOSITIONS

Many of the common prepositions are often used incorrectly. Since a preposition expresses a relationship between the object and some other word in the sentence, the preposition that you use must be selected with care. Very often the speaker or writer is not aware of the distinctions in meaning that careful writers and speakers observe in using prepositions. The following are some of the prepositions that you should use with discrimination.

Differences in Meaning

1. **Around, about.** *Around* means encir[illegible]. *About* often means approximately. Do not use *around* when you mean approximately.

The fish weighed *around* three pounds. (incorrect)
The fish weighed *about* two pounds. (correct)
She tied a ribbon *about* her head. (incorrect)
She tied a ribbon *around* her head. (correct)

2. **Agree to, agree with.** One *agrees to* a proposal, but *agrees with* a person.

The members *agreed with* the president. (correct——*person*.)
I *agree to* your plan for saving money. [illegible]

3. **Beside, besides.** *Beside* means by the side of. *Besides* means in addition to.

Margaret sat *beside* her father. (*by the side of*)
[illegible] besides Jerry in the boat. (*in addition to*)

4. **Between, among.** *Between* is used when referring to two. *Among* is used when referring to more than two.

Frank and Harry divided the money *between* them. (*two persons*.)
[illegible] among the five heirs. (*more than two*.)

5. **Differ with, differ from.** One *differs with* [illegible] opinion. A person or thing *differs from* another in certain respects; [illegible] is *unlike* another in [illegible] respects.

I *differ with* you about his qualifications. (*matter of opinion*.)

Maine *differs from* Honduras in many ways. (*In certain respects*)

6 **Different from, different than.** *Different from* is correct. Do not use *different than* which is incorrect.

The motion picture is *different from* the book. (correct)
The motion picture is *different than* the book. (incorrect)

7 **In, into.** The preposition *in* indicates location or motion within a place. *Into* indicates motion *toward the inside* of a place from the outside.

The tea was held *in* the garden. (*within a place*)
The swimmer jumped *into* the pool. (*from the outside*)
He swam *in* the pool. (*motion within a place*)

8 **In back of, behind.** *In back of* should never be used for *behind*.

The car is *in back* of the house. (incorrect)
The car is *behind* the house. (correct)

9 **Over, more than.** *Over* expresses the idea of *place*. *More than* expresses the idea of *quantity*.

The actress has *over* a hundred dresses. (incorrect)
The actress has *more than* a hundred dresses. (correct)
She wore a cape *over* her shoulders. (correct—*place*)

10 **Outside of, except.** Do not use *outside of* when you mean *except*.

No one went *outside of* James. (incorrect)
No one went *except* James. (correct)

11 **To, too.** The preposition *to* should not be confused with the adverb *too*.

I am going *to* the Dunes. (preposition *to*)
Will you go *too*? (adverb meaning *also*)

12 **Within, inside of.** Do not use *inside of* to express time. Use *within*.

He will leave *inside of* a week. (incorrect)
He will leave *within* a week. (correct)

13 **In regard to, with regard to.** Do not say *in regards to* or *with regards to*. The correct expressions are *in regard to* and *with regard to*.

In regards to your order. (incorrect)
In regard to your order. (correct)

14 **Unnecessary prepositions.** Do not use *off of* for *off*. The *of* should not be added. Always omit the unnecessary prepositions in sentences like the following.

He jumped *off of* the pier. (*of* is superfluous)
He jumped *off* the pier. (correct)
Where is he *at*? (incorrect)
Where is he? (correct)
Where is he going *to*? (incorrect)
Where is he going? (correct)
Is the rain over *with*? (incorrect)
Is the rain over? (correct)

POSITION OF THE PREPOSITION

Many persons believe that it is incorrect to end a sentence with a preposition. Yet often it is more natural and more emphatic to place the preposition at the end of the sentence. In many questions the preposition comes naturally at the end. But a preposition should not be used at the end of a sentence if it sounds awkward or changes the meaning of the sentence. The following sentences end with a preposition. The prepositions fall naturally and correctly at the end.

Whom are you looking *for*?
What kind of plane is he traveling *in*?
They said the cat you were looking *at*.

Ordinarily the preposition should not be placed at the end of the sentence. However, many of our best writers and speakers occasionally end a sentence in this way.

17. THE COMPOUND SENTENCE

Chapter Four explained that there are four types of sentences: *declarative*, *interrogative*, *imperative*, and *exclamatory sentences*. A particular sentence falls into one of these groups according to the purpose which it serves.

When you make a statement, you use a declarative sentence; but when you ask a question, you use an interrogative sentence. If your purpose is to issue a command or make a request, you use the imperative sentence. When you want to express strong feeling or sudden emotion, you use an exclamatory sentence.

KINDS OF CLAUSES

There is still another way of classifying sentences. This classification is based upon the internal structure of the sentence or the way in which it is built up. Thus far we have been dealing with the sentence that has the simplest form of internal structure——the *simple sentence*. We have been dealing with the simple sentence because our chief problem has been the relationships that words have to each other.

In this unit you will begin a study of the more complicated sentence patterns. You will learn how to build up sentences in a number of different ways. This knowledge will enable you to express your ideas in a variety of ways and will give you more power over language.

The type of classification of sentences which you will study is based upon the *number* and *kinds* of **clauses** which a sentence contains. According to this classification, sentences are divided into four groups: *simple*, *compound*, *complex*, and *compound-complex*. In this unit we shall limit our study to the simple sentence and the compound sentence.

Before you can understand the difference between a simple sentence and a compound sentence, you must have a very clear idea of what is meant by a clause in grammar.

A **clause** is a group of words that has a *subject* and a *predicate*. There are two kinds of clauses: *independent* or *main* clauses and *dependent* or *subordinate* clauses.

INDEPENDENT CLAUSES

An **independent clause** is a group of words that has a subject and a predicate. An independent clause does not depend upon anything else for its meaning. It expresses a complete thought. An independent clause is a simple sentence when it stands alone.

The officer blew his whistle and the cars stopped.

In this sentence there are two independent clauses. The first independent clause is *The officer blew his whistle*. The second independent clause is *the cars stopped*. These clauses could be written as two simple sentences by omitting the conjunction *and*. The conjunction *and* does not belong to either of the independent clauses. It simply brings the two independent clauses together in one sentence.

The officer blew his whistle. The cars stopped.

SUBORDINATE CLAUSES

A **subordinate clause** is a group of words that has a subject and a predicate, *but the clause cannot stand alone*. A subordinate clause does not express a complete thought. It depends upon the main clause for its meaning. The connective, or the word that introduces the subordinate clause, plays an important part in making it a dependent clause. In the following sentence the subordinate clause is underlined.

The cars stopped when the officer blew his whistle.

In this sentence the group of words, *when the officer blew his whistle*, is a subordinate clause. It cannot stand alone although it has both a subject and a predicate. The word *when*, which introduces the clause, makes the words which follow it dependent upon the main clause for the meaning. That is the reason why the clause, *when the officer blew his whistle*, is called a dependent or a subordinate clause.

The group of words, *the cars stopped*, is an independent clause. It could stand alone. It is the main clause in the sentence because it states the main idea in the sentence.

THE SIMPLE SENTENCE

A **simple sentence** is a sentence having *one* subject and *one* predicate, either or both of which may be *compound*. A simple sentence consists of one and only one independent clause. All of the following sentences are simple sentences, but some have compound subjects or predicates. The last sentence has both a compound subject and a compound predicate.

John joined the Navy. (simple subject and predicate)
John and Fred joined the Marines. (compound subject)
Mary sang and played at the concert. (compound predicate)
Mary and Jane sang and played at the concert. (compound subject and predicate)

Note that a compound subject does not mean two subjects. It means the *one* subject is made up of two or more nouns or pronouns. A *compound predicate* does not mean two predicates. It means that *one* predicate is made up of two or more verbs or verb phrases.

THE COMPOUND SENTENCE

A **compound sentence** is a sentence that *contains two or more independent clauses*. The independent clauses of a compound sentence must be joined in some way to indicate that the independent clauses form one sentence.

When you put two independent clauses or two simple sentences together to form one longer sentence, you have a compound sentence.

John joined the Navy. (simple sentence)
Harry joined the Marines. (simple sentence)

the problem of punctuation and the problem of

show the ways in which two simple sentences

John joined the Navy. Harry joined the Marines.

John joined the Navy **but** Harry joined the Marines. (*conjunction only*)

From these illustrations you can see that the independent clauses of a compound sentence

1. By using a comma before a conjunction

3. By using a conjunction without a comma

All three methods of writing a compound sentence are correct. However, you will use the first method, a comma before a conjunction, much more frequently than the other two methods. You will learn more about each method of punctuation as you progress in this

IDENTIFYING THE COMPOUND SENTENCE

Some persons have difficulty in distinguishing between a simple sentence with a compound subject or predicate and a compound sentence. The point to keep in mind is that the compound sentence must be the equivalent of

me the following illustration carefully.

The Indian squaw cooks, sews, and builds the wigwam.

You could not possibly make two independent clauses out of the sentence as it is written. In

would have to supply another subject and write the sentence as two independent clauses.

The Indian squaw cooks and sews, **and** she

COORDINATE CONJUNCTIONS

rank or of equal rank. Coordinate conjunc-

Use of the Comma and Coordinate Conjunction

Arthur washed our new car, **and** Ned polished

I may consider your plan, **or** I may disregard it.

I did not seek the position, **nor** do I want it.

Michael likes tennis, **but** he prefers to play golf.

Their team was untrained, **while** ours was

Jack went to bed early, **for** he was very tired.

Careful writers, however, usually place a comma before the conjunctions *but* and *for*. If a comma is not placed before the word *for* when it is used as a coordinate conjunction, *for* might be mistaken for a preposition.

USE OF THE SEMICOLON IN THE COMPOUND SENTENCE

You have learned that a comma and a

separate the clauses of a compound sentence. Sometimes the ideas combined in a compound

necessary to use a conjunction. In that case, a semicolon is used to separate the two clauses. The following are two important uses of the

1. A semicolon should be used between the independent clauses of a compound sentence

conjunction. In the following sentence there

dent clauses; therefore, a semicolon is used.

The doctor came in late; he did not stop to read the telegram.

compound sentence are very long or have *internal punctuation*, a semicolon is generally used before the coordinate conjunction. **Internal punctuation** means that there are commas

Shakespeare, a great dramatist, wrote a great many plays, and he also wrote a number of

Temperamental and lazy, John managed to get along without working, but he was never contented or happy.

Both of these sentences have one or more

the first clause has *internal punctuation*. A semicolon is used between the two independent clauses even though a coordinate con-

THE "COMMA FAULT"

You have just learned that two independent

two independent clauses are often joined by a coordinate conjunction and a comma. The

clauses should not be joined by a comma

In this sentence, two independent clauses are joined by means of a comma. This is known as the "comma fault" because the comma is the sole connection between two independent clauses. This error may be eliminated by punctuating the sentence in any one of the three ways that have been given in this unit.

1. Use a coordinate conjunction after the comma.

The author wrote many stories for children, and she also wrote a number of historical novels. (*correct*)

2. Use a semicolon between the two independent clauses.

The author wrote many stories for children; she also wrote a number of historical novels. (*correct*)

3. Punctuate the two independent clauses as two simple sentences.

The author wrote many stories for children. She also wrote a number of historical novels. (*correct*)

A skillful writer sometimes puts commas between the independent clauses of a compound sentence. This is done deliberately for the purpose of producing a certain effect. The clauses are usually very short and similar in length and structure. The following sentence is a famous example.

I came, I saw, I conquered.

THE RUN ON SENTENCE

The **run on sentence error** is very similar to the "*comma fault*." The only difference is that the run on sentence consists of two or more independent statements that are run together without any mark of punctuation, or without any connecting word. The following sentence is an illustration of the run on sentence.

Money provided by stockholders has helped the company purchase equipment and supplies it has also enabled the company to expand its production.

In this sentence, two independent statements have been run together without any punctuation or without any connecting word or words. The sentence might be correctly written by following any of the suggestions given for removing the "*comma fault*."

This run on sentence error is commonly made. You should check your writing carefully. Be sure that you do not run sentences together without punctuation or proper connectives.

TRANSITIONAL WORDS

There is another type of connecting word

clauses of a compound sentence. The words

They are sometimes called **transitional words** because they are not pure conjunctions.

Some of these words have a slight connecting force. Others have some adverbial force. But they all belong to the independent clause which they introduce or in which they are found. Connectives that belong to this group *are always preceded by a semicolon.*

Since many of these words are regarded as independent elements, they are usually set off

however, moreover, therefore, and *nevertheless* are usually set off.

and so are seldom set

off by commas when they retain their adverbial force.

Sometimes the connection is made by a group of words. Expressions like the following are transitional words and are regarded as a single connecting word: *in fact, on the other hand, that is*, etc. Study the following illustrations carefully.

The road was unpaved; **nevertheless**, we drove on in the rain.
I missed the first boat; **however**, I arrived on time.
The president introduced the speaker; **then** he sat down.
Ethel was sick; **in fact**, she had one of her usual colds.
We arrived early; **as a result**, we had time to visit with our friends.
We cannot get materials; **consequently**, we cannot finish the job.
I became tired of doing his work; **moreover**, I had my own work to do.
I did not dislike the play; **on the contrary**, I enjoyed it immensely.

Commonly Used Transitional Words

Following is a list of transitional words which are used frequently. Become familiar with them.

accordingly	indeed	as a result
afterwards	likewise	at last
again	meanwhile	at the same time
anyhow	moreover	for example
besides	namely	for instance
consequently	nevertheless	for this reason
doubtless	next	in any case
eventually	otherwise	in fact
evidently	perhaps	in like manner
finally	possibly	in short
furthermore	still	on the contrary
hence	then	on the other hand
however	therefore	that is
yet	thus	in addition

18. THE COMPLEX SENTENCE

Chapter 17 explained how to form a compound sentence by combining two or more simple sentences into one longer sentence. It also explained how to punctuate the compound sentence when a coordinate conjunction is used, when transitional words are used, and when no conjunction is used.

The compound sentence is an important type of sentence because it enables us to combine two or more related ideas. However it is just as ineffective to use a number of compound sentences strung along with *ands* and *buts* as it is to use a number of short choppy sentences.

In this unit you will learn how to use a type of sentence that will enable you to put less important ideas in subordinate positions in the sentence. This type of sentence is called the *complex sentence*.

A **complex sentence** is a sentence that consists of one *independent clause* and *one or more subordinate clauses*. *Subordinate* means lower in rank, power, or importance. A subordinate clause is less important than an independent clause because it depends upon the independent clause for its meaning. The independent clause is also called the *main* or the *principal* clause. An independent clause is a group of words that has a subject and a predicate, and does not depend upon anything else for its meaning. It expresses a complete thought, and can stand alone.

A **subordinate clause** is a group of words that has a subject and a predicate, but *cannot stand alone*. A subordinate clause does not express a complete thought. It should never be punctuated as if it were a complete sentence.

A subordinate clause is usually introduced by some type of *subordinate conjunction* or by a *relative pronoun*. These connecting words make it clear that the clause expresses an idea that is subordinate to the main clause. They also join the subordinate clause to some word in the independent clause. In the following sentences, the independent clauses and the subordinate clauses are underlined.

Complex Sentences

I shall be at the station when you arrive.
I shall not go to the park if it rains.
She wore a beautiful dress which her grandmother had worn.

In the first sentence, the subordinate clause is *when you arrive*. The clause is introduced by the **subordinate conjunction** *when*. The group of words, *when you arrive*, has a subject and a predicate, but it cannot stand alone. That is the reason why the clause is called a *subordinate clause*. It depends upon the main clause for its meaning.

The subordinate clause in the second sentence is *if it rains*. This group of words cannot stand alone. The clause is introduced by the subordinate conjunction *if*. This conjunction helps the subordinate clause express the idea that there is a condition upon which *my going* depends.

The subordinate clause in the third sentence is *which her grandmother had worn*. This clause is introduced by the relative pronoun *which*. The word *which* refers to the word *dress* in the independent clause. It also introduces the subordinate clause. A **relative pronoun** always joins a clause to the *antecedent* of the pronoun. In this sentence, the antecedent of the relative pronoun is *dress*. *Dress* is the word to which the pronoun refers.

The relative pronoun also has an important function in the subordinate clause. It might be the subject of the clause, the object of the verb in the clause, the object of a preposition, or a predicate pronoun after a linking verb.

KINDS OF SUBORDINATE CLAUSES

There are three kinds of subordinate clauses: *adverbial clauses*, *adjective clauses*, and *noun clauses*. Each of these different types is used as a part of speech. That is why subordinate clauses are called adverbial clauses, adjective clauses, and noun clauses.

The **adverbial clause** functions as an adverb. The **adjective clause** functions as an adjective, and the **noun clause** functions as a noun.

Adverbs modify verbs, adjectives, and other adverbs. Adverbial clauses also modify verbs, adjectives, and adverbs. Adjectives modify nouns and pronouns. Adjective clauses also modify nouns and pronouns. Nouns are used as subjects of sentences, as objects of verbs, and as objects of prepositions. Noun clauses are used in the same ways.

Subordinate Clauses

The man who received the medal was my uncle. (adjective clause)
We always stop working when the bell rings. (adverbial clause)
I believe that the bookkeeper is honest. (noun clause)

In the first sentence, the subordinate clause is the group of words, *who received the medal*. The subordinate clause is an **adjective clause** and modifies the word *man*. In the second sentence, the subordinate clause is *when the bell rings*. It is an **adverbial clause** and modifies the verb *stop*. The clause expresses *time* just as an adverb expresses *time*. The subordinate clause in the third sentence is the group of words *that the bookkeeper is honest*. This subordinate clause is a **noun clause** and is used as the object of the verb *believe*.

ADJECTIVE CLAUSES

An **adjective clause** *is a subordinate clause that functions as an adjective*. Adjectives are used to describe or limit nouns or pronouns. An adjective clause is also used to describe or limit a noun or a pronoun.

An adjective clause is usually introduced by a relative pronoun. A **relative pronoun** *is a pronoun that joins an adjective clause to some word in the independent or main clause*. The word to which it joins the clause is the *antecedent* of the relative pronoun. The relative pronouns used in this way are *who* (*whom*), *which*, and *that*.

Adjective Clauses Introduced by Relative Pronouns

John brought the books that you ordered. (*that*——relative pronoun)
I favored the plan which the senator proposed. (*which*——relative pronoun)
Men who are thinkers look for facts. (*who*——relative pronoun)
I saw the salesman whom I met at the office. (*whom*——relative pronoun)

The subordinate clause in the first sentence is *that you ordered*. It is an adjective clause and modifies the noun *books*. This clause is introduced by the relative pronoun *that*. The antecedent of the relative pronoun *that* is the word *books*. The pronoun *that* joins its clause to the word *books* in the main clause.

The subordinate clause in the second sentence is *which the senator proposed*. It is an adjective clause and modifies the noun *plan*. The antecedent of the relative pronoun *which* is the word *plan*. The adjective clause limits the meaning to the *plan which the senator proposed*.

The subordinate clause in the third sentence is *who are thinkers*. The main clause is *Men look for facts*. In this sentence the subordinate clause comes between the subject and the predicate of the main clause. The subordinate clause is introduced by the relative pronoun *who*. The antecedent of *who* is *men*.

The adjective clause in the fourth sentence is *whom I met at the office*. This clause is introduced by the relative pronoun *whom*. The antecedent of the pronoun is the word *salesman*.

Relative Adjectives

Sometimes an adjective clause is introduced by the word *whose*, which is the possessive form of the pronoun *who*. In such cases the word *whose* modifies a noun which follows it. When the word *whose* is used in an adjective clause, it is called a **relative adjective.** The

clause.

That [illegible] whose car was stolen [illegible]

[illegible] is a relative adverb meaning *the* and *of*. The antecedent of *whose* is *man*, and the word *whose* is in the main clause. The word *whose* connects the clause *whose car was stolen* to the word *man*.

Adjective Clauses Introduced by Relative Adverbs

Adjective clauses are often introduced by the [illegible] these adverbs introduce adjective clauses they [illegible] the same way as a relative pronoun does. A relative adverb always has an antecedent and joins its clause to that antecedent. In addition a relative adverb performs the function of an adverb in its own clause. It is called a *relative* [illegible] an antecedent.

I found the house where the poet lived.
(*where*——relative adverb)

The doctor selected a time when I was not working. (*when*——relative adverb)

[illegible]
(*why*——relative adverb)

In the first sentence, the relative adverb is *where*. It introduces the clause *where the poet lived*. It also refers to its antecedent *house*. As an adverb, it modifies the verb *lived* in the [illegible].

[illegible] adverb *when* joins the clause *when I was not working*.

[illegible] *why*. Its antecedent is *reason*. It modifies the [illegible].

[illegible] adverb and a simple adverb is the fact that the relative adverb is found in an adjective clause and refers to its antecedent in the main clause.

"WHO" AND "WHOM" IN SUBORDINATE CLAUSES

[illegible]

When a relative pronoun introduces a clause [illegible]

Aaron is the one *who published the report*.
(*who*——subject)

In this sentence, it is clear that *who* is the subject of the subordinate clause. The form *who* is correct because the subject is in the nominative case.

[illegible] president is a man *whom everyone admires*. (*whom*——object)

In this sentence, the word *whom* is the direct object of the verb *admires*. By transposing the clause, you will be able to see this clearly: *everyone admires whom*. The subject of the clause is *everyone*, not *whom*.

Jack is the boy *to whom they gave the camera*.
(*whom*——object of preposition)

In this sentence, the pronoun *whom* is the object of the preposition *to*. When the subordinate clause is transposed, the use of *whom* becomes clear: *they gave the camera to whom*. *They* is the subject of the clause, not *whom*.

RESTRICTIVE AND NONRESTRICTIVE CLAUSES

Adjective clauses present a problem in meaning and in punctuation. Sometimes the adjective clause is set off by commas. Sometimes the adjective clause is not set off by commas. The following sentences are illustrations of clauses that are *not* set off by commas.

I spoke to the woman *who was giving the demonstration*.
This is the man *who discovered the leak in the pipe*.
[illegible] *stop signals*.

[illegible] clause is *who was giving the demonstration*. If you leave the clause out, the meaning of the [illegible] changed. The sentence now gives no indication of *who* the woman was. Since the [illegible] is essential to the [illegible].

[illegible] *discovered the leak in the pipe*. This clause identifies the man and is essential to the meaning of the sentence. The clause restricts the meaning of the [illegible] *discovered the leak in the pipe*. Therefore it is [illegible].

The third sentence does not mean that *I dislike driving in a town*. The meaning is restricted to driving in a certain type of town [illegible].

[illegible] **restrictive clause** identifies the word it [illegible].

Some adjective clauses are not essential to [illegible] information, but the essential meaning of the sentence would not be changed if such clauses [illegible] carefully.

[illegible] *Longbeer* wrote [illegible]

The speaker, *who was accompanied by his wife*, left early.

In the first sentence, the clause, *who lived next door*, gives additional information about Mr. Miller, but the meaning of the sentence is not changed if you leave the clause out. The clause does not place any restrictions on the meaning. Therefore it is called a *nonrestrictive clause*. Nonrestrictive clauses are set off by commas.

A **nonrestrictive clause** is a clause that is *not* essential to the meaning of the sentence. All the clauses in the preceding illustrations are nonrestrictive clauses. They are set off by commas. They are not needed in the sentence to identify the person who is mentioned in the main clause.

A nonrestrictive clause functions more like an appositive or a parenthetical expression. You might call it a thrown-in remark. That is the reason why the nonrestrictive clause is set off by commas.

19. ADVERBIAL CLAUSES

Chapter Eighteen explained that an adjective clause functions in the same way as an adjective functions. Adjectives modify nouns and pronouns. Adjective clauses also modify nouns and pronouns.

An *adverbial clause* functions in the same way as an adverb functions. Adverbs tell *how*, *when*, *where*, and *to what extent* the action is performed. Adverbial clauses answer the same questions and, in addition, express several other ideas which the simple adverb does not express.

Adverbs modify verbs, adjectives, and other adverbs. Adverbial clauses also modify verbs, adjectives, and adverbs. The adverbial clause modifies a verb more often than it modifies an adjective or an adverb.

SUBORDINATE CONJUNCTIONS

An adverbial clause is usually introduced by a *subordinate conjunction*. This connecting word is called a subordinate conjunction because it makes the idea expressed by its clause *subordinate to the main idea in the sentence*. The subordinate conjunction also [illegible] between the subordinate [illegible] word in the main clause which [illegible] clause modifies.

The **subordinate conjunction** is used to show that the clause which it introduces is a subordinate clause, and not a main clause. The subordinate conjunction also indicates the exact type of relationship that the subordinate [illegible] the main clause.

The following illustrations will make clear the function of the *subordinate conjunction* in a subordinate clause.

We listened to the radio because we wanted to [illegible] adverbial clause—modifies [illegible]

She will find the telegram on her desk when [illegible] subordinate clause—modifies will [illegible]

In the first sentence, the subordinate clause *because we wanted to hear the news* It is an adverbial clause and modifies the verb *listened*

in the main clause. The subordinate conjunction is the word *because*.

If you leave out the word *because*, the words that follow no longer express a subordinate idea. They express a complete thought. It is the word *because* that makes the group of words *we wanted to hear the news*, subordinate to the main clause. The **subordinate conjunction** is the key to the adverbial clause.

You should become familiar with the subordinate conjunctions that are commonly used to introduce *adverbial clauses*. The subordinate conjunction will help you identify the adverbial clause. It will also help you determine the **kind** of adverbial clause which it introduces.

WORDS USED AS SUBORDINATE CONJUNCTIONS

after	even though	till
although	except	though
as	if	unless
as—as	in order that	until
as if	provided	when
as long as	provided that	whenever
as soon as	since	where
as though	so—as	wherever
because	so that	whether
before	than	while
even if	that	

KINDS OF ADVERBIAL CLAUSES

Adverbial clauses are used to express a number of different ideas. The following are the ten important ideas which are expressed by adverbial clauses: *time, place, manner, degree, comparison, purpose, result, condition, concession, cause (reason)*.

Since the subordinate conjunction helps the adverbial clause express the idea intended, you should become familiar with the conjunctions that are used to express certain ideas, such as *time, place*, etc. The following is a list of the subordinate conjunctions commonly used in adverbial clauses of the various types.

Time: after, before, when, whenever, since, until, as soon as, while
Place: where, wherever
Manner: as, as if, as though
Degree: that, as—as, not so—as, than
Comparison: as, than, so—as, as—as
Purpose: that, so that, in order that
Result: that, so that
Condition: if, provided, provided that, unless
Concession: although, though, even if
Cause: as, because, since

Ideas Expressed by Adverbial Clauses

Time: I watched the crowd while I was waiting for you.
Place: Put the notice where it can be seen.
Manner: The soldier walks as if he were lame.
Degree: Marvin is not so industrious as his brother (is industrious).
Comparison: The train was later than it usually is.
Purpose: Ted practiced every day so that he might win the contest.
Result: The salesman was so persuasive that I finally bought the car.
Condition: I shall attend the meeting if I have the time.
Concession: Frances will sing at the concert although she has a cold.
Cause or Reason: Gerald read the book because I recommended it.

CLAUSES OF DEGREE

An *adverbial clause of degree* that is introduced by the subordinate conjunction *that* usually expresses a **result** idea as well as the idea of **degree.** The degree idea is expressed by words like *such, such a*, and *so* which precede the subordinate clause.

Jane practiced so long that she became very tired.
Harold made such a poor sales record that he lost his position.

In both these sentences, the adverbial clauses introduced by *that* express a *degree idea* and a *result idea*.

An adverbial clause of degree usually modifies an adjective or an adverb in the main clause.

He talked so loud that he annoyed the speaker.

In this sentence, the adverbial clause *that he annoyed the speaker* is introduced by the subordinate conjunction *that*. The adverbial clause modifies the adverb *so* in the main clause.

THE POSITION OF THE ADVERBIAL CLAUSE

In all of the preceding illustrations the adverbial clause follows the main clause. An adverbial clause is often placed at the beginning of the sentence for emphasis, or for variety in sentence patterns. When the subordinate clause precedes the main clause, it is usually set off by a comma.

He went to the office when it was convenient. (follows main clause)
When it was convenient, he went to the office. (precedes main clause)
The men work overtime whenever it is necessary. (follows main clause)
Whenever it is necessary, the men work overtime. (precedes main clause)

In the first sentence, the adverbial clause *follows* the main clause. In the second sentence, the same adverbial clause *precedes* the main clause. The adverbial clause is placed at the beginning of the sentence for emphasis. Since the adverbial clause is in inverted or transposed order, it is set off by a comma.

The adverbial clause in the third sentence *follows* the main clause. In the fourth sentence this same clause is placed at the beginning of the sentence for emphasis. The adverbial clause is set off by a comma because it is in transposed order.

Sometimes it is necessary to change the position of a noun and a pronoun when the adverbial clause is placed at the beginning of a sentence.

I shall visit **Margaret** in Texas if she sends me her address.
If Margaret sends me her address, I shall visit **her** in Texas.

CLAUSES OF COMPARISON

In both speaking and writing, words are often omitted that are necessary to the grammatical completeness of the sentence. Certain words are sometimes omitted because the meaning of the sentence is perfectly clear without them. Sometimes they are omitted in order to avoid using a sentence that is awkward or monotonous.

Certain words are usually omitted in an *adverbial clause of comparison* for the reasons just given. The verb is often omitted because it can be readily supplied. It is important to realize that the verb has been omitted in order to decide upon the correct form of the pronoun that should be used as the subject of the verb. We often hear sentences like the following, which are incorrect.

I am younger than **him.** (incorrect)
John can run as fast as **us.** (incorrect)

In both sentences the *incorrect* form of the pronoun is used in the adverbial clause of comparison. If the speaker had finished the clause, he would have used the correct form of the pronoun. When the clause is finished, it becomes evident that the pronoun is the *subject* of the clause. A pronoun used as the subject should be in the *nominative case*.

I am younger than **he** (is young). (*he*—subject)
John can run as fast as **we** (can run). (*we*—subject)

In the unfinished clause of comparison the word *than* is a conjunction, and not a preposition. The word *than* introduces a clause which must be finished grammatically. When we supply the words that are necessary to complete the clause, we realize that the form of the pronoun should be *he* and not *him*. *He* is the correct form to use for the subject. The subject requires the *nominative case*.

Study the following illustrations carefully. Pay special attention to the form of the pronoun used in the *adverbial clause of comparison*.

You have lived longer than *I* (have lived). (not *me*)
Martha sews as well as *she* (sews). (not *her*)
Some of the men worked harder than *we* (worked). (not *us*)
I speak as correctly as *he* (does). (not *him*)

"As—As" and "Not So—As" In Comparisons

The connectives *as—as* and *not so—as* are often used in sentences that contain adverbial clauses of comparison. Careful writers and speakers make a distinction in the use of these combinations. They use *as—as* when the comparison is **positive**, and *not so—as* when the comparison is **negative.**

The comparison is said to be positive when the two things compared are approximately the same or equal. The comparison is said to be negative when there is an inequality between the two things compared. An illustration will help make this clear.

John is **as** tall **as** his brother. (positive comparison)
John is **not so** tall **as** his father. (negative comparison)

In the first sentence, the comparison is *positive*. The two persons compared are approximately *equal* in height. The combination *as—as* is used to indicate this type of comparison. In the second sentence, the combination *not so—as* is used to show an *inequality* in height, or a *negative* comparison.

In speaking and in informal writing, *as—as* is commonly used to show both types of comparison—positive and negative. However, in formal writing it is advisable to observe the distinctions that discriminating writers make.

Use of "Like" in Clauses

The word *like* is commonly used as a preposition. When the word *like* is used as a preposition, it should be followed by an object.

If the object is a pronoun, the pronoun should be in the *objective* case. This usage was explained in Chapter 10.

Many careful speakers and writers feel that *like* should not be used as a conjunction to introduce a subordinate clause of manner or comparison. The words *as, as if,* and *as though* would be used in this instance. This type of clause

I shall write the letter *like* you advised me (colloquial)
I shall write the letter *as* you advised me (preferred)

You look *like* you were tired. (colloquial)
You look *as if* you were tired. (preferred)

It looks *like* it might snow. (colloquial)
It looks *as if* it might snow. (preferred)

In the last few years, the colloquial use of *like* as a conjunction has increased. This use sometimes appears in print. We often hear the word *like* used as a conjunction in popular television programs. However, in general, it has not been accepted as standard English for written use.

When *like* is used as a preposition, it means *similar to* or *in a similar manner to*.

Mary's hat is *like* the one I bought in Paris. (*like*—preposition)
John is *like* his father in temperament. (*like*—preposition)

20. NOUN CLAUSES

Chapters Eighteen and Nineteen explained the form and function of two types of subordinate clauses. This chapter explains the third and final type of subordinate clause. It is the noun clause. Adjective clauses and adverbial clauses are used as *modifiers* in the same way that adjectives and adverbs are used as modifiers. Noun clauses are not used as modifiers. They perform the same functions as nouns.

FUNCTION OF THE NOUN CLAUSE

Noun Clause — Subject of a Sentence

A noun is commonly used as the *subject* of a sentence. A *noun clause* may also be used as a subject. The following illustrations show how the noun clause is used as the subject of a verb.

That their house is for sale is a well known fact.
Where we could find an apartment was our problem.
Whether we can afford it is the question.

If you examine the preceding illustrations, you will see that the following words introduce the noun clauses: *whether, how, that,* and *where*. These same words are often used to introduce adjective or adverbial clauses. The only way to be sure that you are dealing with a *noun clause* is to determine how the clause is used in the sentence. If it functions in the way that a noun functions, it is a noun clause.

Noun Clause — Direct Object of a Verb

A *noun clause* is frequently used as the **direct object** of a verb. A noun used as an object completes the meaning of the verb and answers the question *What?* A noun clause used as the direct object of a verb completes the verb and in almost all cases answers the question *What?* Study the following illustrations. They show how noun clauses are used as objects of verbs.

I hope (*what?*) that you will be promoted. (object of *hope*)
We knew (*what?*) where we could park the car. (object of *knew*)
Tell the manager (*what?*) why you are leaving. (object of *tell*)
I believe (*what?*) that it is going to rain. (object of *believe*)
He understood (*what?*) what we were trying to do. (object of *understood*)

The noun clause in the first sentence tells *what I hope*. It is used as the object of the verb *hope*. The noun clause in the second sentence tells *what we knew*. It is the object of the verb *knew*. The noun clause in the third sentence tells *what you should tell the manager*. It is the object of the verb *tell*. The noun clause in the fourth sentence tells *what I believe*. The noun clause in the last sentence tells *what he understood*.

Noun Clause — Predicate Noun

A *noun clause* may be used as a **predicate noun** after one of the linking verbs. Like the predicate noun, a noun clause used after a linking verb means the same as the subject. It is used to complete the verb. The noun clauses in the following sentences are used as *predicate nouns* after linking verbs.

The rumor was that he had left the city. (means the same as *rumor*)
That is what we agreed to do. (means the same as *that*)
My first impression was that I had seen him before. (means the same as *impression*)
The report was that he was drowned. (means the same as *report*)

The noun clause in the first sentence is *that he had left the city*. It completes the verb *was* and means the same as the subject *rumor*. The noun clause in the second sentence is *what we agreed to do*. It completes the linking verb *is* and means the same as the subject *that*. The noun clause in the third sentence is *that I had seen him before*. It completes the linking verb *was* and means the same as the subject *impression*. The noun clause in the last sentence means the same as *report* and completes the linking verb *was*.

Noun Clause — Object of a Preposition

Like the noun, a *noun clause* is sometimes used as the **object of a preposition**. You may have to study carefully to determine whether some word in the clause is the object of the preposition. If you study the following illustrations carefully, you will see why an entire *clause* is the object of the preposition.

Give the message to whoever is in the office. (noun clause—object of the preposition *to*)
We did not agree about what the doctor ordered. (noun clause—object of the preposition *about*)
Do the job in whatever way you wish. (noun clause—object of *in*)

In the first sentence, the noun clause *whoever is in the office* is the object of the preposition *to*. *Whoever* could not be the object of the preposition because it is the subject of the clause. In addition, the sentence does not mean that you should give the message to *whoever*. It means that you should give the message to *whoever is in the office*. The entire clause is the object of the preposition *to*.

In the second sentence, the noun clause *what the doctor ordered* is the object of the preposition *about*. The sentence does not mean that we did not agree about *what*. It means that we did not agree about *what the doctor ordered*. The word *what* could not be the object of the preposition because it has another function to perform in the clause. It is the object of the verb *ordered*.

The noun clause in the third sentence must be the object of the preposition. The word *way* could not be the object of the preposition because that is not the meaning intended. The sentence does not mean that you should do the job in *whatever way*, but it means that you should do the job in *whatever way you wish*. The entire clause is the object of the preposition *in*.

OMISSION OF THE CONNECTING WORD

Sometimes the word that introduces a subordinate clause is omitted. The reason for this omission is to bring the main idea and the subordinate idea closer together. Although the best writers and speakers often omit the connecting word, you should supply it whenever there is any doubt about the construction of the clause.

I believe that you will be promoted. (*that*—subordinate conjunction)
I believe you will be promoted. (subordinate conjunction omitted)

NOUN CLAUSE USED AS AN APPOSITIVE

A noun is often used *in apposition* with another noun. The word **apposition** comes from two Latin words which mean *"placed by"* or *"placed near."* A word in *apposition* is placed near another word to explain it or to identify it in some way. We often speak of a person and then add something to explain who the person is, or to identify him in some way.

Mike, our *janitor*, is very accommodating.
We called on Dr. Allen, a famous *scientist*.
Paris, a *city* in France, is famous as a fashion center.

In the first sentence, the noun *janitor* is in apposition with the noun *Mike*. It explains who Mike was. In the second sentence, *scientist* is in apposition with *Dr. Allen*. It identifies him as a scientist. In the third sentence, *city* is in apposition with *Paris*.

In all three sentences the nouns that are in apposition with other nouns are set off by

commas. Sometimes the appositive is so closely connected with the noun that no commas are required. It is not good practice to set off the appositive by commas in sentences like the following:

My brother Andrew is in London.
The poet Whittier wrote "Snowbound."

Like the noun, a *noun clause* is often used in **apposition** with a word or a group of words. When the noun clause is used in apposition, it usually explains such words as *idea, fact, belief, report, rumor,* etc. Noun clauses used in apposition are not set off by commas.

The rumor that John would be elected spread rapidly.
The fact that the contract was signed was important.
The announcement that the strike was over was received with cheers.
We entertained the hope that the crew had survived.

NOUN CLAUSE AND THE INTRODUCTORY "IT"

Sometimes a sentence begins with the introductory word *it*. In sentences of this type the word *it* is not the real subject of the sentence. The grammatical or real subject appears later. The real subject is often a *noun clause*. Sentences are arranged in this way either for emphasis or for smoothness.

It is obvious that you do not have the money.
(It) That you do not have the money is obvious. (*transposed order*)

This sentence begins with the introductory word *it*. The real or grammatical subject appears later in the sentence. The subject is the noun clause *that you do not have the money*. When the sentence was transposed, the word *it*, which has no grammatical connection with any part of the sentence, was dropped, and the real subject was put in its proper place.

The word *it* has only one purpose in sentences of this type. It fills in the place normally occupied by the subject. Its function is similar to that of the introductory word *there*, which was explained in Chapter Four. When the word *it* is used in this way, it is called an **expletive.**

Sentences that begin with *it* as an expletive, or "filling in" word, are easily recognized because they always follow the same pattern.

It is important that you see him at once.
(It) That you see him at once is important. (*transposed order*)

WORDS THAT INTRODUCE NOUN CLAUSES

A *noun clause* may be introduced by a **subordinate conjunction.** The subordinate conjunctions commonly used in this way are *that, whether,* and *whether or.* The sole duty of the subordinate conjunction is to connect the noun clause to the main clause.

I wonder *whether* they will recognize me.
John knows *that* he will be nominated for an office.

Whether (not *if*) should be used to introduce noun clauses used as the direct object of the verbs *say, learn, understand, know, doubt, ask, tell, discover, wonder,* etc.

Ask John *if* he has washed the car. (incorrect)
Ask John *whether* he has washed the car. (correct)
I did not know *if* he would leave or stay. (incorrect)
I did not know *whether* he would leave or stay. (correct)

A noun clause is often introduced by a **relative pronoun:** *who, what, whatever, whoever, whomever, whichever. Whoever* and *whomever* are seldom used in informal writing and speaking.

The agent does not know *what* he should do about repairs.
Give to the fund *whatever* you can afford.
A copy of the speech was given to *whoever* wanted it.

The relative pronoun that introduces a noun clause is sometimes called an **indefinite relative pronoun** because it does not have an antecedent expressed in the sentence.

Sometimes the relative pronoun is used as an *adjective* in the noun clause. A pronoun used in this way is called a **relative adjective,** or an **indefinite relative adjective** because it has no antecedent.

I shall accept *whatever salary* is offered me. (*whatever*—adjective modifies *salary*)
The manager always knows *what course* he should follow. (*what*—adjective modifies *course*)

Noun clauses are also introduced by the adverbs *how, when, why,* and *where.* The introductory adverb also modifies the verb in the noun clause. The noun clause is underlined in the following sentences.

How we should invest the money is the question. (*how*—adverb)
He asked where the president lived. (*where*—adverb)
I do not know when the speaker will arrive. (*when*—adverb)

21. PARTICIPLES

THE NATURE OF VERBALS

There are three verb forms in English that are known as **verbals:** *participles, gerunds,* and *infinitives.* Participles are discussed in this unit; gerunds in Chapter 22, and infinitives in Chapter 25. These verb forms are called *verbals* because they are derived from verbs and retain many of the characteristics of the verb.

A **verbal** may take any kind of modifier or any kind of complement that a verb might take. In addition to this verb like function, a verbal has a special function of its own. A verbal usually performs the work of two parts of speech at the same time.

There is one function that a *verbal* cannot perform. It cannot function as the predicate verb in a sentence because it is an incomplete form of the verb. A verbal cannot make a statement or ask a question.

A **participle** is a verbal (verb form) which is *used as an adjective.* Since a participle is a verb form and partakes of the nature of a verb, it may take modifiers and complements.

Participles do not always take modifiers or complements. Very often they are used as **pure adjectives** and are placed directly before the nouns which they modify. Sometimes they are used as **predicate adjectives** after linking verbs. The following illustrations show the participle used as a simple adjective.

He conducts a *flourishing* business. (*flourish*—modifies *business*)
The reports were *discouraging.* (*discouraging*—modifies *reports*)
We are reading an *interesting* book. (*interesting*—modifies *book*)

The participle that is most commonly used as an adjective is the participle that ends in *ing*. This is called the **present participle.** In the following illustrations the *present participles* are placed directly before the nouns which they modify. When used in this way, they are generally regarded as pure adjectives.

running water	*singing* brook
shaking knees	*rustling* leaves
murmuring pines	*dangling* modifiers
coming events	*whistling* boy
soaring prices	*sleeping* child

The participles found in the preceding illustrations are *running, shaking, murmuring, coming, soaring, singing, rustling, dangling, whistling,* and *sleeping.* All these forms derived from verbs.

Many participles are used as pure adjectives. When the participle is used as a pure adjective, it is usually placed directly before the noun which it modifies. When the participle is used as a **predicate adjective,** it is found in the predicate and modifies the subject.

The game was *exciting.* (*exciting*——used as a predicate adjective)
The book is *interesting.* (*interesting*——predicate adjective)
The rumors were *startling.* (*startling*——used as a predicate adjective)

In the first sentence, the participle *exciting* is used as a predicate adjective, modifying the noun *game.* The participle *interesting,* in the second sentence, modifies the noun *book.* In the third sentence, the participle *startling* is used as a predicate adjective, modifying the subject noun *rumors.* The participles *exciting, interesting,* and *startling* are forms of verbs.

FORMS OF THE PARTICIPLE

There are three participles that are commonly used as adjectives: the *present participle* (active voice), the *past participle* (passive voice), and the *perfect participle* (active voice). There is no active past participle in English.

These participles are easily recognized. The **present participle** always ends in *ing,* the **past participle** usually ends in *ed, d, t, n,* or *en.* The past participles of some of the irregular verbs do not have distinctive endings: *swum, drunk, gone, sung,* etc. The **perfect participle** is always formed by prefixing the word *having* to the past participle: *having sung, having called, having eaten, having seen,* etc.

Regular Verbs

Present Participle	Past Participle	Perfect Participle
(active)	(passive)	(active)
calling	called	having called
watching	watched	having watched

Irregular Verbs

singing	sung	having sung
driving	driven	having driven
going	gone	having gone

PAST PARTICIPLES AND PERFECT PARTICIPLES

The past participle ending in *ed* is commonly [illegible] show how *past participles* function as *adjec*

[illegible] called [illegible]

The **neglected** and **forgotten** child was [illegible]

The army **surprised** by the attack fled into [illegible]

He [illegible] and gave [illegible] thrown [illegible]

In the first sentence the past participle *called* is used as an adjective to modify *doctor*. The participle is modified by the adverbial [illegible] and *forgotten*. One ends in *ed* and the other [illegible] modified by the adverbial phrase *by the attack*. [illegible] noun *paper*.

[illegible] *Having accomplished* his mission the ambas[illegible]

The perfect participle *having finished* modifies the noun *men*; *having accomplished* modifies *ambassador*; and *having received* modifies *Ted*. These participles are used as [illegible]

THE PARTICIPIAL PHRASE

Like the verb a participle may take **modifiers** and **complements**. The participle with its [illegible] **participial phrase**.

MODIFIERS OF PARTICIPLES

[illegible] **participial phrase**

[illegible] sentence the participial phrase modifies the pronoun *we*. The participle *coming* is modified by the adverb *close* and [illegible] *close to the rock* is a **participial phrase.**

The [illegible] sentences [illegible] [illegible] [illegible]

way to get rid of a dangling participle is to substitute a clause for it.

While we were walking through the tunnel we picked up a wallet.

In the second sentence, the participial phrase modifies *Statue of Liberty*. But it was not the *Statue of Liberty* that was entering the harbor. The phrase seems to be related to a word which it could not modify. The word which the participial phrase really modifies is not in the sentence. The sentence might be revised as follows:

As we entered the harbor, the Statue of Liberty came into view.

In the last sentence, the participial phrase modifies the word *teacher*. If you read the sentence carefully, you will readily see that it was not the teacher who took the test. The sentence would be correctly written if a clause were substituted for the dangling phrase.

After I took the test, the teacher gave me a passing grade.

MISPLACED MODIFIERS

Sometimes there is a word in the sentence which the participial phrase properly modifies, but the participle is not placed correctly. As a result, the meaning is confused. This error is commonly referred to as a **misplaced modifier.**

Jumping into the water, the children were rescued by the life guard.

Several soldiers passed by in their uniforms recently drafted.

If you read the first sentence carefully, you will see that the word which the participle modifies is in the sentence. It is the word *lifeguard*. It was the *lifeguard* who jumped into the water. It was not the *children*. The trouble with the sentence is that the participial phrase should modify the subject. As the sentence is written, the subject is *children*. The subject should be the word *lifeguard*. The sentence might be rewritten as follows:

Jumping into the water, the lifeguard rescued the children.

In the second sentence, a participial modifier is also misplaced. As the sentence is written, the participial phrase modifies the word *uniforms*. But it was not the *uniforms* that were recently drafted; it was the *soldiers*. The sentence might be rewritten as follows:

Several recently drafted soldiers passed by in their uniforms.

PARTICIPLES USED IN VERB PHRASES

Participles are not always used as adjectives. One of their most important uses is to help form a *verb phrase*. When the participle forms part of a verb phrase, it is not considered as a separate word, but as part of the verb phrase.

A participle is never used alone as the predicate verb in a sentence because it is an incomplete form of the verb. It is used as part of a verb phrase. The following illustrations show how the participle is used as part of a verb phrase.

The janitor is washing the windows. (*washing*——part of verb phrase)

The gardener has planted the shrubs. (*planted*——part of verb phrase)

In the first sentence, the verb phrase *is washing* is made up of the auxiliary *is* and the present participle of the verb *wash*, or the *ing* participle, *washing*. In the second sentence, the verb phrase *has planted* is made up of the auxiliary *has* and the past participle of the verb *plant*, which is *planted*.

Sometimes it is difficult to determine whether the participle is part of the verb phrase or whether it is used as an adjective modifying the subject. This is often true when a participle follows a linking verb. The meaning of the sentence will help you determine which use is intended by the speaker or writer. Study the following sentences carefully.

The talk was *inspiring*. (participle used as an adjective)

We *were inspired* by his talk. (participle part of *verb phrase*)

In the first sentence, the verb is *was inspiring*. The verb *was* is a linking verb and requires a complement. In this sentence, the complement is *inspiring*, which is used as a predicate adjective modifying the noun *talk*. The sentence means *inspiring talk*. *Inspiring* is a participle used as an adjective.

In the second sentence, the verb is *were inspired*. In this sentence, the past participle *inspired* is part of the verb phrase, *were inspired*. Study the following sentences carefully. Try to determine whether the participle is used as an adjective or is part of the verb phrase.

Robert was elected secretary at our last meeting. (*elected*——part of the verb phrase)

The old man looked neglected. (*neglected*——participle used as adjective)

The milk seems frozen. (*frozen*——participle used as adjective)

The house was furnished by an interior decorator. (*furnished*——part of verb phrase)

I have been sitting here for an hour. (*sitting*——part of verb phrase)

22. GERUNDS

Nature of the Gerund

If you understand the dual nature of the participle, you will have little difficulty in understanding the dual nature of the **gerund.** You have already learned that the participle is both *verb* and *adjective*. The gerund is both *verb* and *noun*.

Gerunds are like participles in many respects. Gerunds and participles are verbals, that is, they are *forms derived from verbs*. Both participles and gerunds have the same "*ing*" forms. Both take the same kinds of complements and modifiers that verbs take.

Gerunds differ from participles in one fundamental respect. **Gerunds** *are verb forms used as nouns*. Participles are verb forms used as adjectives. Because a gerund functions as a noun, it can take certain modifiers that a participle cannot take. Like the noun, a gerund is often modified by an *adjective* or by an *adjective phrase*. Participles cannot take adjective modifiers.

Since the gerund functions as a noun, it may be used as the *subject* of a sentence, the *direct object* of a verb, the *object of a preposition*, or as a *predicate noun* after one of the linking verbs. Gerunds are often called *verbal nouns* because they are derived from verbs.

Painting is Martha's hobby. (gerund used as subject)

Martha enjoys *painting*. (gerund used as direct object)

Martha earns a living by painting. (gerund used as object of a preposition)

Martha's hobby is painting. (gerund used as a predicate noun)

In the first sentence, the word *painting* is a gerund. It is a verb form that is used as a noun. *Painting* is the subject of the sentence. In the second sentence the same verb form *painting* is used as the direct object of the verb *enjoys*. In the third sentence *painting* is used as the object of the preposition *by*, and in the fourth sentence it is used as a predicate noun after the linking verb *is*.

The Gerund Phrase

Like the participle, the gerund retains many of the characteristics of a verb. Because the gerund is a verb form, it may take any of the complements or any of the modifiers that a verb might take. The gerund with its complements and modifiers is called a **gerund phrase.**

COMPLEMENTS OF GERUNDS

Like the verb, a *gerund* may take a **direct object.** Study the following sentence carefully. You will readily see that although the gerund is used as a noun, it retains the characteristics of a verb because it takes a *direct object*.

Sweeping the floor was one of Jack's duties.

In this sentence the *sweeping* is a gerund. It is used as the *subject* of the sentence. This is its noun function. Since the gerund is a verb form, it retains some of the characteristics of a verb. The verb *sweep* is an action verb and may take a *direct object*. The gerund *sweeping* may also take a direct object. In this sentence the direct object of the gerund *sweeping* is the noun *floor*.

Some verbs take both a direct and an indirect object. Gerunds formed from such verbs may also take a **direct** and an **indirect object.**

Giving the girls a holiday will please them.

In this sentence, *giving* is a gerund used as the subject of the sentence. This is its use as a **noun.** As a **verb form,** it takes the direct object *holiday* and the indirect object *girls*. The entire expression, *giving the girls a holiday* is a **gerund phrase.**

If the gerund is a form of a linking verb, it may take a **predicate noun** or a **predicate adjective** as a *complement*. Study the following sentences carefully. In both sentences the gerund requires a complement to complete its meaning. The gerunds are forms of linking verbs.

His becoming a captain involved certain responsibilities.

I had not heard of Jane's being ill.

In the first sentence, the gerund *becoming* takes the predicate noun *captain* as a complement. In the second sentence, the gerund *being* takes the predicate adjective *ill* as a complement.

ADVERBIAL MODIFIERS OF GERUNDS

The gerund, like the participle, may be modified by an **adverb** or an **adverbial**

phrase. You should have no trouble in identifying the adverbial modifiers of the gerunds in the following sentences:

Sitting on a park bench was his favorite pastime.
Driving a truck in the city is difficult.

The gerund *sitting* is the first sentence is modified by the adverbial phrase *on a park bench*. The gerund *driving* in the second sentence is modified by the adverbial phrase *in the city*. The gerund *seeing* in the third sentence is modified by the adverb *now*.

ADJECTIVE MODIFIERS OF GERUNDS

Because the gerund functions as a noun it may be modified by an *adjective*, or by a *noun* or a *pronoun* used as an *adjective*.

The slow driving in the mountains irritated me.
(*slow*—adjective modifying the gerund *driving*)
The dogs barking saved the child's life.
(*dogs*—noun used as adjective modifying the gerund *barking*)
Her dancing pleased the audience.
(*her*—pronoun used as adjective modifying the gerund *dancing*)

In the first sentence the gerund *driving* is modified by the adjective *slow*. In the second sentence the gerund *barking* is modified by the word *dogs*, which is a noun in the possessive case used as an adjective. In the third sentence the gerund *dancing* is modified by the possessive adjective *her* (pronoun used as an adjective) and the adjective *wonderful*.

Like the noun, a gerund is often modified by an *adjective phrase*. In the following sentences the gerunds take adjective phrases as modifiers.

The falling of the leaves in autumn is a beautiful sight.
The gerund *falling* is modified by the adjective phrase *of the leaves*.

THE POSSESSIVE CASE BEFORE THE GERUND

The error commonly made is to forget to put the noun or pronoun that is a modifier. The important word in such

I am interested in William advancing in his profession. (*incorrect*)

Mother did not like the boys part in the contest. (*incorrect*)

The first sentence does not mean that I am interested in *William* primarily, but that I am interested in *William's* advancement. The object of the preposition *in* is the gerund *advancing*, and not the proper noun *William*. Since the noun is a modifier of the gerund, it must be put in the possessive case: *William's* advancing.

The second sentence does not mean that Mother did not like *the boys*. It means that she *did* not like the *taking part in the contest*. The correct form of the pronoun before the gerund is *not boys taking part*.

THE DANGLING GERUND

Gerunds are often found in prepositional phrases which are placed at the beginning of the sentence. The gerund or the gerund phrase is the *object of the preposition*. The entire prepositional phrase should modify some word in the main part of the sentence. If there is no such word, the phrase *hangs*, or the sentence that the phrase is an unattached modifier.

The gerund almost always expresses action. There must be some word in the sentence to indicate the doer of the action. That word would logically be the subject of the sentence. Examine the following sentence carefully:

Upon receiving the telegram, the trip was cancelled.

This sentence begins with a prepositional phrase. The object of the preposition *upon* is the gerund phrase *receiving the telegram*. The gerund *receiving* implies that someone received the telegram. The sentence as written, *the trip received the telegram*. The subject, *trip*, has no logical relation to the gerund. The subject is not capable of doing the *receiving*. The following sentences are illustrations of the error:

After we had received the telegram, we cancelled the trip.

This error might be corrected in one of two ways, as shown in the preceding illustration:

1. By supplying the word which the preposition

2. By substituting a subordinate clause for the gerund phrase.

When the gerund phrase at the beginning of a sentence does not have a logical relation to the subject, the result is often ridiculous or humorous. The careful study of a sentence like the following will help you to avoid this error:

By pressing a button, you will release the table from the wall. (*incorrect*) (*pressing*, dangling gerund)

You must press a button before *the table* will come out of the wall. According to the way in which the sentence is written, the table is the doer of the action, which is absurd.

The subject of the sentence should be a word expressed by the gerund. That word does not appear in the sentence as it is written. The sentence would be correctly written in either one of the following ways:

By pressing a button, you will release the table from the wall.

If you press a button, the table will come out of the wall.

23. INFINITIVES

Nature of the Infinitive

Participles, *gerunds*, and *infinitives* are called **verbals** because they are derived from verbs and function like verbs in many respects. They are unlike verbs because they cannot function as the predicate verb in a sentence. They are incomplete forms that cannot be used to make statements, ask questions, or give commands or requests. This is an important fact regarding verbals that you should always keep in mind.

You have learned how to recognize a participle or a gerund by its form. The infinitive is very easy to identify because it carries a definite sign which indicates that it is an infinitive. An infinitive is usually preceded by the word **to**, which is commonly called the *sign of the infinitive*.

When the word *to* is used with a verb form to complete the infinitive, it is *not a preposition*. It is merely the *sign* of the infinitive. The way to be sure that the expression is an infinitive and not a prepositional phrase is to look at the word which follows *to*. If this word is a verb form, the expression is an infinitive, and not a prepositional phrase.

Like the gerund, the infinitive is *used as a noun*. It may also function as an *adjective* or as an *adverb*. An infinitive may take any complement or any modifier that a verb might take.

The sign of the infinitive (*to*) is usually omitted after certain verbs in order to avoid awkward or stilted expressions. The *to* is usually omitted after the following verbs: *bear, feel, watch, let, dare, help, see, make, please, bid, need*, etc.

USES OF THE INFINITIVE

You have already studied the two sided character of the participle and the gerund. The participle functions as an adjective and retains some of the characteristics of a verb. The gerund functions as a noun and also retains some of the characteristics of a verb. The **infinitive** retains its verb nature, and in addition may function as a *noun*, an *adjective*, or an *adverb*.

The noun function of an infinitive is very similar to the noun function of a gerund. An infinitive may be the *subject* of a sentence, the *direct object* of a verb, the *object of a preposition*, or a *predicate noun* after a linking verb.

To write was his ambition. (*subject*)
His ambition was to write. (*predicate noun*)
He has nothing except to write. (*object of preposition*)
He likes to write. (*direct object*)

In the first sentence, the infinitive *To write* is the subject of the sentence. In the second sentence, the infinitive *to write* is used as a predicate noun after the linking verb *was*. In the third sentence, the infinitive *to write* is used as the object of the preposition *except*. In this sentence the sign of the infinitive is omitted. In the fourth sentence, the infinitive

to write is used as the direct object of the verb *likes*

INFINITIVES USED AS ADJECTIVES

The infinitive is often used as an *adjective* or an *adverb*. When the infinitive is used as an adjective, it usually modifies a noun which precedes it. It is easy to identify the adjective use of the infinitive because an adjective could be readily substituted for the infinitive. Study the following illustrations carefully.

The desire **to win** was apparent. *(the winning desire)*
They asked permission **to leave.** *(leaving permission)*
He obtained a permit **to build.** *(building permit)*
We had fresh water **to drink.** *(drinking water)*

In the first sentence, the infinitive *to win* is used as an adjective. It modifies the noun *desire*. In the second sentence, the infinitive *to leave* modifies the noun *permission*. In the third sentence, the infinitive *to build* modifies the noun *permit*. In the last sentence, the infinitive *to drink* modifies *water*.

INFINITIVES USED AS ADVERBS

The infinitive is often used as an *adverb* to modify a verb, an adjective, or an adverb. When the infinitive is used as an adverb, it usually expresses *purpose* or *degree*.

It is easy to identify an infinitive used as an adverb when it modifies a verb. In almost every case, the infinitive expresses *purpose*. It tells why, or for what purpose the action is performed. When an infinitive is used in this way, it is often called the *infinitive of purpose*. The infinitives in the following illustrations express purpose and modify the verb.

The traveler stopped **to rest.** *(to rest*—expresses purpose)
The composer came **to listen.** *(to listen*—expresses purpose)
The officer returned *to help* (to help—expresses purpose)

In the first sentence, the infinitive *to rest* modifies the verb *stopped*. The infinitive expresses purpose; that is, it tells why the traveler stopped. The infinitive *to listen* modifies the verb *came*. The infinitive also expresses purpose. It tells why the composer came. The infinitive in the third sentence tells why the officer returned. It modifies the verb and expresses purpose.

An infinitive used as an adverb frequently modifies an *adjective*. This use of the infinitive is also easy to identify. In most cases, the infinitive modifies an adjective which follows a linking verb. Examine the following illustrations carefully.

The cake was ready **to bake.** *(to bake* modifies the adjective *ready)*
The men were anxious **to work.** *(to work* modifies the adjective *anxious)*
We are sorry **to leave.** *(to leave* modifies the adjective *sorry.)*
I shall be glad **to help.** *(to help* modifies the adjective *glad)*

In the first sentence, the linking verb *was* is followed by the predicate adjective *ready*. The adjective *ready* is modified by the infinitive *to bake* which is used as an adverb. As you have learned, only adverbs can modify adjectives. The sentence means that the cake was ready *for baking*. The infinitive *to bake* could readily be turned into an adverbial phrase. This should make its adverbial function clear.

In the second sentence, the linking verb *were* is followed by the predicate adjective *anxious*. The adjective *anxious* is modified by the infinitive *to work*. In the third sentence, the predicate adjective *sorry* is modified by the infinitive *to leave*. In the last sentence, the predicate adjective *glad* is modified by the infinitive *to help*.

In all of the preceding illustrations a linking verb is followed by a predicate adjective. The predicate adjective is modified by an infinitive which is used as an adverb.

COMPLEMENTS OF INFINITIVES

Like the gerund and the participle, the infinitive may take any kind of complement a verb might take. Sometime the infinitive takes a *direct object*. Sometime it takes both a *direct* and an *indirect object*. If the infinitive is a form of a linking verb, it may take a *predicate noun* or a *predicate adjective* as a complement.

Arlene wanted to buy a fur coat. (*coat*, object of *to buy*.)
The tailor promised to make me a suit. (*me*, indirect object; *suit*, direct object.)
John would like to be an aviator. (*aviator*, predicate noun.)
His ambition is to become rich. (*rich* predicate adjective.)

In the first sentence, the infinitive *to buy* takes the direct object *coat*. In the second sentence, the infinitive *to make* takes both an indirect object and a direct object. *Me* is the indirect object and *suit* is the direct object. In the third sentence, the infinitive *to be* takes the predicate noun *aviator* as a complement. In the last sentence, the infinitive *to become* takes the predicate adjective *rich* as a complement.

MODIFIERS OF INFINITIVES

1. Like the verb, an infinitive may be modified by an *adverb* or by an *adverbial phrase*.

The boys like to swim fast. (*fast*, adverb, modifies *to swim*.)
The boys like to swim in Lake Michigan. (adverbial phrase modifies *to swim*.)
To write well is an accomplishment. (*well*, adverb modifies *To write*.)
To fish in that stream is a pleasure. (adverbial phrase modifies *To fish*.)

2. Sometimes the infinitive has both a complement and a modifier.

To do the job properly would require a month's time.

In this sentence the infinitive *To do* takes the direct object *job*. The infinitive is also modified by the adverb *properly*.

THE INFINITIVE PHRASE

In the preceding illustration, the entire phrase *To do the job properly*, regarded as a unit, is the **complete subject** of the sentence. This group of words is called an **infinitive phrase**. An *infinitive phrase* consists of an infinitive with its complements or its modifiers, or both if it takes both.

Ted's aim was to please others. (infinitive with a *direct object*.)
We did not want to travel by plane. (infinitive with an *adverbial phrase* as a modifier.)
The men would like to begin the project now. (infinitive with a *direct object* and an *adverb* as modifier.)

The infinitive phrase in the last sentence is *to travel by plane*. The infinitive takes the direct object *plane* and the adverbial phrase *by plane* modifies the infinitive. In the second sentence, the infinitive phrase *to travel by plane* is the subject of the verb *is*. The infinitive phrase in the last sentence is *to begin the project now*. The infinitive takes the direct object *project* and the adverbial modifier *now*.

THE OMISSION OF THE SIGN 'TO'

You have learned that the sign of the infinitive (*to*) is omitted when the infinitive is used after certain verbs. The sign is not used because the sentence would sound awkward or stilted with the sign placed before the verb form. You should become familiar with the verbs that are followed by the infinitive without the sign *"to"*.

The sign of the infinitive is usually omitted when the infinitive is used after the following verbs: *bear, feel, let, watch, dare, help, see, make, please, but need, do* etc. The following sentences illustrate the use of the infinitive without the sign. The *to* is enclosed in parentheses so that you will know that you should supply it mentally in order to recognize the infinitive construction.

1. I felt the floor (to) shake under me.
2. We heard him (to) sing some old ballads.
3. I saw her (to) enter the theater.
4. They bid us (to) leave immediately.
5. They dare not (to) create a disturbance.
6. Help me (to) carry the luggage.
7. Let his friend (to) help him.
8. They made him (to) wait for an hour.

24. PROBLEMS IN THE USE OF INFINITIVES

THE INFINITIVE CLAUSE

Sometimes the infinitive has its own *subject*. With this subject, the infinitive is used in a construction which is commonly called the **infinitive clause.** *The infinitive clause is not a true clause* because the infinitive cannot function as a predicate verb. An infinitive cannot function as the predicate verb in a clause because it is an incomplete verb form. The following illustrations will help make this clear.

The officers want the men to sing at the Rotary Club.
We believed him to be capable.

In the first sentence, the group of words, *the men to sing at the Rotary Club*, is called an **infinitive clause.** This expression is called a clause because the infinitive has a subject, and the entire group of words functions in the same way as a **noun clause** would function. The *infinitive clause* is used as the direct object of the verb *want*.

In the second sentence, the group of words *him to be capable* is an infinitive clause. The subject of the infinitive is the pronoun *him*. The entire expression *him to be capable* is used as the direct object of the verb *believed*, but it is not a true clause. The infinitive *to be* is not a predicate verb.

Jean asked me to go with her. (*me* subject of the infinitive *to go*.)

[illegible] to buy the bonds. (*him* subject of the infinitive *to buy*)

[illegible] be the leader. (*me* subject of the infinitive *to be*)

We want them to build a house. (*them* subject of the infinitive *to build*)

The [illegible] expression in each of the preceding sentences is the **object** of the preceding verb. In the first sentence, *me to go with her* is the object of the verb *asked*. The sentence does not mean that she asked *me*. It means that she asked *me to go with her*. The entire expression *me to go with her* is the object of the verb *asked*.

The group of words *me to go with her* is called an infinitive clause. It consists of its subject *me* and the infinitive *to go* with the modifier of the infinitive, the prepositional phrase *with her*. You can readily see that this is not a complete verb form and cannot function as the predicate verb.

The important fact to keep in mind about this construction is that the *subject* of the infinitive is always in the **objective case.** This is an *exception* to the rule that subjects of [illegible] are in the nominative case.

Examine the preceding illustrations again. In [illegible] in the objective case. In the third sentence *her* is the subject of the infinitive clause *her to be honest*. *Her* is in the objective case. In the last sentence *them* is the subject of the infinitive [illegible] case. The subject of the infinitive [illegible] case. I think of saying: Jean asked *I* to go with her; or Father advised *he* to buy the bonds. It is natural to use the *objective case* as the subject [illegible] keep the following rule in mind. It will help [illegible]

The manager made Mary copy the report again.
The manager made Mary (to) copy the report [illegible]

I saw her (to) dance at the carnival.

VERB TO BE IN AN INFINITIVE CLAUSE

[illegible]

The problem arises when the infinitive is a linking verb. You learned in your [illegible] that the noun or pronoun used after a linking verb is in the *nominative case* to agree with the subject of the sentence. Up to this point, every word used as the subject of a sentence or of a clause has been in the nominative case. In the case of the "infinitive clause" we are dealing with a subject that is in the **objective case.**

The verb *to be*, as well as other linking verbs, always takes the same case after it as it takes before it. If the case before it is the *objective case*, the *identical* case must follow it. A noun or pronoun following a linking verb must be in the same case as the subject. Since the noun or pronoun that follows a linking verb means the same person or thing as the subject, it must [illegible] the subject in case. Therefore, the noun or pronoun that follows the verb *to be* in an infinitive clause is in the objective case to agree with the *subject* which is in the objective case. This is the logical agreement of *subject* and *complement* after a linking verb functioning as an infinitive in an infinitive clause.

[illegible] will make this clear. Notice the case of the pronoun after the linking verbs in the "infinitive clauses."

I should like the chairman to be him. (*chairman* [illegible] objective case) Note: In the ages of English [illegible] them. (*us* [illegible] objective case.)

In the first sentence, the subject of the infinitive clause, *him*, which is in the objective case, [illegible] the subject of the principal clause. The pronoun *him* is the complement of a linking verb and must agree in case with the subject. Since the subject [illegible] case, the complement must be in the objective case to agree with the subject. In the second sentence, the pronoun *us* is the subject of the infinitive clause. *Us* is in the objective case because the infinitive *to be* follows the infinitive *to be* must be in the same case as the subject. *Them* is in the object case to agree with the case of the subject, *us*.

THE SPLIT INFINITIVE

The parts of an infinitive (*to* with a verb form) are regarded as a unit. They should not be separated unless there is a good reason for doing so. The usual method of separating the parts of the infinitive is to place an adverb between the *to* and the *verb form*. When the parts of the infinitive are separated in this way we refer to the infinitive as a "**split infinitive.**"

[illegible] a modifier. Sometimes it is both desirable and effective to split the infinitive, as many authorities in grammar are pointing out. Ordinarily, it is not the best practice, as you will readily see from the following illustrations.

Asked you **to** immediately **return** my camera. The judge was determined **to** intently and **examine** the [illegible]

[illegible] placed between the sign of the infinitive and the verb form. In this particular sentence there [illegible] it were written as follows:

Asked you **to return** my camera immediately.

In the second sentence, two adverbial modifiers connected by *and* are placed between the parts of the infinitive. This sentence would sound better if the infinitive were not split in this manner.

The judge was determined **to examine** the evidence intently and carefully.

Many authorities in English call our attention to the fact that some of the best writers split infinitives. When writers do this, they have a good reason for the "split." They also know how to do it so that the sentence will not sound awkward or stilted. When a writer splits an infinitive, his purpose is to throw the emphasis in a certain direction. The following are examples of split infinitives found in good writing.

1. I feel like inviting them to first consider
2. "I desire to so arrange my affairs"
3. "his ability to effectually carry on"
4. "to enable him to properly perform his work"
5. "to better acquaint myself with the problems"
6. "Our object is to further cement trade relations."
7. "He worked silently and swiftly, hoping to speedily end his patient's discomfort."

Although there is plenty of evidence that good writers sometimes split the infinitive, ordinarily it is better practice to keep the parts of the infinitive together. A writer or speaker should certainly avoid using such awkward sentences as the following.

1. Edwin was eager for me to especially see the art exhibit. (*to see* infinitive)
2. Eugene promised to never again be late to work. (*to be* infinitive)
3. The committee wanted to beautifully decorate the hall. (*to decorate* infinitive)
4. I want to next year go to Europe. (*to go* infinitive)

In the first sentence, the infinitive *to see* is "split" by placing the adverb *especially* between the sign of the infinitive *to* and the verb form *see*. In the second sentence, two adverbial modifiers split the infinitive. In the third sentence, the adverb *beautifully* "splits" the infinitive. In the fourth sentence, the adverbial modifier *next* is placed between the sign *to* and the verb form, *go*. *Year* is a noun used as an adverb.

SPECIAL USES OF THE INFINITIVE

The infinitive is often used in **apposition** with a noun to explain or identify that noun. This is a very useful construction, for it enables us to explain the noun in a very few words. The infinitive used as an *appositive* is usually set off by commas. Sometimes a dash is used.

His first proposal, to borrow money, was [illegible]
We must [illegible] orders to finish the job [illegible]

In the first sentence, the infinitive phrase *to borrow money* is in apposition with the word *proposal*. It explains the nature of the proposal or tells what the proposal was. In the second sentence, the infinitive phrase, *to finish the job* [illegible] is in apposition with the word *orders*. It explains what our orders were.

The infinitive is also used as the **delayed subject** in a sentence that begins with the

introductory word *it*. In this case *it* is an **expletive.**

It always pays to tell the truth.
(It) To tell the truth always pays.

It is your duty to protect your interests.
(It) To protect your interests is your duty.

Sentences that begin with the pronoun *it* used as an expletive should always be transposed in order to see the grammatical relations more clearly.

THE THREE SIDED CHARACTER OF THE INFINITIVE

NOUN USES OF THE INFINITIVE

1. **Subject** of the sentence
2. **Direct object** of a verb
3. **Object** of a *preposition*
4. **Predicate noun** after a *linking verb*
5. **Appositive**
6. **Delayed subject** after an expletive
7. May take an *adjective modifier*

The Infinitive As A Modifier

1. May function as an **adjective,** modifying a noun.
2. May function as an **adrerb** expressing purpose or degree.

Verb Characteristics Of The Infinitive

1. Expresses *action* or *state of being,* but *cannot* function as the predicate verb in a sentence.
2. May take a complement: *direct object, indirect object, predicate noun,* or *predicate adjective.*
3. May take modifier: *adverbs* and *adverbial phrases.*
4. May form part of an infinitive clause.

25. PUNCTUATION REVIEW

All punctuation marks are "signals" from the writer to the reader. A period shows that a sentence has been ended or that an abbreviation has been used. A comma may show a slight break in thought, separate the two parts of a compound sentence, or be used in one of several other ways.

Keep in mind that *some sentences may be punctuated in more than one way* and that in some instances, a punctuation mark may or may not be used at the writer's discretion.

Remember, also, that *some professions and businesses have their own style of punctuation.* A journalist, for example, may omit some punctuation marks which normally are included in a business letter. A lawyer, on the other hand, uses many more punctuation marks when preparing a legal form than are essential for most types of business writing.

OPEN AND CLOSED PUNCTUATION

The terms *open* and *closed* punctuation apply only to the business letter and only to the heading and inside address of the letter. They do not apply to the salutation and complimentary close. If your company uses *open* punctuation, as most firms do, *omit all commas and periods at the ends of lines in the heading and inside address* unless the line ends in an abbreviation. If your firm uses *closed* punctuation, *include commas and periods at the ends of the lines in the heading and in the inside address.* The following examples illustrate the two styles of punctuation. Remember that most firms prefer open punctuation.

Open Punctuation	Closed Punctuation
Acme Rug Cleaners 1825 Lumber Avenue New York, New York 10016	Acme Rug Cleaners, 1825 Lumber Avenue, Mahwah, New Jersey 07430.

The salutation and complimentary close of a business letter are usually punctuated by a colon after the salutation and a comma following the complimentary close, regardless of open or closed punctuation.

USE OF THE PERIOD

1. The period (.) is used after a declarative or an imperative sentence.

She went to the office. (declarative)
Close the car door. (imperative)

Exception: If you wish to give a declarative or an imperative sentence the force of an exclamatory sentence, use an exclamation point rather than a period.

I was so shocked that I was speechless! (declarative)
Bring the Pulmotor quickly! (imperative)

2. After requests, use a period rather than a question mark.

May I send you a copy of our latest bulletin. (request)
Will you send me any further information which you have available. (request)

3. The period is used after abbreviations and initials.

Dr.	Mrs.	V.M.	Jan.
Sr.	Sat.	C. T. Jones	Inc.
B.S.	Ph.D.	U.S.A.	Gen.

Note: When a sentence ends with an abbreviation, one period is sufficient for both the abbreviation and the sentence.

Mail the package to Conley and Green, Inc.

4. The period is used to indicate the omission of words in quoted passages.

(a) Use three periods (. . .) to indicate the omission of words within a quoted passage.

"I pledge allegiance to the flag of the United States . . . one nation, indivisible, with liberty and justice for all."

(b) Use four periods (. . . .) to indicate the omission of words at the end of a quoted passage.

Fame is the spur . . . ." John Milton

USE OF THE COMMA

1. The comma (,) is used after an adverbial dependent clause when the dependent clause precedes the main clause. When the dependent clause does not begin the sentence, the comma is usually unnecessary. (See Chapter 19 for a detailed discussion of adverbial clauses.)

After the director had read the minutes of the meeting, he called for the financial report. (comma)

The director called for the financial report after he had read the minutes of the meeting. (no comma)

2. The comma is used after a participial phrase or an absolute phrase at the beginning of a sentence. (See Chapter 21 for a detailed discussion of participial phrases and absolute phrases.)

Seeing the address across the street, he wrote a note in his little bag.

The rain having stopped, we went to lunch.

3. The comma is used after an introductory infinitive phrase.

To be successful, you must read widely.

Note: When the subject of the sentence is an infinitive, do not separate the subject from the rest of the sentence.

To be successful was his goal.

4. The comma is used to set off parenthetical expressions, whether words, phrases, or clauses.

(a) Transitional words, such as *however, therefore, moreover, besides, consequently* should be set off by commas.

Consequently, I did not receive an answer to his letter.

Exception: The word *also* is not set off by commas unless the writer wishes *also* to be emphasized strongly. In such a case, *also* is generally placed in an unusual position in the sentence.

We also noticed that the salaries declined after the first of the year. (no emphasis)
Also, we noticed that the salaries declined after the first of the year. (emphasis intended)

(b) Phrases such as *so to speak, in short, as a result of course,* should be set off by commas.

We found, in short, many errors in his work.
Of course, there are many ways to tackle the problem.

(c) Clauses such as *I think, we suppose, he says* should be set off by commas.

Someone, I suppose, should check the report.

(d) Explanatory expressions, such as *and I agree with him, so far as he is concerned,* etc., which break the logical sequence of words should be set off by commas.

The president disliked the policy, and I agreed with him, of letting all employees name their vacation time.

5. The comma is used after introductory expressions such as *yes, indeed, surely* (when it means *yes*), *well.*

Well, the next thing we knew, he had shot the deer.
Yes, I will attend to the matter.

6. The comma is used to set off a nonrestrictive clause. A nonrestrictive clause is set off because *it is not essential to complete the meaning of a sentence.* A nonrestrictive clause is similar to a parenthetical expression in that it gives added information about the word it modifies.

Restrictive clauses are never set off by commas. *A restrictive clause is a clause that is necessary to complete the meaning of the sentence* because the clause identifies the word it modifies. A restrictive clause *cannot* be left out of a sentence, whereas a nonrestrictive clause can be. (See Chapter 18 for further information on restrictive and nonrestrictive clauses.)

commas.)

[illegible] *Mary Jones, our office manager, is ill.* The appositive merely gives added information about the subject, *Mary Jones.*

[illegible] apposition. An appositive is a word or phrase that defines or identifies another word. An appositive means the same as the word it defines.

Jones, our office manager, is ill.

[illegible] manager.

Note 1: An appositive at the end of a sentence should be preceded by a comma.

[illegible] manager

[illegible] my cousin Mary [illegible] Louis the Fourth [illegible]

8. The comma is used to set off words used [illegible]

We regret, Mr. Thomas, that your order was unsatisfactorily filled.

9. The comma is used to separate a series of three or more words, phrases, or clauses.

[illegible] He stalked off the stage, turned around, [illegible] came [illegible]

At the meeting it was decided to (1) give two [illegible] plan.

[illegible] placed before a conjunction joining words of a

[illegible] 10. The comma is used in a compound sentence to separate independent clauses [illegible] by one of the coordinate conjunctions *and, but, for, nor, or, yet,* and *so* when it means the same as *but.* See Chapter Seventeen for a detailed discussion of compound sentences.

[illegible] She ordered, but she did [illegible] not [illegible] receive it recently.

Maria [illegible] is a large industrial center, and it has many cultural attractions.

[illegible] If the clauses of a compound sentence are very short and closely connected, the comma [illegible] be omitted.

He [illegible] but he did not see her.

[illegible] Do not use a comma between two independent clauses unless a coordinate conjunction is [illegible] Use of a comma without a coordinate conjunction between two independent clauses is called the *comma fault.* The following sentence illustrates the comma fault.

[illegible] The shipping department will not follow instructions, they repeatedly make serious errors. (Incorrect—comma should not be used without a coordinate conjunction.)

[illegible] The comma fault may be eliminated [illegible] the clauses in one of the three following ways.

(a) Use a coordinate conjunction after the comma.

The men in the shipping department will not follow instructions, and they repeatedly make serious errors. (correct)

(b) Use a semicolon between the two independent clauses.

The men in the shipping department will not follow instructions; they repeatedly make serious errors. (correct—see Rule 1 under semicolons.)

(c) Punctuate the two independent clauses as two simple sentences.

The men in the shipping department will not follow instructions. They repeatedly make serious errors. (correct)

Note 2: When the independent clauses of a [illegible] *internal punctuation,* a semicolon is generally used before the coordinate conjunction. Internal punctuation within one or both of the independent clauses.

Copyboy, take this folder to Mary Louis, the fellow in brown over there, and be sure to come back.

[illegible] tion, but she never got the raise.

[illegible] commas in the first independent clause. Since [illegible] dent clauses, even though a coordinate con-

12. The comma is used to set off words or phrases expressing contrast.

[illegible]

[illegible] 13. The comma is used in a sentence [illegible] following manner.

The president was born April 8, 1872, at 1224 Elm Street, Cleveland, Ohio.

14. The comma is used to set off a direct quotation.

The director asked, "How many of you are in favor of this change in policy?"

15. The comma is used as a substitute for an exclamation point after a mild interjection.

Well, I'm glad that's over.
My, it's really raining.

16. The comma is used after inverted names.

Thackeray, William M.
Whittier, John Greenleaf

17. The comma is used to indicate the omission of a word.

Fishing forms a quiet man; hunting, an eager man; racing, a greedy man.

18. The comma is used to set off a proper name when followed by an academic degree or honorary title; the comma is used to separate two or more degrees or titles.

Philip F. Adams, A.B., M.A., Ph.D., lecturer in English

19. The comma is used to point off the thousands in figures of four digits or more.

1,117 20,748 1,817,000

Note: Do not use the comma in street addresses, page and policy numbers, or in years.

the year 1985	Policy No. 903451
page 2348	1117 Pensacola Ave.

20. The comma is used to separate two sets of figures or two identical words.

[illegible] Case 1, Case 2, you should apply immediately.
Send me 10 No. 1284 and 7 No. 158.
Since 1981, 14,000 new machines have been sold.

21. The comma is used to separate a declarative clause and an interrogative clause which immediately follows.

The plane will arrive on time, will it not?
Jack is to get a promotion, isn't he?

22. The comma is used to separate a phrase [illegible] of the sentence when the phrase is [illegible] of its natural order.

Like you, I think the policy is a worthwhile one.
[illegible] Despite all the extra work and less pay,
In spite of his promise, he was late to work again.

USE OF THE SEMICOLON

The semicolon (;) is used to show a stronger [illegible] parts of a sentence than does a comma. In practical writing, however, [illegible] the semicolon because it is [illegible] formal. If you use a great [illegible] semicolons are that you are [illegible] correctly or you are writing sentences which are too long. Semicolons [illegible] effect in a lively sentence pattern [illegible] strongly.

1. The semicolon is used to separate independent coordinate clauses closely connected in meaning when no coordinate conjunction is

The sales staff meets every other Tuesday; the production staff meets only once a month.

He would not approve the art layout as presented, he suggested several drastic changes.

Note An example of this rule, as used to avoid the comma fault, was given in Rule 14 under commas.

2. The semicolon is used between coordinate clauses of a compound sentence when they are joined by transitional words and phrases. The following is a list of commonly used transitional words and phrases.

accordingly	indeed	as a result
afterwards	likewise	at last
again	meanwhile	at the same time
anyhow	moreover	for example
besides	namely	for instance
consequently	nevertheless	for this reason
doubtless	next	in any case
eventually	otherwise	in fact
evidently	perhaps	in like manner
finally	possibly	in short
furthermore	still	on the contrary
hence	then	on the other hand
however	therefore	that is
yet	thus	in addition

For a further discussion of transitional words see chapter 17.

Note You have already learned that transitional words are usually set off by commas. When you use a semicolon in place of a comma before the transitional word, you usually put a comma after the transitional word. However, when the transitional word retains its adverbial force and is not regarded as an independent element, it is seldom set off with a comma.

The members of the board of directors approved the change in distribution; consequently, you should appeal to them.

The weather was cold and icy; therefore we didn't go.

3. The semicolon is used before a coordinate conjunction (*and, but, for, or, nor*) between two independent clauses when either one or both have internal punctuation.

The president, a well-read man, predicted a cost of living increase for the first of the year; but his prediction, which spread throughout the plant, proved to be wrong.

The staff housekeeper ordered carpets, divans, lamps, tables, and chairs; but her order was incorrectly filled.

4. The semicolon is used before such words as *for example, for instance, that is,* and *namely* that introduce an example, enumeration, or a list in a sentence. A comma is placed after such words.

These special artist's pencils are available in three colors, namely, red, green, and blue.

Many of our policies will be changed this year; for example, salesmen will be paid a commission instead of a salary.

5. The semicolon is used in lists where a comma is insufficient to separate the items clearly.

Guests at the convention were Mr. Leonard Kee, the past president of the corporation; Mrs. F. K. Small, the wife of the founder; and Mr. Paul Wells, the speaker of the evening.

USE OF THE COLON

The colon (:) indicates the strongest possible break within a sentence.

1. The colon is used before a list of items or details.

Please send out the following items: No. 3 S; No. 467; No. 519; and No. 570.

His actions were as follows: He went to the drugstore, purchased a hypodermic needle, got into his car, and drove away.

Note 1 Capitalize the first letter of each item in a list when the list is in column form.

You should know how to use the following office machines:

1. Typewriter
2. Duplicator
3. Copy Machine
4. Calculator

Note 2 Do not capitalize the first letter of each item in a list when the items are included in a sentence.

You should know how to use the following office machines: typewriter, duplicator, copy machine, and calculator.

2. The colon is used before an appositive phrase or clause.

Our company has always had this motto: The customer is always right.

These are your duties: Sort the mail; open all that is not personal; throw away the envelopes; and bring the letters to me.

Note Capitalize the first letter of the word which follows the colon when that word introduces a complete sentence, as in the above exaples.

3. The colon is used after the salutation of a business letter.

Dear Mr. Roe: Gentlemen: My Dear Madam:
Note Never use a semicolon after a salutation. A comma may be used after the salutation of a friendly or informal letter.

Dear Jane, Dear Father, Dear Jones,

4. The colon is used to divide the parts of references, titles, formulas, and numerals.

The time was 9:15 p.m.
He assigned Chapter XII: Section IV.
Grammar Unit Eight: Complements of Verbs

USE OF PARENTHESES

1. Parentheses ( ) are used to set off words, phrases, clauses, or sentences which are used by way of explanation, translation, or comment, but which are independent constructions.

Hilda (my sister's roommate at college) is coming to visit us.
The motto read as follows: *De gustibus non disputandum est* (In matters of taste there is no dispute).

2. Parentheses are used to enclose a number, letter, or symbol when used as an appositive.

She ordered twelve (12) eight (8) ounce glasses.
The bookkeeper ornamented his letterhead with the percent symbol (%).

Note 1 When using parentheses with other punctuation marks, punctuate the main part of the sentence as if the parenthetical portion was not there. A punctuation mark comes after the second parenthesis if the punctuation mark applies to the whole sentence and not just to the parenthetical portion.

He analyzed and presented standards of evaluation (or lack of them) and techniques (if any), but he could not proceed (nothing).

Note 2 Place the punctuation mark inside the second parenthesis if the punctuation mark applies only to material within the parenthetical portion.

A simplified fire-fighting plan will help you (see the back cover of this brochure).

USE OF THE DASH

The dash (—) is used to indicate an abrupt change of idea. It should be used sparingly. Excessive use of the dash usually indicates that the writer does not know what punctuation mark to use.

There are times you may want to use the dash for visual effect or emphasis. A glance at advertisements in newspaper shows that copywriters make frequent use of the dash. However, in business writing, such as letters, reports, minutes, and in social correspondence use the dash with caution.

1. The dash may be used to indicate a sudden change of thought in a sentence.

I was certain that the manager—indeed, all of the office force—wanted John to receive the promotion.

2. The dash may be used to indicate a summarizing thought or an afterthought added to the end of the sentence.

I shall make out an estimate, draw up a contract, send out a man to interpret it for you—give you every help I can.

3. The dash may be used to set off a word or phrase repeated for emphasis.

We invited them for one meeting—one meeting only—not for the entire convention!

4. The dash may be used between numbers or dates to indicate *to* and *and*.

His chapter covered from 1860—1868.
My appointment was scheduled from 12:15—1:15.

Note on the punctuation of parenthetical matter Close study of the rules on commas, parentheses, and dashes will show you that any one of the three punctuation marks may be used to set off parenthetical words, phrases, or clauses. When should you use the commas, dash, or parentheses? No strict rule can be stated. In general, follow this practice. In punctuating parenthetical matter, use dashes mainly for visual effect; use commas if the material is short and use parentheses if the material is long.

USE OF BRACKETS

1. Brackets [ ] are used to enclose material added by someone other than the writer, for example, editorial additions or comments.

The investigation [from June 1, 1985, to April 8, 1986] caused considerable speculation.
The poet [Robert Browning] did not approve of the excessive adulation during the meeting.

2. Brackets are used to enclose parenthetical matter within parenthetical matter.

Your order (including items No. 391, No. 394, and No. 486 [No. 288 was out of stock] was filled last week.

nature

USE OF THE QUESTION MARK

end of the sentence place a question mark at

Will delivery be made today tomorrow or Friday?

when only part of the sentence is a question. In introduced by a comma or colon a semicolon

Our questions are: what date will you arrive? where will you stay? and do you desire us to

USE OF THE EXCLAMATION MARK

1. The exclamation mark (!) is used after all

Your answer was hard to believe!

2. The exclamation mark is used after an interjection or a word used as an interjection

Hurry! The train will pull out in three minutes!

3. The exclamation mark is used after

USE OF QUOTATION MARKS

The inspector said: "Well, your case is not hopeless."

"Where," he asked, "are you going to keep it?"

"Where can we raise the money?"

Note: Capitalize the first word of a direct quotation. Do not capitalize the first word in the second part of an interrupted quotation unless a second part begins a new sentence.

Do not use quotation marks or capital letters in

"He inspector said that your case is not hopeless." (Many indirect quotations are

2. Quotation marks are used to enclose the names of songs, titles of poems, and other titles

"The Lake Isle of Innisfree"

She sang "Ben to sing" because "at her Arduaine."

"My Heart Leaps Up" is one of Wordsworth's favorite poems.

Note: In typing or writing, underline the titles of book-length works (operas and any other works of art long enough to appear in book form). Underlining signifies italics for printing. The words "The New Yorker" in the first sentence above are printed in italic type.

The anthology "Pastoral Liberal Education" includes A. E. Housman's "Introductory Lines," "The Lowest Trees Have Tops" and "Diction."

The soprano sang "If Madam Should Call You" from Mozart's Marriage of Figaro.

phrases, or sentences referred to within a

"Furthermore" is sometimes used as a transitional phrase.

The sentence "Now is the time for all good

4. Quotation marks are used to set off slang words or expressions.

She said that the office party was held at a

paragraph but at the end of the last paragraph by a colon instead of a comma. Quotations of three or more lines are usually indented and set

USE OF QUOTATION MARKS WITH OTHER PUNCTUATION

before ending quotation marks.

"They are not here," he said.

are placed before quotation marks when they

Did she say, "You are to be promoted next month"?

(d) The semicolon and colon follow ending quotation marks unless they are part of the quoted matter.

She said, "You are to be promoted next month"; consequently, I expected to be promoted.

USE OF SINGLE QUOTATION MARKS

1. Single quotation marks are used to set off a quotation within a quotation.

"Jane," I asked, "did you tell me how to spell the word 'pathologically'?"

The irate mother said, "You must get all of this 'junk' out of the living room at once."

Note: Other punctuation marks are used with single quotation marks in the same way as with double quotation marks.

USE OF THE APOSTROPHE

1. The apostrophe (') is used in nouns to show possession.

Note: Keep in mind that the sign of the possessive case is always added to a word. It is not something that is inserted within a word.

(a) If the singular form of the noun does not end in **s** or an **s** sound, add the apostrophe and **s ('s).**

Singular	Singular Possessive
boy	boy's
girl	girl's
lady	lady's

(b) If the singular ends in **s** or an **s** sound, add the apostrophe (') or the apostrophe and **s ('s)** if the additional **s** sound is desired.

Singular	Singular Possessive
boss	boss' or boss's
dress	dress' or dress's
box	box' or box's

(c) If the plural form of the noun does not end in **s**, add the apostrophe and **s (s')**

Plural	Plural Possessive
men	men's
children	children's
mice	mice's
teeth	teeth's
geese	geese's

(d) If the plural form of the noun ends in **s**, add the apostrophe (')

Plural	Plural Possessive
boys	boys'
girls	girls'
ladies	ladies'

The possessives of proper nouns are formed in the same way as the possessives of common nouns. If the singular form of the noun does not end in **s**, add the apostrophe and **s**. If the singular ends in **s** or an **s** sound, add the apostrophe (') or the apostrophe and **s ('s)**. The plural possessive is always formed by adding the apostrophe to the plural form.

Proper Noun	Singular Possessive	Plural	Plural Possessive
John	John's	Johns	Johns'
Thomas Jefferson	Thomas Jefferson's	Thomas Jeffersons	Thomas Jeffersons'
Jane	Jane's	Janes	Janes'

(e) The possessives relating to *time, distance* and *value* are also written with an apostrophe.

the day's task
a year's time
a minute's notice
five cents' worth
six miles' distance
three weeks' vacation

(g) The singular possessive and the plural possessive of compound nouns are formed by adding the apostrophe to the end of the compound word.

Singular	Plural
brother-in-law's	brothers-in-law's
father-in-law's	fathers-in-law's

(h) Joint ownership is shown by making the last word in the series possessive. Individual ownership is shown by making both parts possessive.

Alice and Jack's apartment (joint ownership)
Alice's and Jack's apartments (individual ownership)

2. The apostrophe is used in indefinite pronouns to show possession. The possessive case of indefinite pronouns is formed in the same way as the possessive case of nouns.

everybody's duty
one's coat
others' positions
someone's hat

3. The apostrophe is used with **s** to form the plural of numbers, letters, signs, and symbols.

Your 4's look like 2's.
He used twelve "r's" to decorate his paper.

4. The apostrophe is used to indicate the omission of a word, letters, or numerals.

don't	let's	o'clock
hadn't	it's	she's
isn't	'tis	wouldn't

The accident happened in '86.

Metric Measurement

JOULE (J) = the work done when the point of application of a force of 1 newton is displaced through a distance of 1 metre in the direction of the force.

erg = 1 dyn acting through a distance of 1 centimetre = 100^7J

watt (W) = the power which in 1 second gives rise to energy of 1 joule.

metric horsepower (ch or CV or cv or PS or pk) = the power which raises 75 kilograms against the force of gravity through a distance of 1 metre per second = 75 × 9.806 65 joules per second = 735.498 75 watts.

coulomb (C) = the quantity of electricity carried in 1 second by a current of 1 ampere.

volt (V) = the difference of electric potential between two points of a conducting wire carrying a constant current of 1 ampere, when the power dissipated between these points is equal to 1 watt.

ohm (Ω) = the electric resistance between two points of a conductor when a constant potential difference of 1 volt, applied to these points, produces in the conductor a current of 1 ampere, the conductor not being the seat of any electromotive force.

siemens (S) = 1 ampere per volt, being the unit of electric conductance; this unit has also been known as the reciprocal ohm (ohm^{-1}) or 'mho'.

farad (F) the capacitance of a capacitor between the plates of which there appears a difference of electric potential of 1 volt when it is charged by a quantity of electricity of 1 coulomb.

weber (Wb) = the magnetic flux which, linking a circuit of 1 turn, would produce in it an electromotive force of 1 volt if it were reduced to zero at a uniform rate in 1 second.

henry (H) = the inductance of a closed circuit in which an electromotive force of 1 volt is produced when the electric current in the circuit varies uniformly at the rate of 1 ampere per second.

tesla (T) = the flux density in vacuum produced by a magnetic field of strength 1 ampere per metre; this is the unit of magnetic flux density and equals 1 weber per square metre.

lumen (lm) = the luminous flux emitted within unit solid angle of 1 steradian by a point source having a uniform luminous intensity of 1 candela. lux (lx) = an illuminance of 1 lumen per square metre.

Metric System

Multiples and Submultiples

The multiples and submultiples of the base and other units are formed by applying established prefixes, which are the same whichever unit is used. Examples are: milligram (mg), millimetre (mm), kilowatt (kW).

Only one multiplying prefix is applied at one time to a given unit. Thus one thousandth of a milligram is not referred to as a millimilligram but as a microgram (g). There are a few cases where, in attaching a prefix to the name of a unit, a contraction of the prefix name is made for convenience in pronunciation; for example megohm, microhm and hectare. Unit names take a plural 's' when associated with numbers greater than 1, eg 1.5 metres; the names hertz, lux and siemens are, however, the same in the plural. Symbols are not altered in the plural form; eg 1.5 m.

The names and values of prefixes in use are given below; also indicated are the equivalent powers to base 10 of the multiplying factors which can be used to relate any multiple or submultiple to the main unit: for example 1 mm = 10^{-3}m and 1 MN = 10^{6} N. The general use of prefixes representing 10 raised to a power which is multiple of ± 3 is recommended in SI; for example, milimetre (10^{-3} m), metre (m) and kilometre (10^{3} m). Other prefixes, notably centi, deci, deka and hecto can be used where others are inconvenient. Myria, as a prefix symbol, is not an SI multiple, but is included for reference.

Prefix name	Prefix symbol	Factor by which the unit is multiplied		Description
atto	a	10^{-18} =	0 000 000 000 000 000 001	one million million millionth
femto	f	10^{-15} =	0 000 000 000 000 001	one thousand million millionth
pico	p	10^{-12} =	0 000 000 000 001	one million millionth
nano	n	10^{-9} =	0 000 000 001	one thousand millionth
micro	m	10^{-6} =	0 000 001	one millionth
milli	m	10^{-3} =	0 001	one thousandth
centi	c	10^{-2} =	0 01	one hundredth
deci	d	10^{-1} =	0 1	one tenth
deca (or deka)	da	10^{1} =	1 0	ten
hecto	h	10^{2} =	10 0	one hundred
kilo	k	10^{3} =	1 000	one thousand
myria	my	10^{4} =	10 000	ten thousand
mega	M	10^{6} =	1 000 000	one million
giga	G	10^{9} =	1 000 000 000	one thousand million
tera	T	10^{12} =	1 000 000 000 000	one million million
peta	P	10^{15} =	1 000 000 000 000 000	one thousand million million
exa	E	10^{18} =	1 000 000 000 000 000 000	one million million million

MULTIPLICATION TABLE

To multiply two numbers find one of the numbers along the side of the table and follow this row to the column headed at the top by the other number. Thus $12 \times 17 = 204$

SPACE EXPLORATION

NASA

Expanding Our Horizons

"That's one small step for a man, one giant leap for mankind." These memorable words were spoken by Neil A. Armstrong on July 20, 1969, as he became the first person to step onto the moon. Armstrong's words aptly describe not only the mission that landed people on the moon but space exploration in general. For as President Lyndon B. Johnson had pointed out, "the moon trip is just one of the many goals" of space exploration.

Some of the goals, such as landing people on the moon and sending unmanned craft to other planets, have been achieved. But with each accomplishment new goals are set, new plans made for the future. By the late 1980s, scientists were looking toward the time when people would visit Mars, when permanent manufacturing facilities would operate in space, when contact would be made with life on other worlds.

The knowledge gained from space exploration has been immense. Instruments aboard spacecraft discovered the Van Allen belt (a zone of radiation encircling Earth) and previously unknown moons circling around Jupiter, Saturn, and Uranus. They have provided much data on such phenomena as solar flares, planetary rings, exploding galaxies, and binary stars. They have yielded valuable information about natural processes occurring on Earth, and about people and how they function in strange environments.

There also have been many practical rewards from the space program. Space-based sensors identify areas that are likely to have petroleum or other mineral deposits. They help forecast harvests and find new fishing grounds in remote waters. They monitor the movement of storms, air pollutants, and volcanic debris. They aid

in search-and-rescue missions for lost ships, monitor temperatures to warn farmers of an approaching freeze, enable the evacuation of people from the paths of hurricanes. Thanks to communication satellites, previously isolated communities receive radio and television service.

The transfer of space technology to everyday life has been enormous: new systems for purifying and treating water and wastes . . . the rapid development and miniaturization of computers . . . new food preservation methods . . . .

Epoxy graphite materials that are light yet strong and rigid were developed for use in spacecraft, and now are also used to make ski poles and fishing rods. High-intensity flashlights developed to mimic the effects of sunlight on spacecraft are now used by campers and search-and-rescue teams. And in 1985 the first commercial products actually made in space became available: tiny latex spheres all exactly the same size. These spheres are used for instrument calibration in medical and industrial work, and they cannot be produced on Earth because of the adverse effects of gravity.

Finally, space exploration has changed forever the way we view our planet. Color photographs taken from outer space show how very beautiful Earth is—and how very different from the barren surfaces of other planets. No other planet in the solar system has the lush greenery, the sparkling oceans, the oxygen-filled atmosphere that form our most precious heritage.

A CHRONOLOGY

The following chronological review of the highlights of space exploration is divided into three broad groups: earth satellites, planetary and lunar missions, and manned space missions.

Earth Satellites

Earth-orbiting satellites are the oldest type of spacecraft—the first one, Sputnik 1, was launched on Oct. 4, 1957. Since then thousands more have been launched; these vehicles have become the workhorses of communications, navigation, weather forecasting, and intelligence gathering. (The date at the beginning of each entry is the craft's launch date.)

1957

Oct. 4: Sputnik 1 (USSR). The first successful artificial satellite.
Nov. 3: Sputnik 2 (USSR). The second satellite and the first to carry a living organism—a dog named Laika—into space.

1958

Jan. 31: Explorer 1 (U.S.). The first American satellite. Discovered the inner (Van Allen) radiation belt.
March 17: Vanguard 1 (U.S.). Contained two transmitters, one operating on solar power supply.
May 15: Sputnik 3 (USSR). A geophysical laboratory.
Dec. 18: Score (U.S.). A military communications relay satellite. On Dec. 19, transmitted a prerecorded tape of President Eisenhower's Christmas message to the nation.

Sputnik 1, the first artificial satellite, was a metal ball 23 inches (58 centimeters) in diameter. It circled Earth for 1 hour 36.2 minutes.

1959

Aug. 7: Explorer 6 (U.S.). Gathered radiation, magnetic field, and micrometeorite data. Took the first TV photographs of Earth as seen from space.

1960

April 1: Tiros—Television and Infrared Observation Satellite (U.S.). The first weather satellite. During a period of 2½ months it sent back 22,952 photographs of global cloud conditions.
May 24: Midas 2 (U.S.). The first missile launch detection satellite. It was equipped with infrared sensors capable of picking up the exhaust heat from a ballistic missile as it left the ground.
Aug. 10: Discoverer 13 (U.S.). Ejected a 300-lb (136-kg) reentry capsule recovered from the Pacific Ocean—the first object recovered from space.
Aug. 12: Echo 1 (U.S.). The first passive communication satellite. Reflected communications between the U.S. and the United Kingdom (U.K.).

1961

Feb. 16: Explorer 9 (U.S.). The first satellite launching by an all-solid-propellant rocket vehicle.
June 29: Transit 4A, Injun 1, and **Solrad 3** (U.S.). The first triple launch. The first nuclear power supply in space.
Dec. 12: Oscar—Orbiting Satellite Carrying Amateur Radio (U.S.). The first privately built satellite, constructed by radio hams. It transmitted for 18 days.

1962

March 7: OSO 1—Orbiting Solar Observatory (U.S.). Carried out the first comprehensive study of the sun from a satellite.
April 26: Ariel 1 (U.S.-U.K.; launched by U.S.). The first international satellite. Conducted atmospheric studies.
July 10: Telstar 1 (U.S.). The first commercially financed communications satellite and the first satellite to transmit live TV and telephone conversations across the Atlantic, between the U.S., U.K., and France.
Sept. 28: Alouette 1 (Canada; launched by U.S.). The first satellite to be wholly designed and built by a nation other than the U.S. or USSR. Conducted ionospheric measurements.
Oct. 31: Anna 1-B (U.S.). The first in a series of geodetic satellites.

1963

July 26: Syncom 2 (U.S.). The first synchronous communications satellite.
Sept. 28: Transit 5-B (U.S.). The first satellite to be completely powered by a nuclear isotope generator.
Oct. 16: Vela 1 and **Vela 2** (U.S.). Designed to detect nuclear explosions.

Nov. 1: Polyot 1 (USSR). The first satellite capable of maneuvering in all directions and able to change its orbit.

1964

Jan. 30: Electron 1 and **Electron 2** (USSR). The first Soviet dual launch. The craft measured Earth's radiation belt.
March 27: Ariel 2 (U.K.; launched by U.S.). Britain's second satellite.
Aug. 28: Nimbus 1 (U.S.). The first of a new type of weather satellite. Unlike Tiros, its cameras moved to keep Earth's surface in view at all times.
Sept. 4: OGO 1—Orbiting Geophysical Observatory (U.S.) Carried 20 coordinated geophysical experiments.
Dec. 15: San Marco 1 (Italy; launched in U.S.). Launched by an Italian crew.

1965

Feb. 16: Pegasus 1 (U.S.). The first in a series of satellites designed to evaluate the danger of a puncture of a spacecraft by micrometeorites and dust in the vicinity of Earth.
April 6: Intelsat 1 (U.S.). Also known as Early Bird. The first commercial communications satellite in synchronous orbit.
April 23: Molniya 1A (USSR). The first Soviet communications satellite.
April 3: Snapshot (U.S.). Tested the performance of the SNAP 10-A (Systems Nuclear Auxiliary Power) system under space conditions. The first known launch of a nuclear-fission reactor into Earth orbit.
Nov. 26: A-1 (France). France thereby became the third nation to launch satellites by its own means.
Dec. 6: FR-1 (France; launched jointly by France and U.S.).

1966

Feb. 3: ESSA 1 (U.S.). An Environmental Sciences Services Administration satellite. Together with ESSA 2, launched Feb. 28, marked the beginning of regular operational use by the U.S. Weather Bureau of information gained from cloud-covered observations. The two satellites were placed into nearly polar orbits, enabling them to survey Earth's entire surface every day.
Feb. 22: Cosmos 110 (USSR). Carrying two dogs, orbited Earth for 22 days. Helped determine the effects of radiation and long periods of weightlessness.
Dec. 6: ATS 1—Applications Technology Satellite (U.S.). Proved the possibility of two-way communications between ground stations and aircraft in flight.

1967

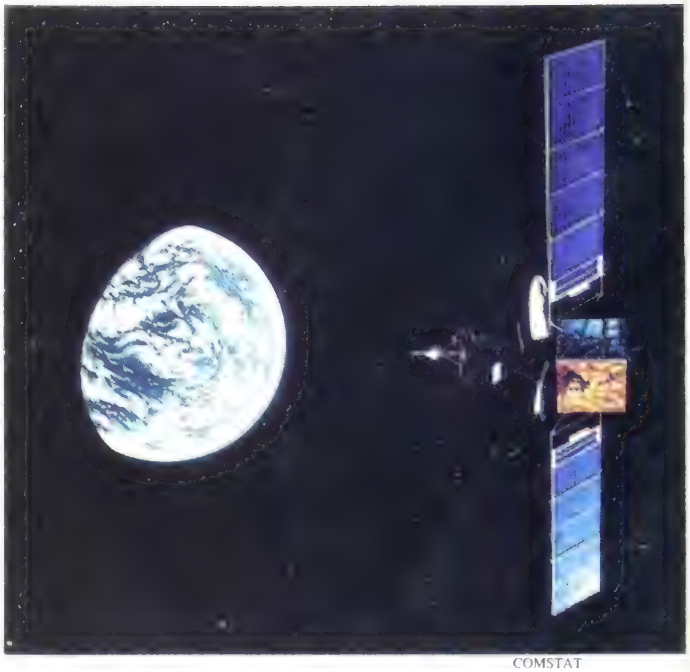
Apr. 26: San Marco 2 (Italy). Italy thereby became the fourth nation to launch satellites by its own means.
Sept. 7: Biosatellite 2 (U.S.). Aboard were plants, insects, amoebas, frog eggs, and other specimens. Tested the effects of weightlessness and radiation.
Nov. 28: WRESAT 1 (Australia). Australia became the fifth nation to launch satellites by its own means.

1968

April 14-15: Cosmos 212 and **Cosmos 213** (USSR). Docked and undocked automatically in space.
May 17: ESRO 2B—European Space Research Organization (A ten-nation international group; launched by U.S.). The satellite studied space physics and Earth's environment.
July 4: Explorer 38 (U.S.). The first of a series of radio astronomy satellites.

1969

April 14: Nimbus 3 (U.S.). The first weather satellite to provide radiometric data for determining vertical temperature and water-vapor profiles (needed for numerical weather prediction).



COMSTAT

Intelsat V, launched in late 1980, is part of a global communications system established by the International Telecommunications Satellite Consortium

Nov. 8: Azur (West Germany; launched by U.S.). The first West German satellite. Studied Earth's atmosphere and radiation belt.

1970

Feb. 11: Ohsumi (Japan). The first satellite launched by Japan.
April 24: China 1 (China). The first satellite launched by China. It transmitted music and telemetric signals.
Nov. 9: OFO—Orbiting Frog Otolith (U.S.). Two frogs with microelectrodes implanted in their inner ears were monitored to study the effects of weightlessness and simulated gravity conditions.

1971

Oct. 28: Prospero (U.K.; launched in Australia). Britain's first technology satellite.
Dec. 27: Aureole (USSR). The first satellite launched by the USSR with French assistance. It studied the upper atmosphere in high latitudes and the polar lights.

1972

July 23: ERTS 1—Earth Resources Technology Satellite (U.S.). Carried remote sensing devices to gather data on Earth's resources. Later renamed Landsat 1.
Aug. 21: OAD 3—Orbiting Astronomical Observatory; also named Copernicus (U.S.). Studied stellar ultraviolet radiation. Operated until Dec. 30, 1980.
Nov. 10: Anik 1 (Canada). Canada's first domestic communications satellite.

1973

Oct. 31: Cosmos 605 (USSR). An animal flight test of manned spaceflight systems.

1974

May 17: SMS-1 (U.S.). The first meteorological satellite placed in a synchronous orbit.

1975

April 19: Aryabhata (India; launched by USSR). India's first satellite.

1976

Feb. 19: Marisat 1 (U.S.). The first of a new class of maritime satellites designed to enable merchant ships to transmit voice, data, facsimile, and telex messages to U.S. shore stations interconnected with domestic terrestrial networks.
May 4: Lageos—Laser Geodynamics Satellite (U.S.). Conducted long-term geodetic studies.
July 8: Palapa 1 (Indonesia; launched by U.S.). Provided transmission of television, voice, and data throughout Indonesia.

1977

Aug. 12: HEAO 1—High Energy Astronomy Observatory (U.S.). Surveyed and mapped X-ray sources.
Sept. 18: Cosmos 954 (USSR). Ocean surveillance craft with a nuclear reactor. In Jan. 1978, disintegrated and fell over northern Canada; no known injuries.
Nov. 22: Meteosat 1 (ESA; launched by U.S.). The first of a series of five global weather satellites sponsored by a total of 145 nations.
Dec. 15: Sakura (Japan; launched by U.S.). An experimental communications satellite that tested the relay of various communication signals among the Japanese islands.

1978

April 26: HCMM—Heat-Capacity-Mapping Mission (U.S.). Measured day and night temperature differences on Earth's surface.
Aug. 12: ISEE—International Sun Earth Explorer-C (U.S.). Monitored sun spots, solar flares, and the solar wind. In Dec 1983, was renamed International Cometary Explorer (ICE) and redirected to intercept comet Giacobini-Zinner. On Sept. 11, 1985, passed through the tail of Giacobini-Zinner—the first spacecraft to probe a comet.
Oct. 24: Nimbus 7 (U.S.). The first pollution monitoring satellite.
Nov. 13: HEAO 2 (U.S.). Also known as the Einstein Observatory. Studied pulsars, quasars, black holes, and exploding galaxies.

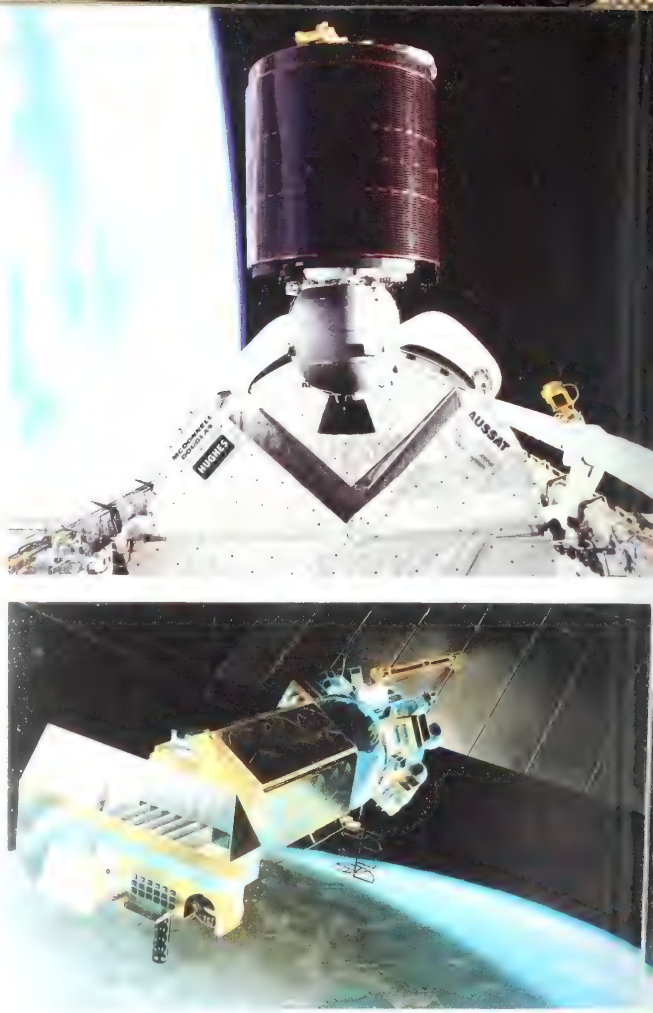
1979

June 27: NOAA-6 (U.S.). Weather and earth-resources satellite orbited for the National Oceanic and Atmospheric Administration. It and Tiros-N (launched Oct. 13, 1978) provided round-the-clock scanning of Earth's surface and atmosphere and monitored solar radiation levels above the atmosphere.
Sept. 20: HEAO 3 (U.S.). Measured cosmic and gamma

[illegible] 30: MAGSAT—Magnetic Field Satellite (U.S.). Provided [illegible] complete survey of Earth's magnetic field for use in [illegible] assisted in the search for miner[illegible]

[illegible] Maximum Mission or Solar Max [illegible] of solar flares and their [illegible]

[illegible] S-4—Geostationary Operational Environmental [illegible] of weather [illegible] synchronous orbits to provide high [illegible] large areas of North and South A[illegible] and [illegible]



Satellites have proven invaluable. Communications craft (*top*: AUSSAT) provide radio, TV, and telephone services. Weather craft (*above*: Tiros) monitor storms. Surveying craft (*facing page, left*: ERTS) map natural resources. Astronomical craft (*facing page, right*: IRAS) study heavenly bodies.

1981

June 19: Meteostat 2, a European Space Agency (ESA) weather satellite, and Apple, a communications satellite for India. The first satellite launched by ESA.
Aug. 3: Dynamics Explorers 1 and 2 (U.S.). Studied space around Earth from the limits of the upper atmosphere to distances far out in Earth's magnetic field.
Oct. 6: Solar Mesosphere Explorer (U.S.). Studied reactions between sunlight and molecules in the atmosphere.
Dec. 20: MARECS-1—Maritime Communications Satellite (ESA). Part of a global communications system designed to provide voice, data, and teleprinter services between ship and land stations.

1982

May 17: Iskra 2 (USSR). An amateur radio satellite placed into orbit by cosmonauts aboard Salyut 7—believed to be the first launch of a satellite from an orbiting space station.
Nov. 11: SBS 3—Satellite Business System (U.S.), and Anik C (Canada). The first satellite deployed from a space shuttle.

1983

Jan. 25: IRAS—Infrared Astronomical Satellite (U.S.). Provided first direct evidence of the possible existence of other [illegible] planetary systems.

Photos, NASA

April 5: TDRS—Tracking and Data Relay Satellite (U.S.). Designed to provide a communication link between space shuttles and ground stations. Launched by Mission STS 6.

1984

Jan. 23: Yuri 2A (Japan). The first high-power direct TV broadcast satellite, designed for transmission to remote areas and urban areas inhibited by high buildings

Aug. 16: AMPTE—Active Magnetospheric Particle Tracer Explorers (U.S.). Three satellites from West Germany, the U.K., and the U.S. launched simultaneously to study the interaction of the solar wind with Earth's magnetosphere. On Dec. 27, the German satellite released two containers of barium, which discharged their contents to form a dense cloud—the first artificial comet.

1985

Feb. 8: Arabsat-1 (Arab League; launched by Arianespace). The first of a series of satellites designed to provide the 22-member states of the Arab League with various TV and communications services

July 10: Cosmos 1667 Biosatellite (USSR). Carried two rhesus monkeys, one of which was equipped with sensors provided by the U.S. On July 17, returned to Earth; flight data provided to American investigators for analysis

1986

Feb. 21: SPOT (France). A commercial remote-sensing satellite that provides extremely detailed photographs of Earth's surface

NASA

An artist's rendition of an unmanned Surveyor craft on the moon's surface, with Earth on the horizon, some 240,000 miles (386,000 kilometers) distant

Planetary and Lunar Missions

Unmanned space probes are the pioneers of the solar system and, indeed, of the universe itself. Such planetary and lunar missions were the first to visit the moon, to orbit the sun, to visit other planets. One such probe has left the solar system. (The date at the beginning of each entry is the craft's launch date.)

1959

Jan. 2: Luna 1 (USSR). The first successful lunar probe. Passed within 3,728 mi (6,000 km) of the moon.
March 3: Pioneer 4 (U.S.). The first successful U.S. lunar probe. Passed within 37,300 mi (60,000 km) of the moon.
Sept. 12: Luna 2 (USSR) moon probe. The first spacecraft to hit the moon's surface. Obtained magnetic field, cosmic and solar radiation, micrometeoroid, and gas composition data.
Oct. 4: Luna 3 (USSR) moon probe. Took the first photographs of the moon's far side.

1960

March 11: Pioneer 5 (U.S.) solar satellite. Radioed back data on the interplanetary magnetic field and the interaction of Earth's magnetic field with the solar wind.

1962

March 7: OSO 1 (U.S.) solar satellite. Obtained data on solar flares.
April 23: Ranger 4 (U.S.) lunar probe. An apparent electronics failure caused it to impact on the moon—the first U.S. spacecraft to make contact with the moon's surface. No scientific data obtained.
Aug. 27: Mariner 2 (U.S.) launched toward Venus. On Dec. 14, passed within 22,000 mi (35,400 km) of Venus—the first spacecraft to visit another planet. Radioed back information on Venus' atmosphere, surface temperatures, and cloud cover.

1964

July 28: Ranger 7 (U.S.) moon probe. Transmitted more than 4,300 photographs of the lunar surface before impact.
Nov. 28: Mariner 4 (U.S.) Mars probe. On July 14, 1965, passed within 6,200 mi (9,980 km) of Mars—the first spacecraft to visit the planet. During the 25-minute encounter it took 21 photographs of the Martian surface.

1965

Feb. 17: Ranger 8 (U.S.) lunar probe. Impacted on the moon Feb. 20. Transmitted more than 7,100 photographs of the lunar surface.
March 21: Ranger 9 (U.S.) lunar probe. Impacted on the moon March 24. Transmitted more than 5,800 photographs.
July 18: Zond 3 (USSR) lunar probe. On July 20, flew past the far side of the moon, photographing the surface.
Nov. 16: Venera 3 (USSR) launched toward Venus. On March 1, 1966, hit Venus—the first spacecraft to impact another planet. Failed to return planetary data.
Dec. 16: Pioneer 6 (U.S.) solar satellite. Obtained a wealth of data on the sun.

1966

Jan. 31: Luna 9 (USSR) lunar probe. On Feb. 3, became first spacecraft to soft-land on the moon. For three days it transmitted photographs of the lunar surface.
March 31: Luna 10 (USSR) lunar probe. On April 3, became the first probe to enter a lunar orbit.
May 30: Surveyor 1 (U.S.) moon probe. On June 2, became the first U.S. probe to soft-land on the moon. Transmitted 11,150 photographs of itself and the lunar surface before ceasing transmission on July 14.
Aug. 10: Lunar Orbiter 1 (U.S.) moon satellite. First U.S. lunar orbiting probe. Photographed the lunar surface for studies of possible Apollo landing sites.
Aug. 17: Pioneer 7 (U.S.) solar satellite. Investigated phenomena of interplanetary space.
Aug. 24: Luna 11 (USSR). Launched into an orbit around the moon.
Oct. 22: Luna 12 (USSR). Launched into an orbit around the moon. Transmitted photographs and scientific data.
Nov. 6: Lunar Orbiter 2 (U.S.) moon probe. Provided photographs and data that helped in selecting locations for a manned lunar landing.
Dec. 21: Luna 13 (USSR) lunar probe. Landed on the moon Dec. 24. Returned photographs and soil density data.

1967

April 17: Surveyor 3 (U.S.). Landed on the moon April 20. Took photographs and soil samples.
June 12: Venera 4 (USSR) Venus probe. On Oct. 18, the main body of the probe crashed into the planet's surface. As it approached, it ejected a capsule that parachuted to the surface. Instruments in the capsule returned data on the Venusian atmosphere during the descent.
June 14: Mariner 5 (U.S.) Venus probe. On Oct. 19, passed within 25,000 mi (40,230 km) of Venus.
July 19: Explorer 35 (U.S.). Placed into a lunar orbit. Measured Earth's magnetic tail every 29.5 days.
August 1: Lunar Orbiter 5 (U.S.). Last in a series of moon probes. On Aug. 5, entered a lunar polar orbit. Photographed areas not previously covered.
Sept. 8: Surveyor 5 (U.S.). Landed on the moon Sept. 11. Transmitted soil analysis data and 19,000 photographs.

Nov. 7: Surveyor 6 (U.S.) moon probe. On Nov. 10, landed on the moon. On Nov. 24, its three engines were fired to lift it slightly off the lunar surface and move sideways about 8 ft (2.4 m)—the first lateral movement on the moon's surface. It then photographed the spot where it originally stood.
Dec. 13: Pioneer 8 (U.S.) solar satellite. Studied solar phenomena

1968

Jan. 7: Surveyor 7 (U.S.) moon probe. Landed on the moon Jan. 10—the only Surveyor to land in lunar highlands and in the debris of a relatively young crater. Relayed 21,000 photographs and soil-analysis data. The last of the Surveyor series.
April 7: Luna 14 (USSR) moon probe. On April 10, entered a lunar orbit. Provided data on Earth-Moon mass relationship and the moon's gravitational field.
Sept. 15: Zond 5 (USSR) moon probe. First unmanned round-trip flight to moon. On Sept. 21, returned to Earth.
Nov. 8: Pioneer 9 (U.S.) launched into a solar orbit. Provided data on solar radiation and the space environment between Mars and Venus.
Nov. 10: Zond 6 (U.S.) moon probe. Unmanned circumlunar flight. On Nov. 17, returned to Earth

1969

Jan. 5: Venera 5 (USSR) Venus probe. On May 16, descent capsule entered Venusian atmosphere and returned 53 minutes of data as it parachuted toward the planet's surface
Jan. 10: Venera 6 (USSR) Venus probe. On May 17, descent capsule entered Venusian atmosphere but did not transmit data.
Feb. 24: Mariner 6 (U.S.) Mars probe. On July 31, passed Mars at a distance of 2,200 mi (3,540 km). Transmitted photographs of the Martian surface.
March 27: Mariner 7 (U.S.) Mars probe. On Aug. 5, flew over the south pole of Mars. Transmitted 126 photographs.
July 13: Luna 15 (USSR) moon probe. Orbited the moon 52 times before crashing onto the surface on July 21.
Aug. 8: Zond 7 (USSR). Unmanned circumlunar flight. Returned to Earth Aug. 14.

1970

Aug. 17: Venera 7 (USSR) Venus probe. On Dec. 15, reached Venus and released an instrumented capsule that parachuted down to the surface. The capsule transmitted data for 23 minutes—the first time that data was received on Earth from the surface of another planet.
Sept. 12: Luna 16 (USSR) moon probe. On Sept. 20, landed on the Sea of Fertility. Drilled 14 in (35 cm) into the surface and extracted a 3.5-oz (109-g) core, which was placed into Luna's upper stage. On Sept. 24, the upper stage returned to Earth.
Oct. 20: Zond 8 (USSR) moon probe. Unmanned circumlunar flight. On Oct. 27, returned to Earth
Nov. 10: Luna 17 (USSR) moon probe. On Nov. 17, landed on the Sea of Rains. Released Lunokhod 1, the first automated moon-roving vehicle, which moved over the lunar surface making observations and telemetering data back to Earth.

1971

May 19: Mars 2 (USSR) Mars probe. First Soviet craft to land on Mars.
May 22: Kosmos 422 (USSR) launched into an orbit around Mars
May 28: Mars 3 (USSR) Mars probe.
May 30: Mariner 9 (USSR) Mars probe. On Nov. 13, entered into an orbit around Mars. Transmitted photographs and data.
Sept. 2: Luna 18 (USSR) moon probe. Completed 54 orbits of the moon. On Sept. 11, impacted on the lunar surface.
Sept. 28: Luna 19 (USSR) moon probe. Entered an orbit around the moon. Photographed the lunar surface

1972

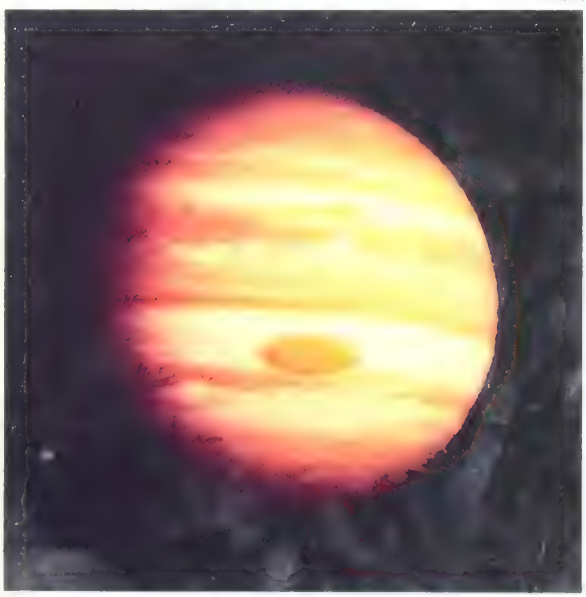
Feb. 14: Luna 20 (USSR) moon probe. On Feb. 21, landed on the Sea of Fertility. Collected lunar rock and soil samples. On Feb. 25, returned to Earth.
March 2: Pioneer 10 (U.S.) launched toward Jupiter and outer space. On Dec. 3, 1973, passed within 81,000 mi (130,000 km) of Jupiter—the first spacecraft to visit the planet Transmitted photographs of Jupiter and several of its moons, and sent back data on the planet's atmosphere and magnetic field. On June 13, 1983, crossed the orbit of Neptune, the most distant planet, becoming the first man-made object to go beyond the solar system.
March 27: Venera B (USSR) launched toward Venus. On July 22, reached Venus and released a descent capsule that landed on the planet's sunlit side—the first daylight landing on Venus. Capsule instruments transmitted data on the atmosphere and the landing site.

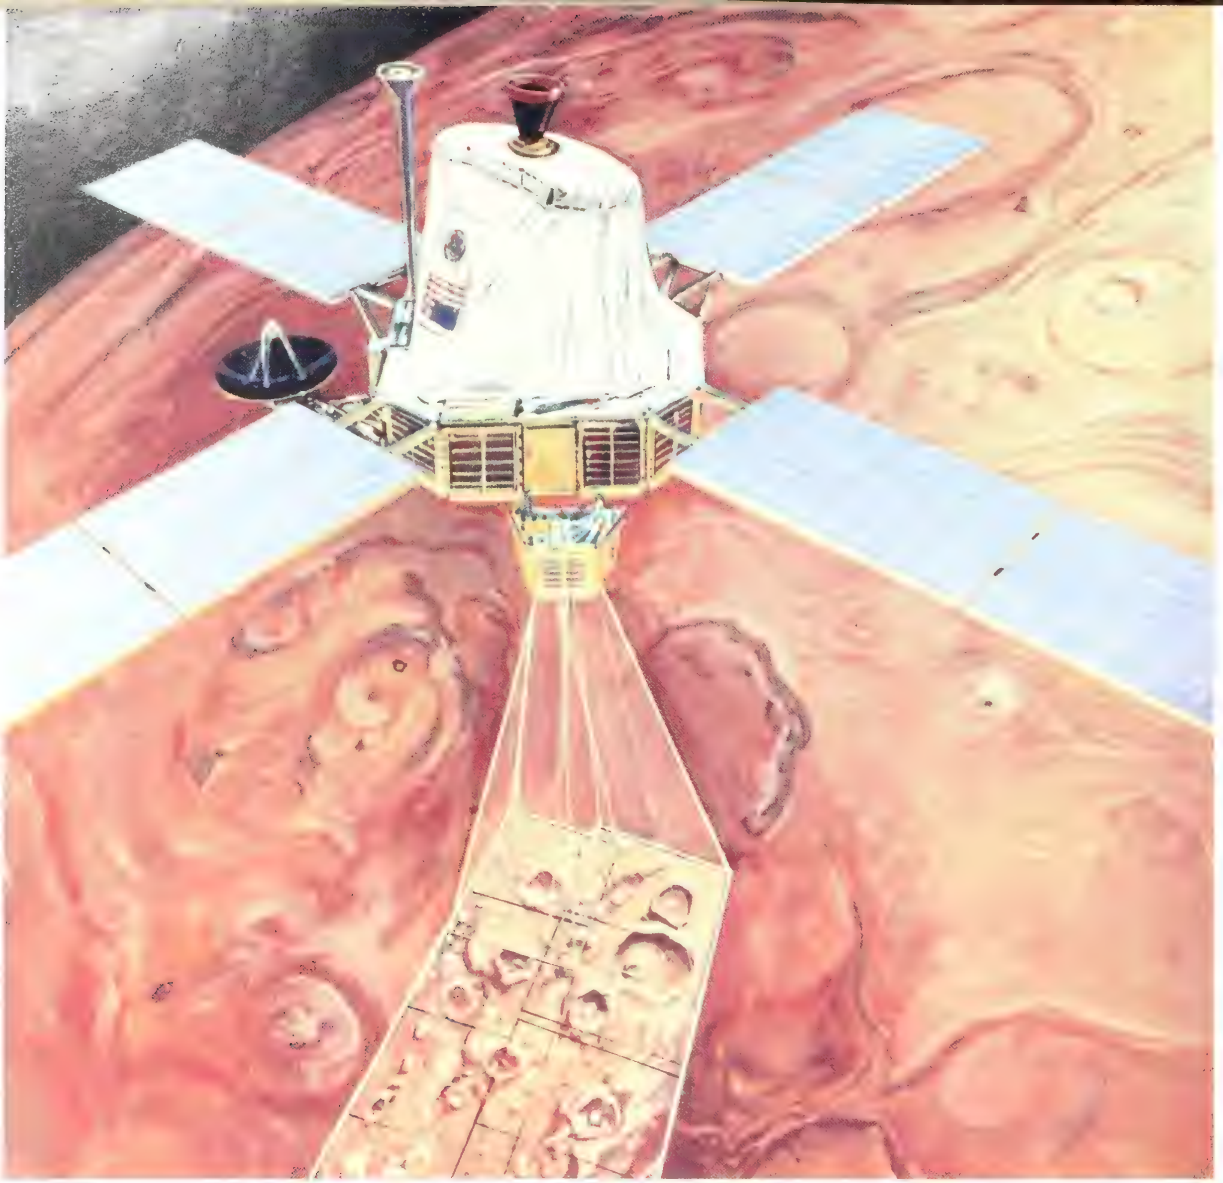
1973

Jan. 8: Luna 21 (USSR) moon probe. On Jan. 16, landed on the moon; unloaded Lunokhod 2 vehicle, which traveled 23 mi (37 km) on the lunar surface during next four months, transmitting pictures and data.
April 5: Pioneer 11 (U.S.). The second probe to the outer planets. On Dec. 2, 1974, flew within 26,600 mi (42,800 km) of Jupiter; transmitted many photographs, including the first pictures of planet's polar regions. On Sept. 1, 1979, made closest approach to Saturn—the first spacecraft to visit the planet; returned photographs and data. Continued on path to escape solar system.
June 10: Explorer 49 (U.S.). Placed in a lunar orbit. Measured galactic and solar radio noise.
July 25: Mars 5 (USSR) Mars probe. Orbited the planet and returned high-resolution photographs.
Nov. 3: Mariner 10 (U.S.) Venus and Mercury probe—the first spacecraft to explore two planets in the course of a mission and the first to reconnoiter with Mercury. On Feb. 5, 1974, flew past Venus at distance of about 3,600 mi (5,800 km); photographed the planet's thick cloud cover. On March 29, 1974, came with 460 mi (740 km) of Mercury; sent back about 2,000 photographs of the innermost planet. On Sept. 21, 1974, and March 16, 1975, made two additional flybys of Mercury.

Photographs of Jupiter taken by Pioneer 10 in 1973 revealed that the Great Red Spot, the planet's most prominent feature, has a "pinwheel" structure

NASA





NASA

Detailed studies of Mars began with the Viking 1 and 2 probes. Here, two television cameras aboard the Viking 1 orbiter scan the planet's surface.

1974

May 29: Luna 22 (USSR) moon probe. In orbit around moon.
Oct. 28: Luna 23 (USSR). Placed in a lunar orbit. Relayed limited data.
Dec. 10: Helios 1 (West Germany; launched by U.S.) solar probe. Obtained data on interplanetary space in the region near the sun.

1975

June 8: Venera 9 (USSR) Venus probe. On Oct. 22, entered an orbit around Venus and landed an instrument-laden capsule on the planet, which during its 53-minute operational life returned data and the first photographs of the planet's surface.
June 14: Venera 10 (USSR) Venus probe. On Oct. 25, entered an orbit around Venus and landed a capsule, which during its 65 minute operational life returned data and photographs.
Aug. 20: Viking 1 (U.S.) Mars orbiter-lander. On July 20, 1976, the lander made a soft landing on Mars. It sent back the first photographs from the planet's surface and much data. On Aug. 7, 1980, the orbiter, which had mapped the Martian surface, was shut off by radio command.
Sept. 9: Viking 2 (U.S.) Mars orbiter-lander. On Sept 3, 1976, the lander made a soft landing on the Martian surface. Mission objectives similar to those for Viking 1.

1976

Jan 15: Helios 2 (West Germany; launched by U.S.). Solar probe. Three of the ten experiments on board were built by the United States and seven by West Germany. These instruments measured solar wind, magnetic fields, solar and galactic cosmic rays, as well as electromagnetic waves.
Aug. 9: Luna 24 (USSR) lunar probe. Landed on the Sea of Crises and collected a core of lunar soil about 6 ft (1.8 m) long. Returned to Earth Aug. 22.

1977

Aug. 20: Voyager 2 (U.S.) probe to the outer planets. On July 9, 1979, reached Jupiter; transmitted photographs and data. On Aug. 25, 1981, flew past Saturn; transmitted more than 18,000 images of Saturn's rings and satellites. On Jan. 24, 1986, flew within 51,000 mi (82,000 km) of Uranus—the first spacecraft to visit the planet; returned photographs and a wealth of new data. The probe was scheduled to visit Neptune in 1989.
Sept. 5: Voyager 1 (U.S.) probe of outer planets. On March 5, 1979, made closest approach to Jupiter; transmitted photographs of the planet and its moons. On Nov. 12, 1980, made closest approach to Saturn; returned photographs and data; discovered unknown rings and moons.

1978

May 20: Pioneer Venus 1 (U.S.) Venus probe. On Dec. 4, placed in orbit around Venus. Returned data on the atmosphere and weather of Venus.

Aug. 8: Pioneer Venus 2 (U.S.) Venus probe. On Dec. 9, entered an orbit around Venus; five payloads entered the planet's atmosphere to measure temperature, chemical composition, and weather conditions.

Sept. 9: Venera 11 (USSR) Venus orbiter. On Dec. 25, deployed a probe that landed on Venus and transmitted data for 95 minutes.

Sept. 14: Venera 12 (USSR) Venus orbiter. On Dec. 21, deployed a probe that descended to the planet's surface transmitting data for 110 minutes.

1981

Oct. 30: Venera 13 (USSR) Venus probe. On March 1, 1982, parachute-landed on the planet's surface. Survived 127 minutes before the planet's intense heat put it out of commission. Radioed back eight photographs and information on water vapor content of the atmosphere. Inert gases of neon, krypton, and possibly xenon also were discovered in an atmosphere that is composed principally of carbon dioxide.

Nov. 4: Venera 14 (USSR) Venus probe. On March 5, 1982, parachute-landed on the planet. Operated for about an hour. Provided spectra obtained from Venusian soil samples.

1983

June 2: Venera 15 (USSR) Venus probe. On Oct. 10, 1983, arrived at Venus. Conducted high-resolution radar-mapping of the planet's surface.

June 7: Venera 16 (USSR) Venus probe. On Oct. 14, 1983, arrived at Venus. Conducted high-resolution radar mapping of the planet's surface.

1984

Dec. 15: Vega 1 (USSR). On June 11, 1985: flew past Venus, deploying a descent module containing a balloon probe and a lander, which gathered data on the planet's atmosphere and soil composition. On March 6, 1986, flew within 5,500 mi (8,850 km) of Comet Halley's core, transmitting the first views of the comet's nucleus.

Dec. 21: Vega 2 (USSR). On June 15, 1985: flew past Venus, deploying a descent module containing a balloon probe and a lander, which gathered data on the planet's atmosphere and soil composition. On March 9, 1986, flew within 5,200 mi (8,360 km) of Comet Halley's nucleus, sending data to Earth on the comet's structure.

1985

Jan 8: Sakigake (Japan) launched toward an encounter with Comet Halley. It flew within 4.3 million mi (6.9 million km) of the comet on March 11, 1986, for an examination of solar winds and magnetic fields.

July 2: Giotto (ESA) probe launched toward an encounter with Comet Halley. On March 14, 1986, came within 335 mi (539 km) of the comet's nucleus, sending back the closest pictures ever taken of the object.

Aug. 19: Suisei (Japan) probe launched toward an encounter with Comet Halley. On March 8, 1986, passed within 94,000 mi (151,000 km) of the comet, transmitting data on the interaction between the solar wind and the comet's enveloping gases.

JPL

Space probes have sent back to Earth a great deal of information about other planets. Venera probes revealed that Venus (*top*), hidden beneath thick clouds that telescopes on Earth cannot penetrate, has a crated surface. Voyagers 1 and 2 discovered previously unknown moons circling Saturn (*middle*) and revealed that this planet has more than 100 rings. Voyager 2 detected unknown moons and a tenth ring around Uranus (*bottom*), and determined that Uranus has a magnetic field that is only about a third the strength of Earth's.

Manned Space Missions

Of all the space missions, the manned one have most captured people's imaginations. Such missions began after unmanned vehicles had helped perfect the necessary technologies and studies had been conducted to determine how to overcome the hazards of weightlessness, radiation, and other perils faced by people in a space environment. (A single date at the beginning of an entry denotes a one-day mission or the date of launch. A combined date, e.g. Dec. 10-March 16, 1968, is the date of the flight. It was launched on Dec. 10, 1967, and concluded on March 16, 1968.)

1961

April 12: Vostok 1 (USSR). Crew: Yuri A. Gagarin—the first person in space. Completed one orbit of Earth. The flight lasted 1 hour 48 minutes.
May 5: Freedom7 (U.S.). Crew: Alan B. Shepard, Jr.—the first American in space. A suborbital flight, lasting 15 minutes.
July 21: Liberty Bell 7 (U.S.). Crew: Virgil I. Grissom. A suborbital flight, lasting 16 minutes
Aug. 6-7: Vostok 2 (USSR). Crew: Gherman S. Titov. The flight lasted 25 hours 18 minutes and completed 17 orbits of Earth.

1962

Feb. 20: Friendship 7 (U.S.). Crew: John H. Glenn, Jr. The first U.S. manned orbital mission. The flight lasted 4 hours 56 minutes and completed three orbits of Earth.
May 24: Aurora 7 (U.S.). Crew: M. Scott Carpenter. Completed three orbits of Earth.
Aug. 11-15: Vostok 3 (USSR). Crew: Andrian G. Nikolayev.
Aug. 12-15: Vostok 4 (USSR). Crew: Pavel R. Popovich. Together with Vostok 3, the first Soviet "group flight." At their closest approach the two craft were about 3 mi (4.8 km) apart.
Oct. 3: Sigma 7 (U.S.). Crew: Walter M. Schirra, Jr. Completed six orbits of Earth.

1963

May 15-16: Faith 7 (U.S.). Crew: L. Gordon Cooper, Jr. The last flight of the Mercury program.
June 14-19: Vostok 5 (USSR). Crew: Valery F. Bykovsky.
June 16-19: Vostok 6 (USSR). Crew: Valentina Tereshkova—the first woman in space. Together with Vostok 5, the second Soviet "group flight." The two craft came within 3 mi (4.8 km) of each other.

1964

Oct. 12-13: Voskhod 1 (USSR). Crew: Vladimir M. Komarov, Konstantin P. Feoktistov, and Boris B. Yegorov. The first craft to carry more than one person into space.

1965

March 18-19: Voskhod 2 (USSR). Crew: Pavel I. Belyayev and Aleksei A. Leonov. Leonov spent ten minutes outside the spacecraft—the first walk in space
March 23: Gemini 3 (U.S.). Crew: Virgil I. Grissom and John W. Young. The first U.S. two-member crew in space.
June 3-7: Gemini 4 (U.S.). Crew: James A. McDivitt and Edward H. White 2d. Secured by umbilical and tether lines, White spent 21 minutes outside the spacecraft—the first American to walk in space
Aug. 21-29: Gemini 5 (U.S.). Crew: L. Gordon Cooper, Jr., and Charles Conrad, Jr. The first use of fuel cells instead of conventional batteries for electric power. Carried out rendezvous maneuvers with a hypothetical target.
Dec. 4-18: Gemini 7 (U.S.). Crew: Frank Borman and James A. Lovell, Jr.
Dec. 15-16: Gemini 6 (U.S.). Crew: Walter M. Schirra, Jr., and Thomas P. Stafford. Rendezvoused within 1 ft. (0.3 m) of Gemini 7.

1966

March 16: Gemini 8 (U.S.). Crew: David R. Scott and Neil A Armstrong. Docked with an unmanned Agena—the first docking in space with a previously launched target vehicle
June 3-6: Gemini 9 (U.S.). Crew: Thomas P. Stafford and Eugene A. Cernan. Rendezvoused with an orbiting Agena. Cernan spent 2 hours 5 minutes outside the spacecraft.
July 18-21: Gemini 10 (U.S.). Crew: Michael Collins and John W. Young. Docked with an orbiting Agena. During extravehicular activity (EVA), Collins retrieved a test package from Agena—the first retrieval of a space object.
Sept. 12-15: Gemini 11 (U.S.). Crew: Charles Conrad, Jr., and Richard F. Gordon, Jr. Docked with an Agena target vehicle Gordon made a brief space walk.
Nov. 11-15: Gemini 12 (U.S.). Crew: James A. Lovell, Jr., and Edwin E. Aldrin, Jr. Docked with an Agena target vehicle. Aldrin spent more than five hours outside the spacecraft.

1967

Jan. 27: Apollo (U.S.). During a check of the ship on the launch pad, a fire destroyed the module and killed the three astronauts on board: Virgil I. Grissom, Edward H. White 2d, and Roger B. Chaffee.
April 23-24: Soyuz 1 (USSR). Crew: Vladimir M. Komarov. Cosmonaut killed in reentry accident—the first actual space fatality.

1968

Oct. 11-22: Apollo 7 (U.S.). Crew: Walter M. Schirra, Jr., Donn F. Eisele, and R. Walter Cunningham. The first flight of the three-person Apollo command module
Oct. 25-28: Soyuz 2 (USSR). Unmanned.
Oct. 26-30: Soyuz 3 (USSR). Crew: Georgi T. Beregovoi. The cosmonaut maneuvered Soyuz 3 to within 650 ft (198 m) of Soyuz 2. Returned to Earth after 64 orbits.
Dec. 21-27: Apollo (U.S.). Crew: Frank Borman, James A. Lovell, Jr., and William A. Anders. The first manned flight around the moon. Completed ten orbits of the moon.

1969

Jan. 14-17: Soyuz 4 (USSR). Crew: Vladimir A. Shatalov.
Jan. 15-18: Soyuz 5 (USSR). Crew: Boris V. Volynov, Aleksei S. Yeliseyev, and Yevgeny V. Khrunov. Docked with Soyuz 4. Yeliseyev and Khrunov transferred to Soyuz 4 and landed with it.
March 3-13: Apollo 9 (U.S.). Crew: James A. McDivitt, David R. Scott, and Russell L. Schweikart. Tested the lunar module.
May 18-26: Apollo 10 (U.S.). Crew: Thomas P. Stafford, Eugene A. Cernan, and John W. Young. Completed 31 orbits of the moon. Descended in the lunar module to within 9 mi (14.5 km) of the moon's surface
July 16-24: Apollo 11 (U.S.). Crew: Neil A. Armstrong, Edwin E. Aldrin, Jr., and Michael Collins. First manned landing on the moon. Armstrong and Aldrin landed on *Mare Tranquillitatis* and on July 20 became the first people to walk on the lunar surface
Oct. 11-16: Soyuz 6 (USSR). Crew: Georgy Shonin and Valery Kubasov. Conducted the first welding experiments in space
Oct. 12-17: Soyuz 7 (USSR). Crew: Anatoly Filipchenko, Vladislav Volkov, and Viktor Gorbatko.

Using a Manned Maneuvering Unit and a life-support system on his back, an astronaut has left the space shuttle to make an untethered spacewalk

NASA from EPG International

Pioneers in the exploration of space. *Above:* Yuri Gagarin, who on April 12, 1961, became the first human being to travel in space when he completed one orbit of Earth aboard Vostok 1. *Top right:* John Glenn, who on Feb. 20, 1962, became the first American to orbit the Earth, piloting Friendship 7. *Bottom right:* Valentina Tereshkova, who on June 16, 1963, became the first woman to fly in space, piloting Vostok 6 for 48 orbits of Earth.

Oct. 13-18: Soyuz 8 (USSR). Crew: V. Shatalov and A. Yeliseyev. Part of a group flight with Soyuz 6 and 7, although the three craft did not dock with one another. Each conducted experiments plus observations of Earth and stars.

Nov. 14-24: Apollo 12 (U.S.). Crew: Charles Conrad, Jr., Richard F. Gordon, Jr., and Alan L. Bean. The second manned lunar landing. Conrad and Bean landed on *Oceanus Procellarum*. They spent a total of 7 hours 39 minutes outside the lunar module, exploring the moon's surface and visiting the Surveyor 3 probe, which landed on the moon April 20, 1967.

Tass/Sovfoto

1970

April 11-17: Apollo 13 (U.S.). Crew: James A. Lovell, Jr., Fred W. Haise, Jr., and John L. Swigert, Jr. The planned lunar landing was aborted after the oxygen tank in the service module ruptured.

June 2-19: Soyuz 9 (USSR). Crew: Andrian G. Nikolayev and Vitaly I. Sevastyanov. The cosmonauts performed space navigation experiments and made Earth and celestial observations. The flight tested people's reactions to long periods of weightlessness.

1971

Jan. 31–Feb. 9: Apollo 14 (U.S.). Crew: Alan B. Shepard, Jr., Stuart A. Roosa, and Edgar D. Mitchell. The third manned lunar landing. Shepard and Mitchell landed on the *Fra Mauro* highlands. They spent two periods outside their craft, for a total of 9 hours 19 minutes.

April 19: Salyut 1 (USSR). First manned space station launched unmanned into an orbit around Earth.

April 23-25: Soyuz 10 (USSR). Crew: Vladimir A. Shatalov, Aleksei S. Yeliseyev, and Nikolai N. Rukavishnikov. Docked with Salyut 1 but did not board the space station.

June 6-30: Soyuz 11 (USSR). Crew: Georgi T. Dobrovolsky, Vladislav N. Volkov, and Viktor I. Patsayev. Docked with Salyut 1 and occupied the space station for 22 days. The crew died as they returned to Earth, when a faulty valve caused cabin decompression.

July 26–Aug. 7: Apollo 15 (U.S.). Crew: David R. Scott, James B. Irwin, and Alfred M. Worden. The fourth manned lunar landing. Scott and Irwin landed on Hadley Rill. They made three exploratory trips, spending a total of 18 hours 37 minutes outside the craft. They used the lunar roving vehicle.

1972

April 16-27: Apollo 16 (U.S.). Crew: John W. Young, Charles M. Duke, Jr., and Thomas K. Mattingly, II. The fifth manned lunar landing. Young and Duke landed in Descartes crater. They made three lunar excursions, spending a total of 20 hours 14 minutes outside their craft. They used the lunar roving vehicle and launched a lunar orbiter.

Dec. 7-19: Apollo 17 (U.S.). Crew: Eugene A. Cernan, Harrison Schmitt, and Ronald E. Evans. The sixth and last U.S. manned lunar landing. Cernan and Schmitt landed in Taurus-Littrow Valley. They made three lunar excursions, spending a total of 22 hours 5 minutes outside their craft.

1973

April 3: Salyut 2 (USSR) space station launched, unmanned. Not visited by any crews.

May 14: Skylab (U.S.). The first U.S. space station, launched unmanned and placed into Earth orbit at an altitude of 271 mi (436 km). On July 11, 1979, entered Earth's atmosphere and broke up over Australia, without causing any injury or damage.

May 25–June 22: Skylab 1 (U.S.). Crew: Charles Conrad, Jr., Joseph P. Kerwin, and Paul J. Weitz. Launched aboard an

Apollo spacecraft and docked with Skylab. Conducted studies of space, sun, and Earth. Tested people's ability to endure long periods in space.

July 28–Sept. 26: Skylab 2 (U.S.). Crew: Alan L. Bean, Jack R. Lousma, and Owen K. Garriott. Launched aboard an Apollo spacecraft and docked with Skylab. Conducted photographic surveys of Earth's surface. During a 6 hour 31 minute space walk, Lousma and Garriott erected a sunshade on Skylab and loaded new film in the solar telescope cameras.

Sept. 27-29: Soyuz 12 (USSR). Crew: Vasily Lazarev and Oleg Makarov. Test of an improved Soyuz craft, in which chemical batteries replaced solar cell arrays found on earlier models.

Nov. 16–Feb. 8, 1974: Skylab 3 (U.S.). Crew: Gerald P. Carr, Edward G. Gibson, and William R. Pogue. Launched in an Apollo spacecraft and docked with Skylab. Conducted extensive studies of Earth and sun. Photographed comet Kohoutek.

Dec. 18-26: Soyuz 13 (USSR). Crew: Pyotr Klimuk and Valentin Lebedev. Tested experiments related to the Salyut program.

1974

June 24: Salyut 3 (USSR) space station launched, unmanned.

July 3-19: Soyuz 14 (USSR). Crew: Pavel Popovich and Yuri Artyukhin. Docked with Salyut 3. Performed wide range of experiments.

Aug. 26-28: Soyuz 15 (USSR). Crew: Gennady Sarafanov and Lev Demin. Attempt to dock with Salyut 3 failed because of fault in automatic control system.

Dec. 2-8: Soyuz 16 (USSR). Crew: Anatoly V. Filipchenko and Nikolai N. Rukavishnikov. Tested docking system of Soyuz and reduction of cabin pressure as required for future joint docking experiment with Apollo.

Dec. 26: Salyut 4 (USSR) space station launched, unmanned.

1975

Jan. 11–Feb. 9: Soyuz 17 (USSR). Crew: Aleksei Gubarev and Georgi Grechko. Docked with Salyut 4. Conducted medical tests and observations of Earth's atmosphere and surface, as well as research into space.

May 24–July 26: Soyuz 18 (USSR). Crew: Pyotr Klimuk and Vitaly Sevastyanov. Docked with Salyut 4. Conducted various astronomical studies, surveyed the USSR, and tended a small space greenhouse.

July 15-24: Apollo (U.S.). Crew: Thomas P. Stafford, Donald K. Slayton, and Vance D. Brand. Together with Soyuz 19, launched on the same date, the first cooperative international space flight. The craft linked up for two days, during which the crews visited one another and conducted a series of experiments. (The last Apollo mission and last U.S. manned mission until April 1981.)

July 15-21: Soyuz 19 (USSR). Crew: Aleksei A. Leonov and Valery N. Kubasov. Two-day linkup with Apollo launched on same date.

Nov. 17–Feb. 19, 1976: Soyuz 20 (USSR). Unmanned mission. Docked with Salyut 4. Test of a resupply and rescue system needed for the development of permanent space stations.

1976

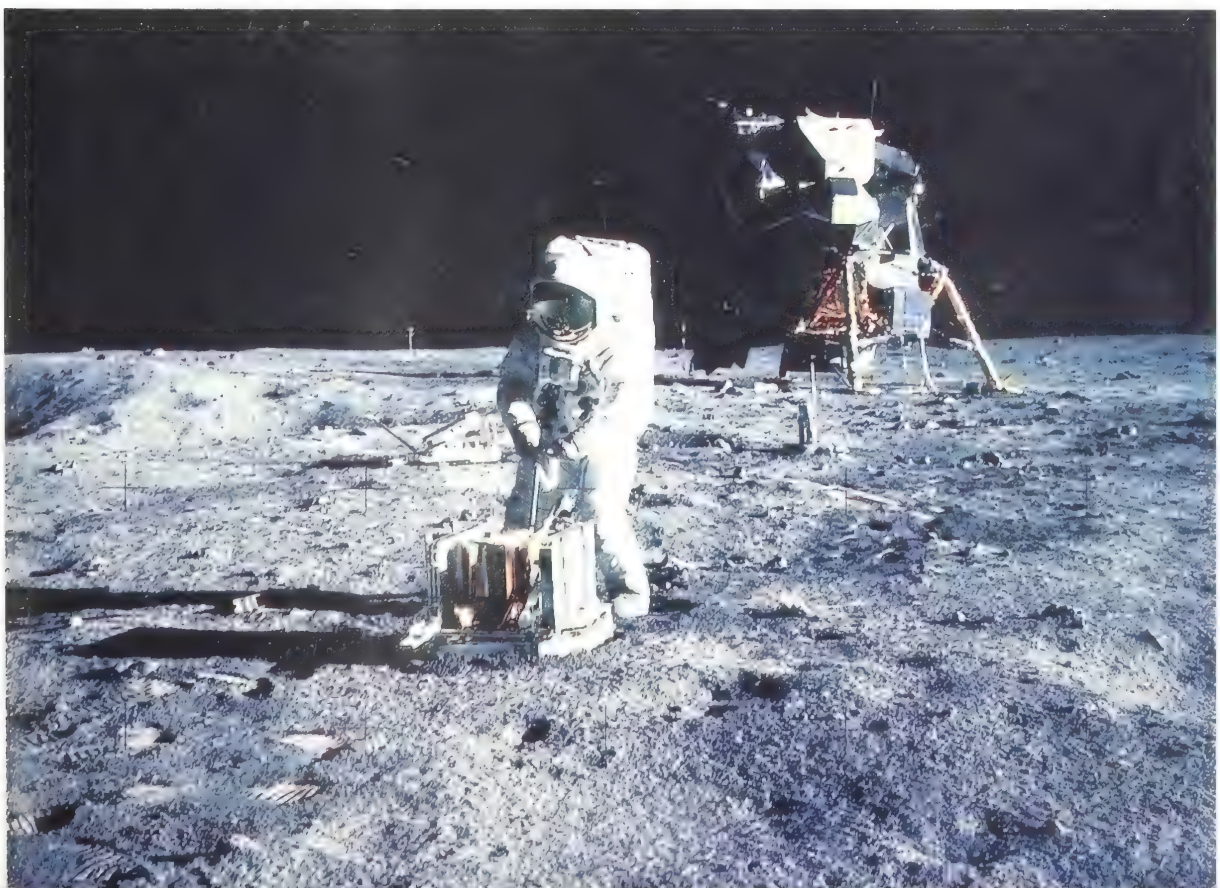
June 22: Salyut 5 (USSR) space station launched, unmanned, into orbit.

July 6–Aug. 24: Soyuz 21 (USSR). Crew: Boris Volynov and Vitaly Zholobov. Conducted geographical and meteorological studies and various scientific experiments.

Sept. 15-23: Soyuz 22 (USSR). Crew: Valery F. Bykovsky and Vladimir Aksenov. Carried out a photographic survey of Earth.

In 1969 humans first walked on the moon. During their 2½-hour walk on the surface, Edwin Aldrin (*below*) and Neil Armstrong (photographer) collected rocks and soil samples and set up a series of instruments to relay scientific data to Earth

NASA



Oct. 14-16: **Soyuz 23** (USSR). Crew: Vyacheslav Zudov and Valery Rozhdestvensky. A malfunction prevented the craft from docking with Salyut 5. An emergency landing was made.

1977

Feb. 7-25: Soyuz 24 (USSR). Crew: Viktor Gorbatko and Yuri Glazkov. Docked with Salyut 5. Conducted research on the effects of weightlessness. Carried out extensive photographic studies of Earth.

Sept. 29: Salyut 6 (USSR). space station launched, unmanned, into orbit. During its nearly five years in orbit, 17 manned craft docked with Salyut 6.

Oct. 9-11: Soyuz 25 (USSR). Crew: Vladimir Kovalenok and Valery Ryumin. Attempt to dock with Salyut 6 failed.

Dec. 10–March 16, 1978: Soyuz 26 (USSR). Crew: Yuri Romanenko and Georgi M. Grechko. First ship to dock with Salyut 6. Conducted numerous experiments. Hosted two groups of visiting cosmonauts; employed the first resupply of a space station by an unmanned tanker/transport spacecraft, Progress 1. Crew returned to Earth in Soyuz 27.

1978

Jan. 10-16: Soyuz 27 (USSR). Crew: Vladimir Dzhanibekov and Oleg Makarov. Docked with Salyut 6/Soyuz 26 complex—the first time that two spacecraft were simultaneously docked with a space station. Crew returned to Earth in Soyuz 26.

Each Apollo mission ended with an ocean landing of the command module Large parachutes slowed the module's speed for a gentle "splashdown

Photos, NASA

March 2-10: Soyuz 28 (USSR). Crew: Aleksei A. Gubarev and Vladimir Remek (Czechoslovakia). Docked with Salyut 6/Soyuz 27 complex.

June 15–Nov. 2: Soyuz 29 (USSR). Vladimir Kovalenok and Alexandr Ivanchenkov. Docked with Salyut 6. Performed experiments in biology, physics, and technology. Hosted two visiting pairs of cosmonauts. Resupplied by three Progress tanker/transport vehicles.

June 27–July 5: Soyuz 30 (USSR). Crew: Pyotr Klimuk and Miroslaw Hermaszewski (Poland). Docked with Salyut 6/Soyuz 29 complex.

Aug. 26–Sept. 3: Soyuz 31 (USSR). Crew: Valery Bykovsky and Sigmund Jaehn (East Germany). Docked with Salyut 6/Soyuz 29 complex.

1979

Feb. 26–Aug. 19: Soyuz 32 (USSR). Crew: Vladimir Lyakhov and Valery Ryumin. Docked with Salyut 6. Performed scientific research. Resupplied by Progress 5, 6, and 7. Progress 5 also boosted the Salyut 6/Soyuz 32 complex into a higher orbit. Crew returned aboard Soyuz 34, launched unmanned on June 6.

April 10-12: Soyuz 33 (USSR). Crew: Nikolai Rukavishnikov and Georgi Ivanov (Bulgaria). The craft's docking mechanism failed and it returned to Earth rather than link up with Salyut 6.

Dec. 16: Soyuz T-1 (USSR). Unmanned. Test flight of new generation of manned spacecraft. Docked with Salyut 6.

1980

April 9–Oct. 11:Soyuz 35 (USSR). Crew: Valery Ryumin and Leonid Popov. Docked with Salyut 6. Hosted four visiting pairs of cosmonauts. Crew returned aboard Soyuz 37.

May 26–June 3: Soyuz 36 (USSR). Crew: Valery Kubasov and Bertalan Farkas (Hungary). Docked with Salyut 6/Soyuz 35 complex. Crew returned aboard Soyuz 35.

June 5-9: Soyuz T-2 (USSR). The first manned flight of a new generation of manned space ship. Crew: Yuri Malyshev and Vladimir Aksenov. Docked with Salyut 6/Soyuz 36 complex.

July 23-31: Soyuz 37 (USSR). Crew: Viktor Gorbatko and Pham Tuan (Vietnam). Docked with Salyut 6/Soyuz 36 complex. Crew returned in Soyuz 36.

Sept. 18-26: Soyuz 38 (USSR). Crew: Yuri Romanenko and Arnaldo Tamayo Mendez (Cuba). Docked with Salyut 6.

Nov. 27–Dec. 10: Soyuz T-3 (USSR). Crew: Leonid Kizim, Oleg Makarov, and Gennady Strekalov. Docked with Salyut 6. Made repairs to Salyut 6 to extend its life.

1981

March 12–May 26: Soyuz T-4 (USSR). Crew: Vladimir Kovalenok and Viktor Savinykh. Docked with Salyut 6. Conducted a wide range of experiments and did repair work. Hosted two visiting groups of cosmonauts.

March 22-30: Soyuz 39 (USSR). Crew: Vladimir Dzhanibekov and Jugderdemidiyn Gurragcha (Mongolia). Docked with Salyut 6/Soyuz T-4 complex.

April 12-14, Space Transportation System 1 (STS-1): *Columbia* (U.S.). The first test flight of the first reusable space shuttle. Crew: John W. Young and Robert L. Crippen. Like all succeeding shuttle missions, *Columbia* lifted off from a launchpad but landed on a runway like a conventional airplane.

May 14-22: Soyuz 40 (USSR). Crew: Leonid Popov and Dumitru Prunariu (Rumania). Docked with Salyut 6/Soyuz T-4 complex.

Nov. 12-14, STS-2: *Columbia* (U.S.). Crew: Joe H. Engle and Richard H. Truly. Conducted tests of the shuttle's mechanical arm, which would be used to launch and retrieve satellites.

1982

March 22-30, STS-3: *Columbia* (U.S.). Crew: Jack R. Lousma and C. Gordon Fullerton. Tested the vehicle's ability to withstand the extreme temperatures of space.

April 19: Salyut 7 (USSR) space station launched, unmanned, to an altitude of 186 mi (300 km)

May 13–Dec. 10: Soyuz T-5 (USSR). Crew: Anatoly Berezovoy and Valentin Lebedev. Docked with Salyut 7. Conducted a variety of experiments. Hosted two groups of visiting cosmonauts. Crew returned aboard Soyuz T-7.

June 27–July 4, STS-4: *Columbia* (U.S.). Crew: Thomas K Mattingly II and Henry Hartsfield, Jr. The final test flight of the shuttle. Carried a secret military payload. Landed at Edwards Air Force Base, California, the first shuttle landing on a hard-surface runway.

June 24–July 2: Soyuz T-6 (USSR). Crew: Vladimir Dzhanibekov, Aleksandr Ivanchenkov, and Jean-Loup Chrétien (France). Docked with Salyut 7/Soyuz T-5 complex.

Aug. 19-27: Soyuz T-7 (USSR). Crew: Leonid Popov, Aleksandr Serebrov, and Svetlana Savitskaya (the second woman in space). Docked with Salyut 7/Soyuz T-5 complex. Crew returned aboard Soyuz T-5.

Nov. 11-16, STS-5: *Columbia* (U.S.). Crew: Vance Brand, Robert Overmyer, William Lenoir, and Joseph Allen. Launched two communications satellites—the first deployment of satellites by the shuttle.

1983

April 4-9, STS-6: *Challenger* (U.S.). Maiden flight of the second American space shuttle. Crew: Paul Weitz, Karol Bobko, Story Musgrave, and Donald Peterson. Two crew members took a space walk, the first U.S. extravehicular activity since 1972.

April 21: Soyuz T-8 (USSR). Crew: Vladimir Titov, Aleksandr Serebrov, and Gennady Strekalov. The mission was aborted when the ship's rendezvous radar failed to deploy, preventing docking with Salyut 7.

June 18-24, STS-7: *Challenger* (U.S.). Crew: Robert L. Crippen, John M. Fabian, Frederick H. Hauck, Norman E. Thagard, and Sally K. Ride (the first American woman in space). Launched two communications satellites and tested the shuttle's 50-ft. (15-m) robotic arm.

June 27–Nov. 23: Soyuz T-9 (USSR). Crew: Vladimir Lyakhov and Aleksandr Aleksandrov. Docked with Salyut 7 Conducted a series of scientific and technical experiments, including materials processing, Earth observations, and medical and biological studies.

Aug. 30–Sept. 5, STS-8: *Challenger* (U.S.). Crew: Daniel C. Brandenstein, Dale A. Gardner, William E. Thornton, Richard H. Truly, and Guion S. Bluford, Jr. Launched a weather and communications satellite. Conducted further tests of the shuttle's robotic arm.

Sept. 27: Soyuz (USSR). Crew: Vladimir Titov and Gennady Strekalov. The crew was saved by an emergency escape system seconds before the SL-4 booster rocket exploded on the launchpad.

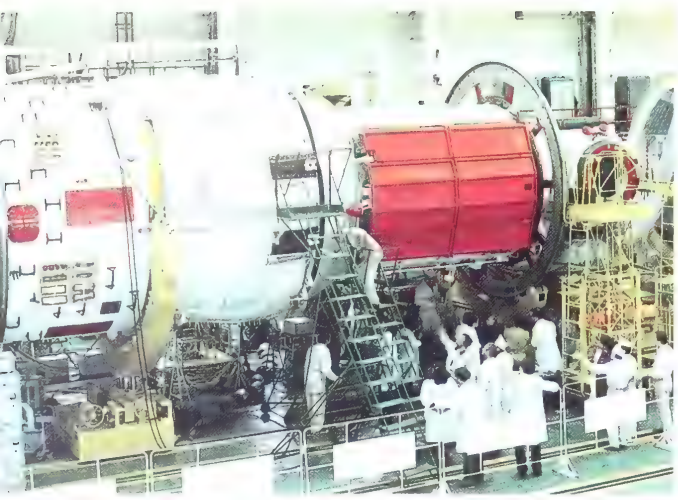
Nov. 28–Dec. 8, STS-9: *Columbia* (U.S.). Crew: Owen K. Garriott, Byron K. Lichtenberg, Robert A. Parker, Brewster H. Shaw, John W. Young, and Ulf Merbold (West Germany). The first use of Spacelab, a research facility developed by ESA

1984

Feb. 3-11, STS-10: *Challenger* (U.S.). Crew: Vance D. Brand, Robert L. Gibson, Bruce McCandless II, Ronald E. McNair, and Robert L. Stewart. The first use of jet-propelled backpacks known as Manned Maneuvering Units, which allow astronauts to make untethered spacewalks.

Feb. 9–Oct. 2: Soyuz T-10 (USSR). Crew: Leonid Kizim, Oleg Atkov, Vladimir Solovyov. Docked with Salyut 7. Performed five extravehicular activities to repair the Salyut propulsion system. Hosted two groups of visiting cosmonauts Crew returned to Earth aboard Soyuz T-11

The space shuttle can be launched into Earth orbit, then fly back to a conventional landing on a runway. It has three main parts: two solid-fuel rocket boosters, a large external fuel tank, and a piloted delta-wing orbiter



Space stations, such as Mir (seen prior to launch in the assembly and testing shop), enable people to work in space for weeks or months at a time.

April 3-11: Soyuz T-11 (USSR). Crew: Gennady Strekalov, Yuri Malyshev, Rakesh Sharma (India). Docked with Salyut 7/Soyuz T-10 complex. Crew returned to Earth aboard Soyuz T-10.

April 6-13, STS-11: *Challenger* (U.S.). Crew: Robert L. Crippen, Terry J. Hart, George D. Nelson, Francis R. Scobee, James D. van Hoften. Retrieved and repaired Solar Max, a satellite launched in Feb. 1980 to study the sun's outer surface. Deployed the Long Duration Exposure Facility, a satellite carrying 57 materials-processing experiments.

July 17-29: Soyuz T-12 (USSR). Crew: Vladimir Dzhanibekov, Igor Volk, and Svetlana Savitskaya. Docked with Salyut 7/Soyuz T-11 complex. Savitskaya performed the first spacewalk by a woman.

Aug. 30–Sept. 5, STS-12: *Discovery* (U.S.). Maiden flight of the third American space shuttle. Crew: Henry W. Hartsfield, Jr., Michael L. Coats, Steven A. Hawley, Richard M. Mullane, Judith A. Resnik, and Charles D. Walker. Launched three communications satellites.

Oct. 5-13, STS-13: *Challenger* (U.S.). Crew: Robert L. Crippen, David C. Leestma, Jon A. McBride, Sally K. Ride, Paul Scully Power, Kathryn D. Sullivan, and Mark Garneau (Canada). Sullivan became the first American woman to walk

Nov. 8-16, STS-14: *Discovery* (U.S.). Crew: Frederick H. Hauck, Joseph P. Allen, Dale A. Gardner, David M. Walker, [illegible] Anna L. Fisher. Retrieved and brought back to Earth two communications satellites that had misfired into useless orbits [illegible] STS-51.

[illegible] STS-15: *Discovery* (U.S.). Crew: James F. Buchli, [illegible] Mattingly II, Ellison S. Onizuka, Gary E. Payton, [illegible] Shriver. The first shuttle mission devoted [illegible] secret military objectives. It was believed to [illegible]

[illegible] 61: *Discovery* (U.S.). Crew: Karol J. Bobko, [illegible] M. Rhea Seddon, [illegible] Donald E. Williams, and Sen. Jake Garn [illegible] of Congress to participate in a space [illegible] munications satellites were deployed. One, [illegible], and efforts to repair it were

[illegible] STS-[illegible] *Challenger* (U.S.). Crew: Frederick [illegible] Dr[illegible] and Robert F. Overmyer, Norman [illegible] Wat[illegible] Lodewijk van den Berg, and Taylor G. Wang. Conducted investigations in crystal growth, materials and fluid processing, and weightlessness.

June 7-Sept. 26: Soyuz T-13 (USSR). Crew: Vladimir Dzhanibekov and Viktor Savinykh. Manually docked with Salyut 7, which had lost all its electrical power by the beginning of 1985. The men spent ten days repairing and reactivating the space station. On August 2, using equipment carried up by an unmanned Progress 24 on June 21, the men installed additional solar panels on Salyut 7.

June 17-24, STS-18: *Discovery* (U.S.). Crew: Daniel C. Brandenstein, John O. Creighton, John M. Fabian, Shannon W. Lucid, Steven R. Nagel, Patrick Baudry (France), and Sultan Salman al-Saud (Saudi Arabia). Three communications satellites and the Spartan payload carrier for studies of galactic X-ray emissions were deployed; the latter was subsequently retrieved and carried back to Earth.

July 29–Aug. 6, STS-19: *Challenger* (U.S.). Crew: Loren W. Acton, John-David F. Bartoe, Roy D. Bridges, Jr., Anthony W. England, C. Gordon Fullerton, Karl G. Henize, and F. Story Musgrave. Conducted a series of astronomical observations using Spacelab's experiment mounting structure to carry several large telescopes.

Aug. 27–Sept. 3, STS-20: *Discovery* (U.S.). Crew: Richard O. Covey, Joe H. Engle, William F. Fisher, John M. Lounge, and James D. van Hoften. Three communications satellites were deployed. The mission's primary accomplishment was the capture, repair, and redeployment of Leasat-3, a communications satellite that failed to activate when launched by STS-16.

Sept. 17–Nov. 21: Soyuz T-14 (USSR). Crew: Georgi Grechko, Vladimir Vasyutin, and Alexander Volkov. Docked with Salyut 7/Soyuz T-13 complex. On Sept. 26, Grechko and Dzhanibekov returned to Earth aboard Soyuz T-13—the first in-flight rotation of space crews. On Sept. 27, a new unmanned module docked to Salyut 7, nearly doubling the station's size. On Nov. 21, Vasyutin became ill and the three cosmonauts returned to Earth in Soyuz T-14.

Oct. 3-7, STS-21: *Atlantis* (U.S.). Maiden flight of the fourth American space shuttle. Crew: Karol J. Bobko, Ronald J. Grabe, David C. Hilmers, William A. Pailes, and Robert C. Stewart. A secret mission, it was believed to have deployed two Department of Defense communications satellites.

Oct. 30–Nov. 6, STS-22: *Challenger* (U.S.). Crew: Guion S. Bluford, Jr., James F. Buchli, Bonnie J. Dunbar, Henry W. Hartsfield, Jr., Steven R. Nagel, Reinhard Furrer (W. Germany), Ernst Messerschmid (W. Germany), and Wubbo Ockels (Netherlands). A scientific mission directed by West Germany—the first shuttle mission paid for and dedicated to a payload provided by another nation. Investigations focused on microgravity research, communications, and navigation.

Nov. 26–Dec. 3, STS-23: *Atlantis* (U.S.). Crew: Mary L. Cleave, Bryan D. O'Connor, Jerry L. Ross, Brewster H. Shaw, Jr., Sherwood C. Spring, Charles D. Walker, and Rodolfo Neri (Mexico). Three communications satellites were launched and construction methods designed to be used in building a space station were tested.

1986

Jan. 12-18, STS-24: *Columbia* (U.S.). Crew: Robert L. Gibson, Steven A. Hawley, Robert J. Cenker, Charles F. Bolden Jr., George D. Nelson, Franklin R. Chang-Diaz, and Rep. Bill Nelson of Florida. A communications satellite was launched and various scientific experiments were performed.

Jan. 28: *Challenger* (U.S.). Exploded seconds after liftoff, killing the crew: Francis R. Scobee, Michael J. Smith, Judith Resnik, Ellison S. Onizuka, Ronald E. McNair, Gregory B. Jarvis, and Christa McAuliffe, a Concord, NH, high-school teacher. Subsequent investigation indicated the accident was caused by the rupture of seals on the booster rockets.

Feb. 20: Mir (USSR). space station launched, unmanned, into a slightly elliptical orbit at an altitude of 210 mi (338 km).

March 13–July 16: Soyuz T-15 (USSR). Crew: Leonid Kizim and Vladimir Solovyov. Docked with Mir. On May 5, the cosmonauts flew to Salyut 7 in Soyuz T-15, the first transfer of crew from one space station to another. Various activities of the crew were televised live during the mission.

INVESTMENT AND MONETARY GLOSSARY

ADR American Depository Receipt. This receipt is issued by various American banks for shares of a stock in a foreign company. The stock certificates are deposited by the bank and the **ADR's** are traded in their place.

ANNUITY A contract with an insurance company to pay you a fixed amount periodically (monthly, yearly, etc.) over a given period of time or for life.

ARBITRAGE The purchase of an asset in one market accompanied by a simultaneous sale of the same (or a similar asset in a different market, to take advantage of differences in price. The arbitrage principle can be applied to simultaneous buying and selling of related currencies, commodities, or securities, the same commodity with different delivery dates, etc.

BALANCE OF PAYMENTS A nation's exports less its imports.

BANKNOTE A unit of currency in paper form, as opposed to a bank deposit.

BANKNOTE A unit of currency in paper form, as opposed to a bank deposit.

BARTER The trading of one commodity for another; in modern usage, any exchange that doesn't involve the use of money or money substitutes.

BID PRICE The price at which a dealer or trader offers to buy.

BLACK MARKET A free market operating without the government's legal sanction.

BULLION Refined bars of gold or silver.

BULL MARKET OR BULLISH When prices are going up in value, or are expected to.

CALL OPTION The right to buy a given asset at a fixed price any time to a specified date.

CARRYING CHARGES In futures trading, the difference between the spot price and a future price—usually equal to the cost of interest and storage for the period of time involved.

CASH:(1)Money substitutes in paper form. (2) The absence of credit.

CENTRAL BANK An agency created by a government to issue its currency and to supervise the nation's banking system.

CERTIFICATE OF DEPOSIT A deposit with a fixed time period and a fixed rate of interest.

COIN Real money (gold or silver) transformed into a recognizable shape and weight in order to facilitate exchange.

CONSERVATIVE Involving a minimum of risk.

CONTENT The metal in a coin or token.

CONVERTIBILITY The metal in a coin or token.

CONVERTIBILITY The ability to receive gold in exchange for currency, at a stated rate of exchange, from the agency that issued the currency.

CURRENCY Correctly, receipts for real money in storage; in modern practice, any money substitutes in use—even if not backed by real money (synonymous with *paper money*)

CURRENT ACCOUNT A bank deposit that can be withdrawn by the depositor at any time.

DEFLATION A decrease in the amount of money substitutes that have been issued in excess of the real money in storage. (The opposite of *inflation*).

DEMAND DEPOSIT A bank deposit that can be withdrawn by the depositor at any time.

DEPOSIT ACCOUNT A bank deposit in which interest is earned and withrawals are limited.

DEPRESSION A period during which most people are no longer able to maintain their previous standards of living. It is caused by the General Market's attempts to cleanse itself of the misguided uses of resources that have been encouraged by government intervention to productive activity more desired by consumers.

DEVALUATION Repudiation of the government's promise to redeem its money substitutes at the stated rate of exchange, causing a new rate for convertibility.

DIRTY FLOAT A period during which the government intervenes in the foreign exchange market while claiming that it isn't. (See also *floating exchanges rates* and *fixed exchange rates.*)

DOWNSIDE RISK The possible depth to which the price of an investment can drop.

ECONOMICS The study that seeks to allocate limited resources in ways that will provide maximum happiness (whether on a personal, commercial, national, or international scale); the art of making decisions.

ENTREPRENEUR An individual who forecasts future demand for a product or service and arranges a business enterprise to respond to that demand.

EQUITY The value of an investment after deduction of all claims against it— loan amount, interest, commissions, and any other fees.

EUROCURRENCY Currency that is circulating outside the nation where it was issued

EXCHANGE CONTROLS Governmental regulations limiting or prohibiting the exporting or importing of currencies.

EXCHANGE RATE The price of a currency as expressed in units of another currency. (Synonymous with *foreign exchange rate.*)

FACE VALUE The legal tender value of a coin, toke, or banknote. On bonds, the amount that will be paid to the holder at maturity.

FIAT MONEY The extent to which bullion is pure gold or silver to back it with.

FINESS The extent to which bullion is pure gold or silver, expressed as a decimal of the total gross weight involved. For example, gold bullion of .995 fineness means that 99.5% of the total weight is pure gold.

FIXED DEPOSIT ACCOUNT A bank deposit for a fixed period of time.

FIXED EXCHANGE RATES Currency exchange rates that are prevented from fluctuating by governmental purchases and sales of the currencies involved.

FLOATING EXCHANGE RATES Currency exchange rates that fluctuate freely because governments are *not* stabilizing the rates through purchases and sales. (See *dirty float* and *fixed exchange rates.*)

FLUCTUATION A change in price—upward or downward.

FOREIGN EXCHANGE RATE The price of a currency as expressed in units of another currency. (Synonymous with *exchange rate.*)

FRACTIONAL RESERVE BANKING A banking system in which money that is payable upon demand to depositors is lent to others by the bank; in other words, a system in which the bank doesn't maintain 100% reserves against demand deposits.

FREE MARKET A market free of governmental intervention.

FUTURES CONTRACT a contract for delivery of a commodity or currency in the future at a price determined in the present.

GAP A condition created on a price graph when the prices for one day's trading do not overlap the previous day's range.

GOVERNMENT The institution of greatest economic, political, and police power in a given area.

GRAM Used in gold weights; there are 31.1042 grams to a troy ounce; one gram = .03215 troy ounces. A kilogram is 1,000 grams; there are 1,000 milligrams to a gram.

HARD MONEY Silver and gold.

INCOME (INVESTMENT) Dividends or interest received from an investment.

INCONVERTIBILITY The inability to receive gold in exchange for currency from the agency that issued the currency.

INFLATION An increase in money substitutes above the stored stock of real money, the counterfeiting of money receipts.

INFLATIONARY DEPRESSION A depression within a period of inflation.

LEGAL TENDER A form of money that an individual is legally required to accept in payment of debts.

LEVERAGE In investments, the ability to purchase more than a monetary investment could purchase on a cash basis.

LIQUIDATION: Normally, the sale of an investment. With regard to depressions, *liquidation* refers to the acceptance of losses and the closing of businesses that existed only because of the miscalculations caused by inflation.

LIQUIDITY The availability of spending money.

LONG The expectation that a price will go up; buying before selling. (See also *short*).

LOT In gold coins, the basic unit of trading. A lot contains 100 British sovereigns, 30 Mexican 50-peso pieces, or 20 U.S. double eagles.

MARGIN In a margin account, the amount of one's equity expressed as a percentage of the total current market value of the investment; also, it can refer to the amount of cash equity.

MARGIN ACCOUNT An investment account in which the investment purchase is increased by borrowing money and using the investment as collateral.

MARGIN CALL In a margin account, a request by the lender for the borrower to make a payment on his loan.

MARGIN SALE A sale forced by margin call conditions.

MARKET (1) A group of transactions integrated by geography or items traded. (2) An opportunity to exchange.

MARKET-MAKER A *dealer* who continually offers to buy and sell a given investment.

MARKETABLE Salable in liquid market. (See also *Liquidity.*)

MATURITY The date on which a contractual obligation such as repayment of a bond) falls due.

MONETARY INFLATION An increase in the *money supply.*

MONEY An asset that is generally accepted in exchange with the intention of trading it for something else; normally, usage is confined to gold, bank notes, bank deposits, coins, or tokens.

MONEY MARKET FUND A *mutual fund* that invests only in short-term interest-earning securities.

MONEY MARKET PAPER Easily marketable short-term notes and bills carrying little risk of default.

MONEY SUPPLY Currency held outside of the commercial marketplace.

OPTION The privilege to buy or sell something at a specific price within a specified time.

OUT OF THE MONEY For an *option* (or a *warrant*), the condition that exists when the price of the *underlying investment* is lower than the striking price of the option.

PAR (1) See *Par value.* (2) Equal in value.

PAR VALUE The nominal or face value of a security or currency. (A currency is often referred to as being at par value when it is trading at the price announced as official by the government.)

PERMANENT PORTFOLIO An assortment of ivestments that remains unchanged from year to year.

PORTFOLIO An assortment of investments held by an individual or company.

POWER OF ATTORNEY *Signature authority.*

PREMIUM (1) The amount by which a security is priced above its *face value, book value,* or inherent value. (2) The amount by which the *forward price* exceeds the *spot price.*

PRIME RATE The interest rate charged by commercial banks to their best customers.

PUBLIC MARKET An investment market in which most relevant information is publicly available.

PUBLICLY TRADED INVESTMENT FUND A *closed-end investment company.*

PURCHASING POWER The value of a unit of money or other asset, measured by the quantity of goods and services it will purchase.

PURCHASING POWER PARITY The exchange rate at which a country's price level is equivalent to price levels in other countries.

PURCHASING POWER PARITY THEORY The system of currency forecasting that maintains that exchange rates will gravitate toward their *purchasing power parities.*

PUT OPTION The right to sell a given asset at a fixed price any time prior to a specified date.

RATIO SCALE On a graph drawn to a ratio scale, a given percentage change in value will cover the same vertical distance, no matter at what level it occurs—so that the significance of the change is graphically illustrated. On a *linear scale,* a given absolute change will cover the same vertical distance, no matter at what level it occurs.

REDEMPTION The repurchase of a security by by its issuer.

RESERVE An allocation of capital for possbile losses or to meet a statutory requirement.

RESISTANCE LEVEL An investment price level at which an unusually large volume of selling is expected.

RESTRIKE A coin that was minted after the date marked, but is otherwise genuine.

RUNAWAY INFLATION A period of intense inflation in which vast "paper money" increases cause all retail prices to zoom upward. During this inflationary period prices can increase daily. As bad as inflation is today (1981), we are not yet in a true state of runaway inflation.

SHORT The expectation that a price will drop; the sale of a commodity the seller doesn't own, with the exception of buying the commodity at a lower price later. (See also *long.*)

SPECIAL DRAWING RIGHTS (SDRs) A currency issued by the International Monetary Fund, used only by governments in place of gold as a monetary reserve.

SPECIE Gold or silver.

SPECULATIVE Involving more than a minimum of risk.

SPOT PRICE The price charged in a sale made for delivery today—as opposed to a price quoted for future delivery.

SUBSIDY Payment to an individual or a company by other than a customer or investor; or a purchase at a price higher than the market price; or a loan that doesn't carry a rate of interest commensurate with normal marketplace interest for the risk involved.

SWAPS An arrangement by which one government borrows another government's currency in order to buy its own currency in the marketplace—in order to keep its own currency from sinking in price.

TAX Property coercively taken from its owner by a government.

TAX HAVEN A country where government offers tax advantages to foreigners. Usually in the hopes that wealthy foreigners will come and help boost the economy.

TECHNICAL ANALYSIS A system, usually related to the stock market, in which supply and demand factors are considered.

TECHNOLOGY The increase of productive output from a given unit of human effort—through the use of machines or improved skills.

TERM INSURSANCE Insurance in which the benefits are payable only upon the death of the insured.

TIME DEPOSIT A bank deposit that isn't payable on demand.

TOKEN A money substitute in metallic form (includes gold and silver if the legal tender face value of the token is considerably above the market value of the gold or silver content).

TON, METRIC See *Gram.*

TRADE BALANCE A nation's product exports less its product imports. (See also *Balance of payments* and *Current account.*)

TRADING Buying and/or selling.

TREND A persistent movement in one direction.

TROY OUNCE The unit of weight used to measure gold and silver. One troy ounce equals 1.097 avoirdupois ounces.

TRUST ACCOUNT A **Discretionary account.**

UNDERLYING INVESTMENT For an *option* (or a *warrant* or other *convertible security*), the investment for which the option provides the right of purchase or sale.

UNEARNED INCOME Interest, dividends, rents, and royalties, when measuring taxable income.

UPSIDE POTENTIAL The probability of an increase in price, and its potential extent.

UPVALUATION (Colloquial) The opposite of a *devaluation;* a *revaluation.*

VALUE DATE The date on which payment is considered to have been made, and from which interest charges will be computed.

VARIABLE PORTFOLIO An assortment of investments that is altered as investment prospects change.

WARRANT An option to purchase a share of stock at a fixed price until a specified date. (A warrant differs from a *call option* in that a warrant is issued by the company whose stock is involved.)

WEAK HANDS Investors holding a given investment who are prone to be easily influenced in their trading by short-term trends or events.

WEALTH Resources that can be used or sold.

Chapter 1

EFFECTIVE LETTER WRITING

In commerce and industry, there are three kinds of contacts between business firms and their customers, suppliers, and others — *personal contacts, telephone calls,* and *letters.* By far the majority of business contacts are made by letter!

But good letter writing is equally important for those in education, government, fund-raising and other private organizations, clubs, church groups, and many others.

In the pages that follow you will be given a solid working knowledge of good letter writing. You will easily and quickly be able to understand the principles and techniques presented. However, you must then put them into practice in your own work or activities.

EVERY LETTER A SELLING LETTER

First of all, remember that your letters represent you, your company, or your organization to the recipient or reader. If the person has not met or talked with you, his or her opinion of you or your organization depends on the way they react to your letter.

If the reaction is favorable, you have sold yourself to the person. If the reaction is negative, you have not sold the reader your idea.

The fundamental principle of good letter writing, then, is this: **Every letter is a selling letter**. The aim of every letter is to sell one or more ideas. The one idea that should be included and sold in every letter is *good will.* Additional ideas included in the letter will depend upon the writer's purpose.

Of course, certain business letters are specifically called sales letters. They are designed to get an order or to aid in getting an order for some product or service. In the average business organization, sales letters are considered the most important of all. But consider the selling problem of the writer who must refuse an adjustment, refuse credit, or demand payment, but who still wants to retain the good will of the customer. He, indeed, has a difficult problem.

But letters other than business letters must sell, too. Fund-raising letters must convince the reader to send in a contribution. Letters from a club or other organization may be to sell the member on attending the next meeting or perhaps just to convey information. But even so, the letters are selling the value of the organization, its benefits, the pride the member can feel in the group.

Keep in mind, then, that all letters should have the aim of being silent salesmen of good will, but in addition a letter will usually include other ideas. How does a successful letter sell its ideas? It does so in two ways: first by its *appearance*, and second by its *contents.*

APPEARANCE OF THE LETTER

Letters, like salesmen and window displays, depend upon their appearance for a favorable first impression. If a letter is slovenly, carelessly written, or unattractive, it gives the same impression as a salesman with unshined shoes and unpressed clothes. If the appearance is not attractive, the potential customer may reject the messenger — whether by salesman or letter — before he hears or reads the message.

Based on the principle that every letter is a selling letter, the first rule of effective letter writing is that *the letter must be pleasing in appearance and correct in form.*

The appearance of your letter depends upon many things. The color and quality of stationery, the way the letter is set on the page, its form, the perfection of the typing — all these create the fleeting, but important, first impression.

So that you may recognize the main features of good mechanical layout of a letter, they are discussed briefly here. This discussion applies to all correspondence as well as business letters.

Page Arrangement:

1. A letter should be framed within its margins, with narrow margins for a long letter and wide margins for a short letter.

2. There should be a little more space at the bottom than at the top of a typed letter to balance it properly, since the optical center of a page is slightly higher than the actual center.

3. The date should be placed close to the body of the letter rather than near the letterhead, either four or six spaces above the inside address, depending upon the length of the letter.

4. If a letter is more than one page, the heading of each subsequent page should show the name of the recipient, the page number, and the date as follows:

Mr. H. J. James Page 2 June 30, 19___

5. Single spacing between lines is normally used rather than double spacing because single spacing is more economical and more attractive. When single spacing is used, two spaces are left between paragraphs.

Letter Styles

As mentioned, a part of the success of any letter is its appearance. On the pages which follow, types of letter layout or format are shown. The *full-block* and *modified-block* are the most widely used. However, the *simplified* form is often used particularly when the letter is not addressed to a specific person.

Note: In business, a company may have a standard format which they want all typists to use. If so, follow company instructions.

Full Block Format

(*Date*)

(*Inside Address*)

: (*Salutation*)

(*Body*)

(*Body con't*)

(*Complimentary Close*)

(*Signature*)

(*Typist's initials*)
(*Enclosure or cc: line*)

The *full-block format* starts all writing at the left-hand margin. This makes it unnecessary to set tab stops for indenting the date line and the complimentary close. A colon is placed after the salutation and a comma is placed after the complimentary close.

Note: The above sample layout illustrates the typed portion only. This typed portion, of course, would be on a letterhead with white margins left, right, and bottom.

Modified Block Format

(*Date*) _____

(*Inside Address*)

(*Salutation*)

(*Body*)

(*Body con't*)

(*Complimentary Close*) _____

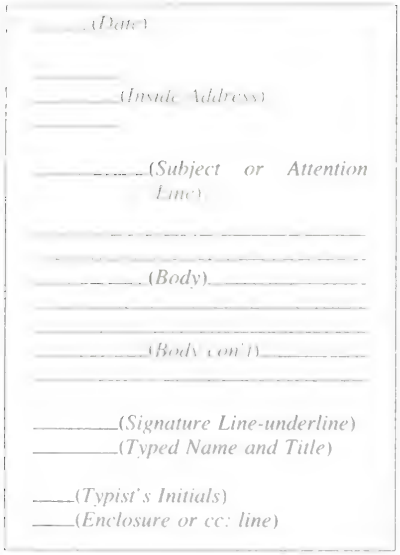
(*Signature*) _____

(*Typist's Initials*)
(*Enclosure or cc: line*)

In the *modified-block format*, the date line and complimentary close and signature line are indented to the right. All other lines start flush left.

Note: Some writers also indent the first line of each paragraph five spaces. This is called *mixed style.*

Simplified Format



The *simplified format* is similar to the full-block format in that all items begin at the left margin. The salutation is replaced by a subject line or an attention line; e.g., Attention: Accounts Receivable Department.

OTHER LETTER ELEMENTS

Punctuation — The most widely-accepted style of punctuation uses no end punctuation for the date and address but retains the colon after the salutation and the comma after the complimentary close. Use this punctuation unless your company specifies otherwise. For complete punctuation rules, see the *Punctuation Rules* section of this handbook.

Postscripts — If you want to add a friendly personal comment or reminder as a handwritten postscript to a typed letter, by all means do so. Typewritten postscripts, although they should not be overused, are permissible and actually are very effective when used judiciously. Start the postscript at the bottom of the letter, three or four spaces below the signature line. Place it even with the left hand margin or indent to conform with the other paragraphs.

Abbreviations — Good form forbids the use of abbreviations in the date line (Sept. 26, 19__) or in the address (St., W., Co.). Even though it takes a little more time to write out Street, West, and Company, the [illegible] your letter is important enough to merit the extra effort. There is one exception to this no-abbreviation rule. If the corporate name of the company you are addressing contains the abbreviation *Co.* or *Inc.*, use it. Always use such widely accepted abbreviations as *Mr., Mrs., Jr., Sr., Dr., D.C.*, and *St.* as in *St. Louis*. For more information, see the *Rules for Abbreviations* sections of this handbook.

Spelling — Be extremely careful to spell correctly the name of either a company or an individual to whom a letter is addressed. Verify spellings, if you have the slightest doubt.

Note: Elsewhere in this book you will find a complete presentation of *Spelling Rules*, a listing of commonly *Misspelled Words*, plus a special listing of *Words Confused and Misused*.

Spelling includes the correct division of words at the end of lines. The pronounciation of words governs their division or syllabication. Your reader might well be bewildered by such incorrect division as *daug-hter, cynical, progr-ess.*

Note: See the section on *Word Division* in this book.

Readability — Does your letter look inviting and easy to read? It won't, if it is composed of long, solid, difficult-looking paragraphs. Vary the length of your paragraphs. Usually they should not exceed ten lines. Don't be afraid of a one-sentence or two-line paragraph, especially if you want an important idea to stand out. Your sentences, too, should be short enough to read easily.

CONTENTS OF THE LETTER

The appearance of your letter is important because from it your reader gets his first impression of you and your message. But the contents are even more important in making sure that every letter is a selling letter.

Fundamentally, your letters will sell *only if they are written from the other person's point of view* rather than from your own. Much has been said and written — and properly so — about the "you" attitude in business letters, and it is equally important in social correspondence. There are still far too many letters which begin almost every paragraph with *I* or *we* because the writer is thinking of himself rather than the reader.

BE COURTEOUS AND CONSIDERATE

The "you" attitude is not merely an appeal to vanity or pride. If it were, it would be insincere and ineffective. The real "you" attitude is the ability to put yourself in the other person's place and to govern your actions — or write your letters — accordingly. This assures the sincerity that is essential to the effectiveness of any letter.

To accomplish your aim of making every letter a selling letter, therefore, your second rule is: *Be courteous and considerate.*

Certain words or phrases should never appear in a courteous, considerate letter. They invariably cause resentment and hostility by connotation, if not by denotation. Consider the words *you claim* or *your claim, you state* or *your assertion*. If you use these words, you might as well add, *but we don't believe you*, for that is the impression you will give.

Obviously is another word to shun as you would poison ivy, for it almost always has a bad effect on the reader. Here is an example from an adjustment letter which lost a valuable customer for a retail store: "Obviously you did not read our last letter carefully or you would have understood that the credit would be shown on next month's bill."

It didn't matter to the customer that her complaint was unjustified and that the adjustment had been made. She had been insulted by a discourteous correspondent who, in effect, had said, "If you're so stupid that you can't understand what we write, we'll just have to point out that *obviously* the credit will appear next month." The customer retaliated by sending back her credit card. Since her account had averaged more than $100 a month, this was truly an expensive letter.

How much better it would have been to say, "Our last letter evidently was not clearly expressed. We are glad to assure you that the credit will be shown on next month's bill. Thank you for writing us."

Evidently, apparently, and *manifestly* are other adverbs which should be used with care. Although you can safely say, *we evidently* or *we apparently*, don't say, *you evidently* or *you apparently*. Keep the other person's viewpoint in mind, and your letters will be courteous and considerate.

"*Thank you*" is one phrase that never becomes trite. You may say thank you in nine letters out of ten, and yet never sound stale to your reader. It is one positive way of putting the you before the I in your letters. How many letters do you receive or write which begin, "We have your letter . . . ." or "In response to your letter of . . . ." or even "On receipt of your letter . . . ."? If it is necessary to acknowledge the receipt of a letter — and in business it is sometimes helpful in keeping files in proper order — why not simply say, "Thank you for your letter of . . . ." or "Thank you for writing us about [illegible]."

This simple, natural way of expressing friendly appreciation illustrates the third rule in making every letter a selling letter: *Be informal and natural.*

BE INFORMAL AND NATURAL

There are varying degrees of formality in both written and spoken communication. Conversation is the most informal kind of spoken communication, and letters should be the most informal written communication. Personal letters are even more informal than business letters.

Conversation does not require the same degree of organization as the letter, and it has the added advantage of immediate give-and-take. The letter is documentary in nature (although it should never read like a legal document) and must await a reply. Although you cannot say everything in a letter that you would in conversation (the "Hi ya, Joe

whadda yu know'' type conversation), you might safely follow this rule: If you wouldn't say it, don't write it — but don't write everything you'd say. Don't let the idea of writing become too high a hurdle. What you are really doing is *talking* to the other person — on paper.

TRITE WORDS AND PHRASES

To be natural and informal, watch your letters carefully until you have eliminated all the cliches — hackneyed, trite, old-fashioned words and phrases — which make a letter sound stilted and formal. You would never dream of using such a vocabulary if you were talking to the other person.

Would you in talking, for instance, use such obsequious language as *your kind favor, your esteemed favor, your obedient servant,* or *I beg to state*? These are hangovers from the nineteenth century. Many a modern, progressive business fails to sell its ideas by letter because of antiquated phraseology. In social correspondence as well, the artificially exaggerated expressions of courtesy have given way to friendly informality.

Approach all your correspondence with an analytical mind. If a word or phrase jars you, question its importance and meaningfulness. Ask yourself if you would use it in talking with the other person. If you would not, the word probably would not be effective in a letter, Apply the ''Would I say it?'' test with judgment, of course, remembering that you do not want your letters — except the most personal — to be chatty or intimate. You merely want them to be friendly and informal.

BE CLEAR AND CONCISE

Have your facts clearly in mind before starting to write. Otherwise, your reader may misunderstand, necessitating additional, expensive correspondence. The second letter is always more difficult to write, for it is harder to explain a misunderstanding which has arisen because of confused information than it s to say it right the first time.

The fourth general rule, then, to make every letter a selling letter is: *Be clear and concise.*

Take time to analyze the situation before you begin. Ask yourself, ''What do I have o say?'' Then marshal your facts, mentally r by penciled notation, and put your ideas n logical order. Finally, express what you ave to say clearly and simply. When you ead your mail, you may find it helpful to ut small dots or question marks or even brief enciled notes in the margin opposite the sen- nces you want to answer. Then, when you re ready to reply, you will not need to reread te letter word for word.

If you are explaining or questioning sev- al different items on a bill, or a number of surance policies, or various steps in assem- ing a piece of machinery, use one para aph for each item or each stem.

Test the clarity of your letter by reading it from the other person's viewpoint before you mail it. Does it answer every question? Does it anticipate those which might result from this correspondence? Is the information given in simple, clear, concise language?

Concise does not mean abrupt or curt. By definition, it means to express much in a few words. It means, therefore, that you should express your thoughts completely but briefly. Do not be disturbed if you find that a letter must be long to cover the information completely. A letter is not ineffective merely because it is long. It is ineffective if it is incomplete. Short letters are manifestly more economical than long ones, but don't make a letter short at the expense of courtesy or completeness.

For conciseness, try to eliminate from your letter the ''cluttering'' words — words which do not advance an idea. If you are doubtful of a word or phrase, ask yourself, ''Does it advance the idea or hinder its advancement?'' If it does not advance the idea, drop it! You will find that your ideas are more clearly expressed and your letters more interesting and effective.

INTRODUCTIONS AND CONCLUSIONS

An important aspect of letter writing is how to open and close your letter. Frequently you hear letter writers exclaim, ''If I could just get started, I'd be all right'' or ''I wish I knew how to end this thing.'' It is true that a lame beginning or ending will detract from the effectiveness of a letter. A poor beginning fails to capture attention — the first essential of a good letter as well as a good speech. A weak ending will leave the other person feeling let down instead of stimulated to action as he should be.

TYPES OF OPENING SENTENCES

Here are some suggestions that will aid you in writing effective openings:

''Thank You'' Opening — Like the salesman, you want to make your first words count. The beginning of a letter is the most important place to express the ''you'' attitude, and there is no better ''you'' than a ''thank you.'' For example, *Thank you for your letter asking for information about our computer software programs.*

Positive Opening — Shun negative ideas in your openings, and minimize them as much as possible throughout your letter. Don't open a letter with *We are sorry to learn* or *It was most unfortunate.* For every negative there is a positive, and if you have made a mistake, the other person will be glad to know it has been corrected. Instead of apologizing, make positive statements such as *You will be glad to know* or *Fortunately, we were able to.*

Summary Opening — Try the journalistic approach. Summarize the facts or give the main idea in your opening sentence as is done in this example: *The adjustment you requested in your letter of October 10 has been made, and the credit will appear on your November bill.*

Question Opening — Don't be afraid to open with a question if it is natural and sensible to do so. For example, *Have you had an opportunity to consider the proposition we outlined in our letter of April 10?*

''Please'' Opening — Use a ''please'' opening occasionally when it is important that you have immediate action. *Please give us the dates of the bills which are past due.* Or, *Please tell us when you returned the merchandise referred to in your letter of March 5 so that we can check our records.*

''If'' Opening — Does an ''if'' opening seem unusual? Because it is different, it is frequently effective in arousing attention and stimulating action. Watch for opportunities to use the ''if'' opening, as shown in these examples: *If you will give us the name of the salesman you wrote us about last week, we will check the order with him.* Or, *If you can come in to our office next week, we shall be glad to talk with you about the proposition you suggested in your letter.*

Remember that every sentence in your letter is important, but none is more important than the first sentence. It is there that you gain or lose the reader's interest.

TYPES OF CLOSING SENTENCES

Of only secondary importance to the opening is the closing sentence. Here is where salesmen apply what is known as the ''hook,'' a slang term meaning *stimulus to action.* Like a firecracker which fails to explode, a letter which fizzles out is a ''dud.'' Don't spoil the effectiveness of a letter with an ending that fizzles.

Use definite, to-the-point statements that are not high pressure but emphatic enough to induce action. Here is the place where the word *we* can be used to advantage. *As soon as we hear from you, we will,* or *If we can answer any questions, we shall be glad to do so.*

Avoid long, vague generalizations and negatives. Be sure to leave a clear idea of what you expect. You can do this by calling attention to some idea previously expressed, or by summarizing the main purpose of the letter, or by saving your most important idea for the last, as a climax to your letter.

Use questions. A question may formulate a courteous request such as, *Will you please give us this information before the end of the week?* Or, *Will you please handle this promptly?* Other questions might be, *Can you arrange to handle this shipment?* or *What is your opinion?* You can change the courteous request to a courteous demand by changing from the interrogative to the imperative mood. *Please give us this information* or *Please handle this.*

Avoid connections. The last sentence of your letter should never be connected with

the complimentary close. Do not say, *Awaiting your reply, we are — Yours very truly.* It is also incorrect to say, *With best wishes, we are,* or *With kindest regards, we are.*

Because *Please accept my best wishes* sounds stilted, try to find some other friendly closing idea. Occasionally, when letter writers are close friends, just the words *best wishes* or *best regards* may be used as a breezy, personal closing. Such phrases should never take the place of the complimentary close in a business letter. They should be placed as a separate, final paragraph.

ANALYZING LETTERS

Now that you have considered the general principles of letter writing, you are ready to analyze and evaluate specific types of correspondence, both business and social. The most effective method of analysis is to ask questions that will train you to detect the good and bad points of any letter.

The following check list gives a series of questions that you should ask yourself about the specific letter which you are analyzing. This list is called the Four-A Check List since, when you are writing, you are concerned with the *aim, appearance, accuracy,* and *attitude* of a letter.

FOUR-A CHECK LIST

For Business and Social Letters

Aim

a. What are the specific purposes of the letter?

b. Does it accomplish these purposes?

Appearance

c. Is the letter pleasing in appearance?

d. Is it correct and consistent in mechanics according to the style used?

Accuracy

e. Is the letter grammatical?

f. Are spelling, syllabication, capitalization, punctuation, and abbreviations correct?

g. Are the sentences and paragraphs varied in length?

h. Are the ideas presented in logical order?

i. Is the letter clear and concise? Does it include any irrelevant ideas or use any unnecessary words?

j. Is the choice of words fully effective?

Attitude

k. Does the letter have the "you" attitude — not merely through the use of the pronoun "you" but through ideas expressed from the other person's viewpoint?

l. Does the letter have words that are negative or words that will have a bad effect on the reader? Are courteous expressions of thanks, appreciation, and good will used?

m. Are trite or old-fashioned words and phrases avoided?

n. Is the letter informal and natural in tone?

o. Is abrupt or curt wording avoided?

p. Does the closing thought leave the reader with the desired idea?

Using the Check List

You will find that the questions in the Four-A Check List are easy to apply to any letter. When you begin to analyze your letters, have the check list open in front of you and check your letter carefully against each question in the list. You will soon be able to detect faults almost automatically and will need to refer to the list only occasionally.

LETTER PARTS

As discussed earlier in this section, the appearance of your letter creates either a favorable or unfavorable impression. Here is a brief explanation of the specific parts of a letter so that your letters conform to generally accepted usages.

Sender's Address: If you are writing on printed stationary, your name and address or the name of your company or organization is given on the letterhead. However, if you are writing a personal letter on plain paper, place your address immediately above the date line.

670 Walnut Street
Little Falls, NJ 07424
June 27, 19—

Date Line: Do not abbreviate dates. Spell out the month and do not use ordinals (*nd, rd, st, th*). Do not use the military version except in military correspondence.

No: 9/21/87
No: Sept. 21st, 1987
No: 21 September 87 (military)
Yes: September 21, 1987

Receiver's Address: Use the proper complimentary title (*Mr., Mrs., Ms., Dr.*) with the person's name, his or her position if known, and the name of the company or organization followed by the complete address.

Mr. Robert Costantini
Director of Publications
Hexagon Publishers, Inc.
1000 Lexington Avenue
New York, NY 10018

Apartment or suite numbers may be placed either on the same line with the address or if the address is too long, on a separate line.

Note 1: For titles of educational, governmental, military, and religious dignitaries, see the *Forms of Address* section of this book.

Note 2: If writing to an individual at a home address, only the name and address would be given.

Salutations. The salutation should follow two spaces after the inside address. It is generally followed by a colon, but some writers omit the colon. The choice of the salutation depends on the relationship with the reader. Unless you know the reader quite well, use a moderately dignified salutation.

Recommended Salutations
Dear Mr. Henderson:
Dear Mrs. Chambers:
Dear Ms. Risner:

Salutations To Be Avoided

Dear Sir:	Dear Madam:
Gentlemen:	Mesdames:

If you are not writing to a specific person, use a *subject* line or *attention* line as explained for the simplified letter format.

Instead of a salutation some modern writers recommend an opening *attention getting phrase* which is generally part of the first sentence as follows:

It was great seeing you again, Tom . . .
. . . at the annual convention.

Thank you for the time . . .
. . . you gave me yesterday, Mr. Henderson, to review my qualifications.

It's true, Mrs. Jordan,
— It was our error. Your account has not been credited.

Body of the Letter: Begin the body of the letter two spaces below the salutation or subject line. Unless the letter is very brief, it should be single-spaced with a double space between paragraphs. If double spacing is used, the first line of each paragraph should be indented.

Complimentary Close: Complimentary closes should be followed by commas, capitalizing only the first word. Here are some accepted closes.

Sincerely,	Cordially,
Sincerely yours,	Best regards,
Very truly yours,	Regards,

The close *Respectfully yours* may be used for a top business executive, government official, or church dignitary. Other complimentary closes are given in the *Forms of Address* section of this book.

Signature and Writers Identification: Type the writer's name and title immediately below the complimentary close. Leave three to five spaces for the signature.

Sincerely yours,

Henry K. Peters
Director of Public Relations

Typist's Initials: The initials should be placed two spaces below the writer's title or name and flush left with the margin. The writer's initials need not be shown.

No: HKP: dob *Yes*: dob

Enclosure Line: Use an enclosure line when other items are included in the letter. If there is more than one enclosure indicate the number. Place the enclosure line two spaces below the typist's initials.

Enclosure Enclosures (3)

Carbon Copy Notation: If copies of the letter are being sent to other people note their names one or two spaces (depending on letter length) below the typist's initials or enclosure line. If necessary, give the person's title so the addressee knows his identity.

cc: Mr. Harry Rigio cc: Walter Brown
Ms. Jane Friedlan Sales Coordinator

Chapter 2

FORMS OF ADDRESS

The following are preferred forms and correct use of titles:

Business Names and Titles

1. All titles in a business address should be capitalized. The "Zip" code should be placed two spaces after the state name without separating punctuation. Do not abbreviate *Company* or *Incorporated* unless the firm uses the abbreviations on its official letterhead.

Mr. John Rae, President
Graphic Products, Inc.
Monroe, Michigan 48048

Mr. Richard Greene
Chairman of the Board
General Dynamics Company
Quincy, Maine 02169

2. An educational or business title may be used with a personal title or degree for the same person.

Dr. Jay Howard
Director of Research
Dexter Electronics, Inc.

Thruman Hardwick, Ph.D.
Professor of History
Cornell University

3. A position title may be placed either on the same line, or on a separate line, based on length and convenience.

Mr. James Gordon, Superintendent
Riverdale Public Schools
Riverdale, Illinois

Mr. James Gordon
Superintendent of Schools
Riverdale, Illinois

4. The salutation *Gentlemen* may be used if the letter is not addressed to a specific person within the company, even though the letter is marked for the attention of that person.

Gould Incorporated
Chicago, Illinois
Attention: Mr. Andrew Williams
Gentlemen:

Titles for Addressing Men

1. The title *Mr.* always precedes the name when addressing letters to a man, if he has no professional title.

Mr. Gary Jones
or
Mr. Gary Jones, Manager

Salutation: Dear Sir:
or
Dear Mr. Jones:

2. For two or more men who have no professional title, *Mr.* should precede each name.

Mr. James North
Mr. Leo James

Salutation Dear Sirs
or
Gentlemen:

3. The proper title for a boy under 12 is *Master*. From ages 12 to 18 usually no title is used. *Mr.* becomes the correct title at age 18.

Master Tommy Burns
Masters Tommy and Jim Burns

Salutation: Dear Tommy and Jim:

4. Designations such as Sr., Jr., III, etc., should be capitalized and usually are separated from the name by commas.

Mr. R.J. Hooker, Sr.
Peter Brady, Jr., Ph.D.
Dr. Arnold Smith, III
Mr. Raymond Gallo, Sr., President

Titles for Professional Men and Women

1. The title *Doctor* is designated for persons who have attained that degree.

Martin Gould, Ph.D.
or
Dr. Martin Gould

Martha Merk, M.D.
or
Dr. Martha Merk

Salutation: Dear Dr. Merk:

2. *Dr.* and *Mr.* should not be used with the same name.

Martin Gould, Ph.D.
not
Dr. Martin Gould, Ph.D.

3. College or university teachers who hold professional rank are called *Professor* or *Prof.*

Professor Lenore Klein
not
Professor Mrs. Klein

Professor Donald Boone
not
Prof. Boone

4. A professional man and his wife are addressed as:

Dr. and Mrs. Richard Warner
Professor and Mrs. James Donalson

5. The title *Messrs.* (*Messieurs*) precedes

the name of two or more professional men jointly engaged in practice.

Messrs. Carl Bunker and Robert Black
Attorneys at Law

Titles for Addressing Women

1. The title *Miss* is used when addressing an unmarried woman. Authorities prefer the use of the title *Ms* for a woman whose marital status is unknown.

Miss Jean Peterson
Secretary to the President

Ms Shelly Streeter, Office Manager
Turner Supply Company

Misses is recommened when addressing two or more unmarried women.

The Misses Baker and Frederickson
The Misses Lena and Sarah Bronson

2. To address a married woman you should use *Mrs.* In business correspondence, the woman's personal first name is preferred. In social correspondence, her husband's name should be used.

Mrs. Linda Reisman
(business)
Mrs. John Reisman
(social)

For two or more married women *Mesdames* is used (if one is married and one is single, *Mesdames* is also suggested).

Mesdames Elyse Brown
and Cynthia Birch

Dear Ladies:
Mesdames:
Ladies:

3. The wife of a doctor or professor should not be addressed as Mrs. Dr. John Toomey or Mrs. Prof. B.T. Brown. The correct form is Mrs. B. T. Brown.

4. A divorced woman may use either her married name or her maiden name, and *Ms, Miss* or *Mrs.* are all correct. The preferred usage by the divorced woman should be followed.

Military Titles

1. Military personnel should be addressed with the rank or grade held. If the military title contains a prefix as in Brigadier, the prefix may be omitted in the salutation. Military personnel may be greeted with Dear Sir: for example.

Brigadier General Mark Reis, U.S.A.
Address
Dear General Reis:
or
Dear Sir:

2. Naval commissioned officers below the rank of *Commander* may be addressed either with their rank or addressed as *Mr.* in the salutation.

Lieutenant Fred Buckner, U.S.N.
Address
Dear Lieutenant Buckner:
or
Dear Mr. Buckner:

The Complimentary Close

1. There are various complimentary closes which are acceptable for business correspondence. The preferred close is largely determined by the writer and the degree of friendliness he has with the person being written to. The first word of the close is always capitalized.

Sincerely,	Yours very truly,
Sincerely yours,	Respectfully,
Yours truly,	Respectfully yours,
Very truly yours,	Cordially,

2. Any of the following may be used for government officials:

Respectfully yours,	Very truly yours,
Respectfully,	Yours very truly,
Yours respectfully,	Sincerely yours,

3. For dignitaries of the church, any of the following may be used:

Faithfully yours	Yours in Christ
Respectfully yours,	Sincerely yours in Christ,
Respectfully,	Sincerely yours,

Dear Sister Superior

Supreme Court: Chief Justice
Hon. Joseph Tiernan
Chief Justice of the Supreme Court
of (State)
Address

Dear Mr. Chief Justice:

Vice-President
The Honorable Justine Smith
The Vice-President of the
United States
Washington, D.C. 20025

Sir
Mr. Vice-President,
Dear Mr. Vice-President:

Chapter 4

IMPROVING YOUR SPELLING

To write a letter, report, or article that contains misspelled words is an almost unforgivable error. Frequent misspellings in business writing may prevent a person from being promoted to a position for which he or she is otherwise qualified. In high school or college a lower grade may be given to papers or reports that contain several misspelled words. Misspellings in social correspondence or in minutes, reports, etc. for club or church groups often affect a person's social or personal standing because errors create an impression of a lack of education or cultural background.

Suggestions for Improvement

Learning to spell well is not difficult, particularly if you set up a spelling improvement program for yourself. The program is simple and consists of the following steps:

1. **Learn the six basic spelling rules.** The rules are given on the following pages. The rules for forming plurals are also given.

2. **Keep a notebook of words you misspell.** Go over the words frequently until you are sure you know their correct spelling. You will be surprised how effective this notebook system will be and how little of your time it will take. Continue keeping the notebook until you have learned to spell correctly the majority of words you regularly use in your writing.

3. **Don't guess about the spelling of a word.** Look up any word you are not sure of in a spelling dictionary or regular dictionary. If you find you have misspelled a word, add it to your spelling notebook. Looking up words in a dictionary takes a little time, but it prevents embarrassing mistakes.

In addition, immediately following this section you will find a list of 400 words which are frequently misspelled. Go over this list just as you do your notebook to help eliminate any errors you may now make. You will be pleased with how rapidly your spelling will improve.

SIX BASIC SPELLING RULES

Following are six basic spelling rules which will guide you in your program of spelling improvement. Each rule is illustrated by examples, and exceptions (if any) are noted.

Note: In another section of this handbook, a list of word roots, prefixes, and suffixes is given.

Rule 1. Words ending with a silent **e** usually drop the **e** when a suffix beginning with a vowel is added.

Root Word		Suffix		Complete Word
survive	+	al	=	survival
divide	+	ing	=	dividing
fortune	+	ate	=	fortunate
abuse	+	ive	=	abusive

Exceptions to the rule:

a. Words containing the soft sounds of **g** or **c** retain the **e** before the suffixes **able** or **ous**. *Examples*: Courageous, advantageous, peaceable, noticeable, chargeable, manageable, serviceable.

b. Retain the **e** in words that might be mistaken for another word if the rule were applied. *Examples*: singe, singeing; dye, dyeing; shoe, shoeing; canoe, canoeing.

c. Words ending in **ie** drop the **e** and change the **i** to **y** when the suffix **ing** is added. This is done to prevent two **i**'s from coming together. Examples: die, dying; tie, tying; lie, lying.

d. In the words *mileage, acreage, lineage*, the **e** is not dropped before the suffix **age**.

Rule 2. Words ending with a silent **e** usually retain the **e** before a suffix beginning with a consonant.

Word		Suffix		Complete Word
arrange	+	ment	=	arrangement
awe	+	some	=	awesome
forgive	+	ness	=	forgiveness
safe	+	ty	=	safety
shame	+	less	=	shameless

Exceptions to the rule: judge, judgment; acknowledge, acknowledgment; argue, argument; true, truly; nine, ninth; pursue, pursuant; value, valuation; wise, wisdom; whole, wholly; awe, awful.

Rule 3. Words ending in a single consonant preceded by a single vowel, usually double the final consonant before a suffix beginning with a vowel.

run + ing = running
big + est = biggest
hot + er = hotter
plan + ing = planning
bag + age = baggage

If the word ends with two or more consonants, or if the final consonant is preceded by two vowels instead of one, the rule does not apply.

Two Consonants

debt + or = debtor
calm + est = calmest

Two Vowels

frail + est = frailest
swear + ing = swearing
sweet + er = sweeter

Rule 4. Words of two or more syllables, that are accented on the final syllable and end in a single consonant preceded by a single vowel, double the final consonant before a suffix beginning with a vowel. If the accent is not on the last syllable, the final consonant is not doubled.

Accent on Last Syllable

refer + ing = referring
regret + able = regrettable
occur + ence = occurrence

Accent Not on Last Syllable

benefit + ed = benefited
differ + ence = difference
travel + er = traveler

If the word ends in two consonants, if the final consonant is preceded by two vowels, or if the accent shifts to the first syllable when the suffix is added, the rule does not apply.

perform + ance = performance
(two consonants)
repeal + ing = repealing
(two vowels)
refer + ence = reference
(accent shifts)

Rule 5. Use of "ei" and "ie." Use **i** before **e** except when the two letters follow **c** and have a long **e** sound, or when the two vowels are pronounced long **a**.

Long e after c	Long a sound	After letters other than c
conceit	vein	shield
deceive	weight	believe
ceiling	veil	grieve
receipt	freight	niece
perceive	neighbor	mischievous

Exceptions to the rule:

weird	foreign	seize	leisure
either	forfeit	height	ancient
neither	sleight	surfeit	sovereign

Words that end in **ie** change the **ie** to **y** when the suffix **ing** is added.

lie - lying die - dying vie - vying

Rule 6. Words ending in **y** preceded by a consonant usually change the **y** to **i** before any suffix except one beginning with an **i**

beauty	+ ful	=	beautiful
[illegible]	[illegible]		[illegible]
lovely	+ ness	=	loveliness
ratify	+ es	=	ratifies
accompany	+ ment	=	accompaniment
accompany	+ ing	=	accompanying

Exceptions to the rule:

shy	+ ness	=	shyness
baby	+ hood	=	babyhood
plenty	+ ous	=	plenteous
lady	+ like	=	ladylike
beauty	+ ous	=	beauteous
wry	+ ly	=	wryly

If the final **y** is preceded by a vowel, the rule does not apply:

journey	+ [illegible]	=	journeys
buy	+ s	=	buys
essay	+ [illegible]	=	essays
obey	+ ing	=	obeying
repay	+ ing	=	repaying
attorney	+ [illegible]	=	attorneys

Note: This rule will be referred to later in the section on forming plurals.

FORMING PLURALS OF NOUNS

If a word is incorrectly pluralized, it is, of course, misspelled. There are thirteen rules on forming plurals listed here, together with examples and exceptions to the rules.

1. Plurals of most nouns are formed by adding **s** to the singular word.

Singular	Plural	Singular	Plural
bell	bells	pencil	pencils
college	colleges	tablet	tablets

2. When nouns end in **y** preceded by a consonant, the plural is formed by changing the **y** to **i** and adding **es**.

Final **y** preceded by a consonant:		Final **y** preceded by a vowel:	
Singular	**Plural**	**Singular**	**Plural**
baby	babies	valley	valleys
century	centuries	donkey	donkeys
lady	ladies	turkey	turkeys

[illegible]

3. Nouns ending in **ch**, **sh**, **ss**, **s**, **x**, or **z**, add **es** to form the plural.

Singular	Plural	Singular	Plural
dress	dresses	church	[illegible]
[illegible]	[illegible]	[illegible]	dishes

4. Nouns ending in **f**, **fe** are formed by adding **s** to the singular.

[illegible]

change the **f** or **fe** to **v** and add **es**.

Add **s** for plural		Change **f** to **v** and add **es**	
Singular	**Plural**	**Singular**	**Plural**
[illegible]	chiefs	wife	wives
handkerchief	handkerchiefs	leaf	leaves
[illegible]	safes	self	selves

5. (a) The plurals of nouns ending in **o** preceded by a vowel usually are formed by adding **s** to the singular. Musical terms ending in **o** add **s** although the final **o** is not always preceded by a vowel.

Singular	Plural	Singular	Plural
studio	studios	piano	pianos
ratio	ratios	trio	trios
portfolio	portfolios	soprano	sopranos

(b) Nouns ending in **o** preceded by a consonant usually add **es** to form the plural.

Singular	Plural	Singular	Plural
motto	mottoes	hero	heroes
tomato	tomatoes	echo	echoes
potato	potatoes	Negro	Negroes

(c) Some nouns ending in **o** have two plural forms. In the following examples, the preferred plural form is given first:

Singular	Plural
memento	mementos or mementoes
cargo	cargos or cargoes
zero	zeros or zeroes

6. (a) Plurals of compound nouns are formed by adding **s** to the important word or most essential part of the compound.

Singular	Plural
sister-in-law	sisters-in-law
passer-by	passers-by
editor-in-chief	editors-in-chief
co-editor	co-editors

(b) Sometimes both parts of a compound are made plural.

manservant	menservants

(c) Compounds ending in **ful** form the plural by adding **s** to the ending of the compound.

Singular	Plural	Singular	Plural
cupful	cupfuls	handful	handfuls
spoonful	spoonfuls	tubful	tubfuls

(d) If there is no important word in the compound, or if both words are equal in importance, make the last part of the compound plural.

Singular	Plural
clothesbrush	clothesbrushes
[illegible]	[illegible]
washcloth	[illegible]

7. Plurals of some nouns are formed either by a change in the vowel or by a complete change of spelling.

Singular	Plural	Singular	Plural
man	men	foot	feet
child	children	woman	women
mouse	mice	goose	geese
ox	oxen	tooth	teeth

8. Some nouns have the same form in both the singular and plural.

Examples: athletics, corps, deer, fish, moose, sheep, species

9. Some nouns are plural in form but are almost always considered to be singular in usage.

Examples: economics, ethics, news, mathematics, politics

10. Some nouns are rarely or never used in the singular.

Examples: cattle, cosmetics, scissors, statistics, trousers

11. Some words derived from a foreign language retain their foreign plurals.

Singular	Plural	Singular	Plural
datum	data	analysis	analyses
alumnus	alumni (masc.)	alumna	alumnae (fem.)
stratum	strata	synopsis	synopses

Sometimes, however, the English plurals are used instead of the foreign plurals.

Singular	Plural
referendum	referendums or referenda
curriculum	curriculums or curricula
trousseau	trousseaux or trousseaus

12. The plurals of proper nouns are formed by adding **s** if the name does not end in **s**, or by adding **es** if the name ends in **s**.

There are two **Marys** in our family.
Three **Besses** answered the roll call.
The **Adamses** have a new automobile.
The **Joneses** and the **Halls** are old college friends.

13. Plurals of letters, symbols, and numbers are formed by adding an apostrophe and **s** ('s).

Examples: A's x's 2's 7's
[illegible] if's 5's 100's

FORMING POSSESSIVES

The apostrophe (') is a mark to show that a noun (or indefinite pronoun) is possessive, or to indicate a contraction. Just as a word

is misspelled if it is pluralized incorrectly, so is it misspelled if the apostrophe is omitted or inserted in the wrong place in a word that shows possession.

1. If the singular form of the noun does not end in **s**, add the apostrophe and **s** (**'s**). If the singular ends in **s**, add the apostrophe (**'**).

Note: In the possessive singular of nouns that end in **s**, if you want the sound of an additional **s**, the apostrophe and **s** (**'s**) may be added.

Singular	Possessive	Singular	Possessive
boy	boy's	Harold	Harold's
child	child's	woman	woman's
Ross	Ross' (or Ross's)	Davis	Davis' (or Davis's)

2. If the plural does not end in **s**, add the apostrophe and **s** (**'s**). If the plural ends in **s**, add the apostrophe (**'**).

Helpful hint: Make the word plural first; then make it possessive.

Plural	Possessive	Plural	Possessive
calves	calves'	bosses	bosses'
boys	boys'	children	children's
men	men's	sheep	sheep's
weeks	weeks'	Joneses	Joneses'

Caution: Be sure that you always add the apostrophe to the end of a word and that you do not insert it within the word. For example, take the proper name Jones. If you insert the apostrophe before the **s** (Jone's), it would mean that the proper name was Jone.

3. Possessive personal pronouns do not require an apostrophe.

my, mine	you, your
he, his	we, ours
she, hers	they, theirs
it, its	who, whose

Note: *It's* is a contraction of *it is* not the possessive of *it*.

4. Possessives of indefinite pronouns are formed by adding an apostrophe and **s**(**'s**).

else's	someone's	everybody's
somebody's	everyone's	one's

5. Possession of a compound word is shown at the end of the word, regardless of which part of the compound may be pluralized.

Singular	Singular Possessive
tradesman	tradesman's
editor-in-chief	editor-in-chief's
secretary-treasurer	secretary-treasurer's

Plural	Plural Possessive
brothers-in-law	brothers-in-law's
menservants	menservants'
freshmen	freshmen's

FORMING CONTRACTIONS

The second use of the apostrophe is to show the omission of one or more letters in words that are contracted.

it's (it is)	wouldn't (would not)
can't (cannot)	haven't (have not)
don't (do not)	hadn't (had not)
I've (I have)	isn't (is not)
I'm (I am)	you're (you are)
doesn't (does not)	won't (will not)
couldn't (could not)	who's (who is)

Chapter 5

440 WORDS FREQUENTLY MISSPELLED

In business letters and reports and in reports or papers prepared by students in high school and college, there are certain words which are misspelled more often than others. Following is a list of words which are frequently misspelled. Refer to the list if you are unsure of the spelling of a word. If the word you are seeking is not in the list and you still are not sure, refer to a spelling dictionary or a regular dictionary.

abeyance

Chapter 6

WORDS OFTEN CONFUSED AND MISUSED

Many words, for whatever reason, are often confused with another word and therefore misused. Sometimes the words look or sound somewhat alike, or they may have a somewhat similar meaning but have different accepted usages. Following are words often confused and misused. Examples of the correct use of the words is given following the definitions.

accept -- except
Accept means to receive or to agree to something.
He did not *accept* the position.
Except means to exclude or leave out.
Everyone *except* John is here.

adapt -- adept -- adopt:
Adapt means to adjust to or to modify.
She did not *adapt* to her new job.
Adept means skillful.
She is an *adept* typist.
Adopt means to embrace or accept.
We will *adopt* a child.
They *adopted* the plan.

advice -- advise:
Advice is a noun meaning a recommendation that is given.
He gave me his *advice*.
Advise is a verb meaning an act of guidance.
Advise her what she should do.

affect -- effect:
Affect is a verb meaning to influence.
His attitude will *affect* his chances.
Effect is a noun indicating result or outcome.
What *effect* will the new plan have?
Effect is occasionally used as an action verb meaning to bring about.
We did *effect* your instructions.

aggravate -- irritate
Aggravate means to make worse (a situation or condition).
His actions *aggravated* the situation.
The rubbing *aggravated* the wound.
Irritate means to annoy or to make sore.
The loud noise *irritated* me.
My skin is quite *irritated*.

allusion -- delusion -- illusion
Allusion is an indirect reference to something.
She made an *allusion* to the mistake.
Delusion is a false or irrational belief.
He had a *delusion* that he would be made president.
He had *delusions* that he was being persecuted.
Illusion is a wrong idea or concept, or an optical misconception (In some usages, illusion and delusion mean about the same).
He had the *illusion* that he was to become president.
The mirage was strictly an *illusion*.

all ready -- already
All ready means all prepared, i.e., a state of readiness.
The students were *all ready* to go.
Already is an adverb meaning previously.
The students had *already* gone.

all together -- altogether:
All together means a group as a whole.
The tools were *all together* on the bench.
Altogether means completely.
The two plans were *altogether* different.

among -- between:
Among is used when more than two persons or things are involved.
The supplies were divided *among* the group.
Between is used when only two persons or things are involved.
Jim and Ed divided the supplies *between* them.

amount -- number:
Amount, except for money, is used when mentioning something that cannot be counted.
The bill *amounted* to $64.50.
She had a large *amount* of cash.
He has a great *amount* of courage.
Number is used for things that can be counted.
A *number* of dogs were in the kennel.
A great *number* voted "no".

anxious -- eager
Anxious means to have a degree of anxiety or fear.
I am *anxious* to hear the results of the operation.
Eager means pleasant anticipation.
I am *eager* to meet her.

any one -- anyone:
Any one is used to refer to one of several things or persons.
I do not like *any one* of the plans.
Any one who wishes may go.
Anyone is a pronoun meaning any person.
Has *anyone* arrived yet?

avenge -- revenge.
Avenge is used when there is a moral intention to right a wrong.
I will try to *avenge* the injustice done to him.
Revenge is a desire to inflict a punishment for an insult or injury.
He is so angry that he is going to seek *revenge*.

bad -- badly.
Bad is an adjective meaning disagreeable, offensive, defective.
Mother feels *bad* this morning.
The sales results were very *bad*.
There is a *bad* odor in the room.
Badly is an adverb meaning in a bad manner.
He behaved *badly* at the meeting.

best -- better:
Best is used when comparing more than two persons or things.
His plan was the *best* of those submitted.
Better is used when comparing two people or things.
His plan is the *better* of the two.

borrow -- lend:
Borrow means that the person is taking or wishes to take.
May I *borrow* your car?
Lend means to give or to let use.
I am going to *lend* him my car.

can -- may:
Can means to be able or capable of doing something.
He *can* operate the machine. (is able to)
Can he operate the machine? (does he know how?)
May means to seek or give permission.
He *may* operate the machine. (giving permission)
May he operate the machine? (seeking permission)

capital -- capitol
Capital refers to a city where a national, state, or province government is located; also to monetary possessions, including money.
Washington, D.C. is the *capital* of the United States.
He invested most of his *capital* (money) in the new company.
Capitol refers to the main government building.
His office is in the *capitol*. (building)

complement -- compliment:
Complement refers to people or things that go well or work well together.
The advertising program *complemented*

the increased sales effort.

Compliment means to praise.

They *complimented* us on the increased sales.

counsel -- council -- counsul:

Counsel as a verb means to give advice; as a noun it means a lawyer or other person who gives advice.

He *counseled* us on the strategy we should use.

He is our company legal *counsel*.

Council is a group of people who discuss and/or take action on various matters.

The city *council* is meeting today.

Counsul is a government official appointed to represent citizens of his country in a foreign country.

The new *counsul* is leaving for Mexico tomorrow.

continual -- continuous:

Continual refers to something that occurs regularly, but with interruption.

His *continual* complaints are irritating.

Continuous means something that occurs without pause.

The *continous* noise in the shop is irritating.

emigrate -- immigrate:

Emigrate means to leave one's country to settle in another.

To avoid political persecution, he *emigrated* from Russia.

Immigrate means to enter a new country to settle there.

Because of political persecution, he *immigrated* to the United States.

eminent -- imminent

Eminent means prominent or distinguished.

He is an *eminent* author.

Imminent means about to occur or threatening to occur.

A strike appeared to be *imminent*.

fewer -- less

Fewer is used for things that can be counted.

We have had *fewer* plant accidents this year.

Less is used for things or ideas that cannot be counted.

He is *less* qualified than she is.

farther -- further

Farther pertains to distance.

How much *farther* do we have to go?

Further refers to degree or extent but not to distance.

She can go no *further* in that type of work.

good -- well

Good is an adjective that describes something positive.

She has a *good* educational background.

Well is an adjective meaning skillful, satisfactory, or thorough. It is also used to describe a state of health.

He is doing *well* in his new job.

The office manager does not look *well* today.

imply -- infer:

Imply means a hint or indirect suggestion.

He *implied* that he was going to quit.

Infer means to draw a conclusion from or interpret the meaning.

From what he said, I *infer* he may quit.

in -- into:

In indicates that something is already at a place or location.

The computers are *in* the next room.

Into indicates that someone or something is moving from the outside to the inside of a place.

He went *into* the computer room.

lay -- lie:

Lay means to put something down, to place something somewhere.

The principal parts are *lay*, *laid*, (*have*, *has*, or *had*) *laid*.

The present participle form is *laying*. The verb *lay* always takes an object.

He *lays* tile for the Regal store.

He *laid* tile for the Petersons.

He *has laid* tile for our neighbors.

He is *laying* tile today.

(Tile is the object of all the above sentences.)

Lie means to recline, to rest, or to remain in a reclining position.

The principal parts are *lie*, *lay*, (*have*, *has had*) *lain*.

The present participle form is *lying*.

He *lies* down every afternoon.

He *lay* on the couch all afternoon.

He *has lain* on the couch at times.

He *is lying* on the couch.

The verb *lie* is also the verb to use when speaking of inanimate objects that are in a reclining or in a *lying-down* position.

The report *lies* on my desk.

The report *lay* on my desk for a week.

The report *has lain* on my desk for weeks.

The report *is lying* on my desk.

There is another verb *lie* which means falsehood. It causes no special problems. Its principal parts are *lie*, *lied*, *lying*.

learn -- teach

Learn indicates that knowledge or behavior is being acquired.

He should *learn* from that experience.

He *learned* Spanish in college.

Teach indicates that knowledge is being provided.

That experience should *teach* him a lesson.

He was *taught* conversational Spanish in college.

liable -- likely

Liable is used either to indicate legal responsibility or the likelihood of an undesirable possibility.

If you injure someone, you are *liable* for damages.

If you don't change your ways, you are *liable* to be fired.

Likely indicates the probability of something.

She is *likely* to be the next one promoted.

It is *likely* you will be fired if you don't change your ways.

precede -- proceed:

Precede means to come or go before someone or something.

The band will *precede* the float.

Careful investigation should *precede* any action.

Proceed means to go on, usually after an interruption.

We can now *proceed* with the plan.

principal -- principle:

Principal means 1) something that is most important, 2) the amount of money owed or invested, 3) the head officer of a school, 4) the employer of a person to act in his behalf.

The *principal* purpose of the plan is to reduce expenses.

The *principal* amounts to $100,000.

She is *principal* of the Bergen Grade School.

The lawyer did his best to protect the interests of his *principal*.

Principle is used to indicate a law, basic truth, rule of conduct, or guidance.

Democracies are based on the *principle* of self-government.

The *principles* of his religion govern his action.

quite -- quiet:

Quite is an adverb meaning completely or very.

The new plan is not *quite* ready.

I am *quite* sure he will agree.

Quiet means still, calm, motionless, silent.

After hearing the announcement, the audience remained *quiet*.

raise -- rise

Raise means to lift or raise. It requires an object.

Those who agree, *raise* your hand.

We will have to *raise* our prices.

Rise means to get up or go up. It requires no direct object.

Please *rise* when the President enters.

The audience *rose* (stood up) when the President arrived.

Our taxes seem to *rise* every year.

set -- sit

Set means to put something down or in a certain place, or to bring to a specified state or condition.

He *set* the books on the president's desk.
The trees were *set* on fire.
She has *set* her heart on going.

Sit means to be seated.

Please do not *sit* on the desk.

stationary, stationery.

Stationary means immovable, not moving, or unchanging.

Once the machine is installed, it will be *stationary*.

The troops stood *stationary* until the flag was past.

Stationery refers to writing paper, envelopes, and other office supplies.

Our new *stationery* order has just arrived.

whose -- who's

Whose is an adjective showing possession.

He is the one *whose* car was stolen.

Who's is a contraction of *who* and *is*. In writing, its use should be avoided.

Who's going to be at the meeting?

Chapter 7

WORD PREFIXES, SUFFIXES, AND ROOTS

Following are some of the important word prefixes used in English. The prefix is indicated in boldface type followed by the basic meaning of the prefix. Examples of the prefixes used in words are given in italic type.

ab-, a-, abs-, away from, *abduct, avert, abstain*
a-, an-, not, less, without, *agnostic, atheist, anarchy*
ad-, a-, ac-, af-, to, toward, *adhere, ascribe, accord, affirm*
ag-, al-, an-, *aggressor, allude, annex*
ap-, ar-, as-, at-, to, toward, *associate, attend*
ante-, before, *antedate, antecedent*
anti-, ant-, against, *antiseptic, antipathy, antacid*
ana-, up, through, throughout, *analysis, anatomy*
be-, by or near, *below, beside*
bene-, good, well, *benevolent, beneficial*
bi-, two, twice, *bicycle, biennial*
circum-, around, all round, *circumstance, circumvent*
com-, con-, col-, together, *combine, confound, collate*
contra-, against, *contradict, contravene*
de-, from, down away, *depart, descend, denude*
dis-, di-, apart, apart from, *distract, divert*
ex-, ef-, e-, out, out of, *export, effect, emit*
hypo-, under, beneath, *hypodermic, hypothesis*
in-, in, into, *intrude, inside, include, insight*
in-, im-, il-, ir-, un-, not, *inactive, impress, illicit, irrestible, unreal*
inter-, between, *intermingle, interstate*
intra-, intro-, within, *intramural, introduction*
mal-, bad, *malcontent, malnourished*
mis-, wrong, *misdeed, mislead*
non-, not, *nonentity, nonconformist*
ob-, against, *object, objective*
par-, para-, beside, beyond, *paradox, parallel*
per-, through, throughout, *persist, pervade*
peri-, around, *periscope, perimeter*
post-, after, *postpone, postscript*
pre-, before, *prefer, predict*
pro-, before, forward, *prologue, promote, proceed*
re-, back, again, *refer, report, review*
retro-, backward, *retroactive, retrogress*
se-, apart, *seduce, sedate*
semi-, half, *semicircle, semiconscious*
sub-, under, *submit, subordinate*
super-, supra-, above, over, *supernatural, suprarational*
syn-, sym-, with, *synopsis, symphony, synonym*
trans-, tra-, across, *transfer, traverse*
un-, not, reversal of action, *uncovered, untie*
uni-, single, *unity, universal*
vice-, instead of, *vice-president, vice-consul*
with-, against, back, *withdraw, withhold*

Word Suffixes

Following are some of the important word suffixes used in English. The suffix is indicated in boldface type followed by the basic meaning of the suffix. Examples of the suffixes used in words are given in italic type.

-able, -ible, -ble, capable of being, as *bearable, reversible, voluble*
-ac, -ic, pertaining to, as *cardiac, angelic*
-ac, -ic, condition or quality of, as *maniac, arthritic*
-acious, characterized by, as *pugnacious, loquacious*
-acity, quality of, as *tenacity, veracity*
-acy, having the quality of, as *accuracy, fallacy*
-age, collection of, state of being, as *garbage, marriage, storage*
-al, -el, -le, pertaining to, as *fanatical, novel, single*
-an, -ian, belonging to, one who, as *American, physician, historian*
-ance, relating to, as *reliance, distance*
-ancy, -ency, denoting state or quality, as *occupancy, dependency*
-ant, -ent, one who, as *tenant, correspondent*
-ar, -ary, ory, relating to, as *popular, dictionary, mandatory*
-ate, act, as *mandate, confiscate*
-ation, action, as *elation, separation*
-cle, -ule, -ling, diminutive, as *article, globule, suckling*
-cracy, rule, as democracy, autocracy
-cy, quality, as *idiocy, ascendency*
-dom, state of being, as *freedom, kingdom*
-ee, one who is acted upon, as *employee, trustee*
-ence, relating to, as *confidence, abstinence*
-er, -or, -ar, one who, as *butler, actor, scholar*
-ful, abounding in, as *grateful, sinful*
-fy, -efy, -ify, to make, as *deify, liquefy, solidify*
-hood, condition, as *fatherhood, falsehood*
-ic, pertaining to, as *historic, democratic*
-ice, act of, as *justice, police, practice*
-il, -ile, pertaining to, capable of being, as *civil, juvenile, mobile*
-ity, -ty, state or condition, as *sanity, acidity, safety*
-ious, full of, as *laborious, rebellious*
-ist, one who, as *pianist, machinist*
-ity, ty, state or condition, as *sanity, acidity, safety*
-ize, -yze, to make like, as *sympathize, analyze*
-less, without, as *careless, needless, hopeless*
-ly, manner, like, as *bodily, truthfully*
-ment, result, as *management, fragment*
-meter, measurement, as *thermometer, hydrometer*
-ness, state of being, as *sickness, happiness*
-nomy, pertaining to laws or government, distribution, arrangement, as *economy, harmony, astronomy*
-ory, place where, as *directory, rectory*
-ous, -ious, -eous, -uous, full of, as *dangerous, melodious, beauteous, strenuous*
-ose, full of, as *morose, verbose*
-ship, state or quality, as *friendship, worship*
-some, like, full of, as *gruesome, tiresome*
-ster, one who, person doing something, as *gangster, songster*

-sion, -tion, act or state of being, as *conception, perception*
-tude, condition, as *fortitude, magnitude*
-ty, ity, condition, as *clarity, peculiarity, sanity*
-ule, little, as *globule, granule*
-ure, act of, as *departure, manufacture*
-ward, direction of course, as *backward, forward, downward*
-y, full of, characterized by, as *filthy, icy, soapy*

Latin and Greek Word Roots

Following are Latin and Greek word roots which are used in English words. Word roots give the word its basic meaning, whereas prefixes or suffixes modify or change the root word. The root word is given in bold face type followed by the meaning of the root. Examples of the roots are printed in italic type. Many word roots are generally used only as prefixes or suffixes. However, as you examine the examples, you will note that many appear at the beginning, in the middle, or at the end of the English word

aero, air, as *aerodynamics, aerospace*
ag, ac, to do, as *agenda, action*
agr, agri, agro, farm, as *agriculture, agronomy*
anthropo, man, as *anthropology, anthropoid, misanthrope*
aqua, water, as *aqueous, aquatic*
arch, rule, principle, chief, as *archbishop, archenemy, anarchy*
astra, astro, star, as *astronomy, astral, astronomical*
aud, audi, audio, hearing, as *audience, audible, audiovisual*
auto, self, oneself, as *automatic, autograph*
biblio, bib, book, as *bibliophile, Bible*
bio, life, as *biology, biosphere*
cad, cas, fall, as *cadence, cascade, casual*
cant, sing, as *cantata, chant*
cap, cep, take, as *captive, accept*
capit, head, as *capital, capitate*
cat, cath, down, through, as *cataract, catheter*
ced, cess, go, yield, as *procedure, cession, antecedent*
cide, cis, kill, cut, as *suicide, excise, incision*
clud, clus, close, as *include, inclusion, preclude*
cred, believe, as *creditor, creditable, creed*
dec, ten, as *decimal*
dem, people, as *democracy, demagogue*
dent, tooth, as *indent, dental*
derm, skin, as *dermatology, taxidermist*
dic, dict, say, speak, as *diction, dictate, predicate*
duc, lead, as *induce, ductile*
equ, equal, as *equivalent, equitable, equality*
fac, fec, make, do, as *manufacture, infection*
fring, break as *infringement*
fract break as *fracture, fractious*
frater, brother, as *fraternal, fraternize*
fund, fus, pour as *refund, confuse*
gam, gamos marriage as *monogamous, bigamist, polygamous*
gen, produce as *generate, generation*
geo, earth as *geology, geometry, geography*
gastro, gast, stomach as *gastronomy, gastritis*
greg, group as *gregarious*
gress, grad walking, moving as *progress, degrade, retrograde*
gyn, woman as *gynecologist*
hemo, blood, as *hemorrhage, hemorroid*
homo, man, same as *homocide, homogeneous*
hydr, water as *dehydrate, hydralic*
idio, own, private, as *idiocy, idiosyncrasy*
iso, equal as *isothermal, isomorph*
ject, throw as *reject, project*
jud, jur, right as *judge, jury*
logy, study of as *psychology, biology*
loqu, speak as *loquacious, eloquent*
mand, order as *remand, command, demand*
manu, hand as *manuscript, manual*
mater, mother as *maternal, matricide*
meter, measure, as *thermometer, barometric*
micro, small as *microscopic, microbe*
mit, mis send as *permit, commission*
mono, mon, single, one as *monotony, monogram, monarch*
mort, death as *mortician, mortal*
nom, law as *economy, astronomy*
onym, name as *synonym, pseudonym*
pathos, feeling as *pathology, pathos*
philo, love as *philosophy, philosophical*
phobia, fear as *claustrophobia, hydrophobia*
porto, carry as *portable, export, report, transport*
pseudo, false as *pseudonym, pseudo*
psych, mind as *psychiatry, psychic, psychology*
scope, see as *telescope, microscope*
scrib, write as *inscription, description*
sec, cut as *dissect, bisect, resection*
sens, feel as *sensuous, sensitive*
sequ, follow as *sequence, inconsequent*
spec, spect, look as *specimen, inspect, spectacular*
spir, breath as *inspire, respiratory*
state, stand as *status, statutory*
ten, hold as *retention, detention*
term, end as *terminal, interminable*
typ, print as *typography, typewriter*
ven, vent, come as *prevent, convene, adventure*
vert, vers, turn as *divert, subversion, controversy*
vict, conquer as *evict, victim*
vid, vis, see as *video, visual, revise*
voc, call as *vocal, vocation*

Chapter 8

GUIDE FOR COMPOUNDING WORDS AND USE OF HYPHENS

A compound is two or more words joined together either with a hyphen or without a hyphen. Many words have become compound words through custom or usage because they are regularly used in succession [illegible] clear or precise when the words are compound word, is a mark of punctuation. Its purpose is to join the parts of a compound but also to separate the parts for better read [illegible] Webster

doubt about the compounding or hyphenation of a word, always consult your dictionary

1. General Rule. Two or more words are [illegible] understanding or readability. If the first word is principally an adjective describing the second word the words usually are not joined

real estate	martial law	machine shop
book value	marble cake	fish hawk
tail wind	sun parlor	roller bearing

2. Nouns. Many nouns are formed by two other nouns (including gerunds) and are written as one word either by repeated usage or because as one word they better express a single thought or idea.

redhead	northeast	eggplant
locksmith	raindrop	doorman
eyewitness	laughingstock	bathroom

3. Verb and Adverb Compounds. Verbs and adverbs are often joined together or with

nouns to express a literal or nonliteral figurative thought.

viewpoint	striptease	outwork
upgrade	rearmost	pushover
troublesome	pennywise	breakdown

4. Compound Personal Pronouns. Write compound personal pronouns as one word

myself	himself	ourself
yourself	herself	themselves

5. Any, Every, Some, No. When these words are combined with *body*, *thing* or *where*, they should be written as one word. When *one* is the second element, and the meaning is a single or particular person, group, or thing, write as two words. *No one* is always two words

anybody	everywhere	nowhere
anything	somebody	nothing
everyone	something	no one

Everyone came. *but*: Every one of the boys came

6. Compound Modifiers (Adjectives) When words or numerals are combined to modify a noun, they should be hyphenated when they precede the word modified. However, see the rules which follow.

long-term lease	two-time candidate
short-wave radio	reddish-brown color
2-volume set	single-engine plane

(a) Certain types of unit modifiers should not be hyphenated. A precise rule can not be given. However, in general the two modifying words are words that are regularly used together in other contexts, the first word is a modifier of the second word, and then the two words together serve to identify or describe the third word

life insurance policy	high school student
special delivery mail	civil rights law
income tax return	real estate tax
atomic energy plant	social security law

(b) Omit the hyphen in a unit modifier when it follows the word modified

The area is middle class
but: It is a middle-class area
The company is well financed
but: It is a well-financed company

(c) Omit the hyphen in a unit modifier if the first word is a comparative or superlative

lower priced stock	low-priced stock
best developed plan	well-developed plan
highest salaried group	high-salary group

(d) Descriptive words are not hyphenated when one of the words is an adverb

happily awaited event	surprisingly long time
socially accepted custom	lovely young girl

(e) If a series of two or more compounds has the same basic word and this word is omitted except as the last term, retain all the hyphens

first-, second-, and third-class mail
part- or full-time work
4-, 5-, and 6-foot lumber

(f) Omit the hyphen in foreign phrases used as modifiers.

prima facie evidence	bona fide signature
per diem payment	ex officio chairman

7. **Miscellaneous Rules**

(a) Compound words containing proper nouns and beginning with the prefixes *anti-*, *ex*, *pro*, and *un*, as well as those ending with the suffix *elect*, are hyphenated

ex-President Carter	Senator-elect Harris
pro-British	un-American

(b) Use hyphens to connect capital letters to words forming adjectives or nouns.

an A-line skirt	a V-line blouse
an S-curve	a T-square

(c) Compound numbers over twenty and less than one hundred are hyphenated

twenty-one	one hundred eighty-six
sixty-three	six hundred forty-two

(d) Two-word fractions are hyphenated only when they are used as adjectives. They are not hyphenated when functioning as nouns.

A two-thirds majority voted in favor. (an adjective)
Two thirds of the members voted in favor. (a noun)

(e) A range in numbers or in the alphabet is indicated by a hyphen.

10-31 (meaning 10 through 31)
M-S (meaning M through S)

(f) Compound nouns and adjectives with the prefix *self* are hyphenated

self-restraint (n)	self-induced (a)
self-interest (n)	self-service (a)

Chapter 9

RULES FOR WORD DIVISION

1. Avoid dividing a word at the end of a line unless necessary to maintain good margins. Do not divide the last word in a paragraph or the last word on a page

2. If it is necessary to divide, divide a word only between syllables; but even then, apply the following rules:

3. Do not separate a single letter syllable from the rest of the word

Right: emo-tion	Wrong: e-motion
Right: abu-sive	Wrong: a-busive

4. Avoid dividing a word before or after a two letter syllable.

Avoid: el-evate	Better: ele-vate
Avoid: cavi-ty	Better: cav-ity

5. Do not divide words of five or fewer letters even if the word has more than one syllable

Wrong: In-dia, Indi-a	Correct: India
Wrong: i-deal, ide-al	Correct: ideal

6. Where the final consonant is doubled before a suffix, the added consonant goes with the suffix However, if the root word ends with a double letter, divide after the double letter

Right: assess-ing	Wrong: asses-sing
Right: allot-ted	Wrong: allotted

7. Words of one syllable should never be divided. Examples: whom, mend, passed, scrubbed

Chapter 10

PUNCTUATION RULES

When you are writing, punctuation marks are signals from you to your reader. A period indicates that you have ended a sentence or that an abbreviation has been used. A comma may mean that there is a slight break in thought, indicate two separate parts of a compound sentence, or it may be used in one of several other ways.

Some sentences may be punctuated in more than one way; and, in some instances, a punctuation mark is a matter of choice by the writer. To help you punctuate expertly, the following rules and examples are given.

THE PERIOD (.)

1. Use a period at the end of a declarative or imperative sentence. (Also see Rule 5 under quotations.)

The letter arrived this morning. (declarative)
Ship our order immediately. (imperative)

2. Use a period rather than a question mark after an indirect question or courteous request.

He asked if you had received it yet. (indirect question)
Will you please ship it today. (courteous request)

3. Use a period after abbreviations, initials, and contractions. Abbreviations do not have internal spacing.

Mr. qt. P.M. etc. U.S.A.

4. At the end of a sentence, a period is sufficient for both an abbreviation and the

Send it to McDonald and Son, Inc.

Use three periods (ellipsis) to indicate the omission of words from a quotation.

people for the people." --Abra

"Get your facts first, and then you can distort them ." - Mark Twain

Note: Do not use a period at the end of a title of a book, magazine article, poem, etc. unless the title ends a sentence. In typed ma period ending a sentence and the beginning

THE QUESTION MARK (?)

Did you receive the report?
Have you shipped our order yet?

2. In a sentence containing more than one question each separate query may use a question mark.

Are you certain of the place? the time? the date?

But if a question is not complete until the final word of the sentence, the question mark should be at the end only.

Do you want to meet me at two p.m., three p.m., or four p.m.?

3. The question mark may also be used when only part of the sentence is a question, and in such sentences, the question is often introduced by a comma or colon; a semicolon or dash is sometimes used.

Please tell me, why are you going?
We must analyze the problem: Have you any suggestions?
I have explained the problem; Have you any suggestions?

Note: In typed material, leave two spaces after the question mark and the beginning of the next sentence.

THE EXCLAMATION MARK (!)

1. Use the exclamation mark after all exclamatory sentences which convey surprise, strong emotion, or deep feeling.

I can't believe you failed to complete the test!
What a lovely thing to do!

2. Use the exclamation mark after interjections or after statements which emphasize commands or which suggest immediate action.

Please! Ship our order immediately.
Act now! Don't wait!

3. Use the exclamation mark after an interrogative sentence that is intended to be exclamatory.

Oh no, how can you tell him that!
Isn't she too young to understand!

4. The exclamation mark is also used to add emphasis.

Your deadline is midnight!
This is your last chance!

Note: In typed material, use two spaces after an exclamation mark and before the beginning of the next sentence.

THE COMMA (,)

1. When a dependent clause precedes the main clause, use the comma to separate the introductory clause. However, the comma is usually unnecessary when the dependent clause does not begin the sentence.

When he completed his assignment, he went to see the dean. (comma)
The chairman asked for the voting to begin after everyone was in the room. (no comma)

2. Use the comma after an absolute phrase or a participial phrase at the beginning of a sentence.

The snow storm having begun, we decided to stay at home.
Having completed the test in less than an hour, she left the room.

3. Use the comma after an introductory infinitive phrase. But do not separate the subject from the rest of the sentence when it is an infinitive.

To be helpful, you must know when to offer help.
To be helpful was her wish.

4. Use the comma to set off parenthetical elements in a sentence, such as words, phrases, clauses, or expressions. (Also see Rule 1 under parenthesis and Rule 1 under the dash.)

(a) Transitional words should be followed by commas (*besides, consequently, however, moreover, therefore*).

However, I did not feel it was necessary.

Phrases, such as *in short, as a result, of course*, or *so to speak*, should be set off by commas.

As I wrote before, there is, of course, a way out.
As a result, our losses will be less than expected.

Use the comma to set off clauses (*I think, he says, we suppose*).

The president, I think, will be concerned.

Expressions should be set off by commas when the logical progression of words is interrupted (*so far as she is concerned*, and *I respect his view*).

The chairman did not object, and I respect his view, to staggering vacation time over a two-month period.

5. Introductory expressions are set off by commas (*indeed, yes, surely*, meaning *yes, well*).

Yes, I am going to attend.
Well, I would not have accepted the report.

6. A nonrestrictive clause is set off by a comma because it gives added information about the word it modifies but it is not needed to complete sentence meaning.

A restrictive clause is needed to complete the meaning of a sentence, and, therefore, is never set off by commas.

The new manager, who is thirty-three, certainly is doing a good job. (The non-restrictive clause *who is thirty-three* gives added information but is not needed to complete the meaning of the sentence.)

The new manager who came from sales is now in charge. (The restrictive clause *who came from sales* is necessary to identify the word *manager*. Therefore, no commas are used.)

7. Use a comma to separate a word in opposition that defines or identifies another word with a noun.

Mary, my secretary, is very efficient.
My secretary, Mary, is very efficient.

8. Use a comma to separate words that indicate direct address.

Scott, please read the enclosed report.

9. Use a comma to separate a series of words, phrases, or clauses.

The recipe calls for, eggs, cream, and sugar.
She ran down the street, into a driveway, back to the curb, and sat down crying.
If we accept the proposal, it means that: (1) we will have three weeks vacation, (2) we will be paid for overtime, (3) we will have maternity leave.

10. Use the comma to separate coordinate adjectives which modify the same noun if the word *and* can be substituted for the comma.

The new, efficient machine will increase our production. (The new *and* efficient machine.)
The present operating plan will be changed. (No comma. You would not say present *and* operating.)

11. Use a comma before the conjunctions *and, but, for, or, nor,* and *yet* when they join the independent clauses of a compound sentence.

I sent the letter as you requested, and we should have a reply soon.
She asked for him on the telephone, but no one was there by that name.

(a) The comma may be omitted between most short clauses and between some long clauses when the meaning is clear.

He searched but did not find the report.

(b) When the comma is used without a coordinate conjunction between two independent clauses it is called the *comma fault*.

The children going to school do not cross at the intersection, they repeatedly jay-walk. (Incorrect -- a coordinate conjunction should be used after the comma.)

To eliminate the comma fault, the sentence may be punctuated in any one of the three following ways:

The children going to school do not cross at the intersection, and they repeatedly jay-walk. (using a coordinate conjunction)
The children going to school do not cross at the intersection; they repeatedly jay-walk. (using a semicolon)
The children going to school do not cross at the intersection. They repeatedly jay-walk. (using two simple sentences)

Use a semicolon before the coordinate conjunction when the independent clauses of a compound sentence are very long or contain internal punctuation.

The children going to school do not cross at the intersection; and, as a result, they repeatedly jay-walk.

12. Use the comma to separate words or phrases that express contrast.

The supervisor, not the foreman, offered to help.

13. Use the comma to set off a month, year or definite place.

He was born December 3, 1954, at 1612 Fardale Road, Jenkintown, Pennsylvania.

14. Use the comma to set off a direct short quotation. (See rule 4 under Quotations.)

The employer asked, "Where do you expect to be in the next five years?"

15. Use the comma to separate a declarative clause and an interrogative clause which follows it.

Terry will receive the award, will she not?

16. Use the comma to set off a sentence element when it is out of its natural order or when it separates inverted names, or phrases.

That she could accept the suggestion, none of us seriously doubted.
Buckley, William S.
Like you, I feel the time is not right.

17. Use a comma to indicate the omission of a word.

Mark is extremely sensitive to the feelings of others, Scott, totally indifferent. (The word *is* has been omitted.)

18. Use the comma to separate a proper name from an academic degree or honorary title. Also use a comma between two or more degrees or titles.

Mary Jones, B.S.N., M.S., F.A.A.N., Director of Nursing

19. Use a comma to separate the thousands in figures of four digits or more.

1,200 22,200 5,000,000

20. Use a comma to separate two sets of figures or two identical words.

Bring me 5, No. 1040, and 10, No. 1140.
Where he is, is not known.

Note: In typed material, use one space after a comma.

THE SEMICOLON (;)

The semicolon (;) indicates a more complete separation between sentence elements than does the comma. Overuse of the semicolon should be avoided.

1. Use the semicolon to separate independent coordinate clauses that are related in meaning when no coordinate conjunction is used. (Rule 11 under Comma.)

The staff members desired a change in direction; they were eager to offer suggestions.

2. Use the semicolon between coordinate clauses of a compound sentence when they are united by transitional words.

The freeholders approved the building plans; as a result, construction will resume next spring.

Commonly used transitional words:

accordingly	furthermore	nevertheless
as a result	however	otherwise
besides	in addition	that is
consequently	indeed	therefore
finally	in fact	thus
for example	moreover	yet
for this reason	namely	

3. Use the semicolon before a coordinate conjunction (*and, but, for, or, nor*) to separate two independent clauses with internal punctuation. (Rule 11 under Commas.)

The meeting, which ran overtime, was boring; but some decisions were made in spite of weak presentations.

4. Use the semicolon before words such as *for example, for instance, namely,* or *that is* which introduce an example, enumeration, or items in a series.

The committee was represented by four officers; namely, the president, vice-president, secretary, and treasurer

5. Use the semicolon in clarifying listings where a comma is insufficient to separate the items clearly.

Committee members who attended were James Farley, president; Timothy Sullivan, vice-president; and Jean Shelley, secretary.

Note: In typed material use one space after a semi-colon.

THE COLON (:)

1. Use the colon before a list of items or enumerations.

See if we have the following merchandise in stock: No. 42, No. 63, and No. 67.

My itinerary included: going on a bus trip, visiting several museums, and shopping for jewelery.

(a) When the list of items is in a column, capitalize the first letter.

You must hire someone who has technical skills in the following areas:
1. Computer programming
2. Audio/Video camera
3. Software production

(b) When the items are presented in a sentence it is not necessary to capitalize the first letter

You must hire someone who has technical skills in the following areas: computer programming, audio/visual camera, and software production.

2. Use the colon before an appositive phrase

The jury rules were simply stated: no radio, no television, no visitors.

3. Use the colon following the salutation of a business letter.

Dear Mr. Greene: Gentlemen:

Do not use a semicolon after a salutation However, a comma may be used after the salutation of an informal letter

Dear Kathy, Dear Mother,

4. Use the colon to divide the parts of formulas, numbers, references, or titles

The conferences will begin at 10:30 [illegible]

The pastor quoted from Chapter VI: Page [illegible]

PARENTHESES ( )

1. Use parentheses to separate words, [illegible]

material that explains, translates or comments. (Rule 4 under commas. Rule 1 under the dash.)

She swam 1500 meters (somewhat less than a mile)

He stated, "E pluribus unum." (One out of many.)

2. Use parentheses to enclose letters, numbers, or symbols when referring to an appositive

We made reservations for fifteen (15) days.

(a) Use parentheses with other punctuation marks. If the punctuation mark is connected to the entire sentence and not just to the parenthetical part, the punctuation mark follows the second parenthesis

They carefully analyzed and evaluated the standards (legal and moral), but could not reach a decision.

(b) The punctuation mark should be placed within the second parenthesis if it applies only to material concerning the parenthetical section.

You may save a life by giving first-aid to someone who is choking. (See the back cover of this pamphlet.)

THE DASH (—)

The dash should be used to indicate a sudden change of ideas, but should be used sparingly. The dash may be used for emphasis or for visual effect.

1. Use the dash to indicate an abrupt change of thought in a sentence or strong parenthetical expressions

She feels — how can I say that? — like an outcast

I was annoyed — no, shocked to be more specific — by his behavior

2. Use the dash to set off a summary or an afterthought that is added to a sentence

The educational team will make an evaluation and draw up a plan — in fact, they will provide a complete special program for the child

3. Use the dash to emphasize a word or phrase that is repeated

The president stated that we had one week — one week only — to make a decision

4. Use a dash to mark limits between dates, numbers, places, and times

The admissions office is open 9:00 — 4:30 daily

Read pages 22–40

THE QUOTATION MARK (" ")

1. Use quotation marks to enclose all direct quotations

"Yes," she said, "I did help to raise funds."

The teacher asked, "Did I give you the date for the test?"

Rules governing the use of quotation marks: Capitalize the first word of a direct quotation. The first word in the second section of an interrupted quotation is not capitalized unless it begins a new sentence. Quotation marks or capital letters are not used in an indirect quotation.

The teacher asked if she gave you the date for the test.

2. Use quotation marks to enclose the chapters of a book, names of songs, titles of magazine articles or poems, and other similar titles. In typing or writing, underline titles of books, magazines, operas, and any other work long enough to appear in book form. Underlining of titles signifies italics for printing.

The National Geographic includes a section called "Members Forum."

"The Owl and the Pussy Cat" is a child's favorite poem.

3. Use quotation marks to set off words, phrases, or sentences referred to within a sentence or to emphasize a word. (Italics may also be used in such cases.)

The sentence "you can't take it with you" has deep meaning for some people.

The word "judgement" is often misspelled.

What was the real "meaning" of his asking?

4. Use quotation marks at the beginning of each paragraph if several paragraphs are quoted, and at the end of the last paragraph. Very long quotations are frequently introduced by a colon instead of a comma. (Rule 14 under commas.) Usually indent quotations of three or more lines from the body.

5. Using quotation marks with other punctuation:

(a) Place a period or comma before ending quotation marks.

She said, "No one is home."

"No one is home," she said.

(b) Place the question mark before quotation marks when they refer to the quoted content, or after when they refer to the complete sentence.

He said, "Why do you want to see her"?

Did he say, "Why do you want to see her?"

(c) Place the semicolon and colon after ending quotation marks unless they are part of the quoted material.

He said, "You are to be our next president"; therefore, I hope you will consider me for your present job.

Chapter 11

RULES OF CAPITALIZATION

1. Capitalize the first word of a sentence.

Your order has been shipped.

2. Capitalize the first word of a line of poetry.

"Poems are made by fools like me

3. Capitalize the first word of a direct quotation.

He asked, "Where are the parts?"

4. Capitalize *proper nouns* (names of specific persons, places, or things)

New York City	Henry Jones	Wall Street
Lake Michigan	Brazil	Holiday Inn

5. Capitalize *proper adjectives* (adjectives formed from proper nouns)

American	Spanish	Southern
Communistic	Chinese	Russian

6. Capitalize names of *specific organizations* or *institutions*.

Northwestern University	Republican Party
American Red Cross	Ford Motor Company

7. Capitalize *days of the week, months of the year, holidays*, and *days of special observance*

Sunday	August	Yom Kippur
Mother's Day	Easter	Christmas
Feast of the Passover		St. Valentines Day

8. Capitalize *names of the seasons* only if they are personified.

Personified	*Season*
Springs warm touch	spring breezes
Winter's icy breath	winter's snow

9. Always capitalize *languages* but not other school subjects unless they are names of specific courses.

English	Chemistry 101	but chemistry
French	Economics 102	economics
Spanish	Composition 200	composition

10. Capitalize *races, religions*, and *ethnic groups*

Negro	Catholic	Moslem
Eurasian	Presbyterian	Japanese

11. Capitalize references to the *Diety* and to the *titles of holy books*.

God, the Father	the Trinity	the Koran
Supreme Being	Genesis	Talmud

12. Capitalize *titles of people* when they are followed by a name.

President Henderson	Senator Hutchins
Cardinal Wilson	Professor Stark
Doctor Allison	Reverend Harmon

13. Capitalize sections of a *country*, but do not capitalize directions

Sections	*Directions*
the Midwest	I traveled west.
the Near East	The sun rose in the east
the South	They went south

14. Capitalize titles of *works of literature, art*, and *music*. However, in such titles do not capitalize short prepositions, articles, and conjunctions unless they are the first word

War and Peace	Battle Hymn of the Republic
The Angelus	Beethoven's Fifth Symphony
Book of Job	The Last of the Mohicans

15. Capitalize *names of governmental bodies* and *departments*.

President's Cabinet	Civil Service Commission
Supreme Court	Bureau of the Census
United States Senate	the Federal Government

16. Capitalize *words which show family relationships* when they are used with a person's name or when they stand unmodified as a substitute for a person's name.

Aunt Alice	my aunt
Grandfather Scott	his grandfather

I sent a package to Mother. (but: My mother will be there.)

17. Capitalize names of *definite regions, localities*, and *political divisions*

the Orient	Fourth Precinct
the Artic Circle	First Ward (of a city)
French Republic	Bergen County

18. Capitalize names of *historical events, historical periods* and *historical documents*.

the Middle Ages	Magna Carta
World War II	the Crusades
Bill of Rights	Third Amendment

19. The names of separate departments of a business may be written with either capital or small letters. Business titles such as president, office manager, superintendent, etc. may be written either way.

The Company will pay your expenses
(or company)
Our President will see you June 6
(or president)
Research Department *or* research department

20. The pronoun *I* should always be capitalized.

It is I who will go.

Chapter 12

POST OFFICE INFORMATION

Air Mail. The post office now moves all first-class mail within distant cities in the United States by air. Do not waste money by sending letters within the United States via airmail. However, much time can be saved by sending letters and packages to foreign countries (including Canada and Mexico) by air. To overseas countries, regular mail by sea may take one to three months for delivery. By airmail, delivery will usually take place in one to three weeks. If time is important, it may pay to send even some bulky materials by airmail. Air freight companies or export brokers can give you information about shipping materials and supplies by air [illegible]

Bulk Rate [illegible]

Bulk Mail: If your company, club, etc. makes simultaneous mailings of fifty or more items with any frequency, you can secure a bulk mail permit. Items that carry a permit or are meter stamped and presorted by postal zones may be mailed at a special reduced rate. Larger mailings receive still lower rates. Since rates change from time to time, check with your postoffice for specific rates and requirements.

Business Reply Permits. If your company is making large mailings to secure orders or to seek a reply, you generally can increase response by paying the return postage. Rather than apply postage to each return envelope or card (which is costly since many envelopes will not be returned), businesses or individuals can secure business reply permits by paying an annual fee. The envelopes must carry certain insignia and facing identification marks (series of horizontal and vertical bars) printed from negatives that are available free at the post office. Upon return of envelopes or cards the regular postage is paid plus an extra fee which almost doubles the total postage. However, postage is paid only for items actually returned.

C.O.D. Mail. First-, third-, and fourth-class mail may be sent *collect on delivery*. The post office carrier collects the amount due from the receiver at the time of delivery. The sender must prepay the postage and a collection fee. However, the mailer may include the charges in the amount to be collected from the addressee.

Insurance is included in the fee, and a return receipt may be requested. The addressee (receiver) is not allowed to inspect the contents before paying for the item.

Certified Mail. First-class mailings in the U.S. of items having no insurance value but for which assured delivery is desired may be sent *certified mail*. Delivery may be restricted to the addressee (only the addressee may sign for it) by writing the words *Restricted Delivery* above the address. A return receipt showing the addressee's signature and date of delivery may also be requested. There is an extra fee for these services.

Electronic-mail System. The U.S. Post Office provides a system whereby businesses may send communications through government computers. E-COM (Electronic-Computer Originated Mail) accepts material up to two pages in length for mailing to multiple addresses. Messages are routed to an E-Com [illegible] the next scheduled delivery. There is an annual subscriber fee plus a per page charge. A somewhat similar service is available through Western Union where the same letter can be sent to multiple addressees with next day delivery by mail.

Express Mail. Any item from a letter to a [illegible] listed before 5:00 p.m. with delivery guaranteed by 3:00 p.m. the next day (except Sunday). [illegible] a post office, the addressee may pick up the item at any time after 10:00 a.m. Postage is determined by weight and distance, and the cost is relatively high. However, the post [illegible] made later than promised. Special labels and envelopes for this service are available at your post office. Private air-express companies also offer the same service.

First-class mail: Letters, bills, checks, receipts, orders, etc. as well as post cards must be mailed first-class mail. Postage on the first ounce is the price of a regular first-class stamp with slightly lower rates for additional ounces. Inter-city mail of any distance is sent by air without extra charge. The weight limit is 70 pounds with a size limitation from 2 by 4 inches to a maximum of 100 inches in combined length and girth (the measurement around the package).

Stamp all large envelopes and packages *first-class* so that post office employees will not mistake them as being third-class. First-class mail, such as letters, may be included in second-, third-, or fourth-class mail provided you note on the outside of the package *letter enclosed*, etc. and affix the additional first-class postage to the package. Or you may attach a stamped envelope containing a letter, etc. to the outside of the package. Any item weighing more than 12 ounces is classified as *priority mail*, described later in this section.

Fourth-class Mail (Parcel Post). Items weighing 16 ounces or more and not shipped first-, second-, or third-class mail are designated *Parcel Post*. Postage is based on weight and distance. Weight cannot exceed 70 pounds and size cannot exceed 108 inches of combined length and girth (distance around the package).

Special delivery is available for fourth-class mail. However, sending a package by priority mail (first-class mail) is oftentimes better and less costly than fourth-class, special delivery.

Special fourth-class rates are available for books, educational materials, manuscripts, catalogs, films, records, etc. Check with your post office for details.

General Delivery. For persons not permanently located in a city, mail may be sent to the destination post office to that person's name. Write *General Delivery* above the person's name and then the post office (or a specific branch) address (city, state, and zip code). The person addressed will have to call at the post office and provide identification [illegible]

Insured Mail. Insured mail is available for only third- and fourth class mail. In the event of loss, the post office will pay only the cost [illegible]

International Mail. First-class mail, air mail, and parcel post service are available to other countries. However, the rates and mailing rules vary from country to country. Check with your post office for the specific rates. [illegible]

A copy of *International Postage Rates and Fees* may also be secured from the U.S. Postal Service without charge.

Metered Mail: Small businesses may buy or rent manual meters. However, larger businesses usually have electically powered meter machines that automatically feed, seal, meter-stamp, and count the mail. The sealed meter box is taken to the post office to replenish the postage.

Money Order: A *postal money order* for up to $500 may be purchased or cashed at any U.S. post office.

National Zip Code Directory: A large directory listing zip codes by state, city, and street may be secured at any post office for a nominal fee.

Parcel Post: See fourth-class mail.

Post Cards: Cards ranging in size from 3½ by 5 inches to 4¼ by 6 inches may be mailed at rates lower than first-class envelope mail. A post card carrying first-class prepaid postage may be purchased at your local post office.

Post Office Box: Boxes or bins may be rented at any post office. A box enables a business or individual to pick up mail at anytime that post office lobbies are open. Many larger businesses may rent several boxes so that their mail is automatically presorted by box number (such as for payments, new orders, sales reports, etc.).

Priority Mail (Air Parcel Post): All first-class mail weighing from 13 ounces to 70 pounds is classified as *Priority Mail*. Priority mail receives air service the same as other first-class mail.

Registered Mail: First-class mail that is registered is kept locked and separate from other mail. It is the safest way for mailing valuable documents or other papers that are uninsurable. All items that are irreplaceable or difficult to replace should be registered (such as money, stock certificates, manuscripts, signed documents, jewelry of unusual value, etc.).

At the time of mailing, the sender receives a numbered receipt and the post office maintains a record of the number. As proof of delivery a return receipt may be requested.

In addition, to first-class postage and return receipt fee, the sender must pay a registration fee based on the declared value (up to $[illegible]) of the item.

Second-class Mail: This mail class provides special rates for publishers who have permit to mail magazines or newspapers, for publications of certain non-profit organizations or for individuals mailing complete publications. The wrapper must be marked *second-class* and no other communication ma[illegible]

be included without mailing all the items subject to first-class postage.

Special Delivery. A special delivery fee must be paid for all classes of mail. For this fee, in addition to regular postage, delivery is assured immediately after arrival at the destination post office.

Third-class Mail: This class mail may be used for individual or bulk mailings of advertising material such as booklets, circulars, and catalogs, and for merchandise, seeds, bulbs, and plants that weigh less than 16 ounces apiece. Items weighing more than 16 ounces are classified as fourth-class (parcel post). Third-class mail must be left unsealed for postal inspection, or if sealed, marked *bulk mail* or *third-class mail*. It must not include written messages or directions on the outside. Check with your post office for the specific requirements for the type of item you are mailing.

Chapter 13

TIME CHANGE

Business today in many industries is done on a worldwide basis. Government and military personnel, too, often must communicate with others in many foreign countries. There is often a need, then, for knowing the time in other locations or other travel itineraries. The listings on the pages which follow will enable you to quickly determine the time in other locations.

In the listing, if all of a country is in one time zone, only the name of the country is given. Where there is more than one zone, the principal cities of the country are given with their time zone.

The *Eastern Standard Time* Zone in the United States is used as a base. If you are in that zone, you only need to add or subtract the number of hours indicated after the name of the country or city whose time you are determining.

For example, if you are in New York or New Jersey or any other Eastern Time Zone area, and wish to know the time in Rome, Italy, look up *Italy*. You will find it has only one time zone indicated as + 6. Simply add 6 hours to your time. In other words, if it is 12 o'clock where you are, it is 6 p.m. in Rome.

If you are not in the Eastern Standard Time Zone, follow these steps:

1. In the list, find the name of the country or city *where you are* or near.
2. Reverse the sign given for your location; e.g. change a + 3 to a − 3. Then add or subtract that number from the actual time where you are.
3. Find the name of the country whose time you wish to know and add or subtract the figure you arrived at in step 2 above.

For example, if you are in San Francisco and wish to know the time in Hong Kong when your time is 2 p.m.:

1. Locate San Francisco in the list.
2. Change the − 3 to + 3 and then add that amount to your actual time. Your time 2 p.m. plus 3 = 5 p.m.
3. Look up Hong Kong which shows + 13. Add that amount to the time from step 2 above: 5 p.m. + 13 = 18 or, in other words, it would be 11 a.m. in Hong Kong when the time is 2 p.m. in San Francisco.

Note: If Daylight Savings Time is in effect in your time zone, *subtract* one hour from the result you found by following the steps above. In the example above, you would subtract one hour from 6 a.m. making it 5 a.m. You would then not want to call until after 5 p.m. San Francisco time to reach someone in Hong Kong after 8 a.m.

Chapter 14

ROMAN NUMERALS

Roman numerals are not widely used, but used often enough so you should be able to read or interpret them. Following is a table of Arabic numerals and their equivalent Roman Numerals

Table of Roman Numerals

Arabic Numeral	Roman Numeral	Arabic Numeral	Roman Numeral
			IX
	III		
			LXXX
	VII		
	VIII		
	IX		
	XII		
	XIII		DCCC
	XVI	4,000	MV
	XIX		XX

The following examples illustrate the use and meaning of Roman Numerals

1. A Roman Numeral or letter preceding *a letter of greater value* subtracts from it:

V = 5 IV = 4
L = 50 XL = 40
C = 100 XC = 90

2. A letter preceding *a letter of equal or lesser value* adds to it

V = 5 VI = 6
L = 50 LX = 60
C = 100 CXI = 111

3. You will quickly (or eventually) be able to remember and recognize smaller numbers

XVI = 16
X (10) + VI (6) = 16

XLIV = 44
XL (40) + IV (4) = 44

XCI = 91
XC (90) + I (1) = 91

For larger numbers simply examine the numbers and break it down into its elements and you will readily interpret the number. You will be able to recognize the elements or parts by applying rules 1 and 2 given above or by looking at the table of Roman Numerals.

CDXCIII = 493
CD (400) + XC (90) + III (3) = 493

DCXCIX = 699
DC (600) + XC (90) + IX (9) = 699

MDCLXXV = 1,675
M (1,000) + DC (600) + LXX (70) + V (5) = 1,675

4. A bar over a Roman Numeral multiplies it by 1,000

MV = 4,000 $\overline{V}$ = 5,000
XV = 15,000 $\overline{XX}$ = 20,000

Chapter 15

PERPETUAL CALENDAR

The use of this perpetual calendar will enable you to determine the day of the week on which any date fell or will fall during the two centuries from 1901 to 2100. To locate a date and day of the week, first locate the year in which you are interested in the list below. Following the year is a letter to tell you which calendar to use on the pages which follow. In addition, if you are planning schedules, etc. for the next year or two and do not yet have copies of those calendars, simply look up the year and the calendar letter, and you will then have a calendar for the entire year in question.

1901 **C**	1918 **C**	1935 **C**	1952 **J**	1969 **D**	1986 **D**	2003 **D**	2020 **K**	2037 **E**	2054 **E**	2071 **E**	2088 **L**
1902 **D**	1919 **D**	1936 **K**	1953 **E**	1970 **E**	1987 **E**	2004 **L**	2021 **F**	2038 **F**	2055 **F**	2072 **M**	2089 **G**

abode alt. *past* and *past part.* of ABIDE

ab·ohm (æbóum) *n.* the cgs electromagnetic unit of resistance equal to 10^{-9} ohm

a·bol·ish (əbɔ́liʃ) *v.t.* to do away with completely, put an end to (laws, customs, taxes, privileges etc.) [F. *abolir (aboliss-)*]

Derivative forms
See Part 1D.

ab·o·li·tion (æbəliʃən) *n.* the act of abolishing ‖ (esp. *hist.*) the movement against slavery **ab·o·li·tion·ism, ab·o·li·tion·ist** *ns* [F. or fr. L. *abolitio (abolitionis)*] —The movement to abolish the international slave trade and the institution of chattel slavery was largely religious. It centered in Great Britain, the U.S.A. and western Europe, between c. 1783 and 1888. Following the pioneer work of Granville Sharp, the struggle was led by the Quakers, who had outlawed slavery in Pennsylvania as early as 1675. Under the leadership of William Wilberforce they obtained, almost singlehandedly, the abolition of the slave trade in the British Empire and the U.S.A. by acts of Parliament and Congress in 1808. In England the struggle then became one for emancipation, while in the U.S.A. the act of Congress was blatantly defied. The U.S. movement, led chiefly by William Llyod Garrison, Theodore Dwight Weld, and Frederick Douglass, was obstructed by the U.S. Constitution's toleration of slavery and by the South's economic defense of it. Only after the Civil War could the 13th amendment outlawing slavery be enacted. In 1862 the U.S.A. adhered to an international agreement reached in 1842 affording the reciprocal right of search, which thereafter put an end to the slave trade

Encyclopedic entry
See Part 3.

Plural form
See Part 1C.

ab·o·ma·sum (æbəméisəm) *pl.* **ab·o·ma·sa** (æbəméisə) *n.* the fourth chamber of the stomach of a ruminant [Mod. L. fr. *ab*, from + *omasum*, bullock's tripe]
